Or for that matter in the local Toronto buy and sell newsgroup.
I'm not sure which is most relevant, but there is tor.forsale and
tor.forsale.misc If there are any responses in one of those newsgroups,
it will be local.

Or, wait for an upcoming hamfest. I don't know when they take place
in Toronto, but there must be some in the region coming up (if they
haven't already happened). The Radio Amateurs of Canada keep a list
at their website at http://www.rac.ca (and of course, the ARRL does
too, at http://www.arrl.org)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL W1AW DX Bulletin, K1XN & GoList, W1TE, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, WW5L, KJ6OW, N6UK/DL4TT, WE7K, K8YSE, Newsline, A.R.V.M., 9A6AA, 9A7K, 9M2TO, DJ4PI, DL1EK/DL7VOA & DX Newsletter, DL7MAE, EA5EYJ, F5NOD, F5NQL & UFT, FJ5DX & La Gazette du DX, G3SWH, I1JQJ & IK1ADH - 425 DX NEWS, IK1GPG, IZ1CCE, JG1OWV, JI6KVR & JA-IOTA Islands News, LU4OO, OM3JW, VA3RJ & ICPO, VK2YX, VK3DYL, VK6NU and YV4GMG for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th/May, through Sunday, 1st/June there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, A2, A3, A4, A6, A7, A9, AP, BV, BY, C6, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH3, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP5, VP6, VP8, VP8/h, VP8/o, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS. On June 9th, Fritz, N6UK/DL4TT, will be in New York and plans his next operating session at the club station 4U1UN. The band choice will depend on shortwave conditions and the status of the roof/antenna work going on at the moment. Mode will be CW. As usual, QSL

only via Box 3873, Grand Central Station New York, NY 10163 USA.

4W, DEMOCRATIC REPUBLIC OF TIMOR LESTE. Thor, 4W3DX, continues to be active on 21002 kHz after 1330z and 14002 kHz between 1300-1800z. Also, watch around 7005 kHz after 0945z. Peter, 4W3CW, has also been active at various times on 40/30/20/15/10 meters. Watch cluster spots for him.

5B, CYPRUS. Alan, G3PMR, is expected to be active as 5B4AHJ until June 22nd. QSL direct to home call.

5X, UGANDA. Christian, 5X1CW, was heard this past week on 21005 kHz around 1930z. He can sometimes be found on 14005 kHz around the same time. QSL via his home callsign F6GQK (See notes under QSL INFO AND NEWS).

7P8, LESOTHO (DXpedition Update - Also 3DA callsigns announced!). Team Leader Charles Frost, K5LBU/7P8TA, announced this past week that the "July 18-25th Lesotho 7P8 DXpedition" sponsored by the Lone Star DX Association and the Texas DX Society has added an amateur satellite mode to its planned operations. The operation will be on the AO-40 satellite. "The uplink will be U--band (70cm) uplink on U-band 435.550 to 435.800 MHz CW/LSB and S2 (2.4GHz) downlink 2401.225 - 2401.475 MHz CW/USB", Frost said. Equipment including antennas and a down converter were donated by Wayne Estes, W9AE, and a spare down converter was donated by Bruce Paige, KK5DO. The list of operators are:
Charles Frost, K5LBU/7P8TA Madison Jones W5MJ/7P8MJ
Igor Zdorov, W0IZ/7P8IZ Neil King VA7DX/7P8NK
Dave Anderson K4SV/7P8DA Tom Anderson WW5L/7P8TA
The 7P8 operation will be an all mode, all band operation. They hope to have at least one station on the air 24 hours a day. QSLs will be handled by each operator separately via their home callsigns as each will have their own 7P8 call. ADDED NOTES: Dave/K4SV and Neil/VA7DX will also be operating from Swaziland (3DA) after 7P8. Their callsigns will be 3DA0SV for Dave/K4SV and 3DA0WC for Neil/VA7DX. QSL via their home callsigns. THE COMPLETE UPDATED PRESS RELEASE will be sent to all OPDX InterNet Subscribers as an additional bulletin.

9A, CROATIA (Islands Activated). Tibor, 9A/HA3HP, plans to activate some of Croatian islands as:
June 7-11th: The Island of Ugljan (CI-134, EU-170)
June 12th : The Island of Pasman (CI-085, EU-170)
June 13th : The Island of Murter (CI-074, not IOTA)
June 14-15th: - Gubavci (CI-487, EU-170)
- Maslinjak (CI-256, EU-170)
- Prisnjak (CI-374, not IOTA)
- Prisnjak Mali (CI-488, EU-170)
- Skoljic V/M (CI-404, EU-170)
- Tegina (CI-413, not IOTA)
- Vinik V/M (CI-375, not IOTA)
- Visovac (CI-486, EU-170)

CQ0, PORTUGAL. The "Association of Radioamadores da Vila de Moscavide" (ARVM) will be active with the special callsign CQ0FY during their Field

Day (June 14-15th) to celebrate the 15th anniversary of the A.R.V.M. QSL via CT1RVM, direct or by the bureau.

DA, GERMANY (Special Event/Field Day Activity). On the first weekend of June (7th/8th), the European CW-Field Day-Contest will take place. Helmut, DL7MAE, reports that "this is one of the biggest events for German hams during the entire DX-year. Many can learn how to build up a Contest or emergency station and to learn how to set up a station for a DXpedition. Our club this year will have more antennas up then ever." The reason is, that the city of Erding (next to Munich) is celebrating its 775th anniversary with festivities and amateur radio activity. The Erding Radio Club wants to give as many DXers and Award hunters as possible the chance to work their "775 Years City of Erding" award. DX stations need to only work them on three bands to qualify for the award, while EU stations need only four bands. The award is "FREE" of charge, only postal-fee is required. Their callsign will be DA0ED/p and a QSL will be sent through the bureau for each contact automatically. Details of their QSL card and award (now rules are also in English) and much other information about their local Erding club can be found on the Web page at: http://www.ov-erding.de

EN720, UKRAINE (Special Event). Look for special event callsign, EN720K, to be active from now through July 15th to celebrate the 720th Anniversary of the Rivne City. Stations will be operated by members of Rivne DX Club: Paul/UT1KY (ex-EM1KY), Igor/UR5KCE and Taras/UR5KDX. QSL Manager is IK1GPG: Massimo Balsamo, Strada Statale 28 Nord # 7, I-12084 Mondov=EC (Cuneo), ITALY. All QSLs will be sent automatically via the Bureau.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS (IOTA Op). Look for operators Barry/G4MFW (ZS1FJ and ZL1MFW) and Phil/G3SWH to be on Mangareva Island in the Gambier Islands of French Polynesia (IOTA OC-063) and from Rurutu Island in the Austral Islands (IOTA OC-050) between July 10-22nd. The actual dates of each operation are to be decided, but they hope to be on each island for at least five days. Propagation permitting, they will be active on all bands from 40-10 meters on SSB and CW. They hope to work as many European, North American and ROTW stations as possible. Special callsigns have been applied for and will be announced as soon as they are known. The QSL route(s) will also be announced later. Donations towards the high cost of this expedition are invited and may be sent to G3SWH.

FH, MAYOTTEE. John Warburton, G4IRN, will be active as FH/G4IRN from Mayotte Island (AF-027), September 16-23rd. Activity will be on 40-10 meters mainly on CW using only 100 watts into a vertical antenna. QSL via G4IRN (QRZ.com).

HS0, THAILAND. Charles Harpole, K4VUD, is now active as HS0ZCW until June 15th. He is expected to be active on 80/160 meters, but was heard on 15 and 20 meters CW. Watch around 21025 and 14024 kHz between 1100-1500z.

IOTA NEWS.....
AF-NEW. (UPDATE FROM OPDX.611) Steve, OM3JW, spoke with Ivan/OM3CGN last week and he was told that in spite of the earthquake several days ago, everything is OK and the IOTA expedition to

Habbibas Island will be starting with one day delay (June 2nd)
as 7W4HI. Operators will be on island until June 5th. They
will be on the air a minimum of 12 hours daily, it will depend
on the local power. However, they will also have gas for 3
full days of operations. The crew consists of Ivan/OM3CGN,
Afif/7X2RO, three other 7Xs (we don't know their callsigns)
and members of the Coast guard. Steve, OM3JW, will have a
regular daily sked with OM3CGN, so he will be as a pilot
station (E-mail: om3jw@konektel.sk).

AF-019. Fabio/IT9GSF and a team of operators will activate Lampedusa
Island as IG9A during a few upcoming contests. Look for future
activity as scheduled:
CQ/RJ Worldwide DX RTTY Contest (September 27-28th) Multi-Op
CQ World Wide DX SSB Contest (October 25-26th) Multi/2
CQ World Wide DX CW Contest (November 29-30th) M/S or SOAB

AS-024. Operators Kaoru/JA3MCA, Aru/JA0KNM, Jun/JJ1EQW and Kai/JE3NJZ
will be active as homecall/JR6 from Hateruma Island, Yaeyama
Archipelago, Okinawa, June 6-9th. Activity will be on 40-2
meters SSB and CW. QSL via their home callsigns, direct or
bureau.

AS-058. Johnny, G3LIV, will be active as 9M2/G3LIV from Langkawi
Island until June 9th. Activity will be mainly on CW with
some PSK31. QSL via his home callsign.

AS-073. Tex, 9M2TO, will once again be active from Perhentian Island
from a resort, June 7-8th. Activity will be CW on 80-10 meters
including the WARC bands. He will use an IC-706 w/100w into
a G5RV antenna. QSL via JA0DMV (All QSL cards will be sent
out automatically).

AS-147. Taka/JR3TVH and Natsue/JJ3NAW will be on Rebun Island and
Rishiri Island from July 25-30th, signing homecall/8. Look
for them on 40/20/17/15/10/6 meters CW/SSB. QSL via JR3TVH
either direct or via the bureau.

EU-083. Operators Giovanni/IZ2DPX, Michele/IK2GPQ, Antonello/IK2DUW
and Lorenzo/IK5MDF, who were active this past week as IP1TIN
from Tino Island (IIA SP-002), will be active again July
26-27th. Activity will be on 40-10 meters CW/SSB/RTTY/PSK31.

EU-115. Berthold, DF5WA, who was active last week as EJ/DF5WA from
the Aran Islands (EU-006), will be active this week as EI/DF5WA
from the Irish Coast (EU-115) until June 7th. His activity
will be mainly on CW. QSL via bureau.

EU-125. Helmut, DL7VOX, is expected to be active as SP1/DL7VOX/p from
Wolin Island until June 14th. Activity will be on all HF bands
including the WARC bands. QSL via bureau.

EU-171. Alan, G0RCI, and other operators from the Grantham Amateur Radio Club will be active from Fur Island between June 2-6th as OZ/G0GRC. Activity will be on all bands CW, SSB and maybe SSTV and other modes. QSL cards are not required because all QSOs will be acknowledged within 28 days of the operators' return.

EU-174. Emil, SV8/DJ4PI/p, will be active from Thassos Island, June 5-18th. QSL 100% via his home callsign and Bureau.

OC-140. The "VK6 DX Chasers Club" will travel to Thevenard Island (Mackerel Island group) and be active for 1 week starting June 15th. The Mackerel Islands group, comprising of 10 islands, is situated 22km offshore from the town of Onslow, 1400km north of Perth, on the coast of the spectacular and ancient Pilbara region of Western Australia. The callsign for the DXpedition will be a special one, VI6TI, to commemorate the naming of the island by the French Captain Baudine who led an expedition in 1801-1804 in the ship "Casuarina". Captain Baudine named the island after the Vice Admiral and Minister 1732-1815 - Antoine John Mary France Thevenard. The 8 member team will leave Perth on Friday, June 13th and hopes to be active from the island on Sunday, June 15th, around 0700 or 0800z. Activity will be on or near the usual IOTA HF frequencies. There will also be activity on 6 meters with a 3 elment beam for this band. They will monitor 50.110 MHz. The group's previous DXpedition in November 2000 to nearby Direction Island netted 550 contacts on 6 meters with many contacts into Europe. The group is hoping for similar conditions this time around. For all the satellite enthusiasts, the group will also be bringing along a portable satellite station looking for contacts on AO-40. They will have a Yaesu FT-847 and will operate Mode U/S with a 8 element yagi on the 70cms uplink and 65cms offset dish with K5GNA AIDC 3731AA 2.4GHz down converter. The grid locator is OG77mm. The QSL Manager is VK6NE: Neil Penfold, 2 Moss Ct, Kingsley, WA 6026, Australia. All direct and bureau cards will be answered, and the group hopes to have a full color card available shortly after the trip. For more info, visit the following Web page at:
http://www.qrz.com/callsign/vi6ti
For more info about the beautiful Mackerel Islands go to the following web site at: http://www.mackerelislands.com.au

KH3, JOHNSTON ISLAND. John, KH3/KT6E, continues to be active almost daily on 20 meters SSB. Watch between 14245-14248 or around 14222 kHz between 0500-0800z.

KH9, WAKE ISLAND. "QRZ DX" reports that Kimo, KH7U, informs them that Chuck Brady, N4BQW, left Honolulu Friday, May 30th for Wake Island. He will be there for the next six weeks standing in for the island's doctor who is going on vacation. He will be joining Jake, N6XIV, who has been active on the island recently. Please keep in mind that Chuck is there to work, and he will only be able to operate when he is not doing the job

he was sent there to do. While there Chuck is going to re-position the Force 12 C3SS yagi in a better location and install an inverted L with elevated radials for 80/75/40. On 40 meters, he may be operating below 7.1 MHz, listening up for U.S. calls. He also has a modified military vertical that can cover 160/80/40 and 30 meters. He is taking two 6 meter yagis antennas - one of them is a long-yagi from M2. There will be NO 6 meter beacon. He has an Alpha 99 amp, and will use it IF he has access to 240VAC. It may take him at least a few days to get all of the antennas raised with the help of Jake and island base personnel. Chuck usually works SSB, but has been known to work some CW on his SSB frequency when asked and the pileups aren't too bad. Depending on demand, he may QSY to the CW portions of the bands, but that depends on the antenna situation. Kimo says, "I am NOT acting as a pilot station NOR am I offering to schedule QSOs for Chuck." Kimo will be in E-mail and some telephone contact with Chuck and can provide a route for some FEEDBACK to him. Constructive comments or reports on reception are welcome via Kimo's E-mail address at: kh7u@arrl.net
QSLs for KH9/N4BQW should be sent to his Wake QSL Manager, Dianna Killeen, KB6NAN. An SAE with sufficient U.S. postage; IRCs or the proverbial "green stamps" are requested. Donations are always appreciated. Direct QSLs are always preferred. DO NOT send requests for Jake, N6XIV, to KB6NAN. Follow Jake's instructions for his QSL routing. There will be NO web page nor posted logs for this operation.

KH0, MARIANA ISLANDS. Ikuko, JA5GSG, will operate from Saipan (OC-086) between June 5-11th. His callsign was not provided. Activity will be on HF and 6 meters. QSL via his home callsign.

L28, ARGENTINA (Special Prefix). Radio Club Salta, LU4OC, will be operating as L28OO from June 2-9th from Iruya. It is a little town located at the very northern part of Argentina close to the Bolivian border, and 2800 meters above sea level. Ariel, LU4OO, reports that it is very difficult to get to this town located right on the mountains. The team will operate on all HF bands, SSB, CW and the Digital Modes. QSL via LU4OC. Please visit the following Web page for more information about this operation at: http://www.qsl.net/lu4oc

NEW AWARD AVAILABLE. Kresimir, 9A7K, informs OPDX that the members of the Amateur Radio Club "Koprivnica" are issuing "The Pope John Paul II in Croatia Award" in celebration of the third visit of Pope John Paul II to Croatia. The rules for this award can be found on the following web site at: http://www.qsl.net/9a7k
The rules are translated into Croatian, English, Spanish, German and French. The Award Manager is Kresimir Juratovic, 9A7K.

NEW OFFICERS FOR 2003-2004. The Patriot DX Association (PDXA), sponsors of the DX Dinner at the New England ARRL Convention, have elected officers for the 2003-2004 year:
President - W1AAX, Harry Wilson
Vice President - W1HH, Bob Wallace
Secretary - W1FJ, Al Rousseau

Treasurer - WZ1Q, Mel Cole
Directors - W1ZT, George Johnson; W1TE, Charley Schwartz;
K1TW, Tom Walsh
The PDXA Web page is at: http://www.qsl.net/patriot_dx_club

QSL INFO AND NEWS.....
5X1CW QSLS. Tommy, WE7K, has been asked by Christian, 5X1CW, to pass along information that he only sends out QSL cards while he is at home in France once every six months. He asks for everyone's patience. His next home visit will be this summer. He does not use the bureau but accepts direct cards to his home callsign F6GQK.

Special event station CQ5AA was active over the past weekend to celebrate the 15th anniversary of ARVM (Association of Radioamadores da Vila de Moscavide). QSL via CT1RVM, direct or by the bureau.

Pascual Guardiola, EA5EYJ, informs OPDX that more QSL routes for the CQ WPX CW 2003 Contest are now available at:
http://www.arrakis.es/~ea5eyj/wpxcw03.htm

Terry, KJ6OW, informs OPDX that he has been doing a mail drop service for Vit, EZ8CW, for quite a while now. Starting on June 15th, he will be adding Alex, EZ8CQ, for U.S. hams ONLY to the service. The same mail requirements will apply (2 USD and a SASE) to get the card.

Gil, F5NOD, announced this past week that all FR/F6KDF/T QSLs received direct from F6KDF have now been answered. The last batch of QSLs should be in the mail or be mailed this week (for QSLs received during last month). Gil hopes everybody will have their QSO confirmed. If you didn't receive a QSL or if you need a second QSL or have a QSO problem, you can still send your request to F6KDF or direct to Gil's address (F5NOD address OK on QRZ.com).

Lutz/DL5KUA and Steve/DJ7AO were active this past weekend from Lighthouse Staberhuk on Fehmarn Island (EU-128). Visit their Web page for more information at: http://e09.de

II1D active over the past week was a special callsign for "2003 - The European Year of People with Disabilities". Activity was a demonstration of solidarity with the school for disabled boys of Giaveno (Turin) by IZ1CCE and G.RA.D. (Gruppo RadioAmatori Disabili - Italy Handi Ham). A special QSL card is available. QSL via the bureau or direct to IZ1CCE: Carlo Sobrito, Via I Maggio n. 9, I-10051 AVIGLIANA, (TO) ITALY.

Phil Whitchurch, G3SWH, reports that he is pleased to announce that all direct QSL requests for ZS1RBN received to date have been mailed.

SILENT KEY. "MR. HAMVENTION", Frank, W8OK, became a Silent Key Thursday night, May 29th. For several years, W8OK has been battling cancer. Then, just days prior to the gates opening for Hamvention 2003, Schwab suffered a heart attack. He was also dealing with pneumonia and congestive heart failure. Frank Schwab, W8OK, is credited with getting the Dayton Hamvention started 52 years ago. Also, he was involved with the founding of SWODXA and

several contest expeditions to J6DX. He will be surely missed by his many friends in the Dayton area. OPDX and its readers would like to send out our deepest sympathy to his family and friends.

VK, AUSTRALIA (Camerons Corner DX-Expedition). Several members of the Blue Mountain ARC will be "heading into the outback" on the Queens Birthday weekend starting Friday, June 6th and returning Monday, June 9th. They will be heading to the corner of New South Wales (VK2), Queensland (VK4) and South Australia (VK5). They would like to make contact with as many people as possible, so if you hear them calling "CQ-DX from Camerons Corner", you know they are smack in the middle of nowhere. Their suggested frequencies and times can be found on their Web page at:
http://www.bmarc.oz-hams.org/camerons.html
They request that "If you do make contact, can you take the time to post to our DX forum and let people know when and on what freq you heard us.."
Please post in the DX-Expedition forum on: http://www.radiocorner.net

VK9C & VK9X, COCOS KEELING AND CHRISTMAS ISLANDS (Update). Gwen Tilson, VK3DYL, informs OPDX that due to circumstances beyond their control (world conditions, flight schedule cancellations etc.), the YLs going to VK9C and VK9X later this year have had to change their itinerary. They will now operate from Christmas Island as VK9XYL, October 13-27th, and from Cocos Keeling as VK9CYL, October 27th-November 10th. VK3DYL still remains as QSL Manager - more details later.

XW, LAOS. Kamfan, XW1FAN, continues to be active on most days on 14220 or 14225 kHz between 1430-1530z.

YA, AFGHANISTAN. Masa, JG1OWV, informs OPDX that he is helping someone called Sada (a Japanese operator who is staying in Kabul for one year) to get on the air. He is now preparing some low band equipment, and he hopes Sada will get his license this month. The callsign and operation start date will be announced at a later date. Masa states, "This is not a DXpedition, but most weekends we may hear an Afghanistan signal."

YV, VENEZUELA. Operators Dario/YV4GMG, Maria/YV4GMB, Hector/YV4GMH, Jose/YV4FUE and Maria C/YV4FUF are expected to be active on June 10th. Look for them on the following bands/modes: 10/15/20/160 meters and 6 meters. Modes will be PSK31/RTTY/SSTV/CW/SSB. QSL via operator's CBA.

RNJ,

It is claimed that "Eric Rudolph" used CB Radios and Listen to the 'Voice of Real American' on Shortwave Radio during his 'Catch Me If You Can Game' with the Federallys.

So what is Pastor Peter J. Peters, Dave Frantz, William Cooper, David J. Smith, Hal Turner, Alex Jones, Rick Wiles, Prophet Stair, Clay Douglas an others saying about "Eric Rudolph" (One of the Chosen Ones) now ?

3573. Power supply for RS HTX-100 need a recommend

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-01 22:28:32 UTC
From: markwgpsu@aol.com
Message-ID: <20030601182832.13652.00000343@mb-m12.aol.com>
Source record: 66920

I'm new to this list so I apologise if this is the wrong place for this question.

I want to get my HTX100 out of mothballs and fire her up in the house.

What is a good, reliable and economical power supplty thatI could use to power this rig?

I haven't been on the air for years and thought the HT100 would be a simple rig to tune-up and go.

Thanks

Mark

Well, the 100 is just on the edge of most of the CB type supplies. On
the bad side of the edge of most, it seems.

If you can find one of the 25amp supplies that Radio Shack closed
out in the stores, that would be decent.

Otherwise, probably best to just run a small gel cell with a charger on
it.

Mike

And now for something completely different.....

"In retrospect, lighting the match was my big mistake.
But I was only trying to retrieve the Gerbil," Eric Tomaszewski
told bemused doctors in the Severe Burns Unit of Salt Lake
City Hospital. Tomaszewski and his homosexual partner
Andrew (Kiki) Farnom, had been admitted for emergency
treatment after a felching session had gone *seriously wrong*.

"I pushed a cardboard tube up his rectum and slipped
Raggot, our pet gerbil, in." he explained. "As usual,
Kiki shouted out 'Armageddon,' my cue that he'd
had enough. I tried to retrieve Raggot but he wouldn't
come out again, so I peered into the tube and
struck a match, thinking that the light might attract him."

"At a hushed press conference, a hospital spokesman
described what happened next. "The match ignited
a pocket of intestinal gas and a flame shot out of the
tubing, igniting Mr. Tomaszewski's hair and severely
burning his face. It also set fire to the gerbil's fur
and whiskers which in turn ignited a larger pocket
of gas further up the intestine, propelling the
small, cute, furry brown rodent out like a
Civil War cannonball, striking Tomaszewski, and
then ricocheting across the room to the far
wall with a splat."

Tomaszewski suffered second-degree burns and a
broken nose from the impact of the gerbil,
while Farnom suffered first and second
degree burns to his anus and lower intestinal tract."

And now, back to more Internet True Stories of love and lust....

3584. DR 119 ALINCO MOD

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-02 16:42:49 UTC
From: elie.chambeurlant@cp.finances.gouv.fr
Message-ID: <d736ce54.0306020842.62c57e0d@posting.google.com>
Source record: 66931

HELLO OLD MEN

I MADE A MOD TO MY TRANSCEIVER DR119 E ALINCO TO RECEIVE OTHER BANDS.

AS IT WAS EXPLAINED, I CUT THE BLUE WIRE NEAR THE VFO BUTTON.

NOW, I RECEIVE THE VHF BAND FROM 130 TO 178 MHZ

BUT I HAVE NO ACCESS IN RECEPTION OF COURSE TO THE 300-400 AND TO THE
800-900 MHZ BAND

IS IT BECAUSE MY DR 119 IS NOT A DR 119 T BUT A DR 119 E FOR THE
EUROPEAN COUNTRIES ?

What can I do to have the same bands ?

THANKS IN ADVANCE FOR YOUR ANSWER

F5MTH

Maybe if you restricted your FA/FS to the appropriate groups you
wouldn't annoy so many people.

There are plenty of forsale, swap, marketplace, groups in the radio
groups where your listings would be appropriate and appreciated.

Dave

NOT one on the anonymous complainers.

This is the RE2000 Alpha scanner made by RELM. Same as the popular RELM HS200 scanner, but these will do Alpha tagging, and are PC programmable. Mint condition, in box with manual, accessories. Also includes custom soft-leather case, programming software, and cable.

$200.00 shipped via UPS ground, insured.

I will accept PAYPAL, Postal money order, bank / cashier's check, or personal check. (Personal check will delay shipping until it clears).

eBay feedback under OFFDAN.

E-mail if interested.

Dan dconti@nj.rr.com

3593. ALINCO DJ-X3 "E" Receiver My ISP calls this spamming. Sheesh, I'm only selling some "stuff"

Newsgroup: rec.radio.amateur.misc

I am selling the newly released ALINCO DJ-X3 "E" version wide band
communications receiver. This is the European version offering uncut
coverage from 0.1 MHz - 1300 MHz. This radio is brand new in the box,
never
used, plastic still on display. This little gem offers many features too
numerous to mention here. You can check my eBay feedback under OFFDAN, and
I can also supply photos of the radio, or answer any questions you may have
regarding the radio VIA E-MAIL!

$250.00 shipped, NO TRADES, NO C.O.D.

I will accept a US Postal Money Order , or PAYPAL.
I will also accept a check, but will wait until it clears before shipping.

Again, if you are interested, or have questions, e-mail me and I will be
happy to respond.

Dan dconti@nj.rr.com

I have an absolute MINT Uniden 210 XL base, programmable scanner for sale. This scanner does not have a mark, scratch or scuff on it, works perfectly. Excellent for a scanner collector or someone looking for the quality afforded in these older base units.

I have no idea what it is worth, so I will entertain serious, reasonable offers, and ask for an extra 10 bucks to ship it via US Postal, Priority mail.

I will accept a US Postal money order or PAYPAL only. If you must, a personal check is OK, but shipping will be delayed until the check clears. NO C.O.D.

ebAy feedback under OFFDAN. NO TRADES.

E-mail if interested, or with your offer.

I will try this one more time, reduce the price for the package, and then
it's off to eBay if NO takers...

I am selling my YAESU FT-50 dual band (440 - 2M) hand held radio. The
radio
is in Excellent condition. Non-smoker. This radio has been modified for
out of band TX. Package also includes the rubber "gasket case", NC-50
rapid
drop in charger, FBA-15 AA battery case, FNB-41 600 mAh battery, MAHA
FNB-V47 1800 mAh battery, and MAHA FNB-40 650 mAh thin battery. All
batteries and the AA case have the optional SPRING belt clip. Also
includes
the ADMS-1E programming software and cable for the FT-50.

I am asking $260.00 for the package, shipped via USPS Priority Mail,
insured.

I can accept PAYPAL, a US Postal money order, or check. Personal check
will
delay shipping until it clears.

You can check my eBay feedback under OFFDAN.

E-mail if interested.

3619. BAD GUY ALERT! - Steven A. Giron AD6GO

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-03 00:43:28 UTC
From: NoSpamDanConti@RoadRunnah.com
Message-ID: <3ATNY6XC37775.1128356481@Gilgamesh-frog.org>
Source record: 66816
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,alt.radio.pirate

Be advised that Steven A. Giron, AD6GO, and EXTRA class radio amateur, (so much for the integrity of this hobby), entered into an agreement with me to sell some radio equipment for an agreed price. I promptly sent him a PAYPAL
payment.

Since that time, he has not responded to the receipt of the money, nor has he answered my numerous e-mail inquiries on this matter. Of course, to date
the equipment has not been received.

Steve is listed as residing at 11609 Nova Street, Santa Fe Springs, CA 90670. He did not provide a telephone number, nor is there one listed for him.

I will take the necessary steps with PAYPAL in an attempt to retrieve my money, but this is not gauranteed.

I have been buying and selling on the groups and eBay for many years, and am
usually very cautious, and to date, after hundreds of transactions, have never been burned - until now.
I dealt with Steve in the past, and he was fine. Also, I always thought that being an EXTRA class ham included some integrity as well. I guess not.
Additionally, his eBay feedback is good except for two neutral ratings relative to his lack of communication. So much for eBay feedback.

This is a warning NOT to deal with Steve. If anyone knows Steve, or can contact him on my behalf, I would like to speak with him on this matter.

Dan dconti@nj.rr.com

3620. Motorola Leather cases for GP68 radios My ISP calls this spamming. Sheesh, I'm only selling some "stuff"

OK - for what it's worth, how do you know he's not on vacation? Inconsiderate, sure, if he has an auction going, but who knows? Maybe he's in the hospital, out of town on work (I've had that problem before), going through a divorce, moving, dead, etc etc etc.

If his feedback rating's generally good, be patient. It'll probably work out ok.

<a lot snipped out>

First of all, if you dealt with him before and he was ok, maybe he is ill or in hospital! Ebay ratings aren't the final word in one's honesty. I wish I had a dime for everyone suckered into that false sense of security.

As to the "integrity" of the hobby of amateur radio due to a bad deal. It is disgusting to me that some one would look upon every one involved in a "group" for the actions of one - regardless of who they may be...(not implicating the one this thread originally alleged to have committed an offense). ALL GROUPS have their share of bad apples. Ham Radio is not as it once was. It isn't the "fraternity". Times have changed for ALL. When an exam is administered for a license, we examiners - do NOT give them Psychological or Lie Detector Tests, nor do we look into a crystal ball to see if they shalt steal. In short, the Ham Hobby has little to do with one's honesty. No more than a "CBer", "Scanner Enthusiast", "Motorcylce Rider" or one of a multitude of other hobbies. WE don't know they're the future thieves of America, whoever they may be. So tell me, what group do you come from, to assume such about ALL Hams, especially those of Extra Class, of which I am proudly one of??????? Is YOUR "group" sin and error free?????

I think you need to lighten up on the ratings you're using - especially with the broad paint brush. Perhaps give the guy with an otherwise spotless record according to your own statements - another opportunity to make good. Try contacting him via phone or snail mail. Maybe his ISP or perhaps his own computer crashed! LOTS of possibilities.... If all else fails, contact the Police department in YOUR area, to file a charge to the police in HIS area to get a file started. Maybe they can shake him loose IF he is willfully trying to hide. L.

gotta think about this for a while, there is a problem getting on here and telling a bunch of stuff on someone that it has been less than 60 days from the date you last contacted him, and you can also take it to small claims court and get a lean on his income and stuff.
right now i know of two people, i should say i read on a web site where two people are suing others for doing this very thing, and they are suing for slander and ... i cant remember exactly what the other was, but from what i have found out from asking the local law enforcement, slander can carry some , shall we say, long term effects, like he can sue you for millions, so i agree with the last guy, give it some time, and call the local police in his area, and have them do a welfare check on him, you might just save his life......

my two cents....

73's!
Ken.

Apparently your efforts a month or so ago have finally paid off
in some way and the twit who complained may well have been
notified that the complaint was inappropriate... or something
to that effect.

Whatever happened, it seems to have annoyed the little twit even
more!

Get with it pal! This is a person posting as if they were Dan. Do you read
the group?

3641. Re: Most recent Dan Conti Messages are forged-Ignore them.

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-03 04:49:31 UTC
From: roy_hinkley@operamail.com
Message-ID: <3a09ca9c.0306022049.21afd23b@posting.google.com>
Source record: 66687
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc,alt.radio.scanner,alt.radio.pirate,alt.cracks,alt.2600.cracks,alt.2600.programz,alt.fan.rush-limbaugh

The flood of recent FS messages from "Dan Conti" are forgeries.

Someone is copying every FS message Dan has ever posted, and they're sending them all at once in the hopes of annoying Dan, and everyone else who uses these news groups.

Looking at the groups they're cross posted to, and the services used to post the messages, it's easy to see they share much in common with the forged Q and Stagger Lee posts of a few weeks ago.

For information about who the imposter is see:

<http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&safe=off&selm=3a09ca9c.0305150730.5cfe6388%40posting.google.com>

Just taking a wild stab here, but it seems logical that if this is a
phony "Dan Conti" than maybe, just maybe, the BAD GUY ALERT may be
phony too.

Yeah. It's Fred Hambrecht, one of the many morons in my list. He thought whining to my ISP about using foul langauge in this group would get me booted or something silly like that. It didn't work. Perhaps he's been enraged so much by this fact that he has gone off the deep end.

--
The following is a list of morons.
That's all. Just morons. Doesn't matter
what they've done or what they said,
it's all been equally moronic.

The moron list:

The top moron in any group on Usenet is Gandalf Grey - gandalfgrey@infectedmail.com - alt.current-events.clinton.whitewater (Yes Hanson. I do post your name in every one of my posts and now you're at the top)

Bush Busta / A.K.A Jim Kennemur - BushBusta@America.com - alt.current-events.clinton.whitewater (Usually giving Gandalf the reach around)
banjocat - banjocat@bellsouth.net - alt.current-events.clinton.whitewater (Fuck you and you threats)
Gary Roselles - rosell19@enetis.net - alt.current-events.clinton.whitewater (Escapee from Rapid City Regional Hospital's psychiatric unit)
Dr. Fred Hambrecht Sr - w4jle@charter.net - rec.radio.scanner (Threatened to tell my ISP cuz I was cussin' on Usenet. Didn't work. He's also Stagger Lee & "Q")
Al Patrick - arp@inet4u.com - rec.radio.shortwave (Thinks God kills people for listening to Rock & Roll. He's also a known Jew hater.)
Usenet User - pkeller@mil.edu - rec.radio.scanner
Jon Van Allen - kf7yn@qwest.net - rec.radio.scanner
MnMikew - MNMiikkeW@aol.com - rec.radio.scanner
Lou Scannon - scannon@lmountain.com - alt.current-events.clinton.whitewater

Hey Dan...this is the same identical email you posted about this guy
back in October of 2002. Over on radiocentral.org -- are you still
trying to find him?

AD6GO was on Echolink on May 31st, claiming to be from DM13 and Orange
County. Claimed a zip code of 95916. The address you left here is in
Los Angeles County. Call the LA county assessor office and find out
who owns the property. Then call the Orange Co assessor and just ask
them if they show any property in AD6GO's name and address. Then go
to the library, get a book called The Haines Criss Cross, look up his
Orange County address and call one of his neighbors, have them take
the guy a message to call you.

Oh one other thing. Steve is an active member of the CARA Catalina
Amateur Repeater Association and even has an article about eQSL's in
the December issue of their newsletter.

http://www.cara-net.us/Ragchewers/2002/rc1202.pdf

Maybe you can contact him through the club.

Sorry about the crosspost. If you respond, please leave rec.radio.cb
in it so I don't have to subscribe to all the groups. <;

You may also email me, change bomb to com.

My BP-180 battery pack has bit the dust. This fits the Pro-90,
Uniden 235 and 245. I want to rebuild the pack with Energizer
NiMH 1850 mAh batteries. Has anyone done this? Are these batteries
too big to charge in the radio? Can this brand accept solder?
I've had Nicads that can't be soldered to before. Thanks.

Scott, somewhere around Baltimore, MD.

SB QST @ ARL $ARLB038
ARLB038 New 60-meter band becomes available July 3

ZCZC AG38
QST de W1AW
ARRL Bulletin 38 ARLB038
From ARRL Headquarters
Newington CT June 3, 2003
To all radio amateurs

SB QST ARL ARLB038
ARLB038 New 60-meter band becomes available July 3

The new five-channel 60-meter domestic secondary amateur allocation becomes available to US Amateur Radio operators at midnight local time on July 3. The FCC Report and Order granting the allocation was published June 3 in the Federal Register. Federal government users are primary in the 5 MHz band.

The FCC has granted amateurs use of five 2.8 kHz-wide channels with center frequencies of 5332, 5348, 5368, 5373 and 5405 kHz. The channels will be available to General and higher class licensees. The only permitted mode will be upper-sideband USB phone, and 50 W ERP is the maximum power allowed.

Users of the 60-meter channels should set their carrier frequency 1.5 kHz lower than the channel center frequency. ARRL suggests restricting transmitted audio bandwidth to 200 Hz on the low end and 2800 Hz on the high end for a total bandwidth of 2.6 kHz. ARRL recommends that amateurs considering modifying existing amateur equipment for operation on 60 meters contact the equipment's manufacturer for advice.

I just spoke with the REAL Dan Conti.

This is not him posting. He is devastated at what has been done to him.

He is afraid to post here or anywhere else for fear that whatever he posts will be re-posted one million times on the groups. He simply now lurks.

Dan has a habit of getting on one's nerves now and again, but he is always fair, rarely curses, and interested in a good deabte and the views of others.
Also, the equipment he sells is always better then described.

If this mutant can do this to Dan, he can do it to any of us, or all of us, ad nauseum , and on and on. Someone has to do something about this guy.

Like him or hate him, Dan didn't deserve what is being done to him here.

Wilson

This -is- reprehensible. Anybody ever confirm the ID somebody made
awhile back when this guy was doing "Q" and "Stagger Lee" and
supposedly left his own e-mail address in a post? Was that accurate?
It was a ham call sign @ a service provider, but I don't know if it
was true or not.

I live in the same town as the REAL Dan, and we have the same ISP.

What bothers Dan the most about this fiasco is that he ALWAYS used to berate others for posting anonymously. Many of you know that anonymous posters would BURN his butt!

Now, he is paying the price of his honesty. He has informed me that he will be back on the groups, anonymously, with an new e-mail address, and will remain quiet for the most part.

This should please many of you. Personally, I enjoyed his comments and debates.

Wilson

The real Dan Conti has been nothing but nice to me. I think the fraud who is doing this needs to be punished in the most severe possible way. I'm hoping that someone with the right "savvy" can track this phony-Dan cretin down and alert his ISP.

Agree 100% Dan is a gentleman.

I strongly suspect the guy who
is using his name is the same whackjob
who was mass-posting in the radio
newsgroups several other names
over the past two months.

I always enjoy a good debate.. who wants mindless followers? :)

Dan, don't let this asshole get to you... just like it says in my sig. Stay out here in the open with the rest of us that are unafraid to let people know who we are, and have the convictions of our beliefs...

Take care, and stay well. :)

Not only do you have the same ISP, you both have the same IP address. Now that's impossible unless you're sharing an account.

Now I thought it was pretty screwed up what was happening, but when the so called victim, which is you, starts playing stupid games like the person that's spamming, then I can't say anyone is to blame but yourself.

No way to be too sure on that one. The email address that was posted,
w4jle@charter.net, supposedly belongs to a Dr. Fred Hambrecht Sr

Since Mr. Hambrecht hasn't come foward to claim his innocence, there's no
real way to tell if it is him or not.

Afraid not. Both Dan and Wilson's messages originate from 24.168.140.228
through Giganews. It's the same process which my ISP, Comcast uses and does
post the senders own IP address.

If they're both using a dialup, and calling the same phone number, I think they could end up with the same IP address - though not at the same time.

What was the same, is significant.

>"The Moron List" <x@x.net> wrote:
...

>> X-Newsreader: Microsoft Outlook Express 6.00.2800.1158
>> X-MimeOLE: Produced By Microsoft MimeOLE V6.00.2800.1165

This is interesting, because if it were different it would likely
mean different computers. That fact that it is the same doesn't
mean much, but does add weight to it.

>> NNTP-Posting-Host: 24.168.140.228

That is the IP address of the individual network interface that
sent the message to the news server.

>> X-Trace: twister.nyc.rr.com 1054687777 24.168.140.228 (Tue, 03 Jun 2003

There it is, repeated again. These are both inserted by the
news server and cannot be forged by the person posting the message
in an effort to hide where it came from.

Okay? Now lets look at the other message and compare appropriate
headers.

>> From: "Dan Conti" <dconti@nj.rr.com>
...
>> X-Newsreader: Microsoft Outlook Express 6.00.2800.1158
>> X-MIMEOLE: Produced By Microsoft MimeOLE V6.00.2800.1165

This person uses *exactly* the save version of Outlook Express.
Interesting, but not definitive.

>> NNTP-Posting-Host: 24.168.140.228
...
>> X-Trace: twister.nyc.rr.com 1054584209 24.168.140.228 (Mon, 02 Jun 2003

The news server says the IP packets it received came from the
exact same network interface. That *is* definitive.

The only possibilities are 1) the same computer sent both
messages, or 2) that there are two people using _dialup_ access
and just happened to hit the same modem at the ISP. We can
check that fairly easily, by simply looking at several messages
from the real "Dan Conti" to see if they are each different
(indicating a dialup modem), or all the same (indicating he has
a DSL or cable modem that always uses the same IP address).

Guess what. He's been using one and only one IP address since
March 2002 (he has upgraded his version of Outlook Express since
then, and his IP address was last changed in Feb 2002).

Here are headers from the oldest message I found with that
IP address originating from "Dan Conti".

Message-ID: <olUf8.22857$in3.5343151@typhoon.nyc.rr.com>
Date: Fri, 01 Mar 2002 23:42:12 GMT
NNTP-Posting-Host: 24.168.140.228

Here is a message one year later (and nothing in between was
any different):

Message-ID: <Oc98a.55779$ma2.16023985@twister.nyc.rr.com>
Date: Sat, 01 Mar 2003 21:01:34 GMT
NNTP-Posting-Host: 24.168.140.228

And of course three months later in June we see not just "Dan Conti"
posting from that IP address, but also "Big Wilson".

Make no mistake, it came from the same computer. Want to bet it
was the same fingers typing?

Fine, so it's Dan trying to do something to clear his name.. I'm still
positive that Dan did not post all that spam from FROG.

No one is saying he did, but to play these dopey games doesn't make him look
good in light of the circumstances.

Brenda Ann hit the nail on the head with this issue. Think about what was done to Dan, and the potential for it to continue against him. Sometimes "Dopey Games" come in response to "Dopey Games" None of it AT ALL being condoned.

I think in light of what has happened, it's best to just let this go now.

;)

I'm trying to do a favor for a local Ham, Al - NX2Q and assist him in selling his rig. he does not have access to a computer.

He has an ICOM 736 HF rig, 100 Watts on HF and 6 meters, auton antenna tuner and power supply built in, with optional CW riddi filter, and 250 Khz narrow CW filter, in original box with manuals...

He is asking $1500.00 for the radio.

Anyone interested in the deal can E-Mail me and I will put you in contact with Al where you can finalize your business. i can also assist in the transaction if necessary.

I get burned a bit as well for posting anonymously. Allow me to offer the real Dan a big "I told you so".
There is absolutely nothing wrong posting with a phony name and address, and quite the opposite, it's just good sense. What with spambots automatically harvesting email addresses, using your good address is asking for lot's of aggravation. Ask the "real" Dan Conti.

That's a point if you're limited to only one good address. I can have as
many as seven on my account. I use one good address just for usenet posts.
I figured I'd change it when my mailbox got overwhelemed with spam, but so
far I get only about one piece of junk mail a day on it. I get more from
the e-mail address I use for online shopping and e-bay and such.

Hi ALL

In 2 days time (Friday 6th June) , the team will be heading to the
corner of vk2, vk4, vk5, commonly referred to you guys as the
"Outback". All details
as to Freq's, times etc can be found on

http://www.bmarc.oz-hams.org/camerons.html

We will be operating onsite under the call of VK2HZ

in addition to the Freq's, we will be operating SSTV from the location
so we hope to send you all some PICCYs.

We also ask that SHOULD you hear us, PLEASE take the time to post in
our forum

http://www.radiocorner.net

goto the DX-Expidition forum and tell people on what freq you heard us
and at what time. Also if you receive an SSTV picture from US, how
about uploading it with your message !!!!

Thanks guys/ladies, any help would be appreciated !!!!

73's Pete..vk2yx

p.s watch our for vk2jpj-5 operating HF aprs

Whether or not it replied to a genuine post is absolutely
irrelevant.

SJ 9 was just a youngun when he was sucked in by the likes of W4FQF and his bunch. Cut him some slack.

As for FQF ... Im still waiting to see his obit so I can complete my 'project'.

NiMh batteries draw more power from their chargers as they
"refill" then NiCad batteries. It's possible your radio's chargingcircuits
burn out when charging NiMh batteries. Rebuilding a pack with
NiCads with solderlips should not be a problem.

Hope your problem is solved sone.

None of the stores have nicads anymore, only NiMh.

Neat little search tool!! I never knew it existed before!

I looked through a bunch of threads on a bunch of different groups and I noticed that there certainly are not many threads in which Fred posted, that "Q" did not also post.... Hmmm....

Either Fred really pissed somebody off... or Fred's ISP should hear about his activities.

Thanks. I'm going to cycle the new batteries a few times before I make the
pack, so the batteries can reach their full potential.

It sure would be nice if someone would design an alkaline holder
for that radio. They could just put a series diode or two to drop
the voltage and keep them from charging. Of course, the diode(s)
would go, and NiMh's put in their place. <;

If only I had some really large shrink wrap...

NiCd chargers charge until the voltage stops rising *and then falls a
small amount*. NiMH batteries don't exhibit that final dip in voltage;
their voltage plateaus. So the average NiCd charger can be expected to
grossly overcharge NiMH batteries.

(And another poster raised this concern.)

That may not be an issue in this case. I have two Uniden radios that use the BP-180 battery pack. Both are SC180B scanners that I bought on clearance from Best Buy, and neither came with the power adapter. From the operating guide that I downloaded, I know that the proper power adapter is the AD-70U power adapter, which is supposed to supply 300 mA at 12 volts DC. Since the battery pack supplies 4.8 volts DC, I suspect that there is an internal voltage regulator in the scanner that controls the voltage supplied to the battery pack as the cells charge. I believe the same circuitry exist in the other Uniden radios that use this battery pack.

I use a 9 volt DC power adapter that came from a telephone answering machine. I'm sure I scavenged it from the trash.

Does Uniden supply a NiMH battery pack intended to replace the BP-180? If so, and if Uniden does not recommend a different power adapter, I would feel safe in using NiMH cells in my SC180B. Interested listers may want to connect a voltmeter and ammeter to their scanner and see what happens as they charge up a NiMH battery pack.

Best wishes.

Hi Dan, Do you have any Ham radios, receivers or scanners for sale at the moment ? If so, perhaps you could let us know on the NG.

Cheers,

Micky

Why the hell would you post your crap for sale in groups
that have absolutly nothing to do with the topic? This
makes you worse than a crossposter. As far as I'm
concerned, you got what you deserve.

Here's your tissue. You can leave now.

Has anyone determined what resistor to replace to increase the current to
about 120 mA? There is a 27 ohm, 1 watt flameproof resistor on the board
connected to the power jack. Would replacing that help?

You're not serious, are you. Sorry, but that's not culture. I happen to live in Cleveland, Ohio- home of one of the world's finest orchestras. THAT is culture, Martha Stewart's drek is not.

Adam

Wait a minit .. I know this email address .. say it ain't soooo ! ! !

Hey I betcha we're gonna have us a
Rrrrrrrrrrooooollllllllllll ccccccaaaaalllllll ! ! ! !

Just like the good old days. I want Bro. John to give the devotional, then have a bone shaking rrrrrooollllll cccaaaalllllll that will register about 40 on the richter scale.

I need to get the Louis-Lewis Agency to notify all check-in's of this up-coming event. And get Bro. Bottle, Kind Jewish Indian and Sir Sidney on board as honorary check-ins.

Then have N9GOR check up on "where all the white women at". Maybe even have Mr. Davies check in via phone patch.

Last but not least, WB2OTK, AF2Y and Riley H. need to check in so the gang's all here.

So what is the story behind the story here? Why is the FCC assigning
"channels" to the US ARS? Is this a first?
Why not just a segment or sliver from 5332 to 5405? Why dictate USB mode
only? What about CW, RTTY, Slow Scan, etc.?

I think we can overlook the "new" ARRL's recommendations on audio passband
edges with no definition of the edges. I suppose they think we all use DSP
rock wall filters in our audio now.

The same goes for ARRL encouraging the ARS to do no tinkering without
consulting the manufacturers. A few years back, rig conversion articles to
cover 60 meters would have made for several issues of QST.

73,
Clay N4AOX

The same goes for

Well, if you can't do CW here, then it must not be a real Amateur Band.

Up to now, CW was permitted in ANY ham band.

It's been said several times already, but all those posts including the one you replied to were originally sent by Dan over a period of years.

Someone is digging them up and reposting them all at once to several groups under Dan's name to annoy us and Dan.

>Why not just a segment

I just want to know who and why anyone wanted this part of the band. And why so narrow. There is an underlieing reson somewhere. Somebody is goint to make money from this. Anybody really know???
To bad 40 meters is still screwed up. They need to look at this area instead of doing strange things with channels. Ham and commerical shortwave together is really dumb.

Clay N4AOX wrote:

> So what is the story behind the story here?

Well, here's my take...

> Why is the FCC assigning
> "channels" to the US ARS?

Mainly because:

1. NTIA didn't want us to get anything at 5 mc, but the really didn't think they should slap us too hard what with all our emergecncy comms work in the recent past, such as at WTC following Sept 11.'01 etc. So they gave us the very barest minimum that would satisfy the original reason for the request for an allocation at 5mc- just enough for us to be able to actually carry on emergency communications in that region. And they insisted on USB only simply so that the already-assinged users would be able to copy our transmissions to ID whatever hams were there. No matter that USB might be the poorest choice of mode under austere conditions.

> Is this a first?

In 100 years of ham radio, yes. (with the sole example of a discrete HF amateur frequecy for the state of Alaska for emergency communications)
If there's any other incidence of channelization ham radio I haven't seen it, and I've been active in ham radio for almost tha last of that hundred years.

>
> Why not just a segment or sliver from 5332 to 5405?

Chances are that the channels assigned correspond to channels appearing on the equipment of users already assigned to that part of the spectrum. That would make it easy for them to tune in hams where they mignt not be able to if our assignments were not channelized. This follows the logic above.

> Why dictate USB mode
> only? What about CW, RTTY, Slow Scan, etc.?

See above

>
>
> I think we can overlook the "new" ARRL's recommendations on audio passband
> edges with no definition of the edges. I suppose they think we all use DSP
> rock wall filters in our audio now.

I wouldn't think so. But still, no one seems to be too concerned with it either. No tolerance has been assigned, as far as I've been able to determine. Maybe they intend for us to follow the same tolerances assigned to the other users. Probably as long as hams use the correct amount of frequecy offset below the channel frequency they'll get along OK. Want to bet on it, though? That's what you'll be doing when you operate on 5 mc.

>
>
> The same goes for ARRL encouraging the ARS to do no tinkering without
> consulting the manufacturers.
>

That one looks like a non-starter. I don't see the manufacturers being anxious to hand out that information freely given that they could later become the target of accusations of fault when something goes wrong, goes wrong, goes wrong, goes wrong......
After all, they can insist that their gear wasn't designed to work on 5mhz so it may not function as designed there, and they won't guarantee the specs will hold for that frequency range.......

Pooooooor Bobby,

No friends, no radio, no brains.

The reason you don't hear any of the Goodfellas on 14.313 is because they aren't there, they are on 14.275 or another frequency. Can your portable receive ssb?

You can't even get your cabin boy Queenie to believe your lies anymore can you?

KK4TL seems to think that you are going to have another Roooooooooool Caaaaaaaaall, but the truth is, it will not happen will it?

Maybe you can dig up all the dead barf members and have a wake.....

Willy

Hmmmmmmmmmmmmm,

The "morons" are still on 14.313.00 Bobby me boy.

Doc, Rich, Jimmy, Dan and Oliver are all doing well, but you aren't. That "jackass" as you referred to Oliver Read owned you and you know it. He helped take you down and you know it.

Now, go have another drink, you drunken asshole!

The REAL QUESTION is where is the originator of this post ? Why did he just dissapear off of the radio oh so many years ago ?? Perhaps he was put in the radio penality box, or perhaps those that visited that piece of crap GDP and wired his mouth shut did the same?

Oh we can dream now can't we.

Dan/W4NTI

I suppose that's the point of the spam flood. Killfiling the forged Dan
Conti also killfiles the real Dan Conti.

No no no ! ! ! There are tens of thousands of us out here ! ! ! Not just me ! ! ! Even Sigster is waiting for it ! ! ! I heard WB2OTK has built a mono-bander for 20 meters just to check in ! ! ! And then N9GOR will have his AL-1500 on line and Sigster will be using that awesome cloud warmer.

Bro. John has prepared a 2 hour sermon just for the rrrrooooollllll ccccccaaaaalllllll ! ! ! Bro. Bottle and Bro. Norton want to check in, too.

I would try but all my stuff got sold a LONG time ago when I first lost my job. Bills to pay, ya know. Well now we're down to SWL-ing from the ole' 'frigerator box. The Frog-A-Hunnert has seen better days, but the rusty-trusty R4C seems to be hangin' in pretty good.

So we'll be "on the side" when the rrrrrooooollllll ccccaaaaalllll does happen. KT4TR said it's gonna rattle the dishes in Sigster's cupboard.

Can you tell we're anxious to get it started ? Maybe even NR5Terrific can come on board for a chat, too.

Think of the possibilities ! ! !

Quite sad that he is more popular on newsgroups than on the radio. Never heard of him, or seen him in the ratings on the radio before.

> One poster in particular seems to be infatuated
> with him so much that he spends his days just posting his name over and over
> and over again.

Perhaps it is the person himself who is trying to get more people to recognize his name by posting it so much. Some people (make that MANY people) in radio are like that.

> and I've been active in ham radio for almost tha last of that hundred years.

The Alaska Emergency Freq (5167.5 mHz)is apparently "owned" by the
Alaska State Troopers. You should relate to that . . . everybody and
their cousins have access to it. Mountain S&R outfits, hams, boats &
ships, medical types, police, bush pilots, remote hunting & fishing
lodges, etc. In addition to the Troopers monitoring the freq 24/365,
so does the USCG, FAA, and the military on the gov't side.

Hamdom is not new to the concept of channelized ops. Ref: MARS & CAP
freqs.

It can be much worse than that. You can completely fry specific ham
xcvrs if they're diode snipped and operated in certain specific
frequency ranges outside the ham bands. That's one reason why the MARS
& CAP freqs are (always?) just outside the ham bands.

60M is not "just outside any ham band". I'd do a lot of research on
any of the published mods for my xcvrs before I got the tools out.

The Commerce Department was the original administrator of radio in the USA. Only later was it handed off to the newly created FCC. Looks like we may be going full circle- you'll note that the FCC is mentioned as having a "consulting function" in the study. Hah! That's like they're a footnote to the whole deal.

Maybe the FCC antagonists will have their way. Can you say Billy Tauzin?

> Alaska State Troopers. You should relate to that

Yeah, I used to be acquainted with a ham who had retired from that org. He was the guy who told me about them building all thost T^2FD antennas using Radio Shack inductive resistors as
the terminators because they worked better than non-inductive typed. But I guess they had to
put someone in charge of it.

> . . . everybody and

I imagine it's a fre-for-all at times, but I doubt they'd tolerate much nonsense.
There emergency conditions can be any and all the time.

>
>
> Hamdom is not new to the concept of channelized ops. Ref: MARS & CAP
> freqs.
>

Well I guess that's one way to looking at it, but not one I'd have chosen. MARS is really a military service for which a qualification is holding a ham radio license. But it's sure not
that much like ham radio otherwise (experience talking here).

If you happen to have a rig that selects a bandpass filter following the final stage which just happens to have a resonance or the wrong sort around the 5mhz area you WILL let some of
the smoke out.

> That's one reason why the MARS
> & CAP freqs are (always?) just outside the ham bands.

Actually that goes back to the days when most hams had to depend on their
rig's frequency overlap beyond the band edges to get it to work MARS. Most had 25 to 50 khz overlap past the band edges and the MARS frequencies were deliberately installed within those
overlaps.
. MARS woulda had darn few members otherwise. The diode snip routine is more of a modern artifact.

I would say that Martha Steward like Oprah Winfrey has been 'good' for
the 'average' American Women in Re-Affirming their Traditional Roles
in Our Progressive Society. A Progressive Society changes over time
with the generations as the people within the society group and evolve
into better beings.

Martha Steward (The Public Persona) to many (most) Americans
represents the right way of 'living the good life' of traditional
personal values and wholesome family values. Preaching the "Art of
Being" a Good Home Maker and Being a Good Hostess.

To the Women's Libbers and the Left Wing Press:
- - - Martha Steward's "Public Persona" is everything that is wrong
with the traditional role of women in the American Family and Society
as a whole.

To the OWLES: Martha Steward is like the WHITE MAN (All White Males)
Collectively these "Evil Ones" represent Everything That IS Wrong With
The World and Must Be Portrayed as "Bad" "Evil" and something that
must be destroyed to radically change our society and the world.

The OWLES - One World Liberal Elite Socialists

Blessed by God with Life and Progressive by Nature by Living ~ RHF

I was listening again today and I started laughing at the thought of some of the old events that took place on 14313. My favorite was the time that ole WB2OTK told everyone that he was flying up the coast of Florida about the time the shuttle was launching. He was aboard one of his private aircraft and told the pilot to circle a couple of miles east of the shuttle so that he could get a good look at the launch. Was this a whopper or what !!!!
What about the time when he challenged anyone to find anything on him, he had been giving KV4FZ hell for a long time and told everyone that nobody can find anything one him, except for those outstanding arrest warrants. HA ha ha ha .
What about the time that W4NTI claimed that he saw the Medal Of Honor, that Duane had received. It only took the FBI to set him straight !!!
Yea, the good ole days will return soon !!!! Hammer007

Actually, both MARS & CAP were set up, at least years ago, so ham equipment
could be used. Hence the frequencies being adjacent to the ham bands. I'd
say it's a very similar example, since when a ham engaged in such operation,
they suddenly had to fit into another radio service. That might mean
technical requirements, such as crystal control, and it obviously meant
a change in operating standards.

With this new band, the US hams are likewise expected to fit into another
service, hence the channelized operation and one mode only, though it is
indeed for ham use rather than to make use of ham skills and equipment
for another service.

//////////////

I have had an 847 for almost five years now—bought one when they first came out. They have good points and bad points.

The way Yaesu first introduced the radios led me to believe that it was capable of cross band repeat—and it is. Trouble is that it is only capable of one-way repeat—in other words, it is NOT bi-directional as the ads had led me to believe. If you are interested in working satellite stuff this rig works fine, but I don't work the "birds". If you wish to do true cross-band repeat with this rig, forget it.

There is also a cooling fan on the rear that runs 24/7 and the whine can be irritating. I cut out some of the fan noise by placing a piece of air-conditioning foam filter over the outside. This does not impede air flow but it does help cut down on the whine of the fan.

Another feature I found irritating was the size of the rubberized touch pad. The individual buttons are very small and close together. My fingernail once tore off a very small chunk of rubber on the #7 key so I now use a pencil eraser to punch the keys.

Now for the plus side.

This rig has excellent receive on all bands and I hear stations on it that I do not hear on my Yaesu FT-767.

I have never had any troubles with the volume or any other knob coming loose.

The rig works well on all bands and if you are into "opening" it, this is easily done. I have found that if I try to transmit out of the Ham 2M bands (on dedicated Ham antennas) that the rig has a safety shutoff when it "sees" high SWR. I suppose this could be circumvented with a broadband antenna or, in my case, using a discone. There is no need to run out of band anyway but the feature is there just in case.

I especially like the all-mode feature on all bands as I often run USB on 2M and 6M. The DCS feature is also nice, for me at least, since I use this on UHF with a local group.

If I were to have but one rig in my shack I would keep the 847. I run it from an Astron RS-35M pwr. supply but with a little tinkering it can also be run from a Marine battery when power outages occur. I have done both.

For more information on the 847 and what can be done with it, visit http://www.supercontrol.de/cat/us/index.php

Hopes this helps.

Name and call withheld.

This is *GREAT NEWS* ! ! ! Got the rusty-trusty R4c calibrated and ready on 14.313. Now all we need is a rrrrrrrrroooooolllllll ccccaaaaaaalllllll to get things going again.

I hope someone has informed Bro. John so he can start preparing some more of those relly great sermons to preach to all the heatherens on 14.313.

Someone better tell Mrs. Sigster to secure the dishes in her cupboard, or else they're gonna come crashin' down when TR steps up to the microphone and starts that rrrrroooooollllll ccccaaaaalllllll.

All we need is a hint as to when it's gonna happen so we can be tuned up. I'll call in sick that day if I have to cause I intend to be ring-side for every bit of it. :-)

After the FCC was formed, Federal radio spectrum management was performed by JTAC, the Joint Technical Advisory Committee. More recently, and I forget under which president, this was formalized as the NTIA, National Telecommunications Advisory Committee. Under the Commerce Department. Reports directly to the office of President. They are responsible for Military frequency allocation, as well as all the 3 letter agencies headquartered in DC. In short, all federal government radios. The FCC continues to be the administering agency for non-federal radio. Except, they are slowly abdicating their responsibility by letting more and more 'unlicensed services grow.

Ole Buster is runnin his mouth all day long on 313. Guess he got another snoot full. This time he says all the hams should send him money for getting Rich Whitten off the radio.

Good to see he finally admits his guilt in the whole thing. Wonder why Buster got away with bad mouthing white women ? Makes ya wonder don't it?

Then later today there he is talking with the no call never ID jammer thats been there for 20 years. Good work Buster. Those jammers dont care about rules and regulations.

Oh for those that don't know....Buster was the name Phil used before he got a license to use 20 meters. N9GOR.

My oh My...how the worm does turn.

THIS IS WARNING TO ALL AMATEURS IN THE DETROIT, MICHIGAN AREA AND ABROAD:

BEWARE OF JAMES KELLER, FORMERLY KNOWN AS N8KGU, NOW HAS HIS LATE FATHER'S CALL OF W8WW.

I HAVE BEEN RECIEVING PHONE CALLS TO MY CELL PHONE SOMETIMES WITH THE CALLER ID BLOCKED AND SOMETIMES THEY FORGET AND THE NUMBER 1-313-962-7331 COMES THROUGH ON CALLER ID. THE REASON I KNOW JAMES IS BEHIND THE CALLS, IS BECAUSE THE CALLER (JAMES OR SOME OF HIS LOSER FREINDS) ARE LEAVING 2 METER REPEATER FREQUENCIES OF THE LOCAL AREA, AS A CALLBACK NUMBER (A FEATURE OF MY VOICE MAIL...) ANYHOW, THERE'S ONLY 2 PEOPLE THAT KNOW MY HOME NUMBER AND MY CELL, THAT ARE HAMS, ONE IS A CLOSE FRIEND OF MINE AND THE OTHER IS KELLER, MY OTHER FREIND WOULDN'T DO SUCH A THING... SO, IT'S KELLER, PEOPLE IF YOU DO ANY BUSINESS WITH THIS SPACE CASE, BE REAL CAREFUL, HE'S BEEN DOING THIS CRAP FOR OVER 6 MONTHS NOW... I CONFONTED HIM VIA INTERNET AND BASICALLY TOLD HIM, IF HE DIDN'T WANT TO HAVE TO GET SOME MAJOR DENTAL WORK DONE, HE'D BETTER CUT THE CRAP, HE GOT ALL HUFFY AND SAID IT WASN'T HIM AND THAT'D REPORT ME TO THE POLICE, (TYPICAL REPLY OF A PUSSY BOY!) AND THE CALLS STOPPED, FOR A WHILE, WELL IT SEEMS PUSSY BOY IS BACK AT IT AGAIN.... I'M TELLING YOU KELLER, IF THE FUCKING CALLS DONT STOP, I WILL BE FILING A REPORT WITH LIVONIA POLICE DEPT. I FORGOT TO MENTION, I KNOW THE CITY OF ALLEN PARK'S MAYOR, PERSONALLY, HIS NAME IS LEVON KING, W8IDX, AND HE'S ALSO MY ATTORNEY. IF YOU DON'T QUIT THE CRAP, BOY, YOUR GONNA END UP IN MORE CRAP, THAN YOU COULD EVER DREAM... KEEP IT UP AND WATCH WHAT HAPPENS.

I believe that you were thinking of IRAC (Interagency Radio Advisory Committee) which was made up of representatives from each Federal department and agency. The paperwork and "heavy lifting" for same was done by FCC employees assigned to that function, and its offices were in the FCC building.

It was replaced by NTIA, which started as the White House Office of Telecommunications Management before being renamed and moved into the Department of Commerce with its own staff.

My former bureau chief at the FCC was named as the head of the OTM (with the title of White House Deputy Chief of Staff) under Pres. Reagan (1985 ??), and was unceremoniously and undeservedly replaced when John Sununu became the Chief of Staff after George Bush I was sworn in (1989).

You drunken asshole, you are delusional. Even your cabin boy Queenie doesn't believe you anymore.

Every other week on their supposed "secret frequency" him and Larry talk and Queenie says "I just talked on the phone with TR, he'll be back on 20 meters next week".....of course, he has been saying that for a few years now.

You wouldn't make a pimple on Dans ass, and what branch of the military did you serve in asshole?

You are nothing more than a sawed off, pot bellied drunken asshole who will always live in the past.

Considering the recent news coverage of the abuse of young boys by gay priests and clergy in the Catholic church, why would any organization vote to allow gays to have access to young boys within that organization? Whatever your position on gay rights, the anecdotal evidence of abuse of young boys by gay men is substantial. With that in mind, I don't think gay men should have any access to children, much less access to an organization filled with very young boys.

That type of ID is mainly for the listener's benefit, not FCC identification. The main purpose is something catchy to help listeners remember the station. If you listen carefully, the station will officially ID sometime during the day with its proper FCC callsign, location, frequency, power output, and so on.

Just wanted to warn everyone that as a result of one or more anonymous, (of course), whining little girly girls, your ISP will be informed of any postings you make on these groups, albeit totally legal, if it upsets these little weasels.

Recently I sold some radio equipment. Some were for sale here in the groups, and others were for auction on eBay.

If it was for sale here, it was listed as a FS, and if it was for auction, it was listed as a FA, with a simple link to the auction.

Apparently some little pissant mutant didn't like the fact that these postings were made on "their" groups, so they fired off a complaint to my ISP. In this complaint they misrepresented the truth. Well, OK, they LIED!

They told my ISP that I was issuing unsolicited, bulk e-mail of a commercial nature. As far as I know, newsgroup postings, although they may be cross-posted, are NOT e-mail, nor are they bulk e-mail solicitations. Additionally, the private sale of radio equipment is not a commercial service or product as far as I know. I am not a radio dealer, and lord knows, as do we all, that you certainly do not make a profit selling your equipment on the secondary market. Of course, my ISP did not identify the complainant, nor did they supply proof or examples of my alleged infractions. So, I can only assume that the complaint was related to the above, recent for sale, for auction postings.

As a result, my ISP accused me of violating their rules against the bulk e-mail solicitation of commercial services or products in violation of my agreement.
They also stated that USENET newsgroup postings of the same nature are also in violation of my agreement, and if the practice continues, my account will be suspended or cancelled. So much for free speech thanks to the newsgroup Nazis. You can only imagine the content of the return letter I fired off to my ISP.

So, the continued death of these newsgroups, once a great place for debate, discussion, and dissemination of information between hobbyists is imminent at that hands of sorry fools with no life and a huge chip on their shoulder, to be replaced by ads for pornography, and silly political discussions not

at all related to the topic of the group, yet continue unabated without a word of complaint that I am aware of.

Many fellow hobbyists acquired very nice equipment from me at very reasonable prices during my latest "spring cleaning". Unfortunately in the future, only those with sense enough to search eBay, or frequent STRONG SIGNALS will be aware of future sales from me and others.

Apparently, I can no longer post my equipment FOR SALE in ANY newgroup, and that is a shame.

I have a Radio Shack Pro-2005 base scanner for sale. This radio is in

Excellent condition, non-smoking environment, bright display, with the

cellular and scan speed-up mods. Includes box and manual.

$250.00 Shipped via USPS Priority Mail, insured.

PAYPAL accepted and preferred, but will take a US Postal money order.

Personal check OK but the scanner ships when the check clears.

eBay feedbak under OFFDAN.

E-mail if interested.

Mr. Roman also left me a phone message, where he stated that , according to
HIM, and I guess he is speaking for Time Warner. The MERE FACT that the
posting was aon a newsgroup deems it to be commercial.

Go figure.

I will preface this by saying to all that I apologize for bothering everyone with this continuing saga, but I truly believe that it is of importance to all who use the radio groups, and have to deal with ISPs.

As a result of the position taken by my ISP, I will no longer post any FOR SALE, or FOR AUCTION threads on the newsgroups. According the logic of Time Warner Cable, if I post on eBay or Strong Signals, I am commercial and in violation there as well.

BUT, until I hear different, that is where I will post future equipment.

Since I also admittedly have a big mouth, and often take the irritating side of an issue, I will simply lurk here and not make future postings of any type for fear of being turned in to my ISP. Love me or hate me, I always thought we had fun, and a good debate. To the little children who turned me in, I surrender, you win. I am silenced.

The following is my response to the latest e-mail from the fellow at Time Warner. It is exactly how it was sent. The only other posting you will see from me in the future is IF and WHEN I get a final reply from them, I will pass it along. DAN

>Dear Mr.Conti
>It is not my job to judge you or your actions.

Yet you or someone in your unit sends me a threatening letter. Please put me in touch with someone who CAN make a final judgement in this matter.

>Our intent was to let you know that there has been a complaint made against your >actions on this newsgroup. It is our policy to not reveal the party who filed the >complaint.

It is unfortunate that you take the word of someone who is most likely NOT a Time Warner customer, over that of a good customer for many years. Is that good customer Relations?

Because a complaint was made, it doesn't mean it is valid. I should have the right to dispute the complaint reasonably with someone of authority at your company.
Additionally, I have the right to question your interpretation of your user

greement as it relates to this matter, and if necessary, my attorney will certainly have the right to review it as well. All I get is short answers apparently in 100% agreement with the complainant.

>We just ask you to be more careful in the future of what you post on newsgroups >because this could affect the status of your Roadrunner account if we receive any >more complaints. Thank you.

In effect you are curtailing my usage of your service without allowing me the opportunity to contest your position. I need to know specifically how to be careful, and why I must be carefulm and where.....

My initial instinct, and those others, would be to take your equipment and throw it on the front lawn where you could pick it up, and terminate your service.

Quite frankly, your service has been good, so I do not want to do that. If there were another service available as good or better, I would.

According to your position, if I post a For Sale or For Auction item to a newsgroup which is a private sale, and not a regular occurrence, and not for profit, it is considered commerical by Time Warner, and jeapordizes my account.

If I post something for auction on eBay then, am I in violation?

If I post something for sale, or for auction on a web site, am I in violation?

You mean to tell me that your Time Wanrer customers posting on eBay are in jeapordy of being cancelled?

This entire matter is ridiculous, and you know it. You are obviously intelligent, and internet saavy. You KNOW I did nothing wrong. I did not violate newsgroups rules or charters, nor am I a commercial user of your service.

I think you guys should back down on this stuff, tell the whiners that there is NO violation, and let your customers enjoy the service they pay PREMIUM prices for every month. You are opening up a can of worms here that should stay closed.

All you need is a big mouth like me, and my big moth attorney to push this issue, get publicity, and TIme Warner will look ridiculous as a result.

I am sure you are aware that I already have a good portion of the radio hobby newsgroup members up in arms.....

I do not consider this matter resolved. I want the complaint removed from my record, and someone of authority at Time Warner to review the matter impartially and make a final determination one way or the other, relative to the cogent hypothetical points I made above.

Sincerely,

Daniel M. Conti

I have a Radio Shack Pro-2005 base scanner for sale. This radio is in

Excellent condition, non-smoking environment, bright display, with the

cellular and scan speed-up mods. Includes box and manual.

$250.00 Shipped via USPS Priority Mail, insured.

PAYPAL accepted and preferred, but will take a US Postal money order.

Personal check OK but the scanner ships when the check clears.

eBay feedbak under OFFDAN.

E-mail if interested.

Mr. Roman also left me a phone message, where he stated that , according to
HIM, and I guess he is speaking for Time Warner. The MERE FACT that the
posting was aon a newsgroup deems it to be commercial.

Go figure.

Dan

I will preface this by saying to all that I apologize for bothering everyone with this continuing saga, but I truly believe that it is of importance to all who use the radio groups, and have to deal with ISPs.

As a result of the position taken by my ISP, I will no longer post any FOR SALE, or FOR AUCTION threads on the newsgroups. According the logic of Time Warner Cable, if I post on eBay or Strong Signals, I am commercial and in violation there as well.

BUT, until I hear different, that is where I will post future equipment.

Since I also admittedly have a big mouth, and often take the irritating side of an issue, I will simply lurk here and not make future postings of any type for fear of being turned in to my ISP. Love me or hate me, I always thought we had fun, and a good debate. To the little children who turned me in, I surrender, you win. I am silenced.

The following is my response to the latest e-mail from the fellow at Time Warner. It is exactly how it was sent. The only other posting you will see from me in the future is IF and WHEN I get a final reply from them, I will pass it along. DAN

>Dear Mr.Conti
>It is not my job to judge you or your actions.

Yet you or someone in your unit sends me a threatening letter. Please put me in touch with someone who CAN make a final judgement in this matter.

>Our intent was to let you know that there has been a complaint made against your >actions on this newsgroup. It is our policy to not reveal the party who filed the >complaint.

It is unfortunate that you take the word of someone who is most likely NOT a Time Warner customer, over that of a good customer for many years. Is that good customer Relations?

Because a complaint was made, it doesn't mean it is valid. I should have the right to dispute the complaint reasonably with someone of authority at your company.

Additionally, I have the right to question your interpretation of your user greement as it relates to this matter, and if necessary, my attorney will certainly have the right to review it as well. All I get is short answers apparently in 100% agreement with the complainant.

>We just ask you to be more careful in the future of what you post on newsgroups >because this could affect the status of your Roadrunner account if we receive any >more complaints. Thank you.

In effect you are curtailing my usage of your service without allowing me the opportunity to contest your position. I need to know specifically how to be careful, and why I must be carefulm and where.....

My initial instinct, and those others, would be to take your equipment and throw it on the front lawn where you could pick it up, and terminate your service.

Quite frankly, your service has been good, so I do not want to do that. If there were another service available as good or better, I would.

According to your position, if I post a For Sale or For Auction item to a newsgroup which is a private sale, and not a regular occurrence, and not for profit, it is considered commerical by Time Warner, and jeapordizes my account.

If I post something for auction on eBay then, am I in violation?

If I post something for sale, or for auction on a web site, am I in violation?

You mean to tell me that your Time Wanrer customers posting on eBay are in jeapordy of being cancelled?

This entire matter is ridiculous, and you know it. You are obviously intelligent, and internet saavy. You KNOW I did nothing wrong. I did not violate newsgroups rules or charters, nor am I a commercial user of your service.

I think you guys should back down on this stuff, tell the whiners that there is NO violation, and let your customers enjoy the service they pay PREMIUM prices for every month. You are opening up a can of worms here that should stay closed.

All you need is a big mouth like me, and my big moth attorney to push this issue, get publicity, and TIme Warner will look ridiculous as a result.

I am sure you are aware that I already have a good portion of the radio hobby newsgroup members up in arms.....

I do not consider this matter resolved. I want the complaint removed from my record, and someone of authority at Time Warner to review the matter impartially and make a final determination one way or the other, relative to the cogent hypothetical points I made above.

Sincerely,

Daniel M. Conti

Sincerely,
Gilbert Roman

Pretty pricey considering you can usually pick one up on e-bay for around
$350 - $380.

That was originally posted in January of 1996.

See:
<http://groups.google.com/groups?q=AOR+AR8000+hand+held.....full+800+coverage,+MINT..for+sale&hl=en&lr=&ie=UTF-8&safe=off&selm=DM1yB3.C76%40news2.new-york.net&rnum=2&filter=0>

An impostor is forging Dan's name and reposting everything he's ever posted FS on the news groups, and he's cross posting them to annoy us all.

3926. Re: I just spoke to the REAL Dan Conti

Newsgroup: rec.radio.amateur.misc

On Sun, 08 Jun 2003 02:46:01 GMT, "Big Wilson" <wilson4345@aol.com> sputtered indignantly:

>Hey jerkoff, surprised you can count.....

I forwarded all of them to your ISP complaining that you had found an anonymous way to post spam still using their servers.

You're one step from being bounced from RR for good. So play nice Dan or you'll be back on dial up before you can say "I was only selling a few things"

>
>Why are you this directing to me?

Could you rephrase that?
>
>You're not fooling anyone asshole. We all know you are the moron behind all
>of this nonsense.

Behind what nonsense? Visions of conspiracies dancing in your head Dan?

>
>When your day comes, you will get more then a spanking.

Really? Wha'd you have in mind Big Guy? I bet they don't call you Big Wilson for nothing.

>
>

The guy is a spammer. You should killfile anything with Dan Conti in it. He now posts as Big Wilson and will probably spam the group in the near future using that nym.

LOL

> >You're not fooling anyone asshole. We all know you are the moron behind
all
> >of this nonsense.
>
> Behind what nonsense? Visions of conspiracies dancing in your head Dan?

No, well...Dan says that when he thinks of idiots like you on the groups, he
has visions of a small, geeky, putrid, no-life moron sitting nude in a
darkened room nude with vaseline all over his private parts, anonymous news
posting devices laid out in fromt of him, keyboard in one hand and VERY
small penis in the other....DANCING in his HEAD! ROFLHFAO!

> >When your day comes, you will get more then a spanking.
>
> Really? Wha'd you have in mind Big Guy? I bet they don't call you Big
Wilson for
> nothing.

Well, finally something directed at ME, BIG WILSON. Wouldn't you LOVE to
have an organ which is the basis for my moniker?

Folks like you who hide behind anonymity and terrorize what was a decent radio newsgroup, along with posters such as Dan who were STUPID enough to use their real name and e-mail address, will NEVER emerge from behind their cloak and meet face to face with ANYONE. It would require washing the old semen from your wreaking torso.

Now, the Dan Conti I know is 6-1, 260 lbs. Quite a BIG dude, and tough as nails. If you'd like to meet him in person, I can arrange it....

Wil......

>Hey folks.
>Armstrong gave up and jumped; Look it up.

The main reason leading to Armstrong's depression and suicide was
his pal, David Sarnoff, stealing his patents.

Had he waited, he would have been vindicated when Sarnoff/RCA was
found liable for same shortly after and was ordered to pay
Armstrong's estate a sizeable sum.

Aww come on Bro. Les. Maybe he works nights.

Be nice to KT4TR. He's gonna have a really GREAT Rrrroooollllll cccaaallllll and I want you to get invited.

I'll be lissening in from here at the ol' 'frigerator box. No transceiver these days so I won't be able to check in, though. It'll still be fun to hear all the check-ins.

I like Sigster and Bro. John.

"Dan/W4NTI" <w4nti@NOSPAMmindspring.com> wrote in message
news:bbtogd$c97$1@slb0.atl.mindspring.net...
Ole Buster is runnin his mouth all day long on 313. Guess he got another
snoot full. This time he says all the hams should send him money for
getting Rich Whitten off the radio.

Good to see he finally admits his guilt in the whole thing. Wonder why
Buster got away with bad mouthing white women ? Makes ya wonder don't it?

Then later today there he is talking with the no call never ID jammer thats
been there for 20 years. Good work Buster. Those jammers dont care about
rules and regulations.

Oh for those that don't know....Buster was the name Phil used before he got
a license to use 20 meters. N9GOR.

My oh My...how the worm does turn.

Dan/W4NTI

.....

Shoot, Dan. Mebbe you should threaten Ole Buster....tell him y'all are gonna
crawl up behind him in the elephant grass and git him. Why nott? You ain't
any stranger to making threats now, are ya?
Rich Whitten run his own ass off the radio. He was way too crappy and
thought he was the end-all of radio. By the way...his name is Whiten. Rich
was an asshole. Probably still is.
He was only one notch above David Tolassi and that ain't saying much. Does
Rich still claim he sent his resignation to the FCC by "mistake"? Come
on...nobody believes that crap...Whiten sent his resignation out of anger
and now he wants to back out and have us believe that his wife mistakenly
sent the email to Riley. It don't take a third-grader to see the BS in this
one!!!!!
Bye-Bye, Rich. Happy Trails.
(now, if only Tolassi would lose his license...wouldn't that be grand?)

Can the Sigster possibly get on the air from the balcony of his condo? Might
be hard to do what with the condo restrictions an such. Sigster could use a
portable antenna...wrap his proboscis with some 22 ga wire and load it up.
Big as his nose is he should be able to wind a 160M wire around it and still
be able to breathe. He could make a ground plane by spreading aluminum foil
about his carpet and standing on it while he transmits.

UPDATE:

The pack was made with Panasonic 1950 mAh NiMh batteries. It was a
tight fit, but the scanner is alive again. Solder stuck to these cells.

Regardless of the wonders she has/may have brought into our/your homes
does NOTHING to change the fact that she broke Insider Trading laws.
And why should she be immune from prosecution merely because Bill
Gates is too big to prosecute?

These two most famous white collar criminals in America are BOTH
guilty as sin. MY question is, how come Martha gets HAMMERED, and
they're talking DEFINITE prison time for her, and Bill gets off scott
free for establishing an illegal monopoly that DWARFS Ma Bell?

There are MANY such stories in America. I myself came from a poor home, yet in just 3 years of hard work, I earned almost $1 Million. BUT, how does that excuse her KNOWN Insider Trading? The middle man has already ADMITTED her guilt!

She found out through her inside person that the stock was about to be devalued, and so she sold her stocks rather than take a loss. That's illegal!

Not as evil as Bill Gates, who CONTINUES to flaunt the law, but bad enough to get her prison time. Now if the laws of our land ARE fair, Bill Gates will be doing some prison time, too.

Never happen.

"Crime DOES pay when you're Bill Gates."

Well, certainly, in the case of Bill Gates, there are too many who
think "the world cannot AFFORD to prosecute Bill Gates! What would
happen to the WORLD if Bill Gates were in prison where he belongs?

"Crime DOES pay, if you're Bill Gates."

It's a very nasty place to get stuck, lost or messed up, ya can die
fast and ugly in their WX. An all-inclusive net makes sense where pole
lines and roads are few and far between. I keep trying to imagine what
a freq like 5167.5 would sound like in Southern California.

I remember reading an article somewhere a long time ago about the
outback VKs having a similar network. All their ranches were equipped
with HF stations and nearest civil authorities monitored the freqs.
Ranch hands carried horseback portables when they were camped in the
boondocks tending the herds. John Wayne with a reddio and a
Winchester. The Outbackers also took it to another level and used
their HF equipment for conducting on-the-air interactive three Rs
classes for the kids. As opposed to 200 mile one-way trips in yellow
buses, etc. Probably resulted in a lotta eight year old kids who were
a bit shaky academically but were pretty decent radio ops.

Yer right. When I was a CAP op we used Gonset Communicators on a freq
just above 148.0 mHz and a mix of USAF castoffs & ham gear on HF. Been
awhile but as I recall our sqdn. HF base station consisted of an xtal
controlled Johnson Viking and a USAF BC-348 type rcvr.

Oh Dan, stand up for yourself and complain if you feel you have something to complain about.

If you didn't spam the groups with all the For Sale items and then whine to everyone when you got busted there would be no issue.

You were taking credit card numbers for merchandise. That's commercial Dan. That is not considered just selling a few things.

In any search about Dan Conti there is either a For Sale, For Auction or all responses related to the For Sale and For Auction posts. There are thousands of posts regarding Dan Conti. You are a legend Dan.

Be a man Wilson, be a man Dan. Keep your nym. It's all you have on the internet. You'll always be Dan to everyone that matters. Get rid of Wilson you don't need him anymore.

<snip>

I must disagree with the above statement. Women made cakes, breads, pancakes, pies and other dishes - main course and desserts - long before canned foods, instant mixes and TV chefs were available. Stoves, Microwaves and even BBQ cooking as well as other ways of preparing foods came on the scene long before Martha Stewart was a household name. I'm damned sure women knew how to cook long before she started her shows. Your mother fed you didn't she? She was an enterprising women - no doubt. As male, I took in a couple shows or so - "IF" it interested me as scanning through the channels. Though the subject may have been somewhat interesting, her personality turned me off even when watching her the few times I did. Even with her guests, to me, she was a cold fish. No warmth at all. Be that as it may, SHE didn't not domesticate the American people or any one else for that matter. That is ONE credit she can't get. She may have taught a few who didn't know any better and were afraid to ask... But she sure didn't teach ALL women or men for that matter. "IF" we are still "eating out of cans", it is only because we don't take time to sit down to a home cooked meal as we should due to what ever we have going on in our lives. It isn't that people don't know how to cook, they often don't take the time. L.

I tend to agree here, Ken Lay and his Enron buddies ripped millions from the Enron employees, stole their retirements, ruined lives, and they are still running around free, they should spend the rest of their lives locked away for what they did. The stock Stewart sold was chicken feed compared to that and to her own financial wealth. I think her broker may have had some inside information and did not pass that on to her, but just advised her to dump the stock and she said OK. I don't think she would knowingly risk so much for less that $50K worth of stock, that is pocket change for her.

Batteries plus will weld your cells together.
If you buy the cells from them, they will weld them for free.

Soldering to nicad/nimh cells damages them by overheating and melting the
insulation.

Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9V, 9Y, A2, A4, A5, A6, A7, AP, BV, BY, C2, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/M, JD/o, JT, JW, JY, K, KH0, KH2, KH3, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VP2E, VP5, VP6, VP8, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS (Possible Change/Update). Fritz, N6UK/DL4TT, informed OPDX that he would be active as 4U1UN on June 9th, however, some bulletins are reporting that he will be active on the 10th. We have been trying to contact Fritz over the weekend to confirm the change. It is

recommended to watch on both days for his activity. Remember, his band choice will depend on shortwave conditions and the status of the roof/ antenna work going on at the moment. Mode will be mainly CW. As usual, QSL only via Box 3873, Grand Central Station New York, NY 10163 USA.

5J0, SAN ANDRES ISLAND (Update to OPDX.606). Eight members of the Florida DXPedition Group will be operating from San Andres Island during the period of October 20-28th. They will run four to five stations before and after the CQWW SSB Contest. They have been assigned 5J0J as their contest callsign. The group is still looking for any assistance and is asking for donations to help offset the cost. If you are interested in donating, you may send it via credit card through PayPal (Paypal ID: w4wx@bellsouth.net) or mail to: Bill Gallier, FDXPG, 2694 North Camel Ave., Middleburg, FL 32068
For information on their team and activities, visit their two web pages at:
http://www.geocities.com/hk02003
http://www.geocities.com/w4wx1/upcoming

9A0, CROATIA (Special Event). As announced last week, Pope John Paul II, visited Croatia over the past weekend. Amateur radio stations from some Croatian towns have activated the special callsign 9A0PAX. This callsign will be in use from now until June 30th. QSL Manager for this station is Kresimir Juratovic, 9A7K, P.O.Box - 88, HR-48001 Koprivnica, Croatia.
The special event station's callsign 9A0PAX is valid for the "The Pope John Paul II in Croatia Award". The rules for this award can be found at:
http://www.qsl.net/9a7k

9A, CROATIA (Lighthouses and Islands). A DXpedition is being organized by the President of CIHG and WLH checkpoint Kresimir/9A7K, WLH Manager Phil/F5OGG and Branko/9A6BND, who are all members of Croatian IOTA Hunters Group - 9A0LH. They will be active from many Croatian lighthouses and islands between June 21-30th. During this activity they will use the following callsigns: 9A7K, 9A6BND, 9A/F5OGG/p and 9A0LH. QSLs are via their individual home callsigns; 9A0LH via 9A7K. The list of all Croatian lighthouses and islands that they are going to activate are:
Barjak Mali (EU-016, LH1219, CLH 008, CI399)
Bisevo (EU-016, LH901, CLHG050, CI007)
Daksa (EU-016, LH 0111, CLH 017, CI 165)

Mulo (No IOTA, LH 0137, CLH 085, CI 458)
Murvica (No IOTA, LH 0806, CLH 091, CI 457)
Murter (No IOTA, CI 074)

You can also visit the following Web page for more details and updates
at: http://www.qsl.net/9a7k

A2 & 7P8, BOTSWANA AND LESOTHO (African Double Jump DXpedition - Update).
Fabrizio, IN3ZNR, reports that they have lost a member of their team.
Mauro, IN3QBR, will not be joining the team on this DXpedition (no reason
given). He reports everything is ready for this African effort. Operators
are: Joe/AA4NN, Aldo/IK2ANI and Fabrizio/IN3ZNR. Activity will take place
between June 28th- July 13th. In June, they will be traveling to South
Africa, so it is possible for some operations using ZS/home calls. The
operation in Botswana will take place starting on July 2nd through the 6th.
The operation in Lesotho will take place starting on July 7th through 11th.
The plan is to run both CW and SSB with two stations on the air. In spite
of the summer season, the CW guys will make a great effort on 80 and 160
meters. The Phone operators will be monitoring 50.110 MHz for checking
the 6 meter band. They will also pay attention to the frequencies of USA
General Class band plan, 10-15-20 meters. The callsigns are already
assigned:
Lesotho - 7P8NR (IN3ZNR), 7P8NN (AA4NN) and 7P8NI (IK2ANI)
Botswana - A25FV (IN3ZNR), A25NN (AA4NN) and A25NI (IK2ANI)
Send QSLs via their home callsign. For further information, check their
dedicated web pages at: http://www.AfricanJump.org

HB0, LIECHTENSTEIN. Members from the Hungarian Pannon DX Club and the
P.V.R.Klub Puspokladany will operate from here again this year. The
operation will take place between June 22-27th from a rented house at
Masescha 1350m ASL. Activity is planned for the HF bands (40-10 meters,
including the WARC bands) CW/SSB and RTTY. There will be 3 stations active
24 hours a day by the following operators:
HB0/HA0HW/p Op Laci
HB0/HA0KHW/p Op Feri HG0ETA, QSL via HA0HW
HB0/HA4DX/p Op Tomi
HB0/HA4XG/p Op Geza
HB0/HG4LGN/p Op Boti
HB0/HA5BWW/p Op Ed
HB0/HA7VK/p Op Sanyi
They will be using a FT-840, a FT-890 and a FT-990 with monoband yagis
for 24 and 21 MHz, and groundplanes and wire antennas for all the other
bands sponsored by DunaX (http://www.pannondxc.hu/dunax).
Cards can be sent to their home callsigns direct or via HA bureau.
For more details, please visit the following Web pages:
Pannon DX Club -- http://www.pannondxc.hu/

INDIAN OCEAN OPERATION. John Warburton, G4IRN, informs OPDX that he will
be active as follows:

Seychelles (S7) -- (AF-024) from September 13-16th.
Mayotte (FH) -- (AF-027) signing FH/G4IRN from September 16-23rd.
Seychelles (S7) -- (AF-024) from September 23-27th.
All operations will be mainly CW with 100 watts, on 40-10 meters, into a
vertical antenna. QSL via G4IRN (See QRZ.com for details).

IOTA NEWS.....
AS-023. Yoshitake, JJ8DEN, will be active as JJ8DEN/6 from Amami
Island June 21-23rd. Look for activity on HF on CW and RTTY.
He will be using an IC-706 and HX52A. QSL via JJ8DEN either
via the bureau or direct to: Yoshitake Izumi, Minami-24-7,
Nishi-1, Obihiro-City, Hokkaido, 080-0011 JAPAN.

AS-032. Yoshitake, JJ8DEN, will be active as JJ8DEN/6 from Yaku Shima
Island July 12-14th. Look for activity on HF on CW and RTTY.
He will be using an IC-706 and HX52A. QSL via JJ8DEN either via
the bureau or direct to: Yoshitake Izumi, Minami-24-7, Nishi-1,
Obihiro-City, Hokkaido, 080-0011 JAPAN.

AS-117. Kenji, JA4GXS, will be active as JA4GXS/4 in the IOTA contest
from Yashiro Island, July 26th (1000z) to the 27th until 2300z.
Activity will be on 40/30/20/15/10 meters SSB and CW. QSL
via the bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cho,
Yamaguchi, 753-0038 Japan.

EU-023. Andrea, IK1PMR, who was recently active as TX4PG from Marquesas
Island, should be active from Gozo Island June 12-19th. This
will mainly be a vacation trip for him this time, not a full
DXpedition like his TX4PG operation. His callsign is not known
yet (probably something like 9H3**). He will operate on 80-10
meters with 100w, vertical antenna + 40m dipole + wires, mainly
on CW with some SSB and RTTY/PSK. QSL via IK1PMR (Bureau or
direct using the address on QRZ.com).

EU-070. Jacques/F6HMJ and Andre/F6AOI will be active as TM3OR from
Ile d'Or from June 13-15th. QSL via F6HMJ.

NA-066. Members of the Escondido (CA) ARS hopes to mount a mini-
expedition to Santa Catalina Island for the IOTA contest.
Hopefully, more details will be forthcoming.

NA-067. Randy, KD8JN, informs OPDX that he will be active from Hatteras
Island (USI NC-005S), North Carolina, from July 19-26th using
the callsign KD8JN/4. Activity will be on all bands, primarily
on SSB. Suggested frequencies will be the usual IOTA frequencies
+/- QRM. Randy states, "This again, is a Vacation/DXpedition,
which includes the family. I will be on the air as much as
possible, and as propagation and the wife permits! NOTICE!!!!
'IF' the fish are biting, I'll be using my fishing rod more
than the radio!! Please be patient. I pay close attention for
QRP stations, Kids, and YL's/XYL's. I REALLY listen for the
weak signals too! I try to get everyone in the log that wants

to be there!" Direct QSLs to KD8JN: Randall Phelps,
1226 Delverne Ave SW, Canton, Ohio 44710-1306 USA. QSLs 100%
via the Bureau also! SWL's welcome too!

NA-125. Nenad, VE3EXY, informs OPDX that he is too busy to travel to
Zone 2 at this time. So, he has decided to visit Orleans Island
(Zone 4) for a weekend operation. He will sign CK2/VE3EXY/P
from June 13th (Fri. about 2200z) to June 15th (Sun. 2000z).
His activity will be on the following modes: CW, RTTY, and
SSB (but mostly RTTY during the ANARTS contest). His sunrise
and sunset: 0845 and 0035z. QSL via his home callsign VE3EXY.
His suggested frequencies: IOTA or RTTY frequencies. No low
bands. Nenad objectives are:
Outside Contest - DX stations (CONDX permitting)
During ANARTS Contest - 20, 15 and 10 meters
Around Greyline times he will be either on 20 or 30 meters.
His resting periods are: 0400-0830z and 1600-1800z subject
to change if CONDX are good. Nenad requests/states, "I'll have
no access to the cluster. Please post me as much as possible."

NA-NEW and NA-007 (possibly NA-009 and NA-047). Mike/K9AJ and Jim/K9PPY
will activate Somerset Island (a new IOTA, in the Nunavut region
of Northern Canada) from July 13-20th. They may have two stations
on the air, depending on conditions. As there will be no sunset
(less than 500 miles north of Arctic Circle), they plan no
activity below 40 meters on this trip. Their callsigns will be
K9AJ/VY0 and K9PPY/VY0. Susan, K9XYL/VY0, might also be active.
After their Somerset Island operation, K9AJ/VY0 will be active
from Southampton Island (NA-007) from July 22-24th. It is also
possible that some activity might occur from Cornwallis Island
(NA-009) and/or Baffin Island (NA-047) during the time period
July 11-26th, so pay attention to the QTH info given by the
operator. The usual IOTA frequencies will be used on CW and
SSB. QSL to operator's home callsign.

LIGHTHOUSE ACTIVITY.....
Jim/W5AZN (ARLHS #484) and Patty/W5AZO (ARLHS #485) will be activating
several lighthouses on Lake Superior signing with the special callsign,
N8L, between July 16-30th. Activity will mostly be on 20 meters SSB.
Frequencies and operating times will vary from different lighthouses
each day. QSL direct to W5AZN, #10 SASE PSE.

Operators Albert/RV3GW, Vlad/RA3GD, Valery/RW3GU and possibly others
are planning to visit some lighthouses and islands in the Onega Lake
June 12-15th. Their goal is to activate the following three new LHs
for the WLHA and RLHA (RRA) programs: LH 0530 - Vasilisin, LH 0441 -
Sosnovo-Shal'skiy and LH 0407 - Mihaylovets. Their callsigns will be
RV3GW/1, RA3GD/1, RW3GU/1 and possibly others. Their activity will be
limited to 20 and 40 meters CW/SSB and one day (about 5 hours from
morning of a local time) per island. The possible activity will depend
on the weather.

QSL INFO AND NEWS.....
FRENCH POSTAL INCREASE. Gil, F5NOD, informs OPDX that there has been a new postage increase for mailing from France to abroad:
(Reference 1 USD = 0.8 Euro)

F to West Europe (DL, OE, ON, OZ, EA, OH, G, SV, EI, TF, I, HB0, LX, LA, PA, CT, HV, SM and HB9) = 0.5 Euro (0.625 USD)

F to Europe (other than listed) and AFRICA = 0.75 Euro (0.93 USD)

F to OC, AS, NA, SA = 0.9 Euro (1.125 USD)
(Remark: 1 USD will not cover any more postage expense to OC, AS, NA, SA)

Jean-Michel, F6AJA, informs OPDX that the Les Nouvelles DX historical QSL gallery Web site continues to grow. This site contains, more than 1400 QSLs in five different galleries. The Web page is at:
http://LesNouvellesDX.free.fr
Some cards are still needed, and your participation is welcome. Please visit their Web site and send them your comments by E-mail to:
LesNouvellesDX@free.fr

To celebrate, Pope John Paul II visit to the City of Rijeka, his 100th pastoral visit outside Vatican, and his third trip to the Republic of Croatia, members of radio club "Rika" activated the special callsign, 9A100IP. "IP" means John Paul in Croatian language. QSL via 9A1RKA: Radioclub "Rika", P.O.Box 262, HR-51000 Rijeka, CROATIA.

Toni, EA5RM, reports that the S05X QSLs have arrived on June 6th from the printer, so confirmations will start Monday, June 9th.

XQ6ET QSL UPDATE. George, W8UVZ (QSL Manager for XQ6ET), reports that cards for XQ6ET have begun to flow as a large batch goes into Monday's (June 9th) mail from Battle Creek. Verification process is slow with Bob's handwritten logs - as the process takes place over the air when propagation cooperates. Also, Bob reports he has many cards that are ready for QSLing, but he had no blank cards. These (QSLs) are being sent to him this week, so the deserving should QRX sending duplicate requests until mid July as their cards may be in the works! One final reminder for those seeking QSLs. Older style IRCs (smaller size) are not redeemable in George's area. He has gotten several QSL requests, particularly from JA and UA with these older IRCs. Those requesting QSLs should use the newer style CN01 (large size with bar coding on rear) IRCs, US Dollars in their envelopes or US postage on their return envelopes.

T32, EASTERN KIRIBATI. Members of the Western Wireless CC will be active from here between November 23rd and December 7th and participate in the CQ World Wide DX CW Contest (November 29-30th) as a Multi/2 entry. Operators will be Barry/N0KV (T32KV), Bill/K0MP (T32MP), Valeriy/N2WW, Gregory/W0ZA, Paul/NO0T and Tim/N0ZM. All T32 callsigns have not been received yet. They will be active on 160-10 meters including the WARC bands. Modes will be CW, SSB, RTTY and PSK-31. QSLs will be via operators' home callsigns.

T33, BANABA ISLAND (Looking for SUPPORT!). In OPDX.611, an announcement was made that an international team of about 15 well known operators were going to activate Banaba Island for a period of about 12 days in March or April of 2004. Because of the long ocean voyage and the lack of facilities on this devastated island, this will be an expensive undertaking. Each member will be contributing to travel expenses. However, even with this, they will fall far short of their needs. They hope organizations will be able to provide some help. Any amount is appreciated, and they will put your club logo on their QSL card, and it will be included in the credits for the video and articles for all significant donantions. For more information please visit their web site at: http://www.dx-pedition.de/banaba2004
You can send your contribution to:
F5CWU - Florent Moudar, 25 Rue du Castel Salis, 37100 TOURS, FRANCE
-- or --
N4CD - Robert A. Voss, 3133 Charring Cross, Plano, Texas 75025 USA
All contributors will be acknowledged by letter and by a listing on the web site when received. If you have any questions, please feel free to contact Flo at: f5cwu@qsl.net

V2, ANTIGUA. Kevin, WB8XX, will be on holiday from here June 10-16th. He plans to be active (callsign not mentioned) and will try to catch a few European openings on 6 meters during this time. QSL via WB8XX.

VK9C, COCOS-KEELING ISLANDS. Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/DM5TI and Andree/DL8LAS will be active as VK9CT and VK9D from here October 11-23rd. Activity will be on all modes, 160-6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on. QSL via DL2RMC.

VK9X, CHRISTMAS ISLAND. Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/ DM5TI and Andree/DL8LAS will be active as VK9XW, VK9XM, VK9XT and VK9XA, respectively, from October 4-11th. Activity will be on all modes, 160-6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on. QSL via DL2RMC.

XW, LAOS. Son, HS6NDK (XW1N), informs OPDX that Champ, E21EIC, will continue to be active as XW1IC until the morning of June 27th. He has been active on 6 meters (on 50.110 and 50.115 MHz around 1000-1700z). He will mainly be pointing to Japan, Asia stations and sometime to Europe. He was heard this past week/weekend on 17 meters RTTY (18104 kHz around 1330z) and 20 meters CW/SSB (between 1530-2030z or later). QSL via E21EIC.

YA, AFGHANISTAN (Update). Masa, JG1OWV, has informed OPDX that Sada has joined Hiro/JA1CQT (YA1CQ) and the group on June 5th. He was invited to use their club station, YA1JA, on 6th. Sada will temporarily go to U.A.E. where he will pick up his FT-857 that Masa has sent him. Sada will be back to Kabul around June 12th with the equipment. Masa states, thet we can expect Hiro's operation to continue for a few more days until he leaves for the southern area next week.

YB35, INDONESIA (Attention Prefix Hunters). To celebrate the 35th anniversary of ORARI (ORganisasi Amatir Radio Indonesia), 1968-2003, the special prefix callsign YB35AR will be on the air from Jakarta City,

July 6-13th by a lot of YB0 call area operators. Activity will be on all HF bands including WARC Bands, VHF 6m and AO-40 Satelite. Modes are: CW, SSB, RTTY, SSTV and PSK31. QSL via YB Bureau, or P.O. BOX 8000, Jakarta 11000 Indonesia. On July 11th, 12th and 13th, the ORARI in the Jakarta area will organize Jakarta HAMfest. YB35AR will be on 40 and 80 meters for local HAM, if everthing is running well. On July 12-13th, look for YE0HQ (ORARI HQ Station) to participate in the IARU World Radio Championship 2003.

ZK1, SOUTH COOK ISLANDS. Dave/W6AQ and Don/K6IPV are going on the road again. Don states, "This time, we'll stay away from the CW, which neither of us has a great familiarity with, and will travel to the South Cook Islands for the CQ WW SSB Contest the end of October." Don also states, "Licenses have been applied for and a decision is about to be made as to just which delightful place we will stay, but we know it will be next door to Victor, ZK1CG/ZK1USA, who has been a tremendous help in coordinating our trip and promises to help whenever he can. We believe that help will probably be in the form of constructive criticism and the supply of tools and duct tape when necessary. We plan to arrive on Rarotonga the evening, local time, of October 20th and will be leaving on October 29th. We anticipate antennas for all HF bands, 160 through 10 meters, and will attempt to get in a little bit of CW along with a lot of SSB. We understand that South Cooks is the most wanted country, in Europe, on RTTY, so, Don will be attempting to patch together some gear to be able to operate the other digital modes while Dave will be checking out the local dining and wine establishments. We have our wives along, this time, so will not, obviously, 'have at least one transmitter on the air 24 hours a day'. We'll do as much as we can." QSL Manager is to be named later and callsigns will be announced as soon as granted.

Hey Dan! Didn't you hear the *news* that GOR/Buster
is now the OFFICIAL DESIGNATED inheritor and Standard
Bearer for keeping up the 20 Meter Legacy of one and
the only----> James (!!) K6KPS (...drum roll Ta-Da!!)

"Callin CQ Callin CQ from beautifull Southern Cal "

REMEMBER HIM Dan......??
N9GOR is now James "Act II".
May he wear his mantle well!

Historical data for you younger hams not old enuf
or who never heard James on 20M:

Newsline 4/17/93

BRANTLEY LICENSE SUSPENDED

Still with enforcement matters comes word that James L.
Brantley, K6KPS, of Los Angeles, California has agreed to a one
year license suspension in-lieu of paying an $8000 Notice of
Apparent Liability to Monetary Forfeiture issued against him by

the FCC last year.
On June 3, 1992 Brantley was fined $7000 for malicious interference to other amateur stations and an additional $1000 for making one-way transmissions. The commission alleged that K6KPS had made one-way repetitive transmissions that consisted of calls that were not actually intended to establish two-way amateur radio communications.
After receiving the notice, the FCC says that Brantley replied that he could not afford to pay an $8000 fine. So, he was given the option of the years suspension in its place. K6KPS reportedly has mailed his license to the FCC which will hold it for the period of suspension. The FCC said that it obtained the evidence against Brantley from complaints by other area radio amateurs and by its own mobile unit and field office monitoring.

Phil,

Hummmm. If you can not transmit CW and its not a Amatuer Band,
could the FCC allow Tech to operate on the band?

What was the FCC reasoning for the allocation?

Will five channel enable a significate amount increase
communications to make this worth the effort?

Larry, KC8EPO

No no no Bro. Les .. he was working really hard to get ready for the rrrrroooool llllllll ccccccaaaaaaaallllllllll.

Maybe he had to climb up a really high tower all day long and install a 12 element full spaced monobander for 20 meters.

That way he could make the dishes fall out of the cupboard at Sigster's house. Sure glad the rusty-trusty R4C has an RF gain control or else the rrrrooooollllll cccaaaaallll might cause the ol' frigerator box here to break apart at the seams.

I heard KB1EVE on 313 this afternoon. And they said N9GOR was on yesterday. Now all we need is WB2OTK and Sigster and Bro. John to come back and get ready for the rrrrrrooooool llllllll ccccaaaaaallllllllll cause it's gonna be any day now.

I wanna hear you on there, too, Bro. Les.

On an international basis it's not a ham band, but domestically the
FCC is allowing ham operation on those channels. Until and unless
the international requirements for a code test are lifted, it's a
safe bet that non-code-exam hams won't be allowed there. It's a
Catch-22 situation.

>What was the FCC reasoning for the allocation?

It was requested as an "intermediate band" between 80/75 meters and
40 meters. It would have been a wider (150 kHz) allocation without
channelization except that the NTIA - the "landlord" of that portion
of the spectrum - disagreed, hence the detailed restricted operation.

>Will five channel enable a significate amount increase communications
>to make this worth the effort?

Personal opinion - I doubt it. I would be happy if I were proved
wrong, though.

Phil,

I realize that the FCC will not change the 5mhz allocation at this point.
But could they allow Techs to operate, and not violate the ITU treaty?

And, if they did violate the treaty, what would be ITU's recourse?

If the Morse code require were determined to be unnecessary,
not in conformity with 5 USC 706, and ITU rule S25.5 remained
after WRC 2003, how would you think the court should decide
when presented with the question of no-code operation on
amateur HF bands?

Or, what are the limitation of ITU rule into the domestic
FCC rules? Your comments about some of the legal battles
between US AM broadcast stations was very interesting.
What happens when one station is in Canada, and the other is in
the USA. Probably take 100 years to resolve.

Source record: 66467

Full story at URL:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-105A1.doc

In a nut shell, quote "In the Notice, the Commission proposed to establish a secondary allocation to the amateur radio service in the 5250-5400 MHz band in response to ARRL's Petition for Rulemaking.[1] ARRL stated that an allocation in the 5250-5400 kHz band would enhance amateur emergency communications and experimentation in the HF range when propagation conditions are not favorable for communication in the 3000 kHz and 7000 kHz bands." Unquote

So reasons are:
1. ARRL petitioned for it
2. To enhance amateur emergency communications and experimentation in the HF range when propagation conditions are not favorable for communication in the 3000 kHz and 7000 kHz bands
3. FCC sed so

Reasons enough, wouldn't you say

As usual the 'ANON IDIOT' don't get the point. I could care less about Rich WHITEN. And yes he is a asshole, and yes I agree he turned it in himself. BUT THATS NOT WHAT IM TALKING ABOUT.

Im talking about BUSTER running his mouth and FINALLY ADMITTING what he did.

Now if you got the balls come on here and tell us who you are. Oh never mind. Your one of the goofs thats been harrassing folks for years on the air, right?

And BTW I don't give one damn if you didn't like me saying what I did to you. You had and have NO RIGHT to do what you do on the air. Go ahead and deny it 'ANON IDIOT'.

The new place for 'Hams to be'.. Better range than CB or FRS...It's
the new MURS radio service. (151.82 Mhz., 151.88 Mhz.)

Don't know if any radios sold for these freqs. yet, but Radio Shack
allegedly has them! Hear many sigs there from folks who have 'mods'
on their radio for out of band 151 Mhz. operation. There is no license
required. There is a power limit, but sounds like no one cares about
that!!

Really. Your CB antenna must suck. I can talk over 50 miles on
sideband from my CB. I did over 7 miles from a rooftop to a
MURS radio (19-1210) and a stock $10 Cobra FRS radio one night.

Fine, so let's see international broadcasters interloping on the ham
bands.

A treaty is an agreement, likely based on some tradeoffs. We'll do
this, and you won't do that.

I have no idea about how ITU could enforce things, but the minute someone
decides that the rules don't count for them, then it just makes it easier
for someone else to see the same thing. You seem to think this doesn't
matter since it's a minor thing (I'd question why it's so important
for people who haven't passed the code test to use this puny, other
than because someone sees a false loophole), but it is the very adherance
to the treaty agreements that keep things in line. If nobody sees
the point in honoring a treaty, then it all falls apart like a house
of cards. And likely other countries, if they followed suit, would
break the treaty on far bigger issues, that will impact far greater
than this puny issue.

Didn't you post the very same thing last month?

If you're such a proponent of it all, then how come you don't have a clue about what equipment is available. You make it sound like it's a new thing, just getting underfoot, when it's been around for at least a couple of years.

Amateur radio is the place to be for "hams to be". Over the years, the entry requirements have been lessened dramatically. Take a relatively simple test, and wham, they've got the same ability as this other radio service, except for no commercial use, plus a lot more potential. There's a ham band practically adjacent, so the range will be as good, and actually better.

Some other radio service is a dead end for "hams to be". If they want to be hams, they need to study for the test and get the license. If they have no interest in ham radio, then they can go to the other radio services. What real benefit does another radio service provide that will lead them to ham radio? So they can play at being hams, and then get the real thing? Maybe forty years ago, but now I gather it's so simple to pass the test (not that it wasn't thirty or forty years ago) that there's no reason for an intermediate step.

Now, there likely are people who might take up these license free radio services who can be attracted to ham radio, but likely they don't know about amateur radio, or they haven't seen radio as a hobby. But that is a very different case than promoting a license free band as a first step to ham radio.

Since WRC 2003 is likly to dump s25.5 in a few days, this is moot. It's a
pity a 60m band is not on the WRC agenda.

Amateur Radio Newsline™ Report 1347 – June 6, 2003

Amateur Radio Newsline report number 1347 with a release date of Friday, June 6th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

HIPPA affects ham radio and update on a harmonized 40 meter band. These stories and more on Amateur Radio Newsline report number 1347 coming your way right now.

(Billboard Cart Here)

**

FEDERAL LAW VS. HAM RADIO: THE CONFUSION OVER HIPPA

A new federal healthier law with the acronym HIPPA is affecting Amateur Radio. Bruce Tennant, K6PZW, takes a look at the recent implementation of the Health Insurance Portability and Accountability Act and its impact on the hobby.

--

If you are a ham with a disability and are a member of a group any other organization that has knowlege of your problem, then listen up. In order to continue receiving most benefits from such a group you are now required under Federal law to fill out and return the new Health Insurance Portability and Accountability Act privacy guidelines forms that you may have already recieved or will recieved from each group.

Its the Federal government that requires the paperwork, and signing it will allow groups that must disclose disability information in the course of routine business to continue to serve you. For hams with disabilities it means that groups like the Handi Hams can continue to provided direct assistance with license renewal or license changes, publish news of individual license upgrades, and even send a birthday greeting by the ham radio's National Traffic System.

What about individuals who do not sign the forms? They will still be able to receive some services offered by these groups, but limited to those which do not involve releasing information about their physical condition. However, in the case of the Handi Hams, a disabled ham could no longer be connected with the groups assistance community of other members and volunteers because of the new federal privacy regulations.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

Full information on the Health Insurance Portability and Accountability Act is on-line at http://aspe.hhs.gov/admnsimp/ (Tnx HandiHams, others)

**

INTERNATIONAL: 40 METER CHANGE LOOKS GOOD

ARRL Executive Vice President Dave Sumner, K1ZZ, says that prospects for a harmonized worldwide 40 meter ham band are starting to look good. Speaking at a recent Dayton Hamvention forum, Sumner says it may all hang on what the United States proposes for the upcoming World Radio Communications conference later this year:

--

Sumner Here

--

Even if a large number of delegations come up with similar proposals, Sumner says that caution is still the by-word until all the voting has been done:

--
Sumner Here
--

You can hear more of what Dave Sumner has to say regarding 40 meters and other issues on this weeks RAIN report. Its in streaming audio at www.rainreport.com. Those without web access can her it by dialing up 847-827-RAIN. Thats 847-827-7246 (RAIN, ARNewsline™)

**

HAM SPECTRUM: 5 MHZ SPOT FREQUENCIES AVAILABLE MIDNIGHT JULY 3

LOOKING FOR SOMETHING NEW IN HAM RADIO? WELL, HERE'S NEWS JUST IN FROM THE FCC AND THE ARRL. I'M ROY NEAL, K6DUE, WITH A LATE BREAKING STORY THAT HAMS HAVE BEEN WAITING A LONG TIME TO HEAR. 60 METERS. 5 MEGAHERTZ …SOON WILL BE AVAILABLE WITH

5 CHANNELS FOR YOUR PLEASURE AND INVESTIGATION. A SECONDARY FIVE CHANNEL DOMESTIC HAM RADIO ALLOCATION WILL BECOME AVAILABLE STARTING AT MIDNIGHT, THURSDAY THE THIRD OF JULY.

FEDERAL GOVERNMENT USERS ARE PRIMARY IN THE 5 MHZ BAND. AMATEURS GET FIVE CHANNELS, 2.8 KHZ WIDE, WITH CENTER FREQUENCIES OF 5332, 5348, 5368, 5373, AND 5405 KILOHERTZ.

GENERAL AND HIGHER CLASS LICENSE HOLDERS WILL BE PERMITTED TO OPERATE UPPER SIDEBAND PHONE, WITH A MAXIMUM OF 50 WATTS EFFECTIVE RADIATED POWER.

USERS ARE BEING ADVISED TO SET THEIR CARRIER FREQUENCY ONE AND A HALF KILOHERTZ LOWER THAN THE CHANNEL CENTER FREQUENCY. THE ARRL ALSO SUGGESTS RESTRICTING AUDIO BANDWIDTH TO 200 HERTZ ON THE LOW SIDE AND 2800 HERTZ ON THE HIGH END TO KEEP THE TOTAL BANDWIDTH WITHIN THE 2.8 KHZ IMPOSED BY THE FCC.

THE REPORT AND ORDER GRANTING THE NEW SPOT FREQUENCY ALLOCATION AT 5 MEGS WAS PUBLISHED IN THE FEDERAL REGISTER ON JUNE THIRD. LOOK FOR LOTS MORE ON THE SUBJECT IN THE NEAR FUTURE HERE ON THE AMATEUR RADIO NEWSLINE.

NORM. (ARRL, FCC)

**

INTERNATIONAL - SOLOMON ISLANDS: LICENSING CONFUSION

Meantime, in the Southern Hemisphere, some questions and some possible answers regarding the confused state of ham radio licensing in the Solomon Islands. Q-News Graham Kemp, VK4BB, has the details:

--

Sam Voron, VK2BVS, spoke to QNEWS from an Internet kiosk at Dubai airport. Sam was en route to Somalia, but paused just long enough to answer a few rumors regarding the Solomon Island H44 prefix licenses.

According to Voron, there had been no way for people to get a license in the Solomons because there are no exams there. So in 2002 the H44 national radio regulatory body called Spectrum printed 21 novice licenses with the call signs chosen by students at a radio school. These are people took the Unrestricted level license class of ham radio training.

But Spectrum said that it first wanted to issue Novice licenses because it felt new operators should start with an entry level ticket before moving on to a full license. But Voron admits that at least two of these licenses may have been issued with Unrestricted privileges.

According to Voron, the Secretary of the H44 national ham society has now drawn up an Unrestricted exam. Students not happy being forced into the novice license when they spent 6 months studying for the Unrestricted will be able to take the exam. If they pass, they will go directly to the Unrestricted instead of the Novice class operating privileges.

In further news just in and unsubstianted as yet, the real exam is ready. Spectrum has directed the candidates to sit for it. The school and candidates are said to be dealying because they are frightened that it may be to hard.

For the Amateur Radio Newsline, I’m Graham Kemp, VK4BB, of Q-News, down-under, in Brisbane, Australia.

--

No matter when that first upgrade test is held, it appears as if a method is at least now in place for native born Solomon Islanders to take an Amateur Radio exam. (Q-News)

FCC: KILLS RULES FOR LIGHTING DEVICE EMISSION LIMITS AT 2400-2500 MHZ

Remember a few years back when hams became very worried about degradation to the 2 point 4 Gigahertz band? This, after the FCC adopted a First Report and Order that relaxed the emission limits for R F lighting devices.

That was on June 9th of 1999 and at that time the Commission deferred to a future date action on changes to the rules to permit such devices to operate from 2400 to 2500 MHZ.

Now, with no apparent remaining interest by the lighting industry to produce RF lighting devices in that spectrum, the FCC has decided to forego any further rule change. Well, at least for the moment it has.

The whole story is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-123A1.doc on the World Wide Web. (CGC)

**

RADIO LAW: FCC ACTS TO EASE MEDIA OWNERSHIP RESTRICTIONS

Federal regulators have acted to relax rules that restrict media ownership. The change will permit companies to buy more broadcast properties and own a newspaper as well as a radio or television station in the same city.

On Monday, June 2nd the Federal Communications Commission announced that it voted 3 to 2 to adopt a series of changes favored by media companies. It now says that a single company can now own TV stations that reach 45 percent of United States households instead of the previous 35 percent limit. The agency also eased rules governing local TV ownership so one media conglomerate can own two television stations in more markets and up to three stations in the largest markets like New York or Los Angeles.

More controversial was a decision to end an age-old ban on joint ownership of a newspapers and broadcast stations in the same city. The revised rule lifts all 'cross-ownership' restrictions in markets with nine or more TV stations. Smaller markets still face some limits and cross-ownership is still banned in city’s and towns with three or fewer television outlets.

And even these rule changes are expected to face court challenges. Some media companies already indicate wanting more wide spread deregulation. Meantime consumer advocates will be seeking to reverse the deregulatory trend in favor of more local control over the print and broadcast media.

Not approached in this latest round of broadcast deregulation was the subject of direct foreign ownership of U-S broadcast properties. Currently foreign entaties and governments are banned from such ownership. But over the years there has been intensive lobbying by foreign interest groups to do away with

this ban which requires an act of Congress to lift. Most annylists say its not likely to happen in the near future. (Published news reports)

ENFORCEMENT: LOCAL CHARGES FILED AGAINST OHIO CB OPERATOR

Complaints from a group of neighbors experiencing interference on household appliances from phones and TV sets to baby monitors have resulted in a court case against a citizens band radio operator. Amateur Radio Newsline’s David Black, KB4KCH, takes a look at a most interesting case:

--

On the CB airwaves, he's said to go by the name Sugar Bear. James A Disbennet, of Lancaster, Ohio, faces first degree misdemeanor charges of operating a CB radio exceeding 4 watts. He also faces two counts of operating a CB radio without certification. The Lancaster Eagle Gazette says Disbennet was released on bond after answering a summons in Fairfield County Municipal Court May 20th.

The Lancaster City Council was the first such group in the U-S to pass an ordinance allowing the City to enforce rules set by the FCC governing the strength of CB radios. On April 10th, an assistant superintendent of the City's Electrical, Communications and Signals Department went on a transmitter hunt. The interfering signals were traced to Disbennet's home. The City then obtained a search warrant, with Lancaster police serving the warrant the following day. Officers seized four pieces of CB radio equipment worth more than a thousand dollars.

A trial date has yet to be set. If convicted, Disbennet could be hit with a 1,000 dollar fine and 180 days in jail.
For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

According to the law under which Disbennet was charged, the definition of CB radio "includes all private, two-way, short-distance voice communications service for personal or business activities of the general public. Citizens filing complaints must keep an accurate log of the interference for a minimum of four weeks and there has to be more than one complainant in order to file charges. The only exclusions to the law are for emergency communications services like police, fire and FCC licensed radio amateurs.

The complete story is in cyberspace at http://www.lancastereaglegazette.com/news/stories/20030521/localnews/339596.html. (N6RU)

**

ENFORCEMENT: FCC WITHDRAWS LETTER IN ENHANCED SSB OPERATION

Remember a stir created on April 3rd the FCC sent advisory letters several hams who run enhanced or so-called high fidelity single sideband? The FCC told

those operating the mode that the agency had received complaints from other radio amateurs alleging that the enhanced mode transmissions were using bandwidth wider than necessary. The FCC termed this as being contrary to good engineering practice.

One of those hams receiving such a notice was Anthony G. Latin, W4NSG, of Ocala Florida. Now, a month later the FCC has withdrawn its original letter to Latin, stating that it was issued to him in error. The regulatory agency also apologized to W4NSG for whatever inconvenience that letter may have caused him. No specific reason for the withdrawal of the letter was given. (FCC)

**

ENFORCEMENT: FCC ISSUES ANOTHER ENHANCED SSB WARNING

But its not over yet. This is because the FCC has issued another ham a similar warning regarding the use of enhanced SSB on the Amateur Service bands.

The May 12th letter went to Tyler Stampfli, KA0KA. Like those issued back in April, it tells the La Grange, North Carolina ham that use of enhanced Single Sideband emission with a bandwidth wider than necessary is contrary to good engineering practice. It also notes that no spectrum in the Amateur Service is designated specifically as “wideband audio” frequencies, either by Commission rule or in any informal band plans.

The FCC did not cite Stampfli. It did however request that he fully review the relevant Amateur Service rules and to make certain his station conforms to them. Also that he operate in the best interests of the Amateur Radio Service as a whole. (FCC)

**

ENFORCEMENT: BIG CELLULAR FINE

The FCC has issued Western Wireless Corporation and WWC Holdings two Notices of Apparent Liability to Monetary Forfeiture in the amount of $200,000 each. The companies are the licensee of Cellular Radio Station KNKN343 in North Dakota. The FCC says that the the companies are operating radio transmitting equipment from an unauthorized location resulting in the first fine.

The second $200,000 is the result of what the FCC says was Western Wireless for operating radio transmitting equipment from another unauthorized location. The two NAL’s wewre issued on May 5th and the companies were given the customary time to appeal.

More is on the web at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-109A1.doc and
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-234290A1.doc (FCC)

**

HAM RADIO AND THE LAW: CA HAM FILES FOR COURT COSTS

Mark Abrams, WA6DPB, the ham who recently triumphed over the city of Rancho Palos Verdes California in an antenna zoning case is headed back to court. In

an e-mail to Amateur Radio Newsline, Abrams says that his attorneys have recently completed our briefing in the 9th Circuit Court of Appeals on the issue of damages. Abrams says that he is now waiting for a court date which he expects will be around the end of August or early September. After the hearing, Abrams says that he expects to wait another 60 days for a written decision from the Court. If the Court decides in his favor he wins the right to have another trial on the amount of attorney's fees, court costs and damages. If he looses Abrams says that it will be unlikely that he will take the matter of reimbursement for his legal fees any further. (WA6DPB)

CHANGING OF THE GUARD: FRANK SCHWAB, W8OK, - S.K.

Some sad news to report. The changing of the guard in ham radio continues. This with word that Frank Schwab, W8OK, has passed away.

As we reported last week, Schwab, who helped to craft the Dayton Hamvention over a half century ago suffered a heart attack a few hours prior to this years event. At the time, the 77 year old Schwab was also fighting cancer and several other ailments.

While best known for his work in creating the Hamvention, W8OK was also a world-class D-X’er and heavily involved in public service activities. Services were held Monday June 2nd at St. Christopher's Church in Vandalia, Ohio. A page long tribute to Schwab appeared recently in the Dayton Daily News. (W8ILC)

**

TIME TO RETIRE: WISCONSIN SCHOOL CLUB GOING QRT

After over 25 years in operation, Andrew Martin, KB9ZLL, reports over qrz.com website that the Fond du Lac, Wisconsin High School's ham radio club is dissolving. This, due to the retirement of it's trustee Jeffry Hoeft, K9NC.

The club had its beginnings in the old high school building in 1972. Back then it consisted of a wire antenna and CW transciver. Today the group has operations on the high frequency bands as well as two meters and 440 Mhz. More important, the Fond du Lac club has been responcible for the licensing of nearly two dozen new hams over the years it has operated. (KB9ZKK, QRZ.COM)

**

NET NEWS: NEW ECHOLINK VHF CONFERENCE

Ron Pastterson, W6FM, reports the creation of a new conference on Echolink devoted to the discussion of all aspects of VHF and UHF weak signal operating. The name of the on-line gathering is *VHF_TALK* and it was created to assist in coordinating skeds, discussing band openings and anything else related to operations in the world above 50 Mhz.

For those who aren't familiar, Echolink is a voice over I P system available to licensed amateurs. For more information on it and the new conference take your web browser over to www.echolink.org. Ron adds that the conference will hopefully soon be avail over the world wide Internet Repeater linking Project as well. Information on IRLP is in cyberspace at www.irlp.net . (VHF Reflector)

**

ON THE WEB: AMATEUR REPEATER BUILDERS HOME PAGE GOES QRT

The Amateur Repeater Builders Home Page appears to have gone QRT and its owner is blaming the attitudes of some hams for its demise. In a posting to the website, its administrator says in part that due to an unfortunate series of events resulting from this groups actions the Amateur Repeater Builders Page page will no longer be maintained.

Whats involved appears to be a dispute over universal recognition and acceptance of the the Northern California Amateur Radio band plan and what the board administrator terms as intentional interference to coordinated 420 links with an ATV transmitter. He says that the FCC's lack of time and/or interest in addressing the issue has caused him to become thoroughly disgusted and that he is -- quote -- ‘Gone fishing!’

But all might not be lost. Kevin Custer, W3KKC, says that he plans to contact the Amateur Repeater Builders Home Page owner to try to obtain the rights to the website and host it himself. He says he will let everyone know what happens over the Yahoogroups based Repeater Owners remailer. (W3KKC, VHF Reflector)

THAT FINAL ITEM: THE OWLS ARE BACK

And finally this week, its time to get ready to T-Hunt down those ever elusive Burrowing Owls. And this year there’s another creature to look for -- bats. Heres Joe Moell, K0OV, with all the details:

--

For five years, ham operators and scanner listeners in western states have monitored VHF frequencies to help researchers in Saskatchewan and Washington state study the migratory behavior of Western Burrowing Owls, a species of concern. Now three more monitoring projects are beginning, and this time we need volunteers in south-central and southeastern states.

A biologist at the University of South Florida at Tampa (USF) is studying Florida Burrowing Owls. That's a slightly different subspecies from the Western Burrowing Owl. It is thought that their range is limited to Florida and the Keys, but there is one 40-year-old report of a sighting in North Carolina. Researchers have banded the legs of these birds in the past, but none of the banded owls have been recovered after leaving their Florida homes.

For the new study, some Florida Burrowing Owl chicks are being radio-tagged right now. Local researchers are tracking them as they leave their nests, learning to forage. In the summer, the young owls are expected to take off for parts unknown. USF wants volunteers throughout the southeast to listen for the VHF radio tags in an attempt to determine their routes and final destinations.

That's project #1. Number two involves Mexican Long-nosed Bats. For about a month beginning in mid-June, Bat Conservation International wants volunteers to join a team that will track their movements in and around Big Bend National Park in Texas as they pollinate century cactus plants. Physically fit hikers are especially wanted, but a few vehicle-based monitors will also be helpful. And there may be opportunities for some home monitors. Hams with VHF radio direction finding equipment are particularly needed.

Project #3 is a study of orphaned Great Horned Owls. It's being done by the Heard Natural Science Museum and Wildlife Sanctuary in McKinney, Texas, along with the University of North Texas. After being raised at the sanctuary, up to two dozen of these owls will be released into the wild this summer, with radio tags attached to help determine their dispersal patterns and survival rates. Volunteers are needed to monitor for the radio tags, especially in the Denton and Collin County areas. Great Horned Owls are territorial and do not migrate long distances.

My Web site on radio direction finding carries the latest details, frequencies, and contact information for all three projects. Point your browser to www.homingin.com HomingIn is one word --- homingin.com

Thanks in advance for your help! From southern California, where Burrowing Owls are diminishing but still can be seen in the farmlands, this is Joe Moell, Kay-zero-oscar-victor, for Amateur Radio Newsline.

--

Again, that website is www.homingin.com. (K0OV, ARNewsline™)

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Norm Seeley, KI7UP, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

3982. First Rig Questions

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-09 20:38:14 UTC
From: Greg <cputec@hotmail.com>
Message-ID: <We6Fa.2649$Jw6.1945132@news1.news.adelphia.net>
Source record: 66478

I am about ready to purchase my first rig. I have basically decided on a 2 meter/440 Kenwood TM-G707A. I have two things I am uncertain on. First off, since this is a mobile radio, I will probably be using some sort of mag mount antenna for this rig, even though it's mostly going to be used inside my home. For a mag mount antenna what kind of tuning is involved? Do these antennas need to be tuned? Or basically are they ready to go provided that the impedance is matched, i.e. for this rig I need an antenna with an impedance of 50 Ohms. Secondly, if this antenna were placed somewhere within the house, how far away should it be from people to protect them from RF levels if the rig is operating with an output of 50 watts?

I know these are really newbie questions, but any help would be greatly appreciated!!!
Greg

> Phil,
>
> Hummmm. If you can not transmit CW and its not a Amatuer Band,
> could the FCC allow Tech to operate on the band?

It is an amateur HF set of frequencies or channels and would, it seems,
possibly allow techs to be given permission to operate. The FCC
would have to make a rule change to do that. Does anyone know if a tech
is allowed to operate on the speial 7mhz channel in Alaska?

> What was the FCC reasoning for the allocation?

To allow amateurs to operate there. The ARRL had petitioned for
a band. The FCC gave 5 discrete frequencies instead and specified
USB mode only.

> Will five channel enable a significate amount increase
> communications to make this worth the effort?

Depends on how you define worthwhile.
Will this aleviate any "crowding" on other HF bands? Not
at all. Does this provide a unique and beneficial set
of designated emergency channels? Yes, and that should
prove worthwhile if for no other reason.

Cheers,
Bill K2UNK

It should be be moot, but I would not bet on it until its sign and sealed.
The requirement been on international life-support for a least ten years.

But my question to Phil Kane was, since it not an ITU amateur alllocation,
could the FCC allow Techs to operate. The band is already being used
as an uppper SSB band by person without CW proficiency.

The FCC already is allowing citizens without licenses to operate below 30
mhz on
40 channels using upper and lower side band, and AM modes.

In other word, is the code requirement a band requirement or licensee
requirement?
Why would a person need CW proficiency to use a band the bars the use of CW?

Larry

Well, now, since nobody's handing out subsidized
Kotex in the cradle-to-grave Clintonista fashion,
your instructions simply cannot be carried out.

Simply put, it is a case of disenfranchisement.

CB is not amateur radio. CB as we know it was a big mistake that
the FCC didn't want to admit making and couldn't undo because it was
too late. IIRC the Dutch undid CB my making examples out of those
who refused to stop operating after it was banned in the early 1970s.

>In other word, is the code requirement a band requirement or licensee

It's a licensee requirement. Perhaps the FCC feels that non-code
folks are not qualified to operate there. Perhaps the moon is made
of green cheese.

In regulatory law, one does not ask "why", one asks "how". This is
reality.

It is a document that guarantees the rights of the citizens of America.
It is no longer valid, however, because leftist politicians have twisted it
into a document which guarantees the rights of government in this country.
States rights? Going...
Free Speech? Going...
2nd Amendment? Gone

I'm new to Ham Radio (just took the exam Saturday), and am hoping to use packet radio for a future project. I had a couple basic questions in regards to packet radio I was hoping more experienced individuals could answer.

1. The AX.25 protocol is used between the TNC and the radio only, correct?

2. Text strings alone (followed by a carriage return) can be exported to the TNC in command mode, and the packet will be created/transmitted?

Thanks in advance for any help anyone can provide!
Dave

I doubt it and I'd be very surprised if the FCC allowed Techs to use
any of the 60M freqs, Alaska, here and otherwise. I expect that all
the usual Part 97 rules apply to all freqs below 30 mHz or we would
have heard about any exceptions by now.

But likely it would depend on the status of the frequency. These
new 5MHz channels are now allocated to amateur radio in the US,
where any type of hobby use is permitted.

From the vague details I've seen, I gather the Alaska channel is
for emergency use only. Is it an "amateur channel", or a channel
for emergency that also allows someone licensed in another service
to use their existing radios to help in emergencies?

CAP and MARS could be considered a similar situation. They aren't
amateur frequencies (well, not the out of ham band ones), and while
a requirement is a ham license, it isn't really hobby operation and
there are restrictions place on the use of those frequencies.

The treaty about a CW test for hams is specific to amateur radio.
Any other service, there is no such requirement (and beyond international
treaties, there is ample room for each country to decide how to use
radio). So for these non-amateur and non-hobby frequencies, I don't see why
the treaty applies.

Of course, those auxiliary services may want a certain level of
skill, that incorrectly or correctly they judge based on the license
level, and that may keep some hams from participating.

The latter. The Part 97 Rule covering that state "Any station...."
and stations in Parts 80 (Maritime), 87 (Aviation), and 90 (Land
Mobile) have similar paragraphs authorizing such use.

CBers are not so authorized.......

And the new 5mhz allocations are for amateur radio licensees to use. In short, in the US they are amateur
radio allocations on a secondary basis. Hams must yield to the primary users of the allocations. Trying to
make the code requirement disappear on this basis won't fly.

In simple terms, because it applies to amateur radio operators and this allocation is, again, an amateur
radio allocaton. Nothing says that it has to be a worldwide allocation for international treaties to apply,
except those who are creatively trying to avoid reality.

Go back and reread what I said, and especially the bit I was responding to.
Someone wondered if the no-code technicians were allowed to use the
Alaska emergency frequency. Someone else said likely not.

I was trying to point out that the Alaska frequency, like CAP and MARS,
is actually another service, so code requirements would not apply.

You're still confused, Mike. If an amateur radio license of General class or higher is required for *hams* to
access that frequency, a code requirement currently does apply, within the USA. YMMV in Canada.

Dick

>
One of those new "channels" is the same as one in the UK, and so far as
I know, the FCC
didn't say that we were not allowed to have QSOs with the UK hams there.
Thus I'd think
it would fall under the treaty rules for coded hams only.

>
>The FCC already is allowing citizens without licenses to operate below 30
>mhz on
>40 channels using upper and lower side band, and AM modes.
>
The CBers are not supposed to talk to anyone in other countries. Thus
it is an "internal"
service. And it's not ham radio. The treaty talks about code for
hams below 30MHz.

>
>In other word, is the code requirement a band requirement or licensee
>requirement?
>Why would a person need CW proficiency to use a band the bars the use of CW?
>
>
There's a rule that mentions "generally accepted ham practices" and that
it is bad ham procedure
to operate modes outside the generally accepted band plans. Which means
don't use CW in the
middle of SSB country. Also don't use LSB on 20m. Or go simplex in 2m
on a frequency that
happens to be the input frequency of the local repeater. This would
effectively "bar" the use of
CW on certain portions of HF ham bands. But you need to be coded to get
on the HF bands.

Aside from all the filthy wording some of you have used, let's really tell it how we, the American Public see Ms. Stewart.

Everything she did is and was for "Martha" and "Martha" ONLY.

She is no different than any other person in our country. We want to make all the money we can.

She should not be receiving any special treatment by the FBI or any other law enforcement force.
I.E.: Taking her in a back door of the Federal Building to be printed. That was wrong. Would they take any one else in the back door? "NO".

She is going to prison, like it or not.

Awwwww-rrrrright, Hammer-Man ! ! ! I knew you'd be back someday ! ! !

>I have heard from a reliable source that the host of characters are being
aligned for possibly a
"FOURTH OF JULY" celebration
>
Will this be the return of WB2OTK ? I heard his license is being restored soon. And AF2Y is getting clearance from the homeowners association to install a huge tower and stuff so he can check in, too. Who knows, maybe N9GOR finally figured out "where the white women at".

Will Bro. John give the devotional to get the rrrrooooollllll ccccaaaalllll started? It's enough to cause him to give a 3 hour sermon, cause the heatherens took over 313 since the last rrroooooollllll ccccaalllllll, you know.

> I plan to call my buddy W4NTI and make sure he won't be too shocked at the
events of the
day.
>
Suggestion .. give a list to the Lewis-Louis agency and have them find all the necessary parties. Those guys can turn a rrrrroooooollllll ccccaaaaalllllll into a national holiday. I heard that the post office and the VA are gonna be closed next year during S-F '04. They can probably do the same for the next rrrrroooooollllll ccccaaaalllllllllll ! ! ! Give 'em a shout and see what they can do. Maybe even have a rrrrroooooollllll ccccaaaalllllll reunion at Dayton next year, back to back with S-F '04. We could use the Louis-Lewis fleet of lear jets to bring in the guests of honor.

A friend K6LLL has a beacon on 10M at 28.2035 MHz and has received QSL's
from all states except Nevada, Idaho, and Wyoming.

Give a listen and help him complete his WAS Beacon project.
With sporadic E maybe those states can hear his beacon.

His URL:
http://www.tlg.uci.edu/~ted/radio_page.html

His map is out of date but he needs only 3 to complete.

Thanks for any help

What bothers me is that lying to suspects and altering evidence is standard police behavior. Neither police nor courts consider it wrong, let alone illegal, to offer a suspect a plea bargain then tell him/her that they have witnesses that don't exist, that he failed a lie detector test he actually passed, or even show him doctored pictures to convince him to plead guilty, whether he is or not; never mind the real perp escapes. But if you lie it's obstruction of justice.

From: ebrown2841@aol.com
Message-ID: <20030611145912.04044.00001751@mb-m16.aol.com>
Source record: 66381

I'm giving some thought to getting into QRP operation as a new challange and was wondering if I should stick with my present 100 watt HF rig, just backing down the power on it, or spring for one of those new low power rigs such as the IC-703. What do you think and what do you use?

Emory, KD2DN

I'll settle for just one hour of the great WOC!!

(aKa: "Bathroom Man")

I really should send Bathroom Man a check for $50.00

Here's why...

Four or five Years ago, when he and 14313 was
in it's 'active stage', I got to talking with him about a problem
I was having with the Toilet Tank in my #2 bathroom
upstairs. Namely, a ball/flapper valve that just would not
seal 100%. Water was still dripping into the overflow pipe
wasting water.

Well paint-me-pink-and-call-me-Berry if ole Bathroom
Man did not *accuratley and correctly* diagnosed the
problem via the symptoms I told him I was having
over the air, and even told me *exactly* which parts
to buy at Home Depot Plumbing Dept to fix the problem!!

The toilet has not leaked SINCE and has worked flawlessely
even Years later!!

Thanks Bathroom Man. I couldn't give a *rat's ass* if you
were Un-Id'ed on the air, you helped me fix my toilet tank
and for that your OK in my book !!

Dave the RedEyed Loon

Source record: 66384

Emory, I just use my Kenwood TS-570S and back down the power until the bird meter in-line reads 5 Watts and operate SSB and CW on all HF + 6M Bands

When operating QRP, I always call with 5 Watts, never with 100 Watts, then say can u hear me on 5 Watts -- tis cheating.

My Furtherest confirmed QRP contact was on 15M - Mozambique C9 --- 1,745 miles per Watt !!! No biggie as a 12M claimed record below shows.

A claimed QRP miles/watt record on 12M (not Me) is claimed at URL:
http://www.madisoncounty.net/~kj5tf/12mquad.html
12 milliwatts - KJ5TF to CO8LY is 1531 miles, for 127,583 miles per watt.

DXCC - QRP is achievable -- and QSL cards are not required see URL;

http://www.arrl.org/awards/#qrpdxcc

DXCC - QRP is a real challenge as is Worked all States (cards required for WAS)

Antenna here is a vertical -- a yagi will do a lot better of course.

I figure anyone who would attempt to be deceptive about the method
(ie auction vs sale) to change ownership of something may be just as
deceptive about the condition of the equipment.

I avoid them.

Mike

>You're still confused, Mike. If an amateur radio license of General
>class or higher is required for *hams* to access that frequency, a
>code requirement currently does apply, within the USA. YMMV in Canada.

But the Rule (Sect 97.401(d)) says in its totality:

(d) A station in, or within 92.6 km of, Alaska may transmit
emissions J3E and R3E on the channel at 5.1675 MHz for
emergency communications. The channel must be shared with
stations licensed in the Alaska-private fixed service. The
transmitter power must not exceed 150 W.

That's the only mention of that frequency/channel in the Rules
Governing the Amateur Service. There is no mention elsewhere in
Part 97 of class of operator license authorized to do that.

If ya' REALLY want me to file a Petition for Declaratory Ruling and
get an "officia;" answer, I gotta charge by the word... <ggg>

What does this have to do with Shortwave? I do not understand why
people say how much they hate off-topic trolls, yes they are trolls.
And then they go off and make off-topic posts of there own. There are
other fourms where this can be discussed.

Welcome to my killfile, man it's getting full.

Actually, it's kind of reactionary due to the assholes who pop in on a
regular basis with repeated ads for auctions on EBay. Guys who pop
in to announce a 'sale' that's really an auction. Followed by repeated
messages of "Only so many days left to this sale" postings. And usually
multiple messages for multiple items, each posted multiple times. Some
of them even for commercial offerings, not really private offerings,
regardless of whether you classify them as a sale or an auction.

You stepped in the shit because you used your keyboard before you used
your eyes. Gotta check out how things work before you just 'dive in'.
Or do you always just dive headfirst into unknown murky waters?

Mike

If they had one nit of class, they would chastise you in a private, polite
message. The fact that it's done publicly causes you to come to the
conclusions about them that you did. You are probably right.

Giving advice on a cable show is an affirmation of values?

> Martha Steward (The Public Persona) to many (most) Americans
> represents the right way of 'living the good life' of traditional
> personal values and wholesome family values. Preaching the "Art of
> Being" a Good Home Maker and Being a Good Hostess.

Where are you getting this from? From what I've seen of her
show, she gives advice on cooking and decorating -- nothing
(good or bad) relating to "values".

If, on her show, she told you to put whip cream on cranberry
popsicles, what "values" would she be passing along to you?

> To the Women's Libbers and the Left Wing Press:
> - - - Martha Steward's "Public Persona" is everything that is wrong
> with the traditional role of women in the American Family and Society
> as a whole.

Even the "public persona" is a myth ...

Insider trading is different from other white collar crimes:
it strikes at the sacred heart of capitalism (IOW, this
particular white collar crime particularly offends the rich
and powerful) -- and it most certainly is prosecuted (ask
Sam Waksal).

Ah, so. The old global rule about "anything goes in an emergency" applies here, I see. So all you need is a radio station capable of transmitting on the frequency ---- and an emergency! And be ready to explain why you had the radio station so long before the emergency, like the kid in San Diego who transmitted on the Sheriff's channel.

> simple for you. you need to learn to pay atention better.

What's "atention"? Is it something to do with camping?

> Bottom line. Martha will go free.

Who cares? Martha Stewart is a criminal, and has been caught. Whether she goes to prison or not will be decided by the price of the lawyer she can afford, and will have NOTHING to do with Letterman.

Other criminals who have to be indicted and tried include "President" Bush (war crimes), Colin Powell (war crimes, aiding and abetting an enemy power, insider trading), and most of the senior politicians in both the USA and the UK should be prosecuted....

Remember - you can always tell when a politician is lying - his mouth's open!

Yes Bill that is up to date and infact here is the rest of his info:

Bill Conduit, Age 54
newknews@msn.com
myway@ix.netcom.com
uknow@ccnet.com
76601.713@compuserve.com
408 13th St. # 229

Oakland Calif 94612

I was going to post his phone number but my boss said not to ;-(For a guy thats 54 he acts and sounds more like a 5 or 4 year old.

And I have now setup his latest nickname in the garbage can so I don't even download anything he has to say.

Premeditated emergency preparedness. What was once a virtue is now a
crime? You should read Orwell.

like the kid in San Diego
> who transmitted on the Sheriff's channel.

Is the San Diego Sheriff using J3E and R3E on 5.1675 MHz? Did the kid
use J3E and R3E on 5.1675 MHz? If not, then its nothing like it.

> > If ya' REALLY want me to file a Petition for Declaratory Ruling and

It is code-free. Don't you know what J3E and R3E are?

Good grief. Yet another case of a elderly, jealous, and vindictive ham PO'd at the next generation and how unworthy they might be to share in HIS hobby. If they can't hobble a radio together out of a foil chewing gum wrapper and a double edged razor blade then the hell with 'em. Now where did I put my microphone?

FWIW the little (FCC type accepted) FT-817 ham xcvr has been able to
transmit on 5.1675 out of the box ever since it was introduced. It's
the only ham xcvr which has incorporated the ability to make use of
the provisions of Sect 97.401(d) that I know about so far. And any
dweeb can walk into any HRO and buy an FT-817.

There are still a number of people that think it is illegal to own a piece
of
radio gear.

As far as I know, there are only two exceptions (one being cell stuff).

There is NO requirement for permits, licenses, visas, whatever, to
POSSESS equipment for receiving or transmitting in the US.

I see the BS about you 'MUST' have a HAM license to purchase. But
that is a seller policy. It is NOT law.

Oh, the other exception? Technically... If you have a CB set with
'expanded' capabilities, possession is considered proof of use.
UNLESS you have a HAM ticket AND the equipment is only hooked
up as HAM equipment. Like using a modified CB set as the core of
a 2M transverter to get on 2M SSB. But then, once you do that,
the CB set isn't really a CB set anymore, is it? It's just 'parts' that are
now 'rebuilt' into a 2M SSB setup. (Which is how I have an old
TRC-457 hooked up to a homebuilt Hamtronics transverter setup.)
Although technically just having it could still get you in trouble I
suppose...

Mike

Back off the mike. Is it an amplified mike? Turn it down.
Put some resistance in the audio wire from the mike...

The point is that a ham, including novices and techs, appears to
be able to use 5.1675 in the abcense of any other statements in
Part 97.

Cheers,
Bill K2UNK

Well Look at this:
alt.ham-radio.marketplace,rec.radio.amateur.misc,rec.radio.swap
I see nothing about E-BAY in any of these...Well DUH
Also go on e-bay and look for a post that has
alt.ham-radio.marketplace,rec.radio.amateur.misc,rec.radio.swap
in it. And show me. I don't know about the rest of you but I am sick of
friggin e-bay. You end up paying too much and you can get screwed very easy.
So if some people would use a bit of common sence there would be no problem.
But seems there isn't much of that around anymore. And Nick if I offended
you I guess I owe a you a " I'm sorry " you can pick that up on e-bay too.
Dave

Disagree. The rule WRT to Techs is no Techs below 30 mHz except for
coded Techs who can operate down to 28.000. Sect. 97.401(d) does not
include an exception to that rule. Ditto Novices by virtue of their
set of restrictions.

You should read about the kid in San Diego, a licensed ham who transmitted on the Sheriffs frequency when he thought he had a valid emergency reason.

>

Ah. More of what passes for Brain logic. Somehow FCC seems to view it as a different manner.
No surprises there, either,

I dont' think so, Bill. More like *anyhone* can use 5.1675 without regard to whether or not they're licensed at all. Of course that isn't true of the five new 60 meter channels.

Yes they can, and you might bring yourself up to date on the case mentioned.
In San Diego a few years ago a licensed ham uses his "oepned up" 2-meter
walkie talkie to call the San Diego county sheriff's office on their channel
when he had what he considered to be an appropriate emergency.
Not only did the FCC office in San Diego confiscate his radio, they made
statements to the effect that the mere possession of a radio capable of doing
that was not legal.
Far as I ever learned they did NOT return his radio to him.

It is MH-10f8 without amlifier.
Using resistance directly in the mike will affect FM operation too.

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday June 15th 2003
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

Far as I recall, IF it is the incident you're referring to, it was just a
motorist assistance. There was no immediate danger to property or
life involved, just a car off the road.

If the story I heard at the time was accurate, the kid deserved to have
his radio taken, and probably his license.

Mike

> Ah. More of what passes for Brain logic. Somehow FCC seems to view it as a different
manner.
> No surprises there, either,

DICK, the FCC views the J3E and R3E Alaska frequency on 5.1675 MHz
differently than the San Diego Sheriff's frequency on VHF. Really.
That's why its codified in Part 97, which you might want to read
sometime.

For you to imply that there is any connection between licensed
amateurs in Alaska using 5.1675 for an emergency in Alaska, and the
use of the San Diego Sheriff's VHF frequency only shows that you're
not a very bright fellow.

> > > > If ya' REALLY want me to file a Petition for Declaratory Ruling and

> > It is code-free.
>
> Just like Bear Brian -make that Teddy Bear Brain.

DICK, when the FCC states J3E and R3E, they don't mean A1A. Really.

> > Don't you know what J3E and R3E are?
>
> Don't you know what license qualifications are? Evidently not. No more than you know what
> permission is.

DICK, Alaska hams have permission to use J3E and R3E on 5.1675 MHz for
emergency purposes. At least the FCC thinks so. Really.

> > Good grief. Yet another case of a elderly, jealous, and vindictive

FCC San Diego has a big problem with competence.
It is staffed by unprofessional moronic boobs, who don't know a
volt from a ohm, let alone how to interpret communications law.
There is also a major issue involving prejudice at this office
against the local Hispanic community.

I believe the police confiscated the radio...not the FCC.
If the FCC made the statements you claim, why then would
the radio be confiscated and never returned?
```

Thank you for bringing this recent news of
the decision by QCWA to our attention.

I would qualify for QCWA membership in Nov
of this Year, but after reading this, as far as I am
concerned QCWA can "go someplace" along with the
grey horse they rode in upon....

Actually, common sense prevails.

Once you modify the equipment, it no longer has it's 'type acceptance'
or whatever it's called these days and is no longer legal for CB use.
Even ON valid CB frequencies at valid CB parameters. It is just a
pie of parts that you now can use as HAM equipment, if you so choose.

There is nothing wrong using it on 10M as long as the use of it adheres
to valid amateur restrictions.

Mike

Wrong story. This case was when a hiker fell in the mountains with a
disabling injury, and the ham called on the sheriffs channel after trying a few
ham repeaters and getting no answer. The injury evidently turned out to be not
so serious, and the sheriff was PO'ed because the ham used his frequency. The
story received a lot of publicity at the time. Popular Communications also had
a story on it.
Of course it's difficult to separate the facts from the spin, but the FCC
SanDiego district Director was quoted as stating that the ham had no authority
to possess the radio capable of transmitting on the sheriff's channel.

4090. Two 'shortwave loonies' link(s) - very very funny!

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-13 20:36:06 UTC
From: cha-ching <flocofpig32@yahoo.com>
Message-ID: <3eea36d6@snipnews.snip.net>
Source record: 66287
Cross-posted to: rec.radio.amateur.misc,rec.radio.cb,rec.radio.scanner,rec.radio.shortwave,soc.culture.british

Two GREAT links of pages written by shortwave loons:

http://www.tackamarks.freeservers.com/index.html

This link above is the *new home page* for the
"true believers" of Michigan Militia (jailbird)
Mark Koernkie. Better known as "Mark from Michigan"
he was the MC of the old Intellegence (??) Report
a now long defunct program on WGTG shortwave.
During this time it was on, Mark promoted a rather
novelly kooky idea that the reflective Inventory
Control Stickers affixed to the back of Michigan State
DOT road signs were actually encoded/encrypted
"tactical markers" (tacmar's) that would be used later
by UN blue helmeted foreign troops to round up Militia
Patriots, bible thumpers, Seventh-Day Adventists, bad
Little League coaches, UFO abductees and those bad
people who "cork" MLB baseball bats... (lions and bears
and tigeres OH MY!) Well, ole Mark was tossed into
the slammer for ARMED BANK ROBBERY about two
Years ago, but this did not stop his followers in Michigan
and other "rust belt" states from latching-onto this kooky
theory. Watch out for those nasty road signs with stickers
on the bacsk folks! They're EEEEEEEVIL!!!!!

http://www.tackamarks.freeservers.com/photo2.html

(Note: Just to *prove* just how BAD these road signs
are, take a look at the link above to page 2 of the aforementioned
URL. Here you will see a sign whth two kids on a
teeter-totter, or see-saw, which is, in Mark's militialoon
follower's minds, points to the site of an NCB/WMD
evacuation point.....I KID YOU NOT FOLKS!!!

Finally....what I consider to be THE MOTHER OF ALL
KOOK MILITIA SITES:

HERE: http://www.raven1.net/

Chips-in-your-ass, tinfoil hats, NWO mind
control, goofy garden churches...it's ALL HERE FOLKS!!

A friend of mine described the above
SHORTWAVE LOON page to a
degree which is un-matched in it's accuracy.
Here is his description of : http://www.raven1.net/

Forgot to add this!

Here's something all you Ham Radio Operators
can TRY AT HOME with your radios. (assuming
of course you don't care if you blow them up
or smoke them on the process.....)

clik here: http://www.raven1.net/demoidea.htm

CALLED: "Mind Control via 146.520 Mhz"

So, bottom line: Novices and Tecs have exactly the same authority as unlicensed individuals in this instance.
It's a simple statement of fact.

When they sent me the spam to join QCWA, I told 'em I wasn't old
enough. A ham since 1957, I'm ONLY 57!

QCWA and ARRL trying to take ham radio back to 1938 is just wrong and
will lead to its early demise.

4095. IRLP Presentations on-line from Las Vegas

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-13 23:20:09 UTC
From: sandman <>
Message-ID: <cvmkev4un0d08lov7eln6dhl1h3rvd6jje@4ax.com>
Source record: 66292

The Presentations done by Dave VE7LTD at the Las Vegas conference in
2003 are available form the Web.

http://dregs.us/lasvegas2003/

Topics covered are:

Audio setup for nodes
Discussion of Sound Card Types
Crosslinking linking systems
Echo-IRLP project
The History of IRLP
What happens when an IRLP call is setup
Possible new hardware
Windows PC client access to IRLP nodes
IRLP current status with Redhat Linux
What is required to support an IRLP reflector
New distributed server architecture

These are audio/video presentations and are VERY interesting. If
you've ever been interested in IRLP and wonder whats under the "lid",
come havce a look !

73's Pete..vk2yx

Pay attention and take it back onto the QCWA refelctor or digest.
The issue has been resolved.

I can agree with that statement because the ONLY purpose allowed
for 5.1675 IS an emergency.

Cheers,
Bill K2UNK

All nice enough for a Dayton fest, but....
For me to pay $8 to park in the handicap area for one day
and still have to walk for ever to get to the front door. harrumph!
Then to cough up another $22 it just isn't worth it for me to
return. Didn't find any of them really good deals but did
manage to stop by and pay up my 10 10 dues for another few years.
I guess the catalog and ebay will be the hamfests for me from now on.

Sorry Y'all 73

Hello,

I am interested in buying a rotor controller for an Alliance model HD-73
rotor system. The controller box is a dual speed with a 6 wire interconnect.

To see a photo of the controller, follow this link:
http://www.bit-net.com/~russ/alliance.jpg

Ideally, I would like a working unit in reasonably good cosmetic condition
but I'm willing to consider whatever may be available and not afraid of
repairing a broken unit.

Thanks for looking!
73,
Russ KB1GKN

Well I guess if YOU say so, then it MUST be so, huh?

I won't rip into you the way I would if you were in full control of
your faculties. I actually feel sorry for you- alone in a room with
nothing better to do than stand up for Martha Stewart (awful spelling
notwithstanding), the blue light of the moniter reflecting off your
pale skin, empty soft drink and fast food remnants everywhere...and
tears of anger rolling off your face and you read the replies to your
simpleton posts.

Your hollow, shallow, empty life is unspectacular in all respects: you
identify with a greedy, stupid woman whose hunger for power is
legendary, and whose time has come for an orange jumpsuit and
handcuffs.

You're a lonely, sad individual with absolutely nothing going for you.
Get a life. Borrow one if you have to.

Will you commit suicide if Martha goes to jail?

Welcome to my KF. In your case 'it's a good thing'.

I have for sale a like new Kenwood TM-2570A 2 meter Transceiver. This is the 70 watt version of the top of the line Kenwood FM transceiver. It has been used very little, and comes with the hard to find TU-7 Tone board installed. The dial lights all work and are original. It comes with the original box, manual, handmic, and power cable. This is a really nice transceiver. It works great and I get a lot of compliments on the audio. Price is $145. Thanks, Charlie Hugg, K5MBX

Hell, Detroit used Bell Isle in the 67 riots. Perfect, only one
bridge. But the bums still bought the stadium with public money.

Hey, Al. What is the problem?
Too much time on your hands?
Nobody to talk to?
Getting old?
Wife ignores you?
Friends shun you?
Prostate meds keeping you up?
Arthritis bugging you?
Your Relys causing chafing about your groin area?
Getting old and grumpy is a problem, but why foist your gall off on the rest
of us?

Go to bed, Al. Q.
No wonder you are lonely. You are in your early sixties and are quite the
consummate loser. Life must be hard for an old geezer such as you are.

EVERY time you solder to the cells, you damage them.
You cannot achieve wetting temperature, without also achieving melting
temperature of the insulators inside.

That damage may or may not cause immediate failure, but it is there, and it
is not reversible.

It's another Sunday on 14.313 and guess who
is on there playing Gospel and C&W music
again....????

Yup......It's "him" again. (complete with his new
mode of operation...."Hi-Fi" SSB)

Don't y'all wish this goofball would go back to holding up
his (bad grammar filled) hand written "hell and brimstone"
posterboard signs on the streetcorners in the
downtown business district, just like he used to do
in days past...?

Why is it in Ham Radio do we always *seem* to attract
all the screwballs and ex-mental patients? Can someone
explain this...?

THE VALUE - Is in the role that She Plays !
- - - The Middle Class Home Maker (Ms Whole Some)
- - - I Am OK and So are You (Its Good To Be US !)

> > To the Women's Libbers and the Left Wing Press:
> > - - - Martha Steward's "Public Persona" is everything that is wrong
> > with the traditional role of women in the American Family and Society
> > as a whole.
>
> Even the "public persona" is a myth ...

The MYTH . . . Is the Magic !
- - - The "public persona" is a ROLE to be 'Played'.
- - - A 'Role' that the Audience can Identify With.

- - - The 'Myth' of Martha Steward is She Is Every Women.
- - - Together "We Are OK" (Normal and Good)

The Female Viewer after 'Watching' Martha Steward and Oprah Winfrey,
"FEELS" that they have Learned Something New to Improve My Life and
Make It Better.
- - - They FEEL Good About Themselves - And That Is Good !

~ RHF

4188. Re: Can use CB with FRS?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-15 19:49:39 UTC
From: Herbert Khaury <Herbert@tiptoe.tp>
Message-ID: <Q5GcnQRa0LWOUnGjXTWcqg@comcast.com>
Source record: 66284

Absolutely. They use frequency allocations that are widely separated (27mHz vs ~470mHz) so you'll have no interference problems at all.

Or did you mean talk into one and receive it on the other? Ahh, no. ;-)

Oh NO !!!!!! You don't mean......KC3AU, the Scranton Idiot is playing
music again? At least he is not sending this around to his stumper
buddies....like he did those 'songs '\(???) of yesteryear......or is he?

Of course. No problem at all. Just turn on the radios and hit the
push-to-talk button to talk, release it to listen.

Listen closely.

Well I look at the reviews as being (for the most part) real world
experiences that have been shared with the community. Sure, someone can
pump sunshine re a product and conversely sling horse manure about
something else. I look at the overall consensus and make my best
assessment from what has been shared already. I am sure 99% of us look
at the reviews this way.

I'm not saying it's him doing this crap every Sunday
as some others (..like the long gone "Baby Euiee"
who's now near Pittsburgh for example) in the past used
to pull this same kind of crap, along with another
station located in Prince Georges County Md who
I ain't heard in quite some time. It's strongly suspected
however just who it is and hams, like lepoards and
other assorted RF mental-patients, don't change their
spots that easily. So many screwballs and so easy to pick
off for the FCC....we think...(??)

Ohio/Penn DX Bulletin No. 614

The Ohio/Penn DX PacketCluster
DX Bulletin No. 614
BID: $OPDX.614
June 16, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF-80 BBS Cleveland, Ohio
Online at 440-237-8208 28.8k-1200 Baud 8/N/1

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, W1RQ, K2FF, N2OO, N2WB, WA2MOE, WA2VUY, K3PD, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N6UK/DL4TT, K8YSE, KG8DP, N8PR, W8CNL, W9DC, K0BCN, 9A6AA, CT1END, DL1EK/DL7VOA & DX Newsletter, DL6UAA, F5NQL & UFT, FJ5DX & La Gazette du DX, GM0CLN, I1JQJ & IK1ADH - 425 DX NEWS, JA1ELY, JI6KVR & JA-IOTA Islands News, LX1NO, MM0DFV, OZ4ACK, SM3CVM, TA3YJ, VA3RJ & ICPO and VE3EXY for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 8th/June, through Sunday, 15th/June there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9V, 9Y, A4, A6, A7, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, VE, VK, VP2E, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZL, ZL7, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HEADQUARTERS (Wrap up). Fritz, N6UK/DL4TT, informed OPDX that he was active as 4U1UN on June 10th, a day later than first announced because his trip back from Europe was delayed. However, Fritz provided OPDX with the following report on the 4U1UN station: "Access to the station is quite limited right now, as is the equipment/antennas that

are available. The only antenna I could use was a folded dipole for the HF bands. The power was 100 watts."
QSO breakdown:
Band No. of QSOs Comments
50 MHz 111 Sporadic E to eastcoast, midwest a very
few W6 and VE
24 MHz 27 US: W0 and east coast
14 MHz 71 20% US and 80% EU/AS
7 MHz 1 no condx

Total 210
"There is currently activity improving the antenna situation (for 6m and shortwave). We hope future operations will be less limited. QSL only via Box 3873, Grand Central Station New York, NY 10163 USA. (Be patient with QSLing. Currently there is a backlog due to limited capacity of the QSL Manager.)"

4W, TIMOR LESTE. Thor, 4W3DX, continues to be very active on 20 meters CW/SSB/RTTY, as well as some activity on 40/15 meters. Most of his activity takes place between 1000-1430z, however, he has been heard on after 0230z. Watch around (+/- 5 kHz) 14025, 14195, 21083 and 7005 kHz. ADDED NOTE: Stu, WA2MOE, announced this week, "A petition was filed with the Chief Executive Officer of ARRL today seeking removal of UNTAET (United Nations Transitional Administration in East Timor) from the DXCC entities list and for the addition of Timor Leste as an entity." The petition states that DXCC rule under "Section II. DXCC List Criteria -- Criteria: (b): The entity has been assigned a call sign prefix bloc by the ITU. A provisional prefix bloc assignment may be made by the Secretary General of ITU. Should such provisional assignments not be ratified later by the full ITU, the Entity will be removed from the DXCC List."
and should be applied. Stu states, "The assignment was not ratified and UNTAET returned it to ITU which has reissued the block 4WA-4WZ to Timor Leste. It is the position of JA1BK and WA2MOE that the addition of 4W to the DXCC entities list was premature and that a mistake was made."

C6, BAHAMAS. Pete, N8PR, will be operating as C6AHR from Andros Island (IOTA NA-001) from June 21-23rd. Activity will be on SSB and CW with operations on 80-10 meters including the WARC bands are planned. QSL via N8PR.

CU2, AZORES. Lars, SM3CVM, plans to be active as CU2/SM3CVM/P from Sao Miguel (EU-003), June 24th- July 6th. Activity will be mainly CW on 80-10 meters. This will be a holiday operation, so he will mostly be active late evenings local time. QSL to his home callsign via the bureau or direct to CBA.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, informs OPDX that the following operation is approved for DXCC credit:
S05X - Western Sahara -- April 15th through 21st, 2003

IOTA NEWS.....................
AS-081. Operators DS5AAQ, DS5ACV, DS5ARL, DS5DNO, DS5DYM, DS5KJR
and DS5MNO will be active from Ch'angson Island during the
RSGB IOTA Contest (July 26-27th) as a Single-Op/12 hour
entry. Contest callsign will be DS5AAQ/p or HomeCall/p...etc.
QSL via their home callsign by the Bureau.

EU-008. The Cockenzie and Port Seton Amateur Radio Club (CPSARC), GM2T,
will once again operate from the Isle of Tiree (IOSA NH04, WAB
NM04), the most westerly of Scotland's Inner Hebridean Islands,
during the RSGB IOTA (Islands on the Air) Contest which runs
from 1200z, July 26th until 1200z, July 27th, using the clubs
special contest callsign GM2T. The team will consist of:
Cambell/MM0DXC, Bob/GM4UYZ, John/MM0JXI, BrianM0RNR, Landles/
GM4XZZ, Ron/GM4IKU, Innes/GM4VJV, Stevie/MM3SRU, Isa/MM3ISA,
and Iain/MM1CPP/MM3IDM. In addition to operation during the
contest, a small group of the team (Cambell, Brian, Iain, Stevie
and Isa) will be travelling to Tiree over the weekend of July
19th to set up the station in preparation for the contest and
will be operational from Tiree on all HF bands during the week
before the contest from around Monday, July 21st, using the
club callsign MM0CPS/P. QSL's for both callsigns via GM4UYZ.

EU-010. A team from the Forth Valley Contest Group will operate from
Benbecula (IOSA OH04 and WAB NF75), one of Scotland's Outer
Hebridean Islands, during the RSGB IOTA (Islands on the Air)
Contest. During the contest (which runs from 1200z, July 26th
until 1200z, July 27th), they will be using the special contest
callsign GM4V. At present, the team consists of John/MM0CCC,
Robert/MM0ANT, Colin/GM0CLN, Ian/GM4ZRR and Keith/GM0FZM. The
QSL Manager for all GM4V's operations is MM0ANT (his QSL details
are avaliable at QRZ.com). They hope to post updates on their
Web page at: http://www.gm4v.co.uk/
If you would like to contact the group, you can E-mail them
at: gm4v@mm0fvc.co.uk
They look forward to working you in the contest.

EU-017. Antonello, IK2DUW, will be active as ID9/IK2DUW from Filicudi
Island now through June 23rd. Activity will be on CW/SSB/RTTY
and PSK.

EU-020. Martin, SM0DTK, will be active from Gotland Island as SM0DTK/1
from June 19th through July 18th. Any sked can be arranged by
E-mail via: sm0dtk@passagen.se
Look at QTH at: http://hem.passagen.se/sm0dtk/
(Click "Losgodis")

EU-123. Look for Ed, G3SQX, to be active as GM7X from the Isle of
Arran during the RSGB IOTA Contest (July 26-27th) as a 100w
CW entry. QSL via G3SQX.

EU-170. (IOCA 2003 Tour!) Look for operators Eugene (9A/RZ3EC), Sergey
(9A/UA3NAN) and Emir/9A6AA (also as 9A0CI) to go on a 7 day

expedition (July 12-19th) to activate rare Croatian islands
and lighthouses in the Dalmatia North Group. More information
is available at: http://www.inet.hr/9a6aa
Some islands/LH they are going to activate are:
Karantunic : CI-421, CRO-065, LH-0674
Kosara : CI-043, CRO-071, LH-0749
Babac : CI-005, CRO-024, LH-0831
Mrtovnjak : CI-195, LH-1296
Ravan : CI-422, LH-0908
Blitvenica : CI-156, LH-0913

NA-046. Brad, W1RQ, will be going to Martha's Vineyard, Dukes County,
MA, using the callsign W1RQ/NA046, from June 21st through
July 12th. Operation will be SSB only, using the typical IOTA
frequencies. QSL via his home callsign W1RQ.

NA-128. CORRECTION. Nenad's, VE3EXY, activity as CK2/VE3EXY/P from
Orleans Island (Zone 4) is IOTA NA-128, not NA-125 as mentioned
in last week's bulletin. QSL via his home callsign VE3EXY.

OC-019. Now through July 3rd, look for Tom, KH6/W4MDL, to be active
during the weekends from various islands around Oahu. He plans
to activate Ford Island (USI HI-022S, Honolulu county), Konoehe
Island (USI HI-new) and Sand Island (HI-021S, Honolulu county).
Activity will be on 20-10 meters, including the WARC bands.
QSL via his home callsign, direct or bureau.

OC-140. By the time you read this, the VK6 DX Chasers Club should be
active from Thevenard Island as VI6TI. Look for them on or
near the usual IOTA frequencies, 40-6 meters plus AO-40, SSB
and CW. The 8 member team will be active through June 22nd.
INTERESTING NOTE: Alek, VK6APK, states that for a sked, if
you need them real bad, call on the Phone at +61 4 28925406.

OC-241. A group of operators are expected to operate as 8A9R from
Rote Island (WW Loc: PH19) in the middle of June for about
10 days. This will be a multi-band operation. Kadek, YC9BU,
will be one of the operators and also the QSL Manager. The
team will be operating near an old lighthouse on Rote Island,
which will be submitted for World Lighthouse Award acceptance.
Further information is forthcoming.

JD1, OGASAWARA (Commemorative Station of The Ogasawara Islands 35th
Anniversary of the Reversion). Toshi, JA1ELY, reports the following:
"Ogawawara Islands are located approximately 1000km south of Tokyo, and it
is distinguished from the mainland on the DXCC program as JD1. The Village
of Ogasawara organized the commemorative amateur radio station to celebrate
the 35th Anniversary of the reversion from June 10th through August 31st
this year. This radio station is the club station and is employed including
many newcomers who are from among the 2400 residents of Ogasawara Islands.
For this purpose, we trained the people of the village for purposes of
allowing them to obtain the license. The same callsign 'JD1YAB' is the

JARL commemorative station of reversion employed 34 years ago, i.e., one year after return, is used for this radio station under the recognition of the JARL!! We will operate all bands, all modes including 80-2 meters band and SSB, CW, RTTY, SSTV, Satellite(AO-10, UO-14) etc up to 200W output depending on each operators privileges. All QSLs will be sent to the world via the bureau automatically without any requests. Also, if you want it directly, it will be issued by the QSL Manager/JA1MRM. Send SAE (Self Addressed Envelope) and 1 IRC or sufficient return postage. JA1MRM: Saburo Asano, 3-26-8, Toyotama-Kita, Nerima, Tokyo, 176-0012 Japan."
73 ..... JD1YAB Operation Manager: Toshi/JA1ELY and Aki/JD1AMA

KH9, WAKE ISLAND. By the time you read this Jake, N6XIV/KH9, is expected (June 14th) or has left Wake Island after having added approximately over 1,500 additional QSOs to the log on his second trip. However, Chuck, N4BQW/KH9, will be remaining on the island for about 4 to 5 more weeks. Both operators were working 20 meters between 0600z and 1100z this past week giving the beam and amplifier a nice workout. Chuck, N4BQW, took time out to work Glenn/K2FF and Frank/W6FRH on 30 meters last weekend with solid signals reported both ways on the wire antenna. An additional antenna for 40/80/160 meters was installed this past week and Jake was working 40 meters, so Wake Island should now be active on multiple bands. Just as a reminder, Chuck will operate whenever he has spare time outside of his work requirements. And remember, QSLs for N6XIV/KH9 go via K2FF, while QSLs for N4BQW/KH9 go via KB6NAN.

LIGHTHOUSE ACTIVITY.....
Wade, AA8LL, plans to activate the Beaver Island, Michigan, Lighthouse on Friday, June 19th through Saturday, June 20th. It is reference number LH-1527 for the WLA and USA-046 for the ARLHS. Wade will be on the usual lighthouse frequencies 40-10 meters (if the propagation cooperates) and mostly SSB. The call and QSL route will be AA8LL.

The Old Barney Amateur Radio Club will be operating N2OB from the Barnegat Lighthouse (ARLHS Lighthouse USA-039), Long Beach Island, NJ (IOTA NA-111) (USI NJ001S) on August 2nd, (rain date August 3rd) from 1300-2300z. Operation will be primarily on or around 7240 and 14240 kHz SSB and 146.835 MHz (-600 FM rpt). A special photo QSL is via N2OB, PO Box 345, Tuckerton, NJ 08087 USA.

OD, LEBANON. Pavel, OD5/OK1MU, in Beirut informs/reminds OPDX and its readers that his stay in Lebanon is coming to an end and he will be going back to the Czech Republic at the end of July. He was heard on 20 and 17 meters CW last week. He is preparing a special color double-sized QSL cards (with the support of OKDXF) which will be sent to everyone who worked Pavel on all 9 HF bands 160-10 meters. A list of stations which have already worked OD5/OK1MU on 9 bands is available at: http://www.qsl.net/ok1mu
There is some 40 days left for those who need to work Pavel on certain bands and are interested to get his special QSL card. For a sked, send and E-mail to: ok1mu@yahoo.com
On behalf of the operator and his QSL manager OK1TN, they are requesting the HAM community for patience with the QSL cards (which are managed via

the OK QSL Bureau). They just received 25,000 QSL cards from the printers, and since Pavel will finish his activities from Lebanon at the end of July, they will send all QSL cards they get via the bureau after his return. "PLEASE, be patient, all QSOs will be confirmed!"

PIRATE STATION. Mogens, OZ4ACK, informs OPDX that a PIRATE station has been active from Copenhagen using the callsign OZ9TR.

QSL INFO AND NEWS.....
QSL CORRECTION. OPDX has been notified by Norby, LX1NO, that Phil, F5OGG, does NOT QSL through his home callsign. All QSLs for F5OGG/p activities (in this case 9A/F5OGG/p mentioned in last week's OPDX.613) must be requested through LX1NO. Phil will not answer these requests, and it would not make sense to send direct or bureau requests to him since it will cause a huge delay.

3B9FR QSLING ROUTE. Mart, DL6UAA, informs OPDX that over the past few months he has been reading about problems with QSLing to Robert, 3B9FR. Mart states he is in contact with Robert, and he does a good job! The only problem he sees is some WRONG details about Robert's address being published. Here is the correct QSL adresss (and please, send it only like this ... NO VIA MAURITIUS OR other via in the address field. Also, NO callsign on on the envelope):
Robert Felicite,
P.O.Box 31
Citronelle
Rodrigues Isl.
REPUBLIC OF MAURITIUS.
If possible, don't use envlopes larger then 17cm x 12cm. In that style Mart states he has NO problems with his mailings to Robert.

9K2ZZ QRT. Ray, W8CNL, reports to OPDX: "Bob Furzer, 9K2ZZ, has informed me this morning (June 13th) that he will be QRT from Kuwait next weekend. The tower and antennas should be coming down the 20th or so. He is not sure of the next callsign he might use. I would really like to wrap up the QSLing by the end of the year. I have about 3000 cards left and quite sure no more will ever be ordered. SASE or SAE and postage is a must. I will except postage from your country, ie: dollars, pounds, rubles, lire, francs, etc. I am all caught up on the QSLing, so if you didn't get a card, better try again. If you're after 10 band/mode contacts, just send 1 card and a note with the other contacts your after. Please don't send 10 separate cards!!! Any comments or questions, send to me direct. Don't tie up the reflectors. If you're not sure if you're in the log, write me before sending a card. Thanks for reading. 73 and Gud DX.... Raymond H. McClure - W8CNL, 5 McKenzie Circle, North Augusta, S.C. 29841-4319"

Special Event Field Day Station, CQ0QXL, was activated by CT2IGX/Bruno, CT2IEL/Filipe and CT2FUQ/Joao. QSL via CT4IS.

QSL JR8XXQ/JD1 (activity from Minami-Torishima) via: Kouichi Saito, 505-11, 3-15-111, Musa, Kushiro, Hokkaido 085-0806 Japan.

Jurij, MM0DFV, was active as MM0DFV/p this past week from (June 11-12th) from Isle of Arran (Western Scotland). Co-ordinates of the island are: 55,43 N and 5,11 W, QRA-Locator is IO75KK. QSL cards for QSOs can be sent through RSGB QSL Bureau or via his home address (QRZ.com).
The info for the islands diplomas:
IOTA: EU-123 -- URL: http://www.rsgbiota.org/
IOSA: CL-01 -- URL: http://www.gmdx.org.uk/
SCOTIA: CS-14 -- URL: http://www.iosa.co.uk/
WAB Area should be NSO2 (Unitary Authority: North Ayrshire).
WAB URL: http://www.users.zetnet.co.uk/g1ntw/wab.htm
You can read about Arran Island and see photos on the Web site at: http://www.scotland-info.co.uk/arran.htm

Nilay, TA3YJ, reports that she has sent out QSL cards for TA3YJ, TA3YJ/0, TA3YJ/3, TA3YJ/4, TA3YJ/LH, SV1/TA3YJ, LZ2/TA3YJ, TA3J, TA3J/0, TA3J/1, TA3J/3, TA3J/4, TA3J/LH, SV1/TA3J, LZ1/TA3J, LZ2/TA3J, YM3BU, YM3ATA, YM3SV, YM75TA, YM21TA, YM3LZ/WPX2000 and YM3LZ/WAE2000 to QSL Bureaus of Monaco, Tunisia, Cyprus, Algeria, Malta, Kuwait, Oman, Qatar, Bahrain, China, Andorra, Chile, Cuba, Morocco, Portugal, Philippines, Ireland, Moldova, Estonia, Ecuador, Colombia, South Korea, Panama, Jordan, Argentina, Luxembourg, Bulgaria, Faroe Islands, Aruba, Brazil, Bosnia & Herzegovina, Iceland, Australia (VK2, VK3, VK4), India, Mexio, Indonesia, Iraq, Latvia, Venezuela, Former Yugoslav Republic of Macedonia, Albania, New Zealand, South Africa, Armenia, Iran, Kyrgyzstan and Kazakhstan direct on June 14th.

SPECIAL EVENT. Look for special event station to as sign, W1T (W 1oo TourdeFrance). Activity will be on all bands during the Tour de France bicycle race, July 5-27th, to commemorate the 100th anniversary of the Tour de France (TdF) and USA's Lance Armstong's attempt to win his 5th consecutive TdF. The operators are: Angel/WA2VUY and Rudolf/K2MVW. QSL via WA2VUY. The QSL card will have a unique photograph of the 21 of the 22 living Tour Champions taken October 24, 2002, in Paris, France, at a special reunion.

T32, EAST KIRIBATI. Pete, K3PD, informs OPDX that La Marr is returning to Kiritimati (Christmas) Island (CQ Zone 31, GRID - BJ11) using the callsign T32Z licensed for E. Kiribati (Line Islands). He expects to arrive on June 30th, and will operate as time permits for several weeks. La Marr will be active on 50 MHz, and the HF bands, SSB, CW, and some digital modes. The QSL Manager for T32Z is K3PD. Any prior requests for QSLs that have been sent to N7YL are no longer available. Logs prior to 2002 may not be available. The preferred method is to send SASE direct to his QSL Manager K3PD. SASE without adequate postage will be returned via the Bureau. You may request a QSL via the Bureau by marking your cards: T32Z via K3PD. QSLs are being printed, and logs will need to be copied, please do not expect instant return on your QSL requests until the QSLs and Logs are ready. The direct QSLs will be answered first. Direct any questions about the operation or QSLs to the QSL Manager Pete, K3PD, via E-mail at: k3pd@arrl.net

USI ACTIVITY (Field Day Operation). Members of the Rusty Zipper HF and DX Contest Club will once again activate, NA8KD, from South Bass Island (U.S. Islands Award OH-USI-007L, Ottawa County) during Field Day. Operators mentioned are Mark/KG8DP and possibly one other to be named later. It will be a limited operation, but when on the air, they will sure to be heard. The group is expected to also activate Kelly's Island (OH-USI-001L, Erie County) and North Bass Island (OH-USI-006, Ottawa County). North Bass Island has not yet been activated. More info to follow in the next few weeks. All QSL should go to KG8DP (OK via address at QRZ.com).

V3, BELIZE. Jay/K0BCN/V31MX and Cal/V31MF will be active from Caye Caulker (IOTA NA-073) from July 23rd until noon of July 29th. They will operate on 80-10 meters SSB with some CW activity. Look for V31MF to be active in the RSGB IOTA Contest (July 26-27th). Jay states he will be sitting this one out. QSL both callsign via K0BCN, either direct or via the bureau.

VP2, MONTSERRAT. Three members of the Florida DXpedition Group are on the "Road Again"! Operators Bill/W4WX/VP2MHX, William N2WB/VP2MWB and Bob/K9MDO/VP2MDO will be here July 22-29th. They will have three Kenwood stations and will be active on most bands and modes. QSL via their home callsigns, CBA. N2WB via QSL Manager N2OO.

Buwahahahahaha.. This is better than watching Dave himself. keep it up funny boy. You're very entertaining, watching you twist in the wind the way you do.

Martha's going to Prison. See it. Learn it. Live it.

Geeez Lloyd, you're better than Daves top ten list.
MUCH funnier.

Barry

> And welding doesn't?

What's the difference between heat and temperature?

Welding puts a very small amount of heat into the can, while raising a small area to a high temperature.

Soldering puts a large amount of heat into the can, while raising a large area to a much lower temperature.

** Read in Reverse **

Take a look at the Product Review guide lines published on the main Product Reviews page in the managers side bar.

Customer service issues/problems are not reviews of a product (QSL cards). Note however that if a review does review the actual product comments regarding the manufacturer, vendor, etc. are OK. But the review should primarily be of a product.

eHam's Forum has an area "CompanyReviews" that is used for discussing pros/cons of dealing with vendors, manufacturers, etc.

After receiving this email from Phil, my review about Octavia was again
removed.
So.. I read eham.net guidelines, and posted again.
It is very difficult to review a product, if you never received it in the
first place.
Reviews should include from the time you spend your money to the point in
time
where you actually receive the product. Most vendors charge your credit
card
when the item ships, not at the time of purchase. If this was done I would
have
had time to dispute this with my credit card company.

Much better was to park for free at the local defunct mall, and spend $2.00 for an all day bus pass which delivered you right to the door. I wouldn't do it any other way now. I bought a linear and walked right outside the arena with it, caught the bus and only walked another 100 feet to my van.

Beats parking in the muddy field by a mile.

Well enjoy! hope you don't pay too much shipping from Ebay. That will eat up thea 22 dollars pretty quickly.

Mike, true as far as that goes. But a lot of these guys cannot decide
if they are Hams or CBers. Therein lies the problem with such radios.

Wrong. In an actual emergency, you use what works. Does 60M not work? Let me go review the ARRL's pioneering work during the experimental era of the last few years...

I'm back. It works, or at least the ARRL said it did.

Eham reviews are about as fair and informative as the QST Product Reviews. ANY publication or website that receives advertising $$$ from a vendor is biased regardless of the vendor.....end of story. Plus, Eham will take reviews and post them from every dim-wit that doesnt know a damn thing about radios or electronics.

When's the last time you saw a scathing negative review about a Yaesu, Icom, or Kenwood radio in QST?.....Like, never.

WHAT IS FAIR?

If you will look even closer youll find that most of the reviews are
just ramblings by whoever feels like writing about something, and its
strictly thier opinion,(now boys dont get upset, "opinions are
like...well you know what they are like) and rarely based on solid
evidence (which does not include MFG'rs specs, they rarely indicate
actual operations and are usually 'lab condions' YEAH! " Its very nice
to know what everyone thinks about all the gear,(who do YOU trust?) but
you still have to filter that through a lot of personal opinion and
likes and dislikes. Most of us who buy sell and trade a little, know
that the BEST RADIO is the one you just got!! And the worst radio , is
the one that broke on you, even though it has to happen on new and used
gear alike. If it breaks a lot, thats when it should be "shot at and
hit!" Another thing , and not my favorite for sure, about
Ehum.....they call a guy who buys and sells and trades as part of his
version of the hobby, a dealer and leave you poor suckers to deal with
a one timer who doesnt know a 9 from porcupine, and has no real reason
to treat you right. Bottom line as I see it is...."Its my website and
I set the rules" , thats ok but it doesnt necessarily make a great
website in my opinion. I give radios to starting foreign hams, help
blind and handicapped in this county A LOT, and mostly get grief from
EHAM and some others. WAHHHHHH!!!! So my editorial is through for the
day...EHAM is a GREAT SITE, but no ones perfect, or even close!! 73

4230. Trick with Pro 51 handheld scanner

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-16 23:53:03 UTC
From: drink@some.beer
Message-ID: <90D4JLR137789.0773726852@Gilgamesh-frog.org>
Source record: 66226
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.amateur.misc,alt.radio.scanner,alt.radio.pirate

Hold down the 2, 9, and MONI keys simultaneously. The scanner will go into display
test mode. As the display fills up press the 2, 9, and L/O keys
simultaneously and now for the tricky part, hold these keys down until
the scanner opens up on 162.4 Mhz. If this is not the Noaa frequency for
your area, your scanner may just start scanning. Thats it! Cell mod
search Ch 22 and 23 and your off and scanning! Good Luck and hope this
helps others.

4231. Trick with Pro 51 handheld scanner

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-17 00:15:14 UTC
From: drink@some.beer
Message-ID: <BV8VP3P637789.0928125@Gilgamesh-frog.org>
Source record: 66227
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.amateur.misc,alt.radio.scanner,alt.radio.pirate

Actually there are several test modes in the PRO-51 (most of these comments
should be true for any Uniden-made Radio Shack scanner, such as the
PRO-46).
I☐ll describe them first and then how to take advantage of one of them to
get
the restricted frequencies.

are three data test modes. These modes completely destroy any frequencies
you had programmed into your scanner, so it☐s best to use these techniques
before you program your scanner. If you have already programmed it, you☐ll
have
to decide if these new capabilities are worth reprogramming.
MODE 0. Clear the scanner.
----- well-known method of clearing the scanner to all zeros is to hold
down the 2
key, the 9 key, and turn on the scanner. All frequencies will be lost.

```
TEST MODE 1. Fill channels 1-25 with test frequencies.
- the 2 key, the 9 key, the L/Out key, and turn on the scanner.

Thi fills channels 1-25 with these frequencies:

30.050
2 40.840
3 49.900
4 138.150
5 162.400
6 173.225
7 406.875
8 453.250
9 511.9125
10 108.500
11 118.800
12 127.175
13 135.500
14 66.450*
15 76.825*
16 87.425*
17 157.800
18 482.3625
19 29.000
20 54.000
21 806.000
22 857.200
```

23 888.96*
24 911.500
25 954.9125

* indicates not within the PRO-51□s normal coverage. More on how to use these in
a minute.

TE MODE 2. Fill channels 1-17 with test frequencies.
- 2, 9, Manual

Fills channels 1-17 with these frequencies:

30.00, 40.00, 50.00, 140.00, 155.00, 170.00, 410.00, 460.00, 510.00, 54.00,
109.00, 118.00, 127.00, 135.00, 810.00, 860.00, 950.00.

Ther is also a display diagnotic mode.

TEST MODE 3. Display Test.
------------ 2, 9, BAND or 2, 9, MONI.

This put the display in test mode. Every annunciator and every digit element is
turned on in a scan from the left side of the display to the right. To keep this
test mode continuous, release the buttons before the first scan finishes. This
mode does not affect stored memory. Press any key to exit this display mode.

Now, if you□ve decided to try test mode 1, you will find several out-of-band
frequencies stored in your memory channels. Channels 14-16 hold frequencies in
the blocked-out 66-88 Mhz range, and channel 23 holds a frequency in the
blocked-out cellular base range. Once you have these frequencies stored in a
memory channel, the PRO-51□s direct search feature will let you search though
these ranges. In the cellular band, the scanner searches in the correct 30 Khz
steps.

You don□t have to keep these frequencies in the channels they were stored by the
test mode. You can move them to any channel in the scanner. Here□s how.

First move the frequency to a monitor channel:

Whi on a channel with one of these frequencies, open squelch completely. Press
direct search button, either up or down. The direct search button puts the
scanner into search mode and the open squelch holds the frequency. Then

press
the Monitor button. The frequency is now in the monitor channel indicated in the
display.

Now you can move it to any regular memory channel in the scanner:

Enter the channel number
Press PROG
Press MONI
Press the number of the monitor channel if the proper channel is not displayed.
Press E(nter)

The frequency is now permanently stored in the memory channel. You can do a direct search from this memory channel at any time.

The 66-88 Mhz range mainly covers TV audio. However, there is a strange phenomenon concerning TV audio and the PRO-51. Channels 4, 5, and 6 fall within
the 66-88 Mhz range (71.75 Mhz, 81.75 Mhz, and 87.75 Mhz respectively), yet the
PRO-51 will not pick up the audio frequency while searching in this range. However, TV channel 2 audio is at 59.75 Mhz. When you add the intermediate frequency of 21.6 Mhz, you get an image of the TV channel 2 audio appearing at
81.35 Mhz. This does come in, although raspy, since the PRO-51 is receiving in
narrow FM mode while TV audio requires wide-band FM mode for proper reception.

I be interested if anyone can verify that any of these test modes work on the
PRO-46 or any other Uniden-made Radio Shack scanner.

4232. Check this months QST

> true of the five new 60 meter channels.

Not so. The Rules are quite specific that that frequency is available only to licensed stations in the Maritime, Aviation, Land-Mobile, Alaska Fixed and Amateur Radio Services and only for communications in connection with an emergency.

Broadcast licensees or GMRS licensees or blanket-authorized users in the CB, FRS, and MURS services can't use it unless they are licensed in one of the permitted services.

Amateurs in Alaska were first given permission to use the Alaska Emergency Frequency when it was changed to 5.1675 MHz in 1974. In FCC 86-9, the Report and Order in PR Docket 85-23 in 1986, this permission was clarified by specifying that all classes of amateur licensees in or within 50 miles of Alaska, including both Novice and Technician, were able to use that frequency by having it listed in the tables of frequencies available to each class. With the reorganization of the amateur rules in 1969, the language "any station" was used to cover all classes and the specific listing of that frequency in the tables for each class was dropped.

> Ah. More of what passes for Brain logic. Somehow FCC seems to view it
>as a different manner. No surprises there, either,

As did the Sheriff's Department, whose radio tech proved using the
ham's own modified radio that it was possible to make an autopatch
call to 9-1-1 on one or more ham channels from that location. They
had had problems with that individual playing wannabee before.....

So they complained to the FCC, relying on the emphasized-below
phrase of Section 97.403 which stated clearly:

Sec. 97.403 Safety of life and protection of property.

No provision of these rules prevents the use by an amateur
station of any means of radiocommunication at its disposal to
provide essential communication needs in connection with the
immediate safety of human life and immediate protection of
property WHEN NORMAL COMMUNICATION SYSTEMS ARE NOT AVAILABLE.

and the FCC agreed that "normal communications systems" were
available.

This was discussed at length in the 1974 R&O that set up that
frequency. Non-emergency traffic - non-critical "quickies" or
otherwise - is permitted only for non-amateur land mobile stations
and then only to call and move off to some other frequency.

From what I understand from my former compadres in the Anchorage
station, this is observed very closely.

If it was the EIC, he had his own ideas about what the law should
be. He is no longer with the agency.

IIRC it was the case officer, who knew a lot better. He passed away
a while back.

All the FCC supervisors in the region tore that case apart for the
actual details which did not always agree with the published stories.

>an appropriate emergency. Not only did the FCC office in San Diego
>confiscate his radio,

The SD seized the radio for evidence so they could make the tests described in another post. Their charge supporting the seizure was interfering with a police officer in the performance of his/her duties (Cal. Penal Code Sect. 148).

At no time was the radio "confiscated"...it was seized as evidence, a big legal difference.

>they made statements to the effect that the mere
>possession of a radio capable of doing that was not legal.

That was a bit of run-off-at-the-mouth by the case officer who is no longer with the agency - he passed away shortly after retiring not all that voluntarily.

>Far as I ever learned they did NOT return his radio to him.

The plea bargain, common for first offenders, was that he would voluntarily surrender the modified radio for destruction in exchange for the FCC suspending any further action on his unlicensed operation, contingent on his not violating the law again. Were he to be caught violating again, he would be charged with this offense as well.

Had he not surrendered the radio coluntarily, the Commission would have gone to Federal court to get a seizure warrant and the U S Attorney would institute a forfeiture proceeding, which would have been a routine but time-consuming matter. Meanwhile the SD was holding the radio safe and sound.....

Does anyone know of a voice-activated speaker mic or even headset on the market that I could use with my ADI AT400 HT?

4248. FS-ICOM IC-735

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-17 12:36:14 UTC
From: n2ion@aol.com
Message-ID: <20030617083614.09323.00001488@mb-m07.aol.com>
Source record: 66145

FS: ICOM IC-735 HF Transceiver, runs on 13.8V DC. All bands 160 through 10-Meters, general coverage receiver, 100 watts (adjustable) transmitter. All modes CW/SSB/FSK/AM/FM. Works well - includes power cable, manual (missing covers), does not have the little door covering the adjustments (I don't think any IC-735's do).

These are current models in the Royal Navy. Every RN vessel will carry
this morse key. Personally, I don't like it much, but assessments of
Morse keys are very subjective and I know several who swear by (at) it.

Hi,

I am not a specialized in HF or alike (see my website) but in the past, as SWL ONL5183, I published several reviews (ALA1530, TS570D) on eham. Each time I received many posts by email telling that my reviews were very appreciated, or confirmed the opinion of the ham who wrote me, hopefully !

What I have written was not simply an "opinion" more or less well writen (a part of my objective). I tried to be as complete as possible, with in mind the question : "what a novice needs for information about this product" and "what a advanced ham could ignore, a subtility, a small feature that could interest him...", What I have tried to develop.

Ecah time I have a review to make I try to question first many users, pro and con. Then I ask some accurate questions to the manufacturer or the designer itself. That works each time and asnwer are always complete.

I also explain on my website that the last rig you bought is of course always the best one. And that the opinion of your friend is not necessary the best in that matter (see my comments about "How to select a RTX"on my website). His or her opinion can be useful of course in that sense that the convergence of similar opinions usually indicate a reality (but stats are a difficult science). Then there the opinion of pro users that you cannot ignore.

I don't think that eham publishes many false reports from fool men, dreamers, etc. On the contrary. From what I have heard, many HAM do read those reviews with many interest.

But personally thare represent only 33% of my decision. The other 33% come from pros, advanced users and manufacturers, the last 33% from my own criticism (of course from the moment I can have some experience using similar devices). With time running (more experience in experimenting in the field or reading reports, forums, etc), I think (this is personal) that all three parts represent the same weight and that this is the best balance I could find to really appreciate a product.

NB. I have to buy a 5 bander beam very soon for a mix or fixed and portable ops. Be sure that it will be reviewed on eham.

4264. Can Implanted GPS chips injure or kill our children?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-17 21:02:12 UTC
From: "WD 4 LCM"@michnews.net
Message-ID: <3eef7aa3.12582795@news-50.giganews.com>
Source record: 66160
Cross-posted to: rec.radio.amateur,rec.radio.amateur.misc

In 1999, Applied Digital Solutions, of W. Palm Beach, Florida, announced that they obtained the patents to technologies which would allow a location / biostate device to be implanted in a human being.

In May of 2003 they announced a prototype of the unit, which they have dubbed the "Personal Locator Device".

---

http://www.adsx.com/news/2003/051303.html

APPLIED DIGITAL SOLUTIONS ANNOUNCES WORKING PROTOTYPE OF SUBDERMAL GPS PERSONAL LOCATION DEVICE

Specially designed antenna and induction-based power-recharging method function properly in field testing

Disk-shaped prototype is roughly the size of a pacemaker - future miniaturization expected

PALM BEACH, FL- May 13, 2003 - Applied Digital Solutions, Inc. (Nasdaq: ADSX), an advanced technology development company, today announced that it has developed and successfully field tested a working prototype of what the company believes is the first-ever subdermal GPS "personal location device" (PLD). Field testing and follow-up laboratory testing of the disk-shaped prototype confirm that the specially designed antenna and the induction-based power-recharging method function properly.

The dimensions of this initial PLD prototype are 2.5 inches in diameter by 0.5 inches in depth, roughly the size of a pacemaker. As the process of miniaturization proceeds in the coming months, the Company expects to be able to shrink the size of the device to at least one-half and perhaps to as little as one-tenth the current size.

The induction-based power-recharging method is similar to that used to recharge implantable pacemakers. This recharging technique functions without requiring any physical connection between the power source and the implant.

Dr. Peter Zhou, Vice President and Chief Scientist of Applied Digital Solutions, said: "We're very encouraged by the successful field testing and follow-up laboratory testing of this working PLD prototype. The specially designed antenna is working as planned. While reaching the working prototype stage represents a significant advancement in the development of PLD, we continue to pursue further

enhancements, especially with regard to miniaturization and the power supply. We should be able to reduce the size of the device dramatically before the end of this year."

Last year, the Company announced that it was accelerating development of PLD in response to demand from high-risk countries and other potential customers. The exact timing of commercial availability of PLD is unclear pending further technological refinements and achieving any required regulatory clearances. The PLD technology builds on United States Patent Number 5,629,678 for a "personal tracking and recovery system" which Applied Digital acquired in 1999.

In its PLD announcement last year, the Company said it is committed to providing customers with a full range of "personal safeguard technologies" that enhance personal safety, security and peace of mind. Other technologies in the Company's line-up of life-enhancing technologies include VeriChip(TM), Digital Angel(TM), and Thermo Life(TM)."

Above and beyond privacy concerns is something that REALLY terrifies me. It seems to me that these devices could get extremely hot extremely quickly in the presence of high energy microwave radiation and "EMP" (electromagnetic pulse) weapons, such as used in the "E-bomb" that was talked about a few weeks ago. Am I being paranoid here? Are they immune to the point where it would be impossible or improbable that Al Qaeda, or a lone dirtbag, could kill our GPS-equipped children silently and at a distance of several dozens or hundreds of yards with an e-weapon?

I am neither a doctor, nor an engineer, but I am a ham who has burned his fingers on hot chips, transistors, and resistors more than once. The thought that this pain could be places inside an unknowing / unwilling child frightens and angers me.

If there is no problem, fine! But I think we really need to examine the potential before we expose ourselves to this risk.

If anyone has good technical data, PLEASE share it with this forum, as well as Congress and the FDA. Let's NOT wait to find out the hard way what a mistake we have made.

BTW...Applied Digital Solutions' CEO Scott Silverman will be on CNBC between 6:30PM and 7:00PM Ruesday, June 17, 2003.

I had subscribed to PopComm the 1st year. Quit it because of the
lawless attitude concerning pirate boradcasts.

How do you prove you saved a life? I think the emergency is better
"proved" by having a cold body as evidence. Slick talking attorneys
will argue that the danger to life was exaggerated unless you can
produce a body.

Bill,

Look for something that doesn't have a long delay before transmit
starts or you will always lose the first syllable or letter of every
transmission.

Subaudible (CTCSS) tone decode is good to keep random noise from
triggering transmit.

I've owned the Alinco DR-590, DR-592 and DR-610's and all are
excellent for cross band repeat. Other people have their own
favorites.

Are you kidding. In sleep mode the device probably uses
5 microwatts. And in active mode probably 50 mil watt.
for maybe 100mS. With today's technology the risk
is extremely small. And I imagine that the device is placed
in a shoulder or leg so if there is a problem the damage is
insignificant.

How does this risk, if there even is one, differ from wearing
metal framed glasses, having steel plates placed in your body to
brace broken bones, having an implanted pacemaker, having a
pocket full of metal coins, having a metal knife in your pocket,
having metal keys in your pocket, or for that matter just
wearing clothes with either metal buttons or with rivets (such as
Levi jeans)???

If someone is going to go around zapping people with high energy
microwave guns, they are going to find very few people who do
not have some kind of metal object on their body, or in it,
that will burn them significantly if it gets warm.

However, I'm not even certain that is of any concern because by
the time that much energy is focused on a human body, how does
it differ from putting a cat into a microwave oven and turning
it on? That much microwave energy doesn't need _metal_ to heat
something up.

Good point. An excellent reason to avoid carrying any sort of metallic object or electronic device on or about one's person at any time, unless of course one has wrapped oneself in aluminum foil.

Well, the device is designed to be highly sensitive to frequencies in
the GPS range. I would hope the front end would quickly fuse out
before there were any significant heating, but if not, it seems there
would be a possibility that the device would be a distance multiplier
over the other objects you described. Not to mention the fact that it
is internal, so it could not be easily removed. Pockets can be
emptied, glasses can be removed, but the PLD (Personal Locator Device)
is THERE until someone cuts you open and removes it.

I imagine that pacemakers would have a similar vulnerability, however,
the proportion of the population who have a pacemaker would be smaller
and a less attractive target than the masses of children desired by
the unit's maker.

For more info on the state-of-the-art in Directed Energy Weapons,
check out:

http://www.google.com/search?as_q=&num=100&as_epq=Directed+Energy+weapons&as_sitesearch=.mil

If you use just the right design, wrapping yourself in aluminum foil is
not necessary. A tin foil hat will suffice... if the point is folded
just right.

Or so I've heard.

As for an RF hazard,
you aren't giving enough information. What is the
operating frequency of the transmitter? What is
the average power? If the transmitter outputs
a digital signal, what is the peak power of
a pulse?

Very wideband digital signals can be harmful,
depending on peak (not average) output. Microwatts
can be harmful, if the pulses have a height (in air)
of 100 kV/m (Lu, et al, 1999).

If only the skin over the transmitter was exposed
to transmissions, the implantee might feel the
transmissions, but the damage might not be great.
However, a 10W CDMA transmitter (~900 MHz digital)
can cause skin nerve damage after prolonged exposure.

On the other hand, the question is where they would be
implanted? I recall reading a paper by

a bioscientist of some kind, in which inert plastic objects were implanted into animal MUSCLE, as I recall--however, I can't seem to locate the paper. The peculiar finding was that tumors developed when the plastic had flat surfaces, but not when rounded.

I think the investigation was to check whether shrapnel left in muscle would become harmful if left in. Apparently some cells are triggered to become cancerous if allowed access to a flat, inert surface. I'll try to locate the paper.

What about metal dental braces?

Moreover, the odds of items being removed from pockets and glasses
not being worn at the exact time/space intersection where one may be
so unlucky to be in the field of an EMP has got to be very unlikely.

So one ends up with a cigarette-type burn under/below the skin. I think
if we have a bunch of enemies running around zapping us where we
stand, that we will have greater problems than 2nd degree minor burns.

If you want to save the children from pain and demise, teach them how to
think.

4279. Re: Can Implanted GPS chips injure or kill our children?

I entered a reply an hour ago in which I could
not recall a reference to a paper on implanted inert
materials. I still can't find that paper, but
here is some info:

From PubMed:
==========
1: Exp Toxicol Pathol. 2001 Feb;52(6):483-91.

Tumors in long-term rat studies
associated with microchip animal
identification devices.

Elcock LE, Stuart BP, Wahle BS, Hoss
HE, Crabb K, Millard DM, Mueller
RE, Hastings TF, Lake SG.

Bayer Corporation, Toxicology
Department, Stilwell, Kansas 66085, USA.
laura.elcock.b@bayer.com

Tumors surrounding implanted microchip
animal identification devices were noted in
two separate chronic toxicity/oncogenicity
studies using F344 rats. The tumors
occurred at a low incidence rate
(approximately 1 percent), but did
result in the early sacrifice of most
affected animals, due to tumor size
and occasional metastases.
No sex-related trends were noted. All
tumors occurred during the second year of the
studies, were located in the subcutaneous
dorsal thoracic area (the site of microchip
implantation) and contained embedded
microchip devices. All were mesenchymal in
origin and consisted of the following
types, listed in order of frequency: malignant
schwannoma, fibrosarcoma, anaplastic
sarcoma, and histiocytic sarcoma.
The following diagnostic techniques were
employed: light microscopy, scanning
electron microscopy, and immunohistochemistry.
The mechanism of carcinogenicity
appeared to be that of foreign-body

induced tumorigenesis.

PMID: 11256750
==========

These implants would be far smaller than
a heart pacemeker.

There also is a study at
http://www.homestead.com/siliconecity/files/ratstudy.htm
which finds that simple smoothness of an inert
implanted surface seems to facilitate tumor growth.

It is possible I was recalling "flatness" instead of
"smoothness" in my previous post.

In any case, there are dozens of studies showing that
just about anything nonbiological that is implanted
increases the incidence of tumor formation, sometimes
after years. Search for "Foreign body tumorigenesis"
or "shrapnel muscle" on Google.

I wouldn't have anything implanted in a pet or
child unless the alternative was death or serious
illness. Why not just play with the child or
keep an eye on it?

I suspect it would be a problem only if you, simultaneously:
-- visit Area 51,
-- listen to Art Bell, and,
-- are surrounded by black helicopters.

Adjust your aluminum foil hat. The Zetas are getting through again.

I think in this case the issue was not what the emergency was at all.
(Although I did hear it wasn't much.) The controversy hinged on
the fact that OTHER ALTERNATE and ACCEPTABLE means
of communications were readily available, but the kid chose to
step in on the sheriff frequency. That, coupled with 'alleged' previous
issues between the kid and the sheriff department, probably had
more to do with the way it was handled than any attorney involvement.

Don't worry about it Les. That pot bellied has been world class bs artist
is gone for good. He has no friends. Just useless users. Anyone still
caught up in the Barf/Stumper thing is a worldclass idiot. And Boooooooby
certainly qualifies.

Can you imagine anyone dumb enough to get on ham radio and put out confidential information and expect to get away with it? Or treat his wife and family so badly they run away so fast the house fell down from the air blast?

That piece of crap knows to stay clear of the ham bands. He KNOWS how close he came to being like his buddy GDP. And he also knows it could still happen.

Don't sweat that weenie Les. He is just another loser.

14.313 (and ham radio in general) has changed. Get used to it. Most operators are:
1) inexperienced and don't know how to put out a "killer signal" ("well i cant buy an antenna"),
2) are scared of Riley and speech that might make them a "person of interest",
3) feel more comfortable with "stalking" via the internet rather than on the air,
4) got a "freebe" license by hook or by crook, not from a driven desire to be a ham, and
5) unable to converse without cursing or name calling for more than 5 minutes [attention deficit] about real problems.

I think for these reasons we will never see any frequencies that everyone listens to and claims they don't, i.e. 14.313 and the Liberty Net., emerge from the low tech knowledge, high model number/processor audio seting knowledge of today's multiple choice converted CB operator. No signal, no audience.

Not that thats a bad thing, it makes Kenwood and Yaesu a good amount of American dollars.

My hope is someday the FCC will wake up and allow hams to do wideband encrypted data things that will attract todays emerging technical talent. Many of these brilliant minds don't want to talk to a bunch of old white middle-class males whose only goal in life is to screw someone out of a 1962 Heathkit at the next hamfest.
Today's youth, go figure.

-D_Castle,esq.

You give the FCC bureauheads credit for more intelligence than they have. Consider that it is a 10 (20?)kHz wide band of space. Put appropriate RF anywhere, and only in, that band. Let the FCC fret as to why they can't understand some of the chirps, sputs and duck talk that they hear when they monitor it.

The writers probably had the CB paradigm of upper/lower, upper-upper/lower/lower in mind when they wrote it, implying 4 channels within a 10 or 12 kHz total band width. We should presume at least this.
We might also argue that really a 20 kHz band is a fair assignment pending interference free software and hardware implementations. We should then lead the way in the new millennium spectrum utilization protocols.

> whereas very little is found below 200 Hz.

I have out a lot of thought into this (speech intelligibility vs audio frequencies). So much so that I limit the low frequency audio in all my household devices such as TV and radio audio. The brain requires little or no audio below about 300 Hz. That is where the voice fundamental is located (100=basso, 300=soprano). The vowels and consonant are all at 500 and above. The energy up to 10 kHz is "useful", but not mandatory.

> What does the Bell standards say?

Ma Bell determined generations ago that up less than 2,000 is bad, to 2500Hz is vital, 3000 is nice, and beyond 3000 as not price effective (but sure sounds pretty). On the low end, "Naturalness" ("nice") required 200. I say that the audio below 500 is not worth the bandwidth it devours.

An article by Kryter in the 1950's declared that if you wanted to do speech with the absolute MINIMUM band, a 500Hz wide band from 750-1250 Hz was appropriate. If you decided at devote 1 kHz of spectrum to the task, then two bands, one from 250-750 and one from 1250 to 1750 would do. If three 500 Hz bands, then add a third 500 as from 2250 to 2750.

> What is the expected cutoff of most if not all TX baseband
> filters?

Probably the Ma Bell band of 200-3000. The only change I suggest is that we raise the bottom to 500Hz.

It is reasonable to apply a 1400 Hz wide 2nd IF or post-IF filter and slide it around the audio spectrum. I suspect that centering it at 1200+-200 Hz will give the best result.

At one point in the 1960's (I was K3IQU then), I had built a crystal lattice SSB filter with its two resonant peaks 1 kHz apart, using it according to Kryter's 500&1500 rue to some success. Today, I would probably place the same two peaks at 700&1700 Hz.

For years, any device that was approved to be connected to the
phone (most notably modems) had to have NO SIGNIFICANT
ENERGY in the area 2500hz and up.

The reason for this is that the trunk disconnect signal is at 2600. You
could inadvertantly disconnect long distance calls. (Heh heh...)

2600 is the magical number here. NOTHING should be there.

2600 is the name of an underground (well, above ground now) magazine
for phone phreaks.

2600 is also refered to as the 'Captain Crunch' signal or tone, due to
the fact that years ago Captain Crunch cerail had this whistle that
really pissed off the phone company.

You do NOT need ANYTHING close to or above 2600.

Sure, it's not hi fi. But we're talking PHONE quality here...

I feel they should test these by implanting them
into Felons and those having a history of criminal
behaviour. This way the Police can monitor the
whereabouts of known felons, jailbirds and bail
jumpers. When they've cleaned their act up and
become productive members of society then they
can have the chips removed.

4303. WinXP/PocketPC logging program ?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-20 02:06:34 UTC
From: Ed <ed@nospam.com>
Message-ID: <3R2dndurRJ228W-jXTWJhA@comcast.com>
Source record: 66100
Cross-posted to: rec.radio.amateur.dx,rec.radio.amateur.misc

Hi ,

There are many logging programs to choose from so I am looking for assistance in locating a logging program that with the following features:

* The software vendor should have versions that run under Windows XP AND the Pocket PC. I'm not really interested in running two different packages.
* Have a built in sync feature so that contacts logged on the PocketPC can automatically be synchronized to the WinXP machine when the PocketPC is put back in its cradle. I would prefer that the sync is handled by the program and not manually through the use of ADIF files.
* The WinXP version should have a good control program for the ICOM 706 MKIIG
* The WinXP version should be able to output a Cabrillo format log for contests
* The ability to easily log non amateur activity (SWL, etc) would be nice but is a low priority.
* If the product is in beta or not yet available I'm interested in hearing about it also

Many thanks in advance for your response !

[If you aren't aware of something that can meet these requirements please don't respond :-) Thanks]

Ed

Go that route (unmonitorable content or noncompliance with the specs
set down) and see how fast the band/channel is taken away, especially
by the primary "owner" who didn't want us there in the first place.

Hi,

In the Dayton flea market area this year I saw what appeared to be lengths of braided coax shield. No center conductor, no dielectric, no outside insulation - just the braided coax shield. It wasn't flat braided cable either - its apparently just braided coax shield and it looks like the skin that a snake would shed .

Unfortunately it had disappeared by the next day when I came to look for it again.

Anyone know what its called and where I can get some ?

Thanks

Ed

Dear Ed:
Unless the flexibility of braided cable is critical to your
application, one is usually much better off with solid conductors. This
is especially true when conductors are exposed to "weathering." 73

4310. SCREWS SWLs+HAMS?: FCC wants NO regs on BPL (Broadband Over Power Line)

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-20 13:29:30 UTC
From: dkcombs@panix.com
Message-ID: <bcv27qfpl1@panix1.panix.com>
Source record: 66107

Sorry -- I separately posted this to rec.radio.shortwave,
and *only after that* thought of posting it here too,
again separately.

Had I planned to do both first, I'd of course have
posted to both groups at the same time, ie "crossposted"
it, so people reading both groups would see it only
once.

Mild suggestion (workaround): if you want to see
or make followups, maybe go to rec.radio.shortwave,
and do it there, and ignore it here -- this posting
being considered a carrot to go to that group instead,
for THIS thread.

Sorry, guys.

David

Understanding the FCC's Broadband Over Power Line (BPL) NOI

From [1]National Association for Amateur Radio, June 19, 2003
By Rick Lindquist

Power lines used as conductors for RF signals at HF and low band VHF
create the potential for interference from radiated emissions.

The BPL NOI In a Nutshell

On May 23, 2003, the FCC published a Notice of Inquiry (NOI) in ET
Docket 03-104 asking how it should regulate the delivery of broadband
services to homes and businesses using electrical wiring to conduct
high-speed digital signals. The FCC calls this technology "Broadband
over Power Line" (BPL)--a technology also known as Power Line Carrier
or PLC. This article briefly explains the NOI and what amateurs
should know so they can make informed comments to the FCC.

BPL uses building and/or overhead power lines to conduct HF and VHF
digital signals to network computers. There are a number of ways
people can obtain broadband services--from cable modem to digital
subscriber line (DSL) to satellite. The FCC views BPL as a
competitive Internet access point, and the utilities view the
technology as a means to use existing infrastructure to generate

additional revenue from something other than power generation and distribution.

The NOI asks how BPL should be regulated and states that the FCC wants to remove regulatory hurdles to its deployment. Present rules already permit BPL right now at significant power levels. Utilities would prefer that the FCC authorize even higher power levels.

As of mid-June, nearly 1000 comments already had been filed. It is worth your time to become informed by reading the NOI itself and this article and to make your views known to the FCC. Amateurs should outline the important uses they make of Amateur Radio and the impact strong interference from BPL might have at HF and low-VHF amateur frequencies.

Electric utility companies will operate many, if not most, BPL systems. ARRL members who have had experience dealing with power line interference and utilities' responses to complaints can describe those experiences in their comments to the Commission.

Information on how to file comments is at the end of this article. An ARRL white paper, "Calculated Impact of PLC on Stations Operating in the Amateur Radio Service." provides a more detailed presentation on the technical aspects of this issue. The ARRL's Broadband Over Power Line resource page contains links to worldwide studies and resources to help Amateur Radio with BPL issues.

How will the radiation from BPL wiring affect other systems, such as telephone or cable TV?

What to Tell the FCC

Amateurs filing comments to the FCC NOI might want to consider including words on these topics and points as part of their comments to the FCC:

* Amateur Radio is a valuable resource that must be protected.

* Describe the use(s) you make of Amateur Radio, especially those with a public service or emergency communication aspect.

* The present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies.

* BPL systems that radiate on wide swaths of spectrum and that occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors.

* The FCC has promised to protect licensed users of the spectrum. We must hold them to that promise.

A BPL Tutorial

The BPL industry claims that the infrastructure to accommodate this technology already is in place. In many field trial areas, however, the BPL purveyors have had to run optical fiber cable throughout the service area to serve as the Internet backbone for the few hundred trial subscribers. Other BPL systems use overhead medium-voltage wiring, with digital "repeaters" installed every 2000 feet or so along the way. This widely spaced, unshielded wiring radiates a strong BPL signal to nearby areas. Still other BPL systems use IEEE 802.11-protocol wireless equipment to make the connection to homes and businesses.

A number of BPL system types are in use or in development. Each employs different techniques and architecture, but all are carrier-current systems--a term describing systems that intentionally conduct signals over electrical wiring or power lines.

There are two major categories of BPL: Access BPL and In-Building BPL

* Access BPL uses electrical distribution lines--overhead or underground--to deliver broadband Internet access to homes and businesses. Because the wiring is physically large and often overhead and extends across entire communities, access BPL poses a significant interference potential to over-the-air radio services. Access BPL uses a number of different techniques, from spread spectrum to OFDM (multi-carrier signals).

* In-building BPL systems are designed to use the electrical wiring within a building to network computers. In-building BPL can be used to interconnect PCs or other devices within a building by using that building's electrical wiring. Access BPL uses electrical distribution wiring to extend that connection to the Internet.

ARRL Lab Manager Ed Hare, W1RFI, is investigating the potential for BPL to cause interference to HF and low-VHF users.

What Present FCC Rules Permit

The NOI is not asking if BPL technology should be permitted. Under existing FCC rules, BPL systems may be built and used in the United States right now . The FCC is asking how the rules might be changed "to promote and encourage new BPL technology," in the words of the NOI.

Present FCC rules say that carrier-current systems--this includes BPL/PLC--need to meet the general radiated emission limits for unlicensed "intentional emitters." An intentional emitter is one that transmits a radio signal as a part of its normal operation. At HF, BPL systems are permitted a radiated field strength of 30 uV/meter measured at 30 meters from the signal source. At VHF, they are permitted radiated emissions of 100 uV/meter measured at 3 meters from the signal source. In most cases, the source will be the electrical wiring within a building or the electric-utility lines that pass close to residences and businesses in the US.

The FCC Notice of Inquiry

The FCC NOI asks a number of specific questions about BPL and how it should be regulated and tested. BPL systems under development and in field trials right now use spectrum between 1.7 and 80 MHz, but the NOI is also asking whether BPL should also operate on other parts of the spectrum. Amateurs are encouraged to read the NOI in its entirety and answer those questions from an Amateur Radio perspective view. Many amateurs have significant professional credentials and experience and this represents an opportunity to use that amateur experience to help the Commission make a difficult decision.

The NOI asks additional questions than we cover here, but these are the ones of greatest interest to most amateurs:

* What changes should the FCC make to existing rules to promote this technology, consistent with the Commission's objective of protecting licensed radio services?

* What spectrum should BPL use? Is there a need to define specific frequency bands for BPL toavoid interference to licensed services?

* How can the potential for interference be predicted?

* Will access BPL be compatible with other systems such as DSL or cable collocated on utility structures? Will in-building BPL be compatible with other devices plugged into the building electrical system?

* Are there any test results from BPL field trials that analyze or demonstrate the interference potential?

* Are existing Part 15 rules adequate to protect authorized users of the spectrum from new high-speed BPL technology?

* Does new high-speed BPL technology pose a higher risk of interference than existing unlicensed technology?

* What changes should be made the rules that describe how measurements should be made?

* How can the Part 15 rules be tailored to both ensure protection against harmful interference and to avoid adversely impacting the development of BPL technology?

NTIA Administrator Nancy Victory has praised the FCC's BPL initiative but cautioned the Commission to take interference concerns into consideration.

No Harmful Interference

FCC Part 15 rules require that the operator of an unlicensed emitter not cause harmful interference to authorized radio services. The absolute emission limits and the non-interference rule work together to allow most unlicensed devices to operate without causing widespread interference.

BPL is different from point-source emitters, however. Access BPL systems are not local in nature. They are expected to occupy entire communities. BPL systems do not create "birdies" on specific frequencies. They create radiated emissions at the FCC limits on entire swaths of spectrum.

If interference occurs from localized "unintentional radiator" sources such as power line noise, solutions exist. For example, power companies can change cracked insulators. The FCC has been able to enforce these rules when necessary. Indeed, a number of electric utilities have received letters from the FCC, as have the neighbors of hams who own and operate noisy Part 15 devices.

In the case of access BPL, if an amateur doesn't have the broadband system installed in his or her own house but experiences interference from signals radiated via the overhead electrical wiring, the only real solution could be to turn off the BPL system in entire neighborhoods. As a practical matter, that is unlikely to occur.

BPL Field Trials

A number of field trials have been conducted overseas. In many cases, International Amateur Radio Union (IARU) member-societies have carried out tests in the trial areas. In Austria, video recordings were made of some of the field trials.

Field trials are just getting under way in the US. To date, none of them have specifically included Amateur Radio nor have any incorporated interference studies. Typical field trials include from a handful to a few hundred homes in suburban neighborhoods.

ARRL has identified active field trials in Briarcliff Manor, New York; Cape Girardeau, Missouri; Cullman, Alabama; Emmaus, Pennsylvania; Hyde Park, Ohio; Manassas, Virginia; Potomac, Maryland; and Raleigh, North Carolina. In addition, the FCC has granted experimental licenses to BPL equipment manufacturers or utilities in a number of other states. To ARRL's knowledge, actual field trials have not started there yet.

Immunity

To ARRL's knowledge, no field trials have studied immunity. What will happen when amateurs operate their stations in areas where BPL is deployed? ARRL recently petitioned the FCC for a tiny amateur LF allocation in the vicinity of 136 kHz. The electric utility industry claimed in comments on the ARRL's petition that its PLC devices--operating on an unlicensed basis on frequencies below 490 kHz--would suffer harmful interference from 1 W effective isotropically radiated power (EIRP) amateur stations. The FCC agreed and chose not to grant Amateur Radio the LF allocation it sought.

Yet the same utility industry, in consortium with BPL manufacturers, is making the claim that on HF and low-VHF--frequencies where power lines make better antennas than they do on LF--BPL signals can

coexist with amateur stations that may be running more than 10,000 W EIRP.

Hams are generally very concerned about immunity, because they understand and appreciate the social problems that might result when a neighbor's broadband access doesn't work because the amateur is on the air.

One technical issue involves the best method to bridging or bypass the typical step-down pole transformer to deliver BPL from the power grid into an office or dwelling.

File Comments

The FCC now is accepting electronically filed comments via its Electronic Comment Filing System (ECFS). Under ECFS Main Links, click on "Submit a Filing." In the "Proceeding" field, enter "03-104" and complete the required fields. Comments may be typed into a form or you may attach a file containing your comments. Comments also may be submitted via e-mail per instructions on the ECFS page. The FCC has created a Web page that offers more information about filing comments. There's also a mailing address for those wishing to file comments by postal mail.

Supporting ARRL's Efforts on the BPL Issue

The ARRL has initiated an important Spectrum Defense Fund campaign to support activities to educate government officials on the potential threat that BPL poses to Amateur Radio. "Although this technology is already allowed, the industry wants the limits to be relaxed--with greater interference to your ham radio operation," notes ARRL CEO David Sumner, K1ZZ, in an appeal that went out recently to ARRL members. "The staff at ARRL is already hard at work on this issue."

Does anybody have any info on the above, I have one, but can find no info on it. Any help much appreciated.

Do you know what the outputs are on the back, they are unmarked on mine, I have a coax input, 2 outputs and 2 pairs of wire terminals and a single ground (apart from the Ezitune connections). There is a pair of black and a pair of red terminals, I expected to have the ground side of a pair distinguished, and I am assuming that the pairs are for high and low impedance matching, but don't know which way.

What I want to use it for is to tune a wire as an antenna, I am restricted in what I can use (conservation area in our "world heritage site" city!!!!) so need to run something around the plastic guttering - any ideas would be great.

No reason to worry about it now. The Frog remailer is gone and thus the
troll is to. Word has it it was the remailers own admin. that was doing most
of the spamming/forging/spoofing.

By the looks of things over at alt.privacy.anon-server alot of these
remailers are seeing problems starting to arise with their services.

While this is not good in the case of people that use them properly it will
possibly get rid of the remailers where the admin. refuses to enforce
against trolling, spamming...etc.

These things will have to be recharged every couple days to work, so,
once the criminals figure that out, they become useless.

I suppose it could be configured with a low-battery warning so that
the police are sent out before they are fully discharged, but that
will tie up manpower that could be spent locking up fresh criminals.

My opinion is that if someone is dangerous enough that we have to
slice them open and stick a device the size of a can of Skol in them,
then they should be caged. Your idea is like putting someone in a cell
and giving them the key. When they want "out" - just "forget" to use
the recharger.

To get a signal out, or to be inductively charged,
the device would have to be close to the skin.
So, it could be removed easily and put on
a dog collar, or something. Also, it would be
easy for the wearer (child, pet, or whatever)
to go somewhere that wouldn't allow a transmission
out to be received: A shed or well-constructed car
might have too much metal in line-of-sight of
the receiver, for example. Swimming in salt water.

I think the cancer or infection risk would be too
high for them to be used in humans--wearing a
bracelet or something would be a lot safer.

In addition, the RF itself might be harmful,
depending on transmission parameters. Transmission
below about 50 MHz probably would be advisable,
for a variety of reasons.

Rising U.S. Death Toll In Iraq Spurs Concern

9 Soldiers Killed in Attacks This Month

By Peter Slevin
Washington Post Staff Writer

Friday, June 20, 2003; Page A16

Inside the Bush administration, where top officials resolutely emphasize postwar progress in Iraq while playing down the setbacks, the rising American death toll and the increasing number of attacks on U.S. troops are causing increasing worry.

The death of a U.S. soldier yesterday near Baghdad brought to nine the number of troops killed in Iraq this month in a string of sporadic rocket and sniper attacks.

Fifty-four Americans have died in accidents or military action since President Bush declared the war ended on May 1, equal to more than one-third of the 139 wartime deaths.

Bush and his top military and foreign policy officials define the casualties as a necessary cost of a successful military occupation.

They say the deaths, while painful, are secondary to recent progress on economic and security issues.

Saving Private Jessica

By NICHOLAS D. KRISTOF

NASIRIYA, Iraq

I've been roaming Iraq, turning over rocks in my unstinting effort to help the Bush administration find those weapons of mass destruction.

No luck yet.

But I did find something related, here in the city where it seems (contrary to early Pentagon leaks) that Pfc. Jessica Lynch did not mow down Iraqis until her ammo ran out, was not shot and apparently was not plucked from behind enemy lines by U.S. commandos braving a firefight.

It looks as if the first accounts of the rescue were embellished, like the imminent threat from W.M.D., and like wartime pronouncements about an uprising in Basra and imminent defections of generals.

There's a pattern: we were misled.

None of this is to put down Private Lynch, whom her Iraqi doctors described as courageous and funny in the face of unrelenting pain; they said that she told Abdul Hadi, a hospital worker who had befriended her, not to take risks for her because he was needed by his 17 children.

Ms. Lynch is still a hero in my book, and it was unnecessary for officials to try to turn her into a Hollywood caricature.

As a citizen, I deeply resent my government trying to spin me like a Ping-Pong ball.

4322. Ain't got no Saddam, ain't got no Osama, ain't got no WMD, ain't got no nuttin'.

Beyond the intelligence officials, aides to President Bush have begun to express less certainty about the question, saying they do not know whether he is dead or alive.

They include those aides who in the immediate aftermath of the war said Mr. Hussein was probably dead.

From The New York Times, 6/20/03:

Hussein Is Probably Alive in Iraq, U.S. Experts Say

By DOUGLAS JEHL and DAVID JOHNSTON

WASHINGTON --

American intelligence analysts now believe that Saddam Hussein is much more likely to be alive than dead, a view that has been strengthened in recent weeks by intercepted communications among fugitive members of the Saddam Fedayeen and the Iraqi intelligence service, according to United States government officials.

The officials said the recently obtained intelligence had re-intensified the search for Mr. Hussein along with his sons, Uday and Qusay.

From The Boston Globe, 6/18/03:
http://www.boston.com/dailyglobe2/169/oped/What_are_Americans_dying_for_now_+.shtml

What are Americans dying for now?

By Derrick Z. Jackson, 6/18/2003

OIL IS TO DIE for.

More to the point, oil is precious enough for the government to send off your children, your husbands, your wives, your partners, your brothers, and your sisters to die for.

That is a rapidly escalating conclusion as American soldiers continue to die at the rate of one a day in Iraq without any major perturbation in Congress or disturbance from the American people.

No weapons of mass destruction have been found.

What we do have are sniper shootings, grenade attacks, and the deaths of nearly 50 US soldiers 48 days after Bush said major combat operations were over in Iraq.

On May 1, Bush said, ''We've begun the search for hidden chemical and biological weapons and already know of hundreds of sites that will be investigated.''

Seven weeks later and with no vile vials in hand, Bush gave a speech Monday in Elizabeth, N.J., where he did not make a single reference to weapons of mass destruction.

Instead, Bush chose to distract Americans from his Nixonian erasing of his justification for war by criticizing his critics as ''revisionist historians.''

Meanwhile, Bush's fellow Republicans in Congress were suppressing history by fighting any formal investigation into the possible cooking of intelligence to exaggerate the threat posed by Saddam Hussein.

Their job, for the time being is being made a piece of cake by a Democratic Party that cannot spell the term ''opposition party'' if you spotted them all the o's and p's.

As the Republicans sit on the intelligence, as Democrats sit on their thumbs, and as Americans plan summer vacations depending on the cheapest gasoline for the biggest cars in the world, our soldiers -

many of them teenagers - are halfway around the world, taking bullets for a mission that is rapidly losing meaning - at least the stated meaning.

Oh, yes, a lot of angry e-mails attempt to remind us ''revisionist historians'' that the current absence of weapons of mass destruction really does not matter because the mass graves of Iraqis who were brutally murdered by Saddam proves the humanitarian aspect of the invasion was still worth it.

That does not hold up.

We went to Somalia a decade ago for what was supposed to be a humanitarian mission, after 300,000 people died in war and starvation.

We fled within months of a failed raid by Army Rangers that ended in the deaths of 18 soldiers and the searing photographs of the corpse of a US soldier being dragged through the streets of Mogadishu.

Back then, the call for the United States to get out of Somalia was stunningly bipartisan.

Since the White House was then occupied by a Democrat, Bill Clinton, it was no surprise that Republicans leaped on the sad turn of events, with Senator Pete Domenici of New Mexico saying, ''We can't continue in that quagmire.''

Then-congresswoman Olympia Snowe of Maine, now a senator, said, ''I cannot express my disgust at watching on television the treatment of our soldiers.... There really isn't a reason for the US to be in Somalia now.''

The criticism was just as blunt from many Democrats.

''If you asked all 535 members of Congress today, almost all of them would say let's get out of Somalia now,'' said Senator Joe Biden of Delaware.

''More and more senators are saying, `We gave them food, we gave them medicine, and now they're shooting at us. Let's get out,''' said Senator John Breaux of Louisiana.

Senator Bill Bradley of New Jersey said, ''I think we ought to leave now.''

Senator Robert Byrd of West Virginia said, ''Americans by the dozens are paying with their lives and limbs for a misplaced policy.... Let's vote and get out.''

When it came to Somalia, Dole asked:

''What is our purpose? What is the cost? And how long do we stay?'' A decade later, the same question should apply.

In the Iraq invasion we lost 139 soldiers, according to the Pentagon, while 3,240 Iraqi civilians had died as of the most recent counting by the Associated Press.

The AP said the final toll is sure to be much higher.

Now, nearly another 50 soldiers have died in nebulous situations that range from justifiable self-defense to dubious overreactions more reminiscent of the shootings of American students and rioters by National Guardsmen in the 1960s.

On May 1, Vice President Dick Cheney claimed that ''one of the most successful military campaigns ever waged'' displayed to the world ''a new American way of war.''

The new American way is already dissolving into a disgusting result that has grown old in the half-century after World War II - a quagmire.

It is about time to ask why we accept a quagmire for Iraq when we would not do it for Somalia.

Without the weapons of mass destruction, it has to be for the oil.

4324. U.S. Troops Frustrated With Role In Iraq!

U.S. Troops Frustrated With Role In Iraq

Soldiers Say They Are Ill-Equipped For Peacekeeping

By Daniel Williams and Rajiv Chandrasekaran
Washington Post Foreign Service

Friday, June 20, 2003; Page A01

BAGHDAD --

Facing daily assaults from a well-armed resistance, U.S. troops in volatile central Iraq say they are growing frustrated and disillusioned with their role as postwar peacekeepers.

In conversations in a half-dozen towns across central Iraq, soldiers complained that they have been insufficiently equipped for peacekeeping and too thinly deployed in areas where they are under attack from fighters evidently loyal to deposed president Saddam Hussein.

Others questioned whether the armed opposition to the U.S. presence in Iraq may be deeper and more organized than military commanders have acknowledged.

"What are we getting into here?" asked a sergeant with the U.S. Army's 4th Infantry Division who is stationed near Baqubah, a city 30 miles northeast of Baghdad.

"The war is supposed to be over, but every day we hear of another soldier getting killed. Is it worth it? Saddam isn't in power anymore. The locals want us to leave. Why are we still here?"

Today, a soldier from the 804th Medical Brigade was killed when a rocket-propelled grenade struck a military ambulance carrying a soldier wounded in another incident, said Capt. John Morgan, a

military spokesman here.

The attack, about 20 miles south of Baghdad, produced the third U.S. fatality from hostile fire in four days.

Two other soldiers were wounded in today's ambush.

Most armed assaults on U.S. military personnel have occurred in an arc of towns and cities to the north and west of Baghdad, where support for Hussein was deepest.

U.S. forces also have mounted a massive counterinsurgency drive in the region.

Areas south of the city, where no such counterattack has been launched, had been quiet until today.

The weapons used against the Americans also have been increasing in power.

In Samarra, a city about 70 miles north of Baghdad, U.S. troops killed an Iraqi today and captured another after they fired a rocket-propelled grenade at a tank.

On Wednesday, three mortar shells rained on a U.S.-run civil administration office in the city, killing an Iraqi bystander, military spokesmen said.

Some soldiers are vexed by what they see as a contradictory reception from Iraqis.

Sometimes the public appears welcoming, sometimes actively hostile.

The problem recalls other military U.S. deployments, including in Afghanistan, where it can be difficult to distinguish friends from enemies.

"The way it seemed is, once Iraqis got over being grateful for getting rid of Saddam, they found out quickly they don't want the Americans, either," said Sgt. Nestor Torres, a military policeman with the 3rd Infantry Division in the restive town of Fallujah, 35 miles west of Baghdad.

"Everyone is blending in with everyone else, so you can't tell the friendly ones from the hostile."

Torres is a bodyguard for the division commander, Maj. Gen. Buford C. Blount III.

"When I look around, I've got to wonder who wants to shoot my boss," Torres said.

Peacekeeping duty in Iraq has made soldiers particularly vulnerable. Troops at police stations and on guard duty at banks, electrical installations and fuel stations are frequent targets of sniping.

Soldiers have been fired on when delivering propane gas.

Bystanders throw stones at them when they are constructing soccer fields or fixing schools.

By contrast, no American has been killed during the recent armed raids in northern and western Iraq, during which U.S. troops have tried to apprehend suspected Baath Party militiamen, fighters from Saddam's Fedayeen and other Hussein loyalists.

Some soldiers complain they are playing roles for which they are ill-prepared.

In Baqubah, the domain of the 4th Infantry's 2nd Brigade, combat engineers who specialize in weapons demolition and building bridges have been given a new mission: to drive around in their M113 armored personnel carriers to fight crime.

"I don't know why they're keeping us around here," said Cpl. Anthony Arteaga, 25, of Hammond, La., who is assigned to the 588th Engineer Battalion.

"We're not peacekeepers. We're heavy-combat engineers."

As Arteaga's M113 roared out of a parking lot to conduct a patrol, the noise of the engine drowned out nearby conversations, prompting Pvt. Dan Sullivan, 21, of Gainesville, Fla., to complain that the vehicle was ill-suited for catching criminals.

"They hear you from two miles away," he said.

"By the time we get there, the bad guys are gone."

Sullivan also said that the armored vehicle was too wide to travel down some of Baqubah's narrower streets.

"This wasn't made for patrolling a city," he said.

But that is what the battalion has been doing for the past six weeks.

Assigned to squelch the lawlessness that followed the downfall of Hussein's government and confiscate illegal weapons, the unit's M113s rumble through the city for hours at a time, even under the blazing afternoon sun.

Soldiers decked out in full combat attire, including heavy flak jackets, poke out of the hatch, their M-16 rifles at the ready.

When the battalion first arrived in Baqubah in late April, "every single person was waving at us," said 2nd Lt. Skip Boston, 24, of Marshalltown, Iowa.

Now, he said, "they just stare."

"A man told me the other day that we've been here for two months and nothing's changed," Boston said.

"That's not really true, but all they see is us riding up and down the roads and being a nuisance for them."

The focus on crime fighting has annoyed Boston and his men, who said they would rather be blowing up ammunition caches.

"It's getting really frustrating," Sullivan said.

"We took the city, but what was it for? We took one bad guy out, but now there are lots of bad guys here."

After President Bush declared on May 1 that major combat in Iraq was finished, many soldiers assumed they would be returning to the United States in a matter of weeks.

But withdrawal plans have been placed on hold.

Not only have military units have been reassigned to street patrols, many are still living in the same spartan camps they pitched two months ago, where they eat rations and sleep in dusty tents.

The inability to unwind outside their camps or interact with Iraqis in a non-military setting has added to soldiers' frustration, several said.

Soldiers are prohibited from leaving their compounds without a weapon, body armor and a specific mission.

Although they are encouraged to talk to Iraqis while on patrol, they have been urged not to eat local food, and alcohol consumption is prohibited by a general order applying to all military personnel in Iraq.

At a checkpoint on the outskirts of Baghdad set up to search for illegal weapons, a soldier sweating in the 110-degree heat told a reporter, "Tell President Bush to bring us home."

On a skylight atop Fallujah's city hall, a soldier has scrawled in the dust:

"I'll kill for a ticket home."

Elements of Blount's 3rd Infantry Division have been away from their home base at Fort Stewart, Ga., since September, when they were deployed to Kuwait to prepare for the invasion.

After spearheading the race to Baghdad and the conquest of the capital, many in the division expected to be sent home.

Instead, they were dispatched to Fallujah to put down a budding revolt.

"Fatigue could come," Blount, the division commander, said in an interview.

"They are getting tired. But morale is still pretty good."

Others contend spirits already are slipping, particularly among reservists who did not anticipate staying in Iraq for more than a few months.

"It's a cliche, but winning the war is easy," said Master Sgt. Steven Quick, a reservist and police officer from Severn, Md.

"Winning the peace is difficult. For future recruitment and retaining of reservists, there has to be a clear idea of when we can go home in situations like this."

Even relatively simple projects designed to show goodwill can turn sour.

Military engineers recently cleared garbage from a field in Fallujah, resurfaced it with dirt and put up goal posts to create an instant soccer field.

A day later, the goal posts were stolen and all the dirt had been scraped from the field. Garbage began to pile up again.

"Is this animosity, crime or both? What kind of people loot dirt?" said Capt. Allen Vaught, from the 490th Civil Affairs Battalion.

"We can't build stuff and then have everyone just help themselves. We don't get anywhere that way."

Lying and Dying

Sex, Lies & WMDs

By Dr. SUSAN BLOCK

Perma-war pops as the dollar drops.

Our leaders lie as people die.

Of course, there are lies, and then there are lies.

Four years ago, a President of the United States was impeached because he lied about details of his sex life.

His enemies insisted:

It's not the sex that's the impeachable offense-- although they couldn't stop talking about the sex--it's the lying!

Though nobody died for those lies.

Now the mob that practically lynched President Clinton is running the country, with the major media as their handmaiden.

And their President who would be King, George II, has been caught in a lie so big, Joseph Goebbels must be tipping his peaked cap in admiration from his grave.

Little Dubya told a lie, not about sex (unless he really does strap on a missile slathered with Crisco between his legs before mounting one of his beloved ranch animals).

No, the Great Pretzel Swallower didn't lie about sex, but about the basis for war.

So far, this particular war has killed untold thousands of soldiers and civilians, including hundreds of Americans, as well as more than a few British blokes, cost us billions of dollars in the midst of the worst deficit in U.S. history, gotten our leaders charged with war crimes by a Belgian court, served as an Al Qaeda recruiting symbol beyond Osama's wildest dreams, and shows no signs of being over, despite Top Gun Georgy's costume-drama proclamation of the end of major fighting on board the U.S.S. Lincoln.

Moreover, Gulf War II is but one part of the Perma-War condition into which the lies of the Bushites have submerged America.

So, which lie should be an impeachable offense?

A personal fib to cover-up a blow-job, or an elaborately orchestrated web of deceit, forgery and Big Internationally Broadcast Whoppers about Vast Stores of End-Times Armaments, for the clear purpose of terrorizing Americans into supporting war, even when all the evidence showed us that Saddam, Evil-Doer that he was, hadn't developed any major weapons since the Gulf War I.

So what if Saddam acted like he had something to hide?

A lot of men do.

Like I explained, almost a year ago in these pages, "Saddamis the kind of guy who brags he's got nine inches, then won't let you unzip his pants for fear you'll laugh at his actual four and a half (and he'd have to kill you for that)."

So, now we all know Saddam is just that type of guy, and we can all see clear-as-a-day-without-bombs that our President and his henchmen lied to us.

So which lie is worse-Clinton's or Bush's?

The sexual sin or the war crime?

The blow-job cover-up or the ruse for the rape of Iraq?

Obviously, covering up a blow-job is worse, according to Congress (also according to the TV pundits who are still after the Clintons, as evidenced by their enraged reaction to the blockbuster sales of Hillary's memoir "Living History").

And oh, those awful semen stains!

Much, much worse than the bloodstains across the ancient land of Mesopotamia, laid waste upon a Pack of Lies.

Hey now, there's a pack of playing cards I'd like to see!

Each card could have a different WMD that the Bushites lied about.

The Ace of Hearts could be the 500 tons of sarin, mustard gas and VX nerve agent.

The Queen of Diamonds could be the 25,000 liters of anthrax.

The Jack of Clubs would be the 38,000 liters of botulinum toxin.

The King of Spades would be the 500 tons of "yellowcake" uranium from Niger.

And so on.

According to Dubya's State of the Union Address, Saddam had enough weapons to blow us to the moon within 45 minutes.

A lie like this shouldn't even be protected by the First Amendment; it is the national equivalent of yelling "Fire!" in a crowded theater.

Sure, many of us knew the Shrub was full of it.

But some of us believed him (just like some of us believed that Billy Jeff "never had sexual relations with that woman"), and on the basis of that belief, we heaved ourselves and our loved ones into this major war that is just beginning, even as the scope of the lie comes clear.

For months, our troops have been bravely searching for these tons upon tons of horrible stuff from FrankenSaddam's evil laboratory (and the search, along with the war, continues), and all to no avail.

They can't even find enough poison in those two Winnebagos to kill a rat.

At this point, if anyone comes up with anything (a vat of lye? a really big can of Raid?), everyone will wonder if it's a plant.

So, caught in a lie, what does our leader do?

Remember what Clinton did?

He came clean--cleaner than any other American president has had to come about his sex life.

He was a man, a sexual man, and he apologized for his indiscretion and took his punishment, insanely overblown as it was.

And what does Bush do?

He blames the CIA.

Of course, Clinton couldn't blame the CIA.

Ever since the Puritans invaded this land, Americans have been sticklers for making us all "take responsibility" for sex.

Too bad we aren't so hypercritical of our leaders when it comes to war.

4326. Iraqis Were Set to Vote, but U.S. Wielded a Veto

Iraqis Were Set to Vote, but U.S. Wielded a Veto

By DAVID ROHDE

AJAF, Iraq --

American marines had built makeshift wooden ballot boxes.

An Army reserve unit from Green Bay, Wis., had conducted a voter registration drive.

And Iraqi political candidates had blanketed the city with colorful fliers outlining their election platforms -- restore electricity, rehabilitate the old quarter, repave roads.

But last week, L. Paul Bremer III, the head of the American military occupation in Iraq, unilaterally canceled what American officials here said would have been the first such election in Iraq since the fall of Saddam Hussein.

Overruling the local American military commander, Mr. Bremer decreed that conditions in Najaf were not appropriate for an election.

4327. No work, no money and plenty of desperation: Just another day in Baghdad.

Just another day in Baghdad

The demonstrating Iraqis have no work, no money and are desperate.

Two are shot dead.

Nearby, an American soldier guarding a gas station is casually killed

Rory McCarthy in Baghdad
Thursday June 19, 2003
The Guardian

Hussein Saber shook with fury as he lay on a dirty hospital bed last night and told the story of another day in Baghdad, a city torn apart by killings, misunderstanding and the startling failures of America's military occupation.

Yesterday Hussein, 33, should have collected a $50 emergency payment which all Iraq's now unemployed soldiers are due to receive.

The money did not arrive and so he and hundreds of other frustrated young men poured towards the gates of the US-led authority to protest.

Within minutes he was shot in his right side by a young, nervous American soldier.

Hussein survived but two other Iraqis standing next to him in the crowd were killed.

Just a few miles away in the centre of the city, gunmen in a passing car shot dead one American soldier and wounded another as they guarded a propane gas station.

It was another strike against the US military by an increasingly bold guerrilla resistance force intent on destabilising the reconstruction.

Neither the Iraqis nor the Americans ever dreamed that Baghdad would be like this, ten weeks to the day after Saddam Hussein's regime was finally toppled.

The people of this city are still gripped with the deepening problems of poor security, interminable power shortages and unpaid salaries.

Their frustration is spilling over into a spate of attacks on the US military, which are met with heavy-handed raids and mass arrests

which, in turn, spark yet greater frustration.

Searing midsummer temperatures do little to cool tempers on either side.

"I hoped and I wished that when the American forces came they would bring us democracy and freedom but unfortunately we have seen the opposite," said Hussein, a non-commissioned officer in the air force for the past 18 years.

"The Americans are going to get hurt if the situation remains as it is."

All the junior ranks within Iraq's 400,000-strong military, which was formally dissolved last month, have been promised a one-off payment and the chance to apply for a job in the new Iraqi national army.

In reality none have been paid since their last wages from the regime in February or March.

Recruitment for the new military has not started and, like the thousands of regular government employees still without work, their frustration should be evident for the US authority to see.

Hundreds of former soldiers gathered at the national recruitment office in Baghdad yesterday morning where they expected to receive their payouts.

Similar payments have been made by the British army in Basra.

But yesterday when officials in the building told them they had no money to offer they poured towards the gates of the Republican Palace, once Saddam's home and now the base of the US-led authority.

In the eyes of the US military, the crowd of frustrated former soldiers was a threat and they eventually opened fire.

The Iraqi soldiers see themselves very differently - as husbands and fathers, struggling to make a living, gripped with defeated pride and disappointment.

Khadum Hussain Hani, 32, joined the Iraqi military aged 15 for the same reasons that brought many of the young Americans on patrol in Baghdad into the US army - he wanted to serve his country and he wanted a decent wage.

His brother, also a soldier, died during the war with Iran in the 1980s.

Following tradition, Khadum married his brother's wife and took responsibility for the couple's three young children.

Last year they had another son.

Until the war he was paid 75,000 dinars a month (then worth $37).

Since March he has received nothing and has had to borrow thousands of dollars to pay the 30,000 dinars monthly rent on his small apartment.

"I have borrowed and borrowed and all I have left in my pocket today is my identity card," he said yesterday.

Before the war he and his wife talked about whether he would fight.

"I told her I wouldn't fight. I was glad the Americans were coming to take us away from this oppression," he said.

Now he has to explain to his children why he has no work and no money.

"Sometimes they ask: 'Did you bring home any apples today father?'" he said.

"I tell them I will bring apples one day when I have some money."

It is all too clear that the natural goodwill that many Iraqis felt when the US and British forces brought to an end three decades of brutality and repression is rapidly fading.

"There is a big gap between the Iraqis and the Americans right now," said Khadum.

American troops speak freely of their own frustrations.

They patrol in heavy bulletproof jackets and Kevlar helmets in the suffocating midday heat.

Many were first deployed to camps in Kuwait nine months ago and have had little time to rest or recover from the intense three weeks of combat that brought them to Baghdad.

The shift from fighting to peacekeeping has been fractured and slow.

Still they are being targeted in guerrilla attacks and they don't understand why.

The al-Shawaf crossroads outside the Republican Palace, the bloodied site of yesterday's killings, has become the touchstone of the failings of the military occupation.

Here there are queues of the articulate and the plain angry.

The US officials who should be listening to their very simple and very real complaints are locked in a cycle of meetings from dawn until after midnight in the palace complex, behind the heavily guarded, barbed-wire entrance at the palace gates.

Alia Abbas Issa, 42, used to work in the palace as a seamstress, sewing curtains for Saddam's offices and private rooms.

She took the job to help pay for English lessons at the local British Council office.

It paid her well, up to 200,000 dinars (ï¿½2000) a month.

Then came the war.

Her apartment was looted of all her possessions, even her bed, and her job disappeared.

She is left caring for the two daughters of her younger brother, who died in Kuwait during the first Gulf war.

"There is nothing I can tell them. We used to have money now there is nothing. We cry from night until morning," she said.

"I thought the Americans would bring us a new start. We want to like George Bush but the Iraqis are suffering and suffering," she said.

"God will reward those people who come here if they come here to help us."

U.S. Trade Deficit Swells to Record $136.1 Billion
By THE ASSOCIATED PRESS

Filed at 5:16 p.m. ET

NEW YORK (AP) -- A key measure of future economic activity rose sharply in May, beating analysts' expectations and fueling hopes for a rebound. But don't pop the champagne corks yet; economists say a few more months of positive readings are needed to inspire the business confidence needed for a full recovery.

The Index of Leading Economic Indicators rose 1.0 percent in May to 111.6, the New York-based Conference Board said. Analysts had expected a rise of about 0.6 percent.

The forecast followed encouraging news from the Labor Department that unemployment benefit claims are on the decline. And in welcome news for the housing market, a new survey showed rates on 30-year mortgages remained at record low levels this week.

Though the index of leading indicators was slightly higher than anticipated, economists said the figure largely confirmed expectations. Investors remained cautious, sending stocks tumbling as they sought to preserve profits from previous rallies.

The Dow Jones industrial average closed down 114 points at 9,180. The broader market also retreated. The Nasdaq composite index fell 29 points to close at 1,649. The Standard & Poor's 500 index dropped 15 points to close at 995.

David Wyss, chief economist at Standard & Poor's in New York, said the rise in the Conference Board index is the clearest sign that things are looking up.

``Everything is pointed in the same direction, but except for the leading indicator, none of it is pointing too hard,'' said Wyss. ``I think that's sort of the state of the economy right now. We may be turning the corner, but we're taking it awfully wide.''

The Conference Board index measures where the overall U.S. economy is headed in the next three to six months. It stood at 100 in 1996, its base year.

The sharp increase in May, following a slight increase in April, comes after 18 months of essentially sideways movement. The consecutive increases could

reflect the beginning of an upward trend.

``The Leading Economic Index finally points to a recovery,'' said Conference Board economist Ken Goldstein. ``But the dangers present in the first five months of the year have not disappeared completely. Chief among them is a lack of business confidence.''

Eight of the 10 indicators that make up the leading index rose in May. Among the positive contributors were stock prices, real money supply and consumer expectations. The Conference Board's coincident index, which measures current economic activity, rose 0.1 percent in May, after holding steady in April and March.

Patrick Fearon, an economist with A.G. Edwards & Sons in St. Louis, said it was encouraging that the rise was so broad, but he remains concerned about lagging business spending and consumer sentiment.

``We'd like to see a few more months of positive readings before we can say that the economy is accelerating in a sustained way,'' Fearon said. ``It's a little early to break out the champagne.''

Meanwhile, the Labor Department said Thursday that new claims for unemployment benefits dropped for the second straight week, declining by a seasonally adjusted 13,000 to 421,000, a five-week low. The more stable, four-week moving average of claims, which smooths out weekly fluctuations, also declined by 3,000 to 432,000.

The employment market continues to worry economists. Although claims have fallen, they're still above 400,000 -- a level associated with a weak job market. But the declines have raised hope that the pace of layoffs may be stabilizing.

Separately, mortgage giant Freddie Mac said the average rate on 30-year fixed-rate mortgages for the week ending June 20 held steady at 5.21 percent, unchanged from last week, according to its nationwide survey.

Last week's rate was the lowest since Freddie Mac began tracking 30-year mortgages in 1971.

Low mortgage rates help the housing market and feed a home-mortgage refinancing boom, which in turn frees money that consumers can spend on other things.

Also Thursday, the Commerce Department said the deficit in the broadest measure of trade widened to a record $136.1 billion in the first three months of 2003, as war tensions stoked the prices of imported crude oil and other petroleum products. The snapshot shows the ``current account'' deficit in the January-March quarter was 5.8 percent larger than the previous record deficit of $128.6 billion, set in the fourth quarter of 2002.

Bush's 9/11 coverup?
Family members of victims of the terror attacks say the White House has smothered every attempt to get to the bottom of the outrageous intelligence failures that took place on its watch.

- - - - - - - - - - - -
By Eric Boehlert

June 18, 2003 | For family members of those who died on Sept. 11, last week brought a rare chance to meet face-to-face with a man who's become a symbol of their dissatisfaction -- FBI director Robert Mueller. The bureau had quietly invited several dozen family members to Washington to hear a presentation on the war on terrorism, but for the small band of husbands, wives and parents who successfully lobbied Congress last year for an independent 9/11 commission to investigate the attacks, it was a chance to ask some of the troubling questions that they have about that day.

They weren't simply queries about the national security collapse that occurred on 9/11, and how a hijacked plane, flying hundreds of miles off course, was able to dive-bomb untouched into the Pentagon a full hour after the World Trade Center had already been attacked twice. Or how more than a dozen terrorists were able to enter America illegally and then live here undetected for weeks and months, and why U.S. intelligence sources failed to piece together significant clues that emerged in advance of the attack.

Family advocates also wanted to know why the government -- and specifically the Bush administration -- has been so reluctant to find answers to any of the obvious questions about what went wrong that day, why so little has been fixed, and why virtually nobody has accepted any responsibility for the glaring failures.

While the administration of President George W. Bush is aggressively positioning itself as the world leader in the war on terrorism, some families of the Sept. 11 victims say that the facts increasingly contradict that script. The White House long opposed the formation of a blue ribbon Sept. 11 commission, some say, and even now that panel is underfunded and struggling to build momentum. And, they say, the administration is suppressing a 900-page congressional study, possibly out of fear that the findings will be politically damaging to Bush.

4330. Bush Lied to Americans on the War

Kerry says Bush misled Americans on war
By Ron Fournier, Associated Press, 6/18/2003 21:04

LEBANON, N.H. (AP) Democratic presidential candidate John Kerry said Wednesday that President Bush broke his promise to build an international coalition against Iraq's Saddam Hussein and then waged a war based on questionable intelligence.

''He misled every one of us,'' Kerry said. ''That's one reason why I'm running to be president of the United States.''

Kerry said Bush made his case for war based on at least two pieces of U.S. intelligence that now appear to be wrong that Iraq sought nuclear material from Africa and that Saddam's regime had aerial weapons capable of attacking the United States with biological material.

Still, Kerry said it is too early to conclude whether or not war with Iraq was justified. There needs to be a congressional investigation into U.S. intelligence on Iraq, he said.

''I will not let him off the hook throughout this campaign with respect to America's credibility and credibility to me because if he lied he lied to me personally,'' he said.

Kerry fielded several questions about Iraq from a small group of anti-war Democrats after he addressed about 250 people in a downtown Lebanon park.

Kerry supported the war and said Wednesday, ''I'm glad Saddam Hussein is gone.'' But the Massachusetts senator has criticized the president's diplomatic efforts. He that concern Wednesday saying Bush had alienated U.S. allies in the runup to war.

As for the question about U.S. intelligence, Kerry said he has led the call for a congressional investigation and pledged, ''We will get to the bottom of this.''

Kerry said his service in the Vietnam war and his experience as a member of the Foreign Relations Committee and former member of the Intelligence Committee of the Senate make him the Democrat best suited to question Bush's efforts on foreign policy.

''I believe I can hold President Bush accountable if they have misled us,'' he said.

Addressing senior citizens in Hanover later in the evening, Kerry said he supported a congressional investigation because it was not clear whether Bush acted on poor, distorted or politicized intelligence.

''I don't have the answer,'' he said. ''I want the answer and the American people deserve the answer. I will get to the bottom of this.''

4331. Iraqis Curse B.U.S.H. at Funeral of Protestor

Iraqi gunmen curse America at protester's funeral

By Esmat Salaheddin

BAGHDAD, June 19 (Reuters) - Cursing America, scores of gunmen fired in the air on Thursday at the funeral of a former Iraqi air force man killed by U.S. troops during a violent protest in Baghdad.

"Revenge! Revenge!" several hundred mourners shouted as men with Kalashnikov assault rifles fired volleys into the air, in defiance of a U.S. ban on carrying weapons in Iraq.

"There is no god but Allah, America is the enemy of Allah," mourners chanted as they followed the coffin of Tareq Mohammed, one of two men shot dead at a demonstration on Wednesday.

There was no sign of U.S. troops in Baghdad's impoverished al-Hurriya district where Mohammed, a former air force non-commissioned officer, had lived with his wife and five children.

Mohammed was killed when sacked members of Iraq's dissolved armed forces confronted U.S. soldiers during furious protests outside the headquarters of the U.S.-led administration in the capital.

The U.S. military said demonstrators had thrown stones at a convoy entering the compound and one had pulled out a weapon and begun shooting, prompting U.S. forces to respond.

Mohammed's former colleagues who joined him in Wednesday's protest denied the accusations, saying they were unarmed.

"We were unarmed in a peaceful demonstration to demand our frozen salaries," said one mourner, Khazaal Qatie, angrily. "Isn't that terrorism, shooting at protesters?"

During the demonstration, protesters beat passing United Nations and press vehicles with shoes, and attacked some journalists, smashing their cameras.

"They deprived us of our jobs and have not offered us new ones," Qatie said of the U.S. move to disband Saddam Hussein's armed forces, security services and two ministries, throwing 400,000 people out of work.

"The Americans should expect problems now. He (Mohammed) has relatives, friends and neighbours."

People who gathered for funeral prayers at the neighbourhood mosque complained bitterly about the lack of electricity, water and other services in the area.

"The former regime was 1,000 times more merciful," said one resident, Abdul-Azim Abdul-Wahed.

"The Americans have only pumps to steal our oil, but have no generators for us."

U.S. forces have struggled to impose order and restore services in Iraq since Saddam's government fell on April 9.

Rising U.S. Death Toll In Iraq Spurs Concern

9 Soldiers Killed in Attacks This Month

By Peter Slevin
Washington Post Staff Writer

Friday, June 20, 2003; Page A16

Inside the Bush administration, where top officials resolutely
emphasize postwar progress in Iraq while playing down the setbacks,
the rising American death toll and the increasing number of attacks on
U.S. troops are causing increasing worry.

The death of a U.S. soldier yesterday near Baghdad brought to nine the
number of troops killed in Iraq this month in a string of sporadic
rocket and sniper attacks.

Fifty-four Americans have died in accidents or military action since
President Bush declared the war ended on May 1, equal to more than
one-third of the 139 wartime deaths.

Bush and his top military and foreign policy officials define the
casualties as a necessary cost of a successful military occupation.

They say the deaths, while painful, are secondary to recent progress
on economic and security issues.

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste.

Saving Private Jessica

By NICHOLAS D. KRISTOF

NASIRIYA, Iraq

I've been roaming Iraq, turning over rocks in my unstinting effort to help the Bush administration find those weapons of mass destruction.

No luck yet.

But I did find something related, here in the city where it seems (contrary to early Pentagon leaks) that Pfc. Jessica Lynch did not mow down Iraqis until her ammo ran out, was not shot and apparently was not plucked from behind enemy lines by U.S. commandos braving a firefight.

It looks as if the first accounts of the rescue were embellished, like the imminent threat from W.M.D., and like wartime pronouncements about an uprising in Basra and imminent defections of generals.

There's a pattern: we were misled.

None of this is to put down Private Lynch, whom her Iraqi doctors described as courageous and funny in the face of unrelenting pain; they said that she told Abdul Hadi, a hospital worker who had befriended her, not to take risks for her because he was needed by his 17 children.

Ms. Lynch is still a hero in my book, and it was unnecessary for officials to try to turn her into a Hollywood caricature.

As a citizen, I deeply resent my government trying to spin me like a Ping-Pong ball.

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste.
No brains strikes again! If its in the Post it must be true! Cut and Paste.

Beyond the intelligence officials, aides to President Bush have begun
to express less certainty about the question, saying they do not know
whether he is dead or alive.

They include those aides who in the immediate aftermath of the war
said Mr. Hussein was probably dead.

From The New York Times, 6/20/03:
http://www.nytimes.com/2003/06/20/international/worldspecial/20SADD.html

Hussein Is Probably Alive in Iraq, U.S. Experts Say

By DOUGLAS JEHL and DAVID JOHNSTON

WASHINGTON --

American intelligence analysts now believe that Saddam Hussein is much
more likely to be alive than dead, a view that has been strengthened
in recent weeks by intercepted communications among fugitive members
of the Saddam Fedayeen and the Iraqi intelligence service, according
to United States government officials.

The officials said the recently obtained intelligence had
re-intensified the search for Mr. Hussein along with his sons, Uday
and Qusay.

http://www.boston.com/dailyglobe2/169/oped/What_are_Americans_dying_for_now_
+.shtml

What are Americans dying for now?

By Derrick Z. Jackson, 6/18/2003

OIL IS TO DIE for.

More to the point, oil is precious enough for the government to send
off your children, your husbands, your wives, your partners, your
brothers, and your sisters to die for.

That is a rapidly escalating conclusion as American soldiers continue
to die at the rate of one a day in Iraq without any major perturbation
in Congress or disturbance from the American people.

No weapons of mass destruction have been found.

What we do have are sniper shootings, grenade attacks, and the deaths
of nearly 50 US soldiers 48 days after Bush said major combat
operations were over in Iraq.

On May 1, Bush said, ''We've begun the search for hidden chemical and
biological weapons and already know of hundreds of sites that will be
investigated.''

Seven weeks later and with no vile vials in hand, Bush gave a speech
Monday in Elizabeth, N.J., where he did not make a single reference to
weapons of mass destruction.

Instead, Bush chose to distract Americans from his Nixonian erasing of
his justification for war by criticizing his critics as ''revisionist
historians.''

Meanwhile, Bush's fellow Republicans in Congress were suppressing
history by fighting any formal investigation into the possible cooking
of intelligence to exaggerate the threat posed by Saddam Hussein.

Their job, for the time being is being made a piece of cake by a
Democratic Party that cannot spell the term ''opposition party'' if
you spotted them all the o's and p's.

As the Republicans sit on the intelligence, as Democrats sit on their thumbs, and as Americans plan summer vacations depending on the cheapest gasoline for the biggest cars in the world, our soldiers - many of them teenagers - are halfway around the world, taking bullets for a mission that is rapidly losing meaning - at least the stated meaning.

Oh, yes, a lot of angry e-mails attempt to remind us ''revisionist historians'' that the current absence of weapons of mass destruction really does not matter because the mass graves of Iraqis who were brutally murdered by Saddam proves the humanitarian aspect of the invasion was still worth it.

That does not hold up.

We went to Somalia a decade ago for what was supposed to be a humanitarian mission, after 300,000 people died in war and starvation.

We fled within months of a failed raid by Army Rangers that ended in the deaths of 18 soldiers and the searing photographs of the corpse of a US soldier being dragged through the streets of Mogadishu.

Back then, the call for the United States to get out of Somalia was stunningly bipartisan.

Since the White House was then occupied by a Democrat, Bill Clinton, it was no surprise that Republicans leaped on the sad turn of events, with Senator Pete Domenici of New Mexico saying, ''We can't continue in that quagmire.''

Then-congresswoman Olympia Snowe of Maine, now a senator, said, ''I cannot express my disgust at watching on television the treatment of our soldiers.... There really isn't a reason for the US to be in Somalia now.''

The criticism was just as blunt from many Democrats.

''If you asked all 535 members of Congress today, almost all of them would say let's get out of Somalia now,'' said Senator Joe Biden of Delaware.

''More and more senators are saying, `We gave them food, we gave them medicine, and now they're shooting at us. Let's get out,''' said Senator John Breaux of Louisiana.

Senator Bill Bradley of New Jersey said, ''I think we ought to leave now.''

Senator Robert Byrd of West Virginia said, ''Americans by the dozens are paying with their lives and limbs for a misplaced policy.... Let's vote and get out.''

When it came to Somalia, Dole asked:

''What is our purpose? What is the cost? And how long do we stay?'' A decade later, the same question should apply.

In the Iraq invasion we lost 139 soldiers, according to the Pentagon, while 3,240 Iraqi civilians had died as of the most recent counting by the Associated Press.

The AP said the final toll is sure to be much higher.

Now, nearly another 50 soldiers have died in nebulous situations that range from justifiable self-defense to dubious overreactions more reminiscent of the shootings of American students and rioters by National Guardsmen in the 1960s.

On May 1, Vice President Dick Cheney claimed that ''one of the most successful military campaigns ever waged'' displayed to the world ''a new American way of war.''

The new American way is already dissolving into a disgusting result that has grown old in the half-century after World War II - a quagmire.

It is about time to ask why we accept a quagmire for Iraq when we would not do it for Somalia.

Without the weapons of mass destruction, it has to be for the oil.

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste.
No brains strikes again! If its in the Post it must be true! Cut and Paste.

U.S. Troops Frustrated With Role In Iraq

Soldiers Say They Are Ill-Equipped For Peacekeeping

By Daniel Williams and Rajiv Chandrasekaran
Washington Post Foreign Service

Friday, June 20, 2003; Page A01

BAGHDAD --

Facing daily assaults from a well-armed resistance, U.S. troops in
volatile central Iraq say they are growing frustrated and
disillusioned with their role as postwar peacekeepers.

In conversations in a half-dozen towns across central Iraq, soldiers
complained that they have been insufficiently equipped for
peacekeeping and too thinly deployed in areas where they are under
attack from fighters evidently loyal to deposed president Saddam
Hussein.

Others questioned whether the armed opposition to the U.S. presence in
Iraq may be deeper and more organized than military commanders have
acknowledged.

"What are we getting into here?" asked a sergeant with the U.S. Army's
4th Infantry Division who is stationed near Baqubah, a city 30 miles
northeast of Baghdad.

"The war is supposed to be over, but every day we hear of another
soldier getting killed. Is it worth it? Saddam isn't in power anymore.
The locals want us to leave. Why are we still here?"

Today, a soldier from the 804th Medical Brigade was killed when a rocket-propelled grenade struck a military ambulance carrying a soldier wounded in another incident, said Capt. John Morgan, a military spokesman here.

The attack, about 20 miles south of Baghdad, produced the third U.S. fatality from hostile fire in four days.

Two other soldiers were wounded in today's ambush.

Most armed assaults on U.S. military personnel have occurred in an arc of towns and cities to the north and west of Baghdad, where support for Hussein was deepest.

U.S. forces also have mounted a massive counterinsurgency drive in the region.

Areas south of the city, where no such counterattack has been launched, had been quiet until today.

The weapons used against the Americans also have been increasing in power.

In Samarra, a city about 70 miles north of Baghdad, U.S. troops killed an Iraqi today and captured another after they fired a rocket-propelled grenade at a tank.

On Wednesday, three mortar shells rained on a U.S.-run civil administration office in the city, killing an Iraqi bystander, military spokesmen said.

Some soldiers are vexed by what they see as a contradictory reception from Iraqis.

Sometimes the public appears welcoming, sometimes actively hostile.

The problem recalls other military U.S. deployments, including in Afghanistan, where it can be difficult to distinguish friends from enemies.

"The way it seemed is, once Iraqis got over being grateful for getting rid of Saddam, they found out quickly they don't want the Americans, either," said Sgt. Nestor Torres, a military policeman with the 3rd Infantry Division in the restive town of Fallujah, 35 miles west of Baghdad.

"Everyone is blending in with everyone else, so you can't tell the friendly ones from the hostile."

Torres is a bodyguard for the division commander, Maj. Gen. Buford C. Blount III.

"When I look around, I've got to wonder who wants to shoot my boss," Torres said.

Peacekeeping duty in Iraq has made soldiers particularly vulnerable. Troops at police stations and on guard duty at banks, electrical installations and fuel stations are frequent targets of sniping.

Soldiers have been fired on when delivering propane gas.

Bystanders throw stones at them when they are constructing soccer fields or fixing schools.

By contrast, no American has been killed during the recent armed raids in northern and western Iraq, during which U.S. troops have tried to apprehend suspected Baath Party militiamen, fighters from Saddam's Fedayeen and other Hussein loyalists.

Some soldiers complain they are playing roles for which they are ill-prepared.

In Baqubah, the domain of the 4th Infantry's 2nd Brigade, combat engineers who specialize in weapons demolition and building bridges have been given a new mission: to drive around in their M113 armored personnel carriers to fight crime.

"I don't know why they're keeping us around here," said Cpl. Anthony Arteaga, 25, of Hammond, La., who is assigned to the 588th Engineer Battalion.

"We're not peacekeepers. We're heavy-combat engineers."

As Arteaga's M113 roared out of a parking lot to conduct a patrol, the noise of the engine drowned out nearby conversations, prompting Pvt. Dan Sullivan, 21, of Gainesville, Fla., to complain that the vehicle was ill-suited for catching criminals.

"They hear you from two miles away," he said.

"By the time we get there, the bad guys are gone."

Sullivan also said that the armored vehicle was too wide to travel down some of Baqubah's narrower streets.

"This wasn't made for patrolling a city," he said.

But that is what the battalion has been doing for the past six weeks.

Assigned to squelch the lawlessness that followed the downfall of Hussein's government and confiscate illegal weapons, the unit's M113s rumble through the city for hours at a time, even under the blazing afternoon sun.

Soldiers decked out in full combat attire, including heavy flak jackets, poke out of the hatch, their M-16 rifles at the ready.

When the battalion first arrived in Baqubah in late April, "every single person was waving at us," said 2nd Lt. Skip Boston, 24, of Marshalltown, Iowa.

Now, he said, "they just stare."

"A man told me the other day that we've been here for two months and nothing's changed," Boston said.

"That's not really true, but all they see is us riding up and down the roads and being a nuisance for them."

The focus on crime fighting has annoyed Boston and his men, who said they would rather be blowing up ammunition caches.

"It's getting really frustrating," Sullivan said.

"We took the city, but what was it for? We took one bad guy out, but now there are lots of bad guys here."

After President Bush declared on May 1 that major combat in Iraq was finished, many soldiers assumed they would be returning to the United States in a matter of weeks.

But withdrawal plans have been placed on hold.

Not only have military units have been reassigned to street patrols, many are still living in the same spartan camps they pitched two months ago, where they eat rations and sleep in dusty tents.

The inability to unwind outside their camps or interact with Iraqis in a non-military setting has added to soldiers' frustration, several said.

Soldiers are prohibited from leaving their compounds without a weapon, body armor and a specific mission.

Although they are encouraged to talk to Iraqis while on patrol, they have been urged not to eat local food, and alcohol consumption is prohibited by a general order applying to all military personnel in Iraq.

At a checkpoint on the outskirts of Baghdad set up to search for illegal weapons, a soldier sweating in the 110-degree heat told a reporter, "Tell President Bush to bring us home."

On a skylight atop Fallujah's city hall, a soldier has scrawled in the dust:

"I'll kill for a ticket home."

Elements of Blount's 3rd Infantry Division have been away from their home base at Fort Stewart, Ga., since September, when they were deployed to Kuwait to prepare for the invasion.

After spearheading the race to Baghdad and the conquest of the capital, many in the division expected to be sent home.

Instead, they were dispatched to Fallujah to put down a budding revolt.

"Fatigue could come," Blount, the division commander, said in an interview.

"They are getting tired. But morale is still pretty good."

Others contend spirits already are slipping, particularly among reservists who did not anticipate staying in Iraq for more than a few months.

"It's a cliche, but winning the war is easy," said Master Sgt. Steven Quick, a reservist and police officer from Severn, Md.

"Winning the peace is difficult. For future recruitment and retaining of reservists, there has to be a clear idea of when we can go home in situations like this."

Even relatively simple projects designed to show goodwill can turn sour.

Military engineers recently cleared garbage from a field in Fallujah, resurfaced it with dirt and put up goal posts to create an instant soccer field.

A day later, the goal posts were stolen and all the dirt had been scraped from the field. Garbage began to pile up again.

"Is this animosity, crime or both? What kind of people loot dirt?" said Capt. Allen Vaught, from the 490th Civil Affairs Battalion.

"We can't build stuff and then have everyone just help themselves. We don't get anywhere that way."

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste. No brains strikes again! If its in the Post it must be true! Cut and Paste.

Lying and Dying

Sex, Lies & WMDs

By Dr. SUSAN BLOCK

Perma-war pops as the dollar drops.

Our leaders lie as people die.

Of course, there are lies, and then there are lies.

Four years ago, a President of the United States was impeached because he lied about details of his sex life.

His enemies insisted:

It's not the sex that's the impeachable offense-- although they couldn't stop talking about the sex--it's the lying!

Though nobody died for those lies.

Now the mob that practically lynched President Clinton is running the country, with the major media as their handmaiden.

And their President who would be King, George II, has been caught in a lie so big, Joseph Goebbels must be tipping his peaked cap in admiration from his grave.

Little Dubya told a lie, not about sex (unless he really does strap on a missile slathered with Crisco between his legs before mounting one of his beloved ranch animals).

No, the Great Pretzel Swallower didn't lie about sex, but about the basis for war.

So far, this particular war has killed untold thousands of soldiers and civilians, including hundreds of Americans, as well as more than a few British blokes, cost us billions of dollars in the midst of the worst deficit in U.S. history, gotten our leaders charged with war crimes by a Belgian court, served as an Al Qaeda recruiting symbol beyond Osama's wildest dreams, and shows no signs of being over, despite Top Gun Georgy's costume-drama proclamation of the end of major fighting on board the U.S.S. Lincoln.

Moreover, Gulf War II is but one part of the Perma-War condition into which the lies of the Bushites have submerged America.

So, which lie should be an impeachable offense?

A personal fib to cover-up a blow-job, or an elaborately orchestrated web of deceit, forgery and Big Internationally Broadcast Whoppers about Vast Stores of End-Times Armaments, for the clear purpose of terrorizing Americans into supporting war, even when all the evidence showed us that Saddam, Evil-Doer that he was, hadn't developed any major weapons since the Gulf War I.

So what if Saddam acted like he had something to hide?

A lot of men do.

Like I explained, almost a year ago in these pages, "Saddamis the kind of guy who brags he's got nine inches, then won't let you unzip his pants for fear you'll laugh at his actual four and a half (and he'd have to kill you for that)."

So, now we all know Saddam is just that type of guy, and we can all see clear-as-a-day-without-bombs that our President and his henchmen lied to us.

So which lie is worse-Clinton's or Bush's?

The sexual sin or the war crime?

The blow-job cover-up or the ruse for the rape of Iraq?

Obviously, covering up a blow-job is worse, according to Congress (also according to the TV pundits who are still after the Clintons, as evidenced by their enraged reaction to the blockbuster sales of Hillary's memoir "Living History").

And oh, those awful semen stains!

Much, much worse than the bloodstains across the ancient land of Mesopotamia, laid waste upon a Pack of Lies.

Hey now, there's a pack of playing cards I'd like to see!

Each card could have a different WMD that the Bushites lied about.

The Ace of Hearts could be the 500 tons of sarin, mustard gas and VX nerve agent.

The Queen of Diamonds could be the 25,000 liters of anthrax.

The Jack of Clubs would be the 38,000 liters of botulinum toxin.

The King of Spades would be the 500 tons of "yellowcake" uranium from Niger.

And so on.

According to Dubya's State of the Union Address, Saddam had enough weapons to blow us to the moon within 45 minutes.

A lie like this shouldn't even be protected by the First Amendment; it is the national equivalent of yelling "Fire!" in a crowded theater.

Sure, many of us knew the Shrub was full of it.

But some of us believed him (just like some of us believed that Billy Jeff "never had sexual relations with that woman"), and on the basis of that belief, we heaved ourselves and our loved ones into this major war that is just beginning, even as the scope of the lie comes clear.

For months, our troops have been bravely searching for these tons upon tons of horrible stuff from FrankenSaddam's evil laboratory (and the search, along with the war, continues), and all to no avail.

They can't even find enough poison in those two Winnebagos to kill a rat.

At this point, if anyone comes up with anything (a vat of lye? a really big can of Raid?), everyone will wonder if it's a plant.

So, caught in a lie, what does our leader do?

Remember what Clinton did?

He came clean--cleaner than any other American president has had to come about his sex life.

He was a man, a sexual man, and he apologized for his indiscretion and took his punishment, insanely overblown as it was.

And what does Bush do?

He blames the CIA.

Of course, Clinton couldn't blame the CIA.

Ever since the Puritans invaded this land, Americans have been sticklers for making us all "take responsibility" for sex.

Too bad we aren't so hypercritical of our leaders when it comes to war.

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste. No brains strikes again! If its in the Post it must be true! Cut and Paste.

Iraqis Were Set to Vote, but U.S. Wielded a Veto

By DAVID ROHDE

AJAF, Iraq --

American marines had built makeshift wooden ballot boxes.

An Army reserve unit from Green Bay, Wis., had conducted a voter registration drive.

And Iraqi political candidates had blanketed the city with colorful fliers outlining their election platforms -- restore electricity, rehabilitate the old quarter, repave roads.

But last week, L. Paul Bremer III, the head of the American military occupation in Iraq, unilaterally canceled what American officials here said would have been the first such election in Iraq since the fall of Saddam Hussein.

Overruling the local American military commander, Mr. Bremer decreed that conditions in Najaf were not appropriate for an election.

http://www.guardian.co.uk/Iraq/Story/0,2763,980453,00.html

Just another day in Baghdad

The demonstrating Iraqis have no work, no money and are desperate.

Two are shot dead.

Nearby, an American soldier guarding a gas station is casually killed

Rory McCarthy in Baghdad
Thursday June 19, 2003
The Guardian

Hussein Saber shook with fury as he lay on a dirty hospital bed last night and told the story of another day in Baghdad, a city torn apart by killings, misunderstanding and the startling failures of America's military occupation.

Yesterday Hussein, 33, should have collected a $50 emergency payment which all Iraq's now unemployed soldiers are due to receive.

The money did not arrive and so he and hundreds of other frustrated young men poured towards the gates of the US-led authority to protest.

Within minutes he was shot in his right side by a young, nervous American soldier.

Hussein survived but two other Iraqis standing next to him in the crowd were killed.

Just a few miles away in the centre of the city, gunmen in a passing car shot dead one American soldier and wounded another as they guarded a propane gas station.

It was another strike against the US military by an increasingly bold guerrilla resistance force intent on destabilising the reconstruction.

Neither the Iraqis nor the Americans ever dreamed that Baghdad would be like this, ten weeks to the day after Saddam Hussein's regime was finally toppled.

The people of this city are still gripped with the deepening problems of poor security, interminable power shortages and unpaid salaries.

Their frustration is spilling over into a spate of attacks on the US military, which are met with heavy-handed raids and mass arrests which, in turn, spark yet greater frustration.

Searing midsummer temperatures do little to cool tempers on either side.

"I hoped and I wished that when the American forces came they would bring us democracy and freedom but unfortunately we have seen the opposite," said Hussein, a non-commissioned officer in the air force for the past 18 years.

"The Americans are going to get hurt if the situation remains as it is."

All the junior ranks within Iraq's 400,000-strong military, which was formally dissolved last month, have been promised a one-off payment and the chance to apply for a job in the new Iraqi national army.

In reality none have been paid since their last wages from the regime in February or March.

Recruitment for the new military has not started and, like the thousands of regular government employees still without work, their frustration should be evident for the US authority to see.

Hundreds of former soldiers gathered at the national recruitment office in Baghdad yesterday morning where they expected to receive their payouts.

Similar payments have been made by the British army in Basra.

But yesterday when officials in the building told them they had no money to offer they poured towards the gates of the Republican Palace, once Saddam's home and now the base of the US-led authority.

In the eyes of the US military, the crowd of frustrated former soldiers was a threat and they eventually opened fire.

The Iraqi soldiers see themselves very differently - as husbands and fathers, struggling to make a living, gripped with defeated pride and disappointment.

Khadum Hussain Hani, 32, joined the Iraqi military aged 15 for the same reasons that brought many of the young Americans on patrol in Baghdad into the US army - he wanted to serve his country and he wanted a decent wage.

His brother, also a soldier, died during the war with Iran in the 1980s.

Following tradition, Khadum married his brother's wife and took responsibility for the couple's three young children.

Last year they had another son.

Until the war he was paid 75,000 dinars a month (then worth $37).

Since March he has received nothing and has had to borrow thousands of dollars to pay the 30,000 dinars monthly rent on his small apartment.

"I have borrowed and borrowed and all I have left in my pocket today is my identity card," he said yesterday.

Before the war he and his wife talked about whether he would fight.

"I told her I wouldn't fight. I was glad the Americans were coming to take us away from this oppression," he said.

Now he has to explain to his children why he has no work and no money.

"Sometimes they ask: 'Did you bring home any apples today father?'" he said.

"I tell them I will bring apples one day when I have some money."

It is all too clear that the natural goodwill that many Iraqis felt when the US and British forces brought to an end three decades of brutality and repression is rapidly fading.

"There is a big gap between the Iraqis and the Americans right now," said Khadum.

American troops speak freely of their own frustrations.

They patrol in heavy bulletproof jackets and Kevlar helmets in the suffocating midday heat.

Many were first deployed to camps in Kuwait nine months ago and have had little time to rest or recover from the intense three weeks of combat that brought them to Baghdad.

The shift from fighting to peacekeeping has been fractured and slow.

Still they are being targeted in guerrilla attacks and they don't understand why.

The al-Shawaf crossroads outside the Republican Palace, the bloodied site of yesterday's killings, has become the touchstone of the failings of the military occupation.

Here there are queues of the articulate and the plain angry.

The US officials who should be listening to their very simple and very real complaints are locked in a cycle of meetings from dawn until after midnight in the palace complex, behind the heavily guarded, barbed-wire entrance at the palace gates.

Alia Abbas Issa, 42, used to work in the palace as a seamstress, sewing curtains for Saddam's offices and private rooms.

She took the job to help pay for English lessons at the local British Council office.

It paid her well, up to 200,000 dinars (£2000) a month.

Then came the war.

Her apartment was looted of all her possessions, even her bed, and her job disappeared.

She is left caring for the two daughters of her younger brother, who died in Kuwait during the first Gulf war.

"There is nothing I can tell them. We used to have money now there is nothing. We cry from night until morning," she said.

"I thought the Americans would bring us a new start. We want to like George Bush but the Iraqis are suffering and suffering," she said.

"God will reward those people who come here if they come here to help us."

What A HOOT! Cut and Paste. Cut and Paste. Cut and Paste. Cut and Paste. No brains strikes again! If its in the Post it must be true! Cut and Paste.

==========

==>ARRL URGES INFORMED COMMENTS IN FCC BPL INQUIRY

The ARRL is urging amateurs to file well-thought-out, informed comments when responding to the FCC's Broadband Over Power Line (BPL) Notice of Inquiry (ET Docket 03-104). The FCC published its NOI on May 23. The NOI asks how the FCC should regulate the delivery of broadband services to homes and businesses using electrical wiring to conduct high-speed digital signals. While the FCC has dubbed this technology Broadband over Power Line, it's more commonly known as Power Line Carrier or PLC.

BPL would use building and/or overhead power lines to conduct HF and low-VHF digital signals to network computers. The FCC has expressed its unabashed enthusiasm for BPL, which it views as a competitive Internet access point. Utilities consider BPL as another means to use existing infrastructure to generate additional revenue.

The NOI is not asking if BPL technology should be permitted. Under existing FCC rules, BPL systems may be built and used in the US right now. The FCC is asking how the rules might be changed "to promote and encourage new BPL technology," in the words of the NOI.

Present FCC Part 15 rules say that carrier-current systems--including BPL/PLC--need to meet the general radiated emission limits for unlicensed "intentional emitters." While the rules permit BPL at significant power levels, utilities would prefer that the FCC authorize even higher power levels. BPL systems under development and in field trials use spectrum between 1.7 and 80 MHz, but the NOI also asks whether BPL should operate on other parts of the spectrum as well.

As of mid-June, nearly 1000 comments already had been filed in the proceeding. The ARRL has urged amateurs who comment to outline the important uses they make of Amateur Radio and the impact strong interference from BPL could have at HF and low-VHF amateur frequencies.

Electric utility companies will operate many, if not most, BPL systems. ARRL members who have had experience dealing with power line interference and utilities' responses to complaints also may want to describe those experiences in their comments to the Commission.

Amateurs filing comments to the FCC NOI might want to consider these topics and points:

* Amateur Radio is a valuable resource that must be protected.

* Describe the uses you make of Amateur Radio, especially those with a public service or emergency communication aspect.

* The present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies.

* BPL systems that radiate on wide swaths of spectrum and occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors.

* The FCC has promised to protect licensed users of the spectrum. We must hold them to that promise.

For more information, see "Understanding the FCC's Broadband Over Power Line (BPL) Notice of Inquiry" <http://www.arrl.org/news/features/2003/06/19/2/>. An ARRL white paper, "Calculated Impact of PLC on Stations Operating in the Amateur Radio Service" <http://www.arrl.org/tis/info/HTML/plc/files/C63NovPLC.pdf> provides technical details. The ARRL's Broadband Over Power Line resource page contains links to worldwide studies and other resources.

The ARRL has initiated an important Spectrum Defense Fund campaign to support activities to educate government officials on the potential threat that BPL poses to Amateur Radio. To find out more, or to support ARRL's efforts in this area, visit the ARRL's secure BPL Web site <https://www.arrl.org/forms/development/donations/bpl/>

The complete NOI is available on the FCC Web site <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc>.

Comments are due on or before July 7, 2003. Reply comments are due on or before August 6, 2003. Interested parties may submit electronically filed comments via the FCC's Electronic Comment Filing System (ECFS) <http://www.fcc.gov/cgb/ecfs/>. Under ECFS Main Links, click on "Submit a Filing." In the "Proceeding" field, enter "03-104" and complete the required field. Comments may be typed into a form or you may attach a file containing your comments. Comments also may be submitted via e-mail, per instructions on the ECFS page.

We use a number of their wide band amps at work and they have a
reasonably good performance. Probably not as good as ENI, R & S or
Agilent and similar, but then not as expensive; and certainly better
than some Italian CB rubbish I was once shown.

Well congratulations. You sure worked on it long enough. Now it paid off.
Good job ! ! !

We'll be listening as usual. Just listening, though. If there's jamming,
you'll know it didn't come from the ol' Mem-Town 'frigerator box.

Maybe someday we'll run 220 in here and power up an L4B. Nahh. Just kidding.
Too broke for any radios lately. Much less amps.

Tell Kevin hello for us.

Hey maybe you'll even check in for the rrrrroooooollllll ccccaaaaalllllllllll
..

BE SURE TO FILE YOUR COMMENTS WITH THE FCC. You can do this easily and
conveniently at:

http://gullfoss2.fcc.gov/ecfs/Upload/

Just select "Broadband Over Power Line (BPL) - Docket 03-104" and
press Continue.

If you don't know what all this is about, go to:
http://www.arrl.org/news/stories/2003/05/08/3/#noi

Copied from another group.

On Sat, 21 Jun 2003 10:48:30 -0500, "Dan/W4NTI"
<w4nti@NOSPAMmindspring.com> was blabbling:

...==
...
...==>ARRL URGES INFORMED COMMENTS IN FCC BPL INQUIRY
...
...The ARRL is urging amateurs to file well-thought-out, informed
comments
...when responding to the FCC's Broadband Over Power Line (BPL) Notice
of
...Inquiry (ET Docket 03-104). The FCC published its NOI on May 23.
The NOI
...asks how the FCC should regulate the delivery of broadband services
to
...homes and businesses using electrical wiring to conduct high-speed
digital
...signals. While the FCC has dubbed this technology Broadband over
Power
...Line, it's more commonly known as Power Line Carrier or PLC.
...
...BPL would use building and/or overhead power lines to conduct HF
and
...low-VHF digital signals to network computers. The FCC has expressed
its
...unabashed enthusiasm for BPL, which it views as a competitive
Internet
...access point. Utilities consider BPL as another means to use
existing
...infrastructure to generate additional revenue.
...
...The NOI is not asking if BPL technology should be permitted. Under
...existing FCC rules, BPL systems may be built and used in the US
right now.
...The FCC is asking how the rules might be changed "to promote and

encourage
...new BPL technology," in the words of the NOI.
...
...Present FCC Part 15 rules say that carrier-current
systems--including
...BPL/PLC--need to meet the general radiated emission limits for
unlicensed
..."intentional emitters." While the rules permit BPL at significant
power
...levels, utilities would prefer that the FCC authorize even higher
power
...levels. BPL systems under development and in field trials use
spectrum
...between 1.7 and 80 MHz, but the NOI also asks whether BPL should
operate
...on other parts of the spectrum as well.
...
...As of mid-June, nearly 1000 comments already had been filed in the
...proceeding. The ARRL has urged amateurs who comment to outline the
...important uses they make of Amateur Radio and the impact strong
...interference from BPL could have at HF and low-VHF amateur
frequencies.
...
...Electric utility companies will operate many, if not most, BPL
systems.
...ARRL members who have had experience dealing with power line
interference
...and utilities' responses to complaints also may want to describe
those
...experiences in their comments to the Commission.
...
...Amateurs filing comments to the FCC NOI might want to consider
these
...topics and points:
...
...* Amateur Radio is a valuable resource that must be protected.
...
...* Describe the uses you make of Amateur Radio, especially those
with a
...public service or emergency communication aspect.
...
...* The present FCC Part 15 limits for this technology already can
result in
...substantial interference potential to amateur frequencies.
...
...* BPL systems that radiate on wide swaths of spectrum and occupy
entire
...neighborhoods have greater interference potential than localized
systems,
...such as switching power supplies or electric motors.

...
...* The FCC has promised to protect licensed users of the spectrum.
We must
...hold them to that promise.
...
...For more information, see "Understanding the FCC's Broadband Over
Power
...Line (BPL) Notice of Inquiry"
...<http://www.arrl.org/news/features/2003/06/19/2/>. An ARRL white
paper,
..."Calculated Impact of PLC on Stations Operating in the Amateur
Radio
...Service"
<http://www.arrl.org/tis/info/HTML/plc/files/C63NovPLC.pdf>
...provides technical details. The ARRL's Broadband Over Power Line
resource
...page contains links to worldwide studies and other resources.
...
...The ARRL has initiated an important Spectrum Defense Fund campaign
to
...support activities to educate government officials on the potential
threat
...that BPL poses to Amateur Radio. To find out more, or to support
ARRL's
...efforts in this area, visit the ARRL's secure BPL Web site
...<https://www.arrl.org/forms/development/donations/bpl/>
...
...The complete NOI is available on the FCC Web site
...<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc>.
...
...Comments are due on or before July 7, 2003. Reply comments are due
on or
...before August 6, 2003. Interested parties may submit electronically
filed
...comments via the FCC's Electronic Comment Filing System (ECFS)
...<http://www.fcc.gov/cgb/ecfs/>. Under ECFS Main Links, click on
"Submit a
...Filing." In the "Proceeding" field, enter "03-104" and complete the
...required field. Comments may be typed into a form or you may attach
a file
...containing your comments. Comments also may be submitted via
e-mail, per
...instructions on the ECFS page.
...

Remember that these systems are NOT radio and so are not a protected
service.
If you have an operator trialling a system in your area make as much problem
for
his users as legally possible..... I mean operate your radio !!!
If the system generates noise at HF / VHF then a strong HF / VHF signal will
get
in to the system just as good. If it can be shown that these "Broadband
unscreened"
systems will suffer much data loss then the users will not take them up as a
preferred
option.
If you have access to spectrum analyzer / frequency monitoring equipment
connect it
up and see what you local noise level looks like (capture the data for
future reference).

and do like Dan say's get off your butt and lobby your political leaders.
Make your
voice (and signal) heard.

4381. Another Day another Excuse: Now Bush Says Iraqi Weapons Sites Were Looted ROTFLMAO

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-21 21:05:27 UTC
From: Rastus@anon.col
Message-ID: <3f85d552.2914745101@pita.alt.net>
Source record: 65978
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc

Reuters, June 21, 2003

http://www.nytimes.com/reuters/politics/politics-iraq-usa-bush.html

WASHINGTON (Reuters) - President Bush, trying again to explain the failure to find weapons of mass destruction in Iraq, said on Saturday that suspected arms sites had been looted in the waning days of Saddam Hussein's rule.

``For more than a decade, Saddam Hussein went to great lengths to hide his weapons from the world. And in the regime's final days, documents and suspected weapons sites were looted and burned,'' Bush said in his weekly radio address.

It is believed to be the first time Bush has cited looting to explain the inability of U.S. forces to uncover chemical or biological weapons in Iraq, a U.S. official said.

Bush had previously said weapons may have been destroyed before the war.
The U.S. military has been criticized for failing to prevent looting at
an Iraqi nuclear facility.

Bush has been widely criticized for misleading the public by asserting that Saddam had stockpiles of unconventional weapons that menaced the world. The allegations were Bush's main justification for bypassing the
United Nations and ordering the U.S.-led invasion of Iraq.

``The intelligence services of many nations concluded that he had illegal weapons and the regime refused to provide evidence they had been
destroyed,'' Bush said. ``We are determined to discover the true extent
of Saddam Hussein's weapons programs, no matter how long it takes.''

This week, Bush dismissed questions over his reasons for going to war as
the work of ``historical revisionists.''

In his radio speech, he sought to address problems in post-war Iraq, including attacks on U.S. troops and the slow pace of reconstruction.

``American service members continue to risk their lives to ensure the liberation of Iraq,'' he said, blaming ``dangerous pockets of the old regime'' and their ``terrorist allies'' for the attacks. The U.S. military was combating the threats by hunting down Saddam loyalists and
``terrorist organizations.''

The United States has provided more than $700 million in humanitarian and reconstruction aid for Iraq, Bush said.

With its allies, it was fixing water treatment plants, boosting electricity supplies and vaccinating children. A $100 million U.S. fund,
billions of dollars in recovered Iraqi funds and revenues from oil sales
will help pay for reconstruction.
"You can tune in for ten minutes and figure
out what [Rush Limbaugh] has been talking about
the past two months. Well, in this case, two years
... he's STILL talking about Clinton."

http://www.washingtonpost.com/wp-dyn/articles/A14492-2003Jun19.html?nav=hptop_tb

BAGHDAD, June 19 -- Facing daily assaults from a well-armed resistance, U.S. troops in volatile central Iraq say they are growing frustrated and disillusioned with their role as postwar peacekeepers. In conversations in a half-dozen towns across central Iraq, soldiers complained that they have been insufficiently equipped for peacekeeping and too thinly deployed in areas where they are under attack from fighters evidently loyal to deposed president Saddam Hussein. Others questioned whether the armed opposition to the U.S. presence in Iraq may be deeper and more organized than military commanders have acknowledged.

"What are we getting into here?" asked a sergeant with the U.S. Army's 4th Infantry Division who is stationed near Baqubah, a city 30 miles northeast of Baghdad. "The war is supposed to be over, but every day we hear of another soldier getting killed. Is it worth it? Saddam isn't in power anymore. The locals want us to leave. Why are we still here?"

[...]

Some soldiers are vexed by what they see as a contradictory reception from Iraqis. Sometimes the public appears welcoming, sometimes actively hostile. The problem recalls other military U.S. deployments, including in Afghanistan, where it can be difficult to distinguish friends from enemies.

"The way it seemed is, once Iraqis got over being grateful for getting rid of Saddam, they found out quickly they don't want the Americans, either," said Sgt. Nestor Torres, a military policeman with the 3rd Infantry Division in the restive town of Fallujah, 35 miles west of Baghdad. "Everyone is blending in with everyone else, so you can't tell the friendly ones from the hostile."

Torres is a bodyguard for the division commander, Maj. Gen. Buford C. Blount III. "When I look around, I've got to wonder who wants to shoot my boss," Torres said.

Peacekeeping duty in Iraq has made soldiers particularly vulnerable. Troops at police stations and on guard duty at banks, electrical installations and fuel stations are frequent targets of sniping. Soldiers have been fired on when delivering propane gas. Bystanders throw stones at them when they are constructing soccer fields or fixing schools.

Rising U.S. Death Toll In Iraq Spurs Concern

9 Soldiers Killed in Attacks This Month

By Peter Slevin
Washington Post Staff Writer

Friday, June 20, 2003; Page A16

Inside the Bush administration, where top officials resolutely emphasize postwar progress in Iraq while playing down the setbacks, the rising American death toll and the increasing number of attacks on U.S. troops are causing increasing worry.

The death of a U.S. soldier yesterday near Baghdad brought to nine the number of troops killed in Iraq this month in a string of sporadic rocket and sniper attacks.

Fifty-four Americans have died in accidents or military action since President Bush declared the war ended on May 1, equal to more than one-third of the 139 wartime deaths.

Bush and his top military and foreign policy officials define the casualties as a necessary cost of a successful military occupation.

They say the deaths, while painful, are secondary to recent progress on economic and security issues.

The press release I saw about a month ago described a device that was passive. It required being in the proximity of a receiver as in using "smart tags" for clothing. With a bit of adapting the smart tag principle should be capable of working out to a couple hundred yards

If it is active then think of pacemakers. They run for years before needing a recharge. OTOH they are very light on the duty cycle.

The cellphone/gps devices work similar to the WAAS for aircraft approaches(if they ever get it activated). They can locate a phone within a few feet using the cell phone base/repeater tower as the equivalent of the WAAS station.

GPS by itself is no where near that accurate even with the dithering turned off although it's actually good enough to use for virtually any approach except an ILS which uses vertical nav as well.

Good enough? Yes. Legal? No.

If you have ever thought of changing careers to make more money and would like to work from home, now is the time.

We are an International Marketing Company that is looking for select individuals in the United States and Canada, who would like to start their own home-based
business using the power of the Internet and Mail Order.

No special skills are required. We provide everything you need including personalized training in your area. All that is required is a computer, access to the Internet, and the ability to follow directions.

INCOME POTENTIAL
$700 / week part-time
to over $8,650+ / month full-time

In order for you to make this kind of income we MUST work personally with you to show you exactly how it's done. Therefore, we are only able to work with a limited amount of people in each area. Once we feel that this limit has been met we WILL NOT accept any more requests. Don't miss out!

RADIO LAW: HAMS PETITION TO OUTLAW HI-FI SSB

On-air experimentation with so-called High Fidelity or Enhanced Single Sideband transmissions could be outlawed if thr FCC adopts a proposed rules change requested by two radio amateurs on opposite sides of the country. Amateur Radio Newsline's Paul Courson, WA3VJB, reports from the nations capital:

--

A petition for rulemaking was sent to the FCC and accepted by the agency May 27th. It was not immediately issued a Rulemaking Number so it was hard to find in the public record. However, Newsline has talked with two sources who have seen the proposal, and it calls for what many would consider severe bandwidth limitations on HF phone.

The petition asks for a federally mandated bandwidth limit of 2.8 kilohertz for SSB, well below the extended bandwidth needed for what has been called enhanced audio.

One of the two hams who submitted the petition told the FCC they are motivated by interference problems caused by two groups of single sideband operators. These groups are portrayed by the petitioners as, in both cases, having cast aside traditional voluntary limits on bandwidth of roughly three kilohertz. The petition therefore asks that these voluntary limits be made mandatory to provide a clear enforcement mechanism for regulators.

The petitioners, Michael Lonneke WØYR of Virginia, and Melvin Ladisky W6FDR of California, said hams from one of the groups come on during radio contests, and are found tweaking their transmitters to splatter purposely to provide elbowroom on a very crowded band. The two men characterize the other group as those who experiment with high-fidelity audio, apparently trying to replicate the sound of FM Broadcast stations.

Newsline has recently reported on advisory letters sent out by FCC Enforcement Counsel Riley Hollingsworth, K4ZDH, who wrote to several members of the enhanced SSB group telling them the agency had received interference complaints. The letters did not validate nor dispute the complaints, but warned the stations that if such complaints continued, the unresolved friction could trigger petitions for rulemaking. One such petition is now at hand.

A Newsline reporter spoke with Lonneke, who declined to provide a copy of his petition for this report. He said he and Ladisky hold the same views on the matter of excessive bandwidth causing interference, and that they teamed up on the petition to add strength to their call for regulatory intervention. Lonneke declined further comment, and said the petition will speak for itself if the FCC chooses to assign it a rulemaking number and put it to public comment.

Members of the enhanced SSB group have told Newsline they believe their experimentation with improved audio is totally in line with the spirit of ham radio, and thet when conducted under appropriate conditions, is every bit as justified in bandwidth consumption as any other spectrum-intensive activity, including contesting. But the FCC's Hollingsworth, reacting to such comments, disagreed, suggesting the mode of SSB was commissioned for the amateur service as a spectrum conservation mode, counter to the idea of high-fidelity audio and the bandwidth it requires.

Hollingsworth could not be reached to comment on the proposed Petition, and another FCC official declined to comment.

The petition also mentions the legacy mode of AM, and said it, quote, does not create the same problems that the burgeoning use of so-called 'Hi-Fi Single Sideband' creates. Nonetheless, the petition asks the FCC to impose a 5.6 kilohertz bandwith limitation on AM, with the restrictions asked for on all HF allocations below 28.8 megahertz.

Previous regulatory proposals based on bandwidth have failed, including Docket 20777 from the mid 1970s. The conclusion then was that having loosely-defined technical standards allowed the greatest range of experimentation in ham radio, as long as such signals are clean. Indeed, many present-day violations of splatter, overdriven amplifiers, and poorly administered audio lashups can already trigger enforcement action under existing FCC rules governing the purity of signal.

Reporting for Newsline, Paul Courson, WA3VJB, in Washington

--

As we go to air, the ten page petition by W0YR and W6FDR has not been been assigned a Rule Making number designation. More on this story in future amateur Radio Newsline reports. (ARNewsline™, W5YI)

**

ON THE AIR: PERTH HAMS JAMMED OFF 2.4 GHZ

A cloud of radio frequency interference has settled in on the 2 point 4 Gigahertz in the city of Perth Australia. For many hams it is making satellite operations impossible. Felix Scerri, VK4FUQ, reports from the city

of Ingham – down under:

--
You may not hear many VK6 hams on AO40 for a while. Many are suffering from interference from some form of wide band data transmission centred on 2.4GHz. The signal covers much of the Perth metro area and is very strong. So strong in fact that it does not matter where you beam you can still hear it - mainly from reflections.

The signal, which runs continuously, sounds like a 100Hz buzzing sound and has a bandwidth of about MHz. Looking at the signal on a spectrum analyzer it has a flat top and very steep sides. The signal started about 6 weeks ago and one suggestion is that it might be an image response of S band down converters to the 2.1GHz G3 mobile phone service that have just started tests.

--

At airtime, the interference is still there and hams in Perth are wondering what to do to make the problem, go away. (Q-News)

**

WRC 2003: AN UPDATE

Radio regulators from around the world are still gathered in Geneva Switzerland trying to work out numerous spectrum issues including some dealing with Amateur Radio. Q-News Graham Kemp, VK4BB, is here with the latest:

--

The International Telecommunication Union's 2003 World Radiocommunication Conference got under way June 9th in Geneva Switzerland. Amateur Radio is only a small part of the conference which is trying to complete work on more than 40 agenda items.

Amateur Radio is but a small part of the conference, which is trying to complete work on more than 40 agenda items. Three are especially important to us: realignment of 7 MHz allocations (agenda item 1.23), revision of the regulations governing the amateur and amateur-satellite services (agenda item 1.7), and consideration of an allocation for satellite-borne synthetic aperture radars (SARs) in the 70-cm band (agenda item 1.38).

Two other agenda items that could potentially have a great impact are the drafting of an agenda for the next WRC scheduled for 2007 (agenda item 7.2) and the revision of footnotes to the Table of Frequency Allocations (agenda item 1.1). A member of the IARU core team has been assigned to follow each of these five items, with the most focus being on 7 MHz.

It is the intention of the IARU core team to send timely and accurate reports of final decisions reached on Amateur Radio issues. It is important to remember that nothing is final until the second reading of a document in the Plenary, which in the case of controversial issues
will not take place until the final week of the conference, 30 June to 4 July.

--

Look for up to date briefings on the ARRL website at www.arrl.org and weekly summaries here on Amateur Radio Newsline. (ARRL, Q-News)

IN THE MEDIA: HAM RADIO HIGHLIGHTED ON WBUR RADIO

Ham radio was the featured guest when WBUR radio in Boston Massachusettes devoted its show titled "The Connection" to the hobby on Thursday, June 12th. Hosted by Dick Gordon, the show's theme was that ham radio is alive and vital with close to two-and-a-half million hams world wide still consider ham radio their preferred way to fly.

The program was also centered around the new book titled "Hello World: A Life in Ham Radio" by Danny Gregory and Paul Sahre. A book based on the collection of QSL cards of silent key W2OJW. And while neither of the authors was there, Bob Hopkins, WB2UDC was. Hoskins is Director of the Computer Center at Cooper Union University in New York and played a key role in the books development:

--

Hopkins: "Hello World is a wonderful book, and where I work over at Cooper Union I have collegues that do many things. We have an engineering school, an art school and an arcetecture school. Because of the archecture aspect, a collegue of mine who works at the Princeton Archecture Press as well as Cooper Union contacted me and said that he had a couple of friends who were thinking of putting together a book on ham radio post cards and wanted to do the graphic design and would I be interested in having a conversation with them. I said -- oh sure -- fine -- bring them in. These guys came in with these fabulous cards dating back to 1927 up to the present."

--

Also appearing on the program were were Moody Law, WQ6I in Claremont California, Joe Leto, W0ANT from Ankeny Iowa, and Harry Han, BG4AGY, in Shanghai. Each spoke on the way ham radio has affected their personal lives and those around them.

Even though its well over a week since the perogram aired, it is archived as a Real Audio stream at the WBUR website. To hear it take your web browser to http://www.theconnection.org/shows/2003/06/20030612_b_main.asp

Our thanks to Daron Manoogian who is the Manager of National Program Marketing at WBUR for permission to use the audio you heard in this report. (K1TW)

**

RADIO LAW: NY HAM CITED UNDER STATE SCANNER LAW

A New York ham has been cited for having radio gear in his car even though the state law governing scanner radios exempts licensed Amateur Radio operators. On May 31st Richard C. Lalone II, KC5GAX, of Calcium, says that he was stopped while driving well under the posted speed limit by a New York State Trooper and given a ticket for having Icom IC 1500 and IC 706 radios in his vehicle.

Lalone says via the qrz.com website that he did try to explain that that he was an Amateur Radio Operator and even provided his Amateur license for the officer’s review. Apparently, this was not good enough and the ticket was issued.

Lalone appeared in court on June 10th to answer the summons. At that time he approached the judge with both his license and a copy of New York Traffic Law 397 a copy of PR Docket 91-36. But the Court Recorder immediately took the documentation from the judge and returned it to KC5GAX. The judge then conferred with the Court Recorder after which he told Lalone that he was entering a plea of innocent for him. He then instructed Lalone to seek an attorney and be present in court July 9th. They court then offered KC5GAX paperwork to obtain a public defender, and returned the citation with the new court date.

Its not clear as to what will transpire on July 9th. Lalone’s posting did not state if this was a trial date or other type of preliminary hearing. If he is convicted of violating New York’s scanner control law Lalone faces a fine of $1000, 6 months in jail, or both. (W6EM, qrz.com)

**

ENFORCEMENT: FCC WRITES PART 15 DEVICE USERS ABOUT ALLEGED INTERFERENCE TO AMATEUR RADIO

Turning to enforcement issues, the FCC has written two Northern Virginia residents to follow up on complaints from a local amateur. A ham who alleges that he's on the receiving end of harmful interference from telephone devices with the capability to support multiple cordless remotes. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, has more:

--

According to the ARRL Letter both units interfereing with Bernie Keiser, W4SW, of Vienna, Virginia, are unlicensed Part 15 consumer electronics made by a well-known manufacturer. In separate June 2nd letters to the two users, the FCC’s Sharon Bowers pointed out that if their units are the cause of harmful interference to a licensed spectrum user, they are responsible for solving the problem. Also, that the operator of the device is responsible for correcting the interference or ceasing operation whenever such interference occurs.

Bowers is the deputy chief of the Consumer Inquiries and Complaint Division of the FCC's Consumer and Governmental Affairs Bureau. She explained in her letters that the equipment was classified as an intentional radiator and noted that harmful interference to a licensed radio service from such a device is a violation of FCC rules. She advised the consumers that the alleged harmful interference must be corrected before they may use the devices legally. She suggested they contact the manufacturer or retailer of the equipment to see if they'd either allow them to return them or exchange them for devices that don't cause interference.

The interference to W4SW’s ham radio operation took the form of broadband noise from 2400 to 2450 Mhz. This made it it difficult for him to hear the AO-40 downlink and beacon in the 2.4 Ghz band.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

The complaints against the two Vienna Virginia consumers represent a bit of a turnabout from the typical interference scenario. Usually its the ham who generates complaints of RFI to consumer electronic gear and hears from the FCC. (ARRL)

**

ENFORCEMENT: HAM ACCUSED OF FALSE DISTRESS CALLS ORDERED OFF THE AIR

A California ham has lost his right to operate an Amateur Radio station. This, based on allegations by the FCC that he may have been the source of a number of phony distress calls made by radio.

On June 3rd the agency’s Riley Hollingsworth notified Michael V. Swift, the now former KG6QOB to inform him that his license had been cancelled. This, based on evidence that the San Ramon ham had made numerous false distress calls on Marine Channels 16 and 22A.

In his letter Hollingsworth said that in view of the agency’s action that Swift no longer has authority to operate Amateur Radio transmitting equipment. He also warned that any continued on-air operation by Swift could lead to a fine or criminal prosecution. (FCC, RAIN)

**

SPECTRUM REALLOCATION: FCC PROPOSES UNLICENSED DEVICES IN THE 5 GHZ BAND

Still with regulatory matters, the FCC has proposed making 5.47 to 5.725 Gigahertz available to National Information Infrastructure devices, including Radio Local Area Networks, on an unlicensed basis. If adopted, this plan will increase the spectrum available to license-free devices in the 5 GHz region by nearly 80%.

The complete story is on the web at the FCC’s website. A direct link to it is http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-110A1.doc (CGC)

EMERGING TECHNOLOGY: THE TRUE UNIVERSAL REMOTE

A true universal remote unit that will literally help to control your entire lifestyle is now under development. Researchers on the project say that the all-in-one controller that would choreograph not just home entertainment systems but also intelligent appliances all around the house.

Maya Designs Inc. in cooperation with Pennsylvania’s Carnegie Mellon University has created a prototype based on a Compaq iPAQ portable digital assistant. The experimental handheld has so far been used to control two lamps, a fan and a stereo with a five-CD changer. Researchers say that more is on the way once standardization of remote control codes for various appliances

is achieved.

The Consumer Electronics Association is working on this aspect of the problem. It estimates the average household has at least four remote control units. It also understand why the consumer electronics industry considers a universal remote an important device for the marketplace. (Science Today)

RADIO AND SPACE: MOUNTAIN PEAK NAMED IN HONOR OF ILL FATED COLUMBIA CREW

A Colorado mountain peak has been named Columbia Point. This, in honor of the seven astronauts who died when the space shuttle Columbia broke up over Texas on Februay 1st.

The peak on Kit Carson Mountain in the Sangre de Cristo Range near Colorado Springs is close to the 14,081-foot Challenger Point. That peak was named in honor of the seven crew members who died in the Challenger space shuttle explosion in 1986. The newly cvhristened Columbia Point also is roughly 14,000 feet. (ANS)

INTERNATIONAL - EUROPE: PMR446 MEANS FUN

From a listener in Europe comes word of a new communications network called PMR446. This is a licence free 500 milliwatt personal mobile radio service that is quite similar to the United States Family Radio Service with one big difference. The pan-Eueropean service permits is users to connect their radio gear to the Internet using personal computers and software interfaces. The software of choice is eQSO and with it Eueropean experimenters have created a network of linked rf-gateways.

On the R-F side, the radio gear is limited to flea power and built-in antennas, but thanks to gateway linking PMR 446 is quickly developing into quite a hobby thats bringinging together hams and non hams alike. In fact, it even has its own home in cyberspace at www.446user.co.uk. Drop by and have a look at what’s happening on the other side of the Atlantic. (PMR446 Users Group)

**

INTERNATIONAL - HOLLAND: RADIO NETHERLANDS TARGETED BY PUBLIC BROADCASTER

Radio Netherlands management have reacted angrily to a recent edition of the Dutch domestic current affairs TV programme Nova. A story reported on Nova said that drastic budget cuts of up to 85% was in the offering for Radio Netherlands, and as a result everything except broadcasts to the Netherlands Antilles and Surinam would be scrapped.

According to Radio Netherlands, the erroneous item was based on a leaked copy of a report into the efficiency of public broadcasting that was jointly commissioned by the Dutch Ministry of Culture and the broadcasters themselves. Nova seized on one section of the report and interviewed a representative of the Dutch Association of Journalists, who said this would effectively mean the

end of Radio Netherlands.

But Radio Netherlands says that the report was not a call to action. Rather, its purpose of the report was to identify multiple scenarios where cost savings could be made. The example quoted by Nova was just one. The Hilversum based station also noted that decisions on the mission of Radio Netherlands are made by politicians in The Hague, not by other public broadcasters or the authors of a commissioned report. (Media Network)

ON THE AIR: MUSEUM SHIPS 2003

On the air, K3CLG says that the 2003 Museum Ships Weekend special event stations will be held on the weekend July 19th and 20th. Operations will encompass all modes including phone, C-W, PSK-31, APRS and even contacts via the Internet Radio Linking Project or IRLP. You can check on all the details at this easy to copy URL. Its all at www.qsl.net/ww2dd/event.html (K3CLG)

**

DX

In D-X, word that SM3CVM, plans to be on as portable CU2 from Sao Miguel in the Azores through July 6th. Activity will be mainly CW on 80 through 10 meters. This will be a holiday operation, so he will mostly be active late evenings local time. QSL to his home callsign via the bureau or direct to his callbook address. (GB2RS)

Also V31MX and V-31-M-F will be active from Caye Caulker from July 23rd until noon of July 29th. They will operate on 80 through 10 meters SSB with some CW activity. QSL both callsign via KZBCN, either direct or via the bureau. (OPDX)

**

THAT FINAL ITEM: N6ZE’S CROSS-COUNTRY ROVING ODYSSEY

And finally this week, the story of Peter Heins, N6ZE, who may now hold the record for a QRP Rover in the June ARRL VHF QSO Party. In less than two days, Pete managed to rove coast-to-coast, from Grid Square FN-20 to CN-87. Thats a distance of 2754 miles and he operated 6 and 2 meter SSB from each location. Here’s how he did it.

From 1400 to 14:45 E-D-T on Saturday June 14th, Pete was on the air from park bench overlooking Hudson River at Weehawken New Jersey. From there he even managed to work a station in grid EL-86 thru the tremendous E skip that was present at the time.

A bit more operating from a hotel room in midtown Manhattan followed until 15:30 Eastern Daylight Time. Then a quick drive out to the airport where Pete, who is a commercial airline pilot, traded his ham radio microphone and key for the co-pilots seat of a Boeing jetliner. He then spent the next several hours flying to Salt Lake City Utah.

During the layover, Pete rented a car, unpacked his FT-690 and IC-202 and took to the airwaves. From 8:45 to 15:30 Mountain Daylight Time hN-6-Zed-E roved through Grids DN30, 31, 40 and 41 operating both 6 and 2 meters.

He then repacked the gear, got back in the plane and flew it another 689 miles on to Seattle. Thanks to another hours time change, Pete was back on the air around 19:52 Pacific Daylight Time in Grid CN-87 from the airport ramp making two QSO’s. His last contact took place at 19:59 Pacific Daylight Tine. That was just 1 minute before end of contest.

His totals for the contest period: On 6 meters he had 16 QSO’s, 16 QSO points and 8 multipliers. 2 meters yielded 24 QSO’s, 24 QSO points and 9 multipliers for a grand total of 960 points.

In his posting to the VHF Reflector, Pete put out a special thank you to the hams in the Salt Lake City area who provided lots of information for operating sites in 4 grids that helped to make his cross country VHF roving odyssey, complete. (ARNewsline™, N6ZE)

Hey pencil-dick: Try and wrap your peabrain around the following

1) I didn't flood those groups. I want to see your proof that it was me. In Court there's a saying: He who alleges a thing must therefore also prove it. You made an allegation I flooded the groups. Prove it was me. I can prove it was not.

2) I've 'been reported to (my) ISP'? Oooo. I'm just shakin' in my boots. Guess what idiot? I'm still here, online and my account intact and in good standing.

3) 'by a lot of pple'? What's pple? Pineapple? Pimple? Purple? Oh! People!(LOL) Oooooo. how many is a lot? Let's see now.....2 is a couple, 3 is a few/some, 4 must be 'a lot'. Yeah. That's the ticket! 4! And they all live inside your demented, hallucinatory, fevered and demon-possessed brain. Guess what idiot? I'm still here, online and my account intact and in good standing. Repeat that until it sinks in. Or until Martha Steward walks up to you and jerks you off.

Now put the pie plate on your head, stand outside and stare into the sun while doing the following: Click your heels and repeat: There's no place like home. There's no place like home. There's no place like home.

And to you, your sock puppets, and your imaginary friends, FAQ thumpers and other assorted non-existant things that live in your head and go 'bump' in the night: Fuck off...and by the way.....

PLONK Hahahahahahahahahahahahahaha!!!

Isn't this Phillips guy the one that 'handled' the RFI department? If my memory serves me correct. He did a piss poor job in that department in my opinion. I 'tried' to deal with him on various occassions about my power line noise. Let me say the result was less than I expected.

Hey shit-4-brains:

You can't do it can you? You can't provide the proof that I supposedly spammed the group. You babble about Google but it's a copout. When it doubt, aim for Google and hope it sounds official. Fuck off.

You are such a little puke. If you were standing here in front of me I'd bitch slap you so fucking hard your teeth would go down your throat, out yer ass and mow the neighbor's lawn with them.

Oh and I'll PLONK you as many times as I feel like it. You think you're such red hot shit just because you nym-shift and get your sock

puppets to speak for you. Take a look at all the fucking headers, Your bad spelling and sentiments give you away. Moron.

Btw: provide me with proof of spam you allege I sent.

In the meantime....*PLONK* your bad spelling, PLONK your bad breath, PLONK your tiny little mind and PLONK you for supposedly going through TaraNews.net and here are the header references I'm referring to.

I'm looking forward to Martha going to jail. And you hanging yourself. Or jumping in front of a subway car or bus or train or truck.....(get the picture?) a two-fer: That's good thing!

PLONK! (Hey! This is FUN!)

Martha Stewart Jokes and pictures:
http://politicalhumor.about.com/cs/marthastewart/

Don't forget to supply me with YOUR proof, puke-breath little weasel.

Click on the video link below.
It includes pics of actual wireless motion
detector sensors that are buried around Groom Lake.
He was also using a Startronics Broadband RF Sniffer
All of this is in the VIDEO at the KLAS site below!!

http://www.klas-tv.com/Global/story.asp?S=1330758&nav=168XGVQf

From LAS VEGAS REVIEW JOURNAL
June 21, 2003:

ONGOING INVESTIGATION: FBI raids home near Area 51
By KEITH ROGERS
REVIEW-JOURNAL

Man says authorities were searching for
photos, data about classified military base

FBI agents and other law enforcement officials raided a Rachel man's rented trailer home Thursday while he was out of state, searching for what he said were photographs and data stored in his computers about the classified military installation known as Area 51.

"Area 51. That's what it's for," said the man, Chuck Clark, when asked by telephone about the search warrant that he found Friday on a table inside the trailer in the rural Lincoln County community, 100 miles north of Las Vegas.

"They timed this very nicely while I was in Denver with a TV crew," said Clark, 57, author of the "Area 51 & S-4 Handbook."

Clark said he thinks the search warrant was triggered by his research into motion-detection sensors that are buried on public land along trails miles away from the restricted area around the classified installation near the dry
lake bed of Groom Lake, 90 miles north of Las Vegas.

Clark and other Area 51 buffs think the sensors are linked by radio signals to an automatic alarm network that alerts the installation's security personnel
about possible intruders.

"I dug them up, photographed them, recorded their GPS and put them back," he said, referring to Global Positioning System coordinates.

"I resent the fact they put them on public land. All I did is document them
...

to make an issue of putting them outside of restricted land," Clark said. He described himself as a semi-retired photographer and writer who has spent 10 years researching Area 51.

Clark said the search warrant was issued by U.S. Magistrate Judge Lawrence Leavitt and that the agents who executed it left a four-page inventory of items
seized. An FBI spokesman in Las Vegas, Jim Stern, confirmed that a sealed search warrant had been executed on Clark's residence Thursday.

The FBI agents were accompanied by other law enforcement authorities who were part of a task force, but Stern declined to confirm the nature of the task
force.

There were no arrests, Stern said, noting, "This is an ongoing investigation of Clark." He said items were taken from Clark's residence but declined to give details
about what prompted the investigation. He also would not comment on the scope of the search warrant or say what was seized.
"That area is of a concern just by virtue of location," Stern said, referring to the general vicinity of Rachel Nevada.

An annual presidential directive issued by President Bush and former President Clinton keeps government information about the Groom Lake installation
classified.
Clinton, in 1995, became the first president to sign the annual exemption, which stemmed from lawsuits brought by widows of two men who claimed that their husbands died from exposure to hazardous and toxic materials while they
worked at the installation.

Government officials will not say what activities are conducted there but the Groom Lake facility has been widely reported to be where high-tech U.S. aircraft are tested against foreign radar systems and planes. S-4 is located near the southern edge of Area 51.

Yes he was, he worked for Ed Hare the League lab manager, RFI/EMI guru
and author of the ARRL tome on RFI/EMI. Phillips held the title "RFI
Engineer" or some such.

IIRC he didn't stay long.

OK...thought so. He didn't handle my situation well. After he was out of
the picture things went a lot smoother. I really get annoyed when Im
ignored and my e-mails go un-answered for months.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 15th/June, through Sunday, 22nd/June there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FO, FP, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T2, T32, T5, T7, T9, TA, TF, TG, TI, TJ, TK, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V4, V5, V7, VE, VK, VK9N, VP2E, VP2V, VP5, VP6, VP8, VP8/o, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YJ, YK, YL, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4U, UNITED NATIONS HQ. Frank/W2IX and Ray/W2RE gave many a real treat and surprise to work 4U1UN on Sunday morning, June 22nd. They were operating SSB and CW. Activity was on 20/17/6 meters as this bulletin was being typed.

7Q7/10JUNE, MALAWI (Good or Not!). It seems this one caused some confusion over a week ago. First reports indicated that this was a PIRATE station. However, this is NOT the case. According to Leo, CT1CSN, activity was by Vasco, 7Q7CT, who has a Malawian official document granting the use of the callsign, 7Q7/10JUNE, to be used as a special event. June 10th was Portugal's Day and is commemorated by the various Portuguese communities around the world. So those who worked Vasco with the callsign 7Q7/10JUNE made a legitimate contact. QSL Manager is ZS6AMX.

9A, CROATIA. THIS IS JUST A REMINDER! Operators Kresimir/9A7K, Phil/F5OGG and Branko/9A6BND will activate several islands and lighthouses over the next week until June 30th. Activity began over the past weekend. Watch around 14260 kHz. Remember to QSL via operator's home callsign, except Phil/F5OGG (QSL via LX1NO). LAST MINUTE UPDATE: Look for the 9A0LH team to be active from Palagruza (EU-090 and WLH-0057) early Monday morning, June 23rd.

CT3, MADEIRA ISLANDS. Francisco, CT1EAT, informs OPDX that he will be active as CT3/CT1EAT on a DX holiday, from Porto Santo Island (AF-014) starting on the July 24th, ending on the 30th. The radio operation will take place mainly on the AO-40 satellite, but also on HF (from 20-10m), on SSB and RTTY modes. He will be an entry in the IOTA Contest as CT9T as a Single Operator/Low Power, SSB only. QSL via CT bureau, or direct to his home callsign via CBA address: P.O. Box 172, 7801-902 Beja, Portugal. For more information, please visit his home page at: http://www.qsl.net/ct1eat

FH, MAYOTTE. Martial, F5SIE, will be active as FH/F5SIE, from Mayotte Island (IOTA AF-027 and DIFO FH001) between July 1-15th. This will be a CW only operation with activity on 40/17/15 meters with a TS-50 and wire antennas. QSL (PLEASE) via the French REF bureau.

HP, PANAMA (Special Event). Members of the Panama Radio Club invite all amateur radio stations in the world to make a contact with special event station HP100RCP to commemorate the 100th anniversary of the Republic of Panama. Activity will take place November 1-3rd on all bands on modes CW/SSB/RTTY/PSK31. A special commemorate QSL can be obtained by sending your QSL plus 2 IRC or one USD to: Radio Club de Panama, P.O. Box 10745, Panama 4, Panama. You can view the special event station at HP100RCP and the QSL card on PRC's Web sites at: http://www.radioclubdepanama.org http://www.qsl.net/hp1rcp

IOTA CONTEST (Attention Island-hopper and Island-chaser!). Ric, DL2VFR, informs OPDX that already 42 stations have announced their participation in the 2003 IOTA Contest and have been listed now on the following Web page at: http://www.iota-post.com
Ric states, "This is useful if you are looking for a QTH or if you are looking to see who will be QRV ?" Everybody is invited to send his/her island QTH report to: info@iota-post.com
In the last years he has had more than 130 reports. Deadline for reports are the 24th of July. After that date Ric is heading to EU-129 where he is participating with the team of DL0KWH from Usedom Island.

IOTA NEWS.....
AF-019. Paolo, IZ8FDH (member of "VESUVIO DX TEAM") will be active from Favignana Island (IIA TP-011) as IF9/IZ8FDH, fron June 29th to July 6th. Activity will be on HF and 6 meters. QSL to IZ8FDH via the bureau or direct to the address: Paolo Capobianco, Via Enrico Cocchia n. 26, 80124 Napoli-Italy.

AS-080. If you were lucky this past weekend to work 6K2BYF/3 it was from Anmyun Island. Choi, HL5FUA, states activity is expected to last until June 23rd on 40-10 meters including the WARC bands. QSL via 6K2BYF.

EU-008. John, GM0VIV, will be active as GM0VIV/p from the following Inner Hebrides Islands Group between June 23-25th as follows: Monday evening, June 23rd, from Mull (IOSA NH-15, SCOTIA CN10); Tuesday morning, June 24th 0900z from Gometra (IOSA NH-28, SCOTIA CN-06); Tuesday afternoon, June 24th, from Ulva (IOSA NH-18, SCOTIA CN-05); and Wednesday morning, June 25th 1000z from Iona (IOSA NH-16, SCOTIA CN-01). He will be on Mull overnight Monday, Tuesday and Wednesday nights. QSL via home callsign, CBA.

EU-101. Hans, OH6MY, will be active as OH6MY/p from his summer QTH at Anterskar (Lapporarna Island -- WW Loc. KP03OI) between July 7th to August 3rd. He will be using a IC-706 at low power on a car battery with a G5RV antenna. QSL via his home callsign, direct or via the bureau.

EU-184. A group of Finnish operators will be active from Hailuoto Island and Marjaniemi Lighthouse as OH6AW/8 between June 27th and July 1st. Operations will be on HF, 6 meters and 2 meters. Operators will be OH6HJE, OH6NJ, OH6UV and OH6XX. QSL via OH6AD.

SA-040. Operators Pablo/HK8RQS, Victor/HK8JEH and Albaro/HK8HIX will be active from Morro Island, October 11-14th.

SA-063. Ramon, YV5EED, Events Coordinator for ARV Caracas and Grupo DX Caracas, informs OPDX that the Association of Radioamateurs of Venezuela and the Grupo DX Caracas has activated Remediadora Island instead of La Cotorra Island to celebrate the 65th Anniversary of the Venezuelan National Guard Day 2003, from June 20-24th. They will operate on HF from 160-10 meters, including 6 meters on SSB and CW. QSL via W4SO (mail drop). Cards will be verified and mailed from Venezuela.

OC-241. CHANGE IN PLANS! The multi-team active from Rote Island were expected to use the callsign 8A9R, but they used another callsign instaed, YE9R. They will be active until June 25th. QSL via YC9BU.

KH2, GUAM. Yoshiro, N1VF, plans to be signing N1VF/KH2 from Guam Islands (OC-026), November 21-24th. No details on bands/modes of activity were provided. QSL to his home call: Yoshiro Nishimura, c/o David Manela,

2248 Mountain Ridge Rd., Chula Vista CA 91914 USA.

LIGHTHOUSE ACTIVITY.....
Members of the Georgian Bay ARC will be back at Flower Pot Island on August 2nd, 3rd and 4th. They will be transmitting on 20, 40 and 80 meters. Flower Pot Island is in the Great Lakes in Georgian Bay. The Lighthouse reference number is WLH 0763 and is wanted by 70% of the lighthouse chasers.

Mike, GM4SUC, sends the following reminder: "Well it doesn't seem nearly a year has passed since the last International Lighthouse/ Lightship Weekend when over 385 stations were active at lighthouses and lightships throughout the world. This year the event will be from 0001z on Saturday, August 16th until 2359z on Sunday, August 17th, 2003. Full details of the rules and an entry form can be found at: http://lighthouses.net.au/illw/index.html
A list of stations that have already confirmed their participation can be found at: http://lighthouses.net.au/illw/2003.htm
So come and join us in the fun of the weekend, listen out for the QRP, newly licensed and other lighthouses/lightships, and give them a call."

NEW DX WEB PAGE. Marek, DH9SB, reports he has a new Web site which contains a weekly overview of DXpeditions/Special Event Stations operating in the current week. He provides two URL addresses:
http://www.dx-info.de/
http://www.dx-info.com/

QSL INFO AND NEWS.....
Operators CT1GFK/P, CT1GPQ/P and CT2IHP/P were active from Culatra Island (IOTA EU-145, DIP AL-01 for the Portuguese Islands Award) during the past weekend. QSL via their home callsigns, direct or bureau.

Gordon, KU4EC, informs OPDX that his 2002 KG4EC Guantanamo Bay logs are now available on-line at: http://www.qsl.net/n8ch/gitmo02.htm
He states, "For those who want to check if they are in the log or not, sorry for the delay getting these posted."

QSL UPDATE FOR TI/AI5P. Rick, AI5P, reports that QSLs arrived June 16th from the printer. He expects to have all direct cards received answered in about 10 days or so. He thanks you for your patience.

Silvano, I2YSB, QSL Manager of TX4PG, reports to OPDX that all direct requests for TX4PG QSLs have been sent out.

ANYONE NEED A QSL MANAGER? Gert, K5WW, writes to OPDX and states: "I am offering my services as QSL manager to the DX community. Anyone who makes a lot of QSOs and doesn't have enough time to handle his/her own QSL, has no local QSL bureau or just wants to spend more time on the radio instead of QSL'ing can contact me. I have several years of experience handling the incoming and outgoing QSL for the members of two large clubs and their contest stations. I'm a member of The QSL Managers' Society. I accept paper and/or electronic logs. If you don't already have it a webpage with information about your station and a

logbook search will be created. All requests are welcome at:
k5ww@arrl.net
I'd appreciate it if you could find a couple of lines in the next edition of your magazine to publish this. I recently moved and now live in a 'no antennas welcome' neighborhood. So my own DX activities have to be postponed, and I have plenty of time to help other DX'ers with their QSL."

Claudio, IV3OWC (aka-ST2CF and 9E1C), informs us that his ST2CF QSLs have arrived, and he has begun to confirm direct cards. Also, QSLs for his 9E1C operation have all been sent out.

XW2A QSL PROBLEMS. Hiro, XW2A, reports he has a big problem with the postal system. So, please do not send U.S. dollars, only IRC's!!! He states over 95% of mail with green stamps are stolen. His address is: PO Box 10003, Mail Service Office, Vientiane, Laos.

RUSSIAN MOUNTAIN DXPEDITION. A group of Russian amateurs are going on a mountain DXpedition in Carachayevo-Cherkessya Republic, Russia, from June 25-29th. The exact location is Gidam-Bashi Mountain (2410m), Aksaut Canyon, Main Caucasus Range. Reference numbers are: QTH-locator is LN03PO, R-03-03 for Russian Mountain Award, and KC-04 for Russian Districts Award. The members of the DXpedition are: RA6ED/P, UA6ECU/P, UA6EM/P, UA6EDQ/P, RA6EAG/P, UA6EZ/P, UA6EDU/P, RZ6HGG/P, RW6HKF/P, RN6FJ/P and RV6HJD/P. They plan to be active on 80-15 meters SSB/CW and 144/430 FM. QSL are 100% via the bureau and direct.

S7, SEYCHELLES (Update to OPDX.613). John Warburton, G4IRN, will be active from here September 13-16th and 23-27th. This past week John received his licence for The Seychelles. His callsign will be S79IRN.

SPACE DX NEWS ACTIVITY.....
Look for GB1WIS (first Woman In Space) to be active on the LEO (Low Earth Orbiting) satellitess UO14, FO29, AO7 and possibly AO40 up to June 30th. Activity periods will be posted on the AMSAT NA BB at regular intervals.

Next weekend is the ARRL's Field Day and participants may have a real treat to work the Space Station during the weekend event. The "ARRL Letter" states: "The Expedition 7 crew may be on the air from NA1SS during ARRL Field Day the weekend of June 28-29th. 'We don't know if the crew will be active or not, but give it a try,' said ARISS Mentor Charlie Sufana, AJ9N. Sufana advises 'good operating sense' and recommends that FD operators wait for the crew to finish a previous contact before calling. 'You may be only hearing a station or two, he pointed out, 'but they are hearing hundreds.' Look for the ISS during Field Day during these time slots: Northern and Southeastern U.S., June 28th, 1821-1842 UTC; Southern and Northeastern U.S., June 29th, 1059-1117 UTC; Western U.S., June 29th, 1233-1253 UTC; Northeastern U.S., June 29th, 1723-1744 UTC; and Northwestern and Southern U.S., June 29th, 1859-1920 UTC. ARRL Contest Branch Manager Dan Henderson, N1ND, notes that Field Day contacts with the ISS crew do not count

for satellite QSO bonus points, just contact credit. 'Valid satellite contacts must be Earth-satellite-Earth contacts through a satellite transponder or repeater,' he explained. (See Field Day rule 7.3.7.)"

SPECIAL EVENT. French operators will activate the special callsign TM5AR to participate in the celebration of the " 'L' Armada Rouen 2003". Activity will be on 80-2 meters. For the 4th time since 1989, a large group of sail boats (fleet) will gather/head to Rouen, Normandy, France. More than 30 great barques, two/three/or four masted schooners, bricks, ketches and other sea clippers from all over the whole world will stay and parade on the River Seine from June 28th to July 6th. The last Armada was in 1999, where more than 10 millions people enjoyed the visit from the ships. More are expected this year. QSL via instructions for direct cards or via the French REF Bureau.

SV5, DODECANESE. Bert, PA1KW, informs OPDX that he will be active during the IOTA Contest in July from Kos Island (EU-001) as SV5/PA1KW. He also mentions that he will be active before and after the contest. QSL via his home callsign, bureau or direct (SASE).

T2, TUVALU. Mike/T21MY and Jan/T2YL continue to be active until about June 26th. Mike was heard this past week on 80/30/15/12/10 meters CW at various times. Jan was heard on 20/17/15 meters SSB. QSL Manager George, OM2SA, reports that he has received the first set of logs about two weeks ago and the first batch of direct QSLs (500) are in the mail. He is working on them everyday and requests everyone to please be patient.

T5, SOMALIA. Baldur, DJ6SI, has once again surprised everyone and showed up as T5X on June 16th. The length of his stay is not known. He has been very active on 17 meters CW as well as 80/40/30/20/15 meters. QSL via DJ6SI.

V31, BELIZE. Wayne/N5WD and his wife Pamela/KB5UAE are planning to be active as V31WD and V31UA, respectively, from Placencia (EK56), July 15-21st. Wayne will be concentrating on 6 meters during the CQWW VHF Contest weekend. However, he will be on 80-6 meters at other times during the week and can do PSK31/SSB/CW. He tells OPDX, "Maybe next trip we'll add WSJT". QSLs to N5WD, callbook address or via the W5 bureau.

VP2V, BRITISH VIRGIN ISLANDS. Mike Foster is now operating as VP2V/7Q7FM until he gets his own British Virgin callsign. His activity is mostly on 20 meters until he gets his antennas sorted out. Watch around 14200 kHz. QSL "ONLY DIRECT" via Allen, G0IAS. Allen states, "PLEASE add a bit to the return postage....sorry, my pockets are only so deep...and NO return postage no card."

VP5, TURKS AND CAICOS ISLANDS. Gary/K4UU and Bud/K4ISV are now active from North Caicos until June 25th. Their callsign are homecalls/VP5. Gary was heard over the past weekend on/around 14184 kHz after 0100z. Bud was heard on 80 meters SSB (3793 and 3796 kHz) after 1000z and again at 0130z. QSLs for K4UU/VP5 go to his home callsign. No QSL details were provided for Bud's activity.

VP8, SOUTH SHETLAND ISLANDS. Look for LZ2UU to be active as VP8/LZ2UU during the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/ All Band/Low Power entry. Activity will be from LZ0A, the Bulgarian Antarctic Base on Livingston Island, South Shetland. QSL via LZ2UU.

YI, IRAQ. Steve, OM3JW, reports that his son Mike, OM2DX, will be going back to Baghdad on June 25th. Mike's activity will be limited to a few weeks because Slovak Ambassy in Baghdad was totally destroyed. His power amplifier was lost and antenna systems (log-periodic yagi for 20-10m, vertical HF6 and wire dipoles on low bands) were destroyed. Mike expects to operate as YI1BGD from the club station. However, he believe that he will receive his personal callsign very soon. He will also look for YI1BGD documents (licence that was issue in 1978) and will send his copy to ARRL. The reason for this is that some people are now having their YI1BGD QSLs rejected for DXCC (Mike's activity). For more info and updates, go to the following Web page at: http://www.qsl.net/om2dx

4419. Re: braided coax shields ?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-22 22:24:02 UTC
From: Crazy George <munschNO@attglobal.net.SPAM>
Message-ID: <3ef62df8_1@news1.prserv.net>
Source record: 66066
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc

Ed:

Did you examine it closely enough to determine that it was braided plated copper, and not steel? I recently sold a couple hundred feet of steel tubular braid to some military vehicle collectors for replacement loom. This I had came off some RG-18 or whatever armored RG-17 is nomenclatured. I didn't need the armor, and it sure makes handling the coax a lot easier without it.

As far as copper is concerned, both Alpha and Belden still show it in their master catalogs, Alpha #s 2132 thru 2152 for 1/16" to 25/32" I. D., while Belden numbers are 8660 to 8669, but not in any numerical order by size. Alpha calls theirs "Tinned Copper Oval Braid" while Belden's term is "Shielding and Bonding Cables". And, they are not flat. The flat has different part numbers.

Go to their web sites and check for dealers.

This was one of the fears expressed by WD4LCM: That they would
be passive devices activated by dangerously high levels of
irradiation. Imagine the power needed to fill an area say
1/2 km^2 with radiation of some kind intense
enough to power a device under the skin (effectively
shielded in a conductive saline medium) and provide it
enough to broadcast a recognition and location signal.

Do you want to stand next to someone generating RF to
power a chip 200 m away? Say it consumes 10 mW to
transmit back at 2 mW: 10 mW in a 10 cm^2 receptive
area is 1 mW/cm^2. A sphere 200 m in radius has
area 4*Pi*(200 m)^2 ~= 500,000 m^2 ~= 5*10^9 cm^2. So,
a nondirectional transmitter would have to output,
at least momentarily, 5*10^9 mW = MegaWatts. Anyone
nearby would get cataracts! Any radio equipment nearby
would pick it up, no matter how sharply tuned.

I agree that any such device should be battery or
solar powered and not implanted in living tissue.
If so, it might be designed to last years,
especially if only queried occasionally.

Yes, this would be feasible, I think.

Fairly well made, better than the Microwave Modules stuff. As others have said
it will only really be linear if under driven by about 30 or 40 percent. Very nice
if driven with an FT817, for instance. This really only matters for CW or SSB use.
In FM you can drive it with the full 10 W. You will get around 75 W out for 6 W in.

4431. PETITION FILED TO OUTLAW HI-FI SSB ON THE HF BANDS

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-23 13:55:16 UTC
From: channel391@juno.com
Message-ID: <ae188f77.0306230555.1fb50431@posting.google.com>
Source record: 66078
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.dx,rec.radio.amateur.misc,rec.radio.cb

Newsline has the following report on the problems being caused by
those hi-fi SSB operators and a petition to run them off the airwaves:

RADIO LAW: HAMS PETITION TO OUTLAW HI-FI SSB

On-air experimentation with so-called High Fidelity or Enhanced Single
Sideband
transmissions could be outlawed if thr FCC adopts a proposed rules
change
requested by two radio amateurs on opposite sides of the country.
Amateur
Radio Newsline's Paul Courson, WA3VJB, reports from the nations
capital:

--

A petition for rulemaking was sent to the FCC and accepted by the
agency May
27th. It was not immediately issued a Rulemaking Number so it was hard
to find
in the public record. However, Newsline has talked with two sources
who have
seen the proposal, and it calls for what many would consider severe
bandwidth
limitations on HF phone.

The petition asks for a federally mandated bandwidth limit of 2.8
kilohertz for
SSB, well below the extended bandwidth needed for what has been called
enhanced
audio.

One of the two hams who submitted the petition told the FCC they are
motivated
by interference problems caused by two groups of single sideband
operators.
These groups are portrayed by the petitioners as, in both cases,
having cast
aside traditional voluntary limits on bandwidth of roughly three
kilohertz. The
petition therefore asks that these voluntary limits be made mandatory
to
provide a clear enforcement mechanism for regulators.

The petitioners, Michael Lonneke W0YR of Virginia, and Melvin Ladisky W6FDR of California, said hams from one of the groups come on during radio contests, and are found tweaking their transmitters to splatter purposely to provide elbowroom on a very crowded band. The two men characterize the other group as those who experiment with high-fidelity audio, apparently trying to replicate the sound of FM Broadcast stations.

Newsline has recently reported on advisory letters sent out by FCC Enforcement Counsel Riley Hollingsworth, K4ZDH, who wrote to several members of the enhanced SSB group telling them the agency had received interference complaints. The letters did not validate nor dispute the complaints, but warned the stations that if such complaints continued, the unresolved friction could trigger petitions for rulemaking. One such petition is now at hand.

A Newsline reporter spoke with Lonneke, who declined to provide a copy of his petition for this report. He said he and Ladisky hold the same views on the matter of excessive bandwidth causing interference, and that they teamed up on the petition to add strength to their call for regulatory intervention. Lonneke declined further comment, and said the petition will speak for itself if the FCC chooses to assign it a rulemaking number and put it to public comment.

Members of the enhanced SSB group have told Newsline they believe their experimentation with improved audio is totally in line with the spirit of ham radio, and thet when conducted under appropriate conditions, is every bit as justified in bandwidth consumption as any other spectrum-intensive activity, including contesting. But the FCC's Hollingsworth, reacting to such comments, disagreed, suggesting the mode of SSB was commissioned for the amateur service as a spectrum conservation mode, counter to the idea of high-fidelity audio and the bandwidth it requires.

Hollingsworth could not be reached to comment on the proposed Petition, and
another FCC official declined to comment.

The petition also mentions the legacy mode of AM, and said it, quote, does not
create the same problems that the burgeoning use of so-called 'Hi-Fi Single
Sideband' creates. Nonetheless, the petition asks the FCC to impose a 5.6
kilohertz bandwith limitation on AM, with the restrictions asked for on all HF
allocations below 28.8 megahertz.

Previous regulatory proposals based on bandwidth have failed, including Docket
20777 from the mid 1970s. The conclusion then was that having loosely-defined
technical standards allowed the greatest range of experimentation in ham radio,
as long as such signals are clean. Indeed, many present-day violations of
splatter, overdriven amplifiers, and poorly administered audio lashups can
already trigger enforcement action under existing FCC rules governing the
purity of signal.

Reporting for Newsline, Paul Courson, WA3VJB, in Washington

--

As we go to air, the ten page petition by W0YR and W6FDR has not been been
assigned a Rule Making number designation. More on this story in future
amateur Radio Newsline reports. (ARNewsline(tm), W5YI)

More whining hambos! I always thought amateur radio was all about
experimenting.

If this is so bad, why is Hi-Fi AM still allowed on 75 meter phone?
Talk about your wide bandwidth!

Can't resist. 40 or 50 years ago? What was this moonbounce with 85 watts or less? Imagination? OMG, I'm getting tired. Helping the young folks with computer problems at work. Oh well, must be that CW has fried my brain. Errrr ... well, then, why do they have a problem and not me?

Well, they don't really work quite like that and it takes little power
to "sense" one.

ID cards and library cards have used a version of this for years.

>irradiation. Imagine the power needed to fill an area say
>1/2 km^2 with radiation of some kind intense

>nearby would get cataracts! Any radio equipment nearby
>would pick it up, no matter how sharply tuned.

From what I've seen and read, the transmitter (which is not implanted)
runs not much more power than a wireless computer network connection.

Now figure the power density in an area where there are literally
thousands of wireless network connections and the users are trying to
extend the distance.

I'd have far more concern over the wide spread use of wireless
networks, or cell phones...and I really don't worry about them either
except from an interference basis.

There was one in QST back in the early 60s on two meters with a KW.

Now its done with single yagis and 180watts. Big changes.

I have no problem with experimenting, even experimenting with wide SSB.

The problem is doing it on 75 or 20 meters where it causes un-necessary interference. The un-necessary interference is the problem.

Experiment on a band with plenty of 'space'.

Source record: 66001

I will be attempting to interface a Yaesu MD-100A8X microphone to a Yaesu
FT-101. Can anyone provide me with the pinout to the microphone? I would be content with just getting the PPT and audio working but I believe if I can also provide a supply voltage to the mic via an external source I may be able to get the filters in the mic working also. The freq up and dn are not an issue since the FT-101 does not have this capability.

I seem to remember a series of articles on one of the Ham mags using
BC-348 surplus HF receivers with simple converters for moonbounce, not
easy but doable with a little ingenuity and persistence.

Mind you that was when I was home brewing 14 tube HF SSB rigs - now I
can afford and use commerical rigs which are somewhat more versatile and
smaller.
Still have a pile of parts including mechanical and crystal SSB filters
for 'the next one', but I doubt I'll live long enough - got lazy like so
many of us. But, it most definitely ain't anywhere near as much fun or
nearly as satisfying

This would require those hams to act like gentlemen, something
that is beyond a lot of hams today.

I see no reason why a 348 couldn't be used as a IF. If the noise figure was decent enough on the converter.

I don't remember that article, but Id say they were using a 417a, or a 416B triode tube for the RF side of things and possibly a 6J6 for the osc/mult chain. eh?

I don't see a need to ban wide SSB entirely. Just assert a rule saying
that it is a secondary
type of transmission, afforded no protection from QRM, and that it not
QRM other users.
A way of saying "If the band is empty, go ahead and play with it, but if
things are crowded,
forget it". This could also open up other wide band modes like spread
spectrum on HF,
"okay to experiment if the band is empty". IF these modes can be shown
to not trash more
traditional modes, then they could be permitted in more crowded times.

No, I think the article being referred to came later. It was in the November
1972 issue of 73 (it was the thickest issue to that point, and had an article
about "building" a computer). The article, by someone named Brown, was
more an idea article about low cost moonbounce. So by that point it
was transistorized converters. There was an article or two that followed
about some conversions he did to the 348, and he wrote a slew of articles
that in some way referenced the main project. But, the moonbounce seemed
to be a pipe dream, while he persued all kinds of other things.

Dave Letterman has a Late night TV show. Martha Stewart is an Ignoramus Bitch, who pretends she knows all that is best for everyone, Unfortunately for the world she has her own TV show. Anyway she was caught with her Kotex in the wrong hole for Insider trading.

You mean that I don't need to off tune my rig a few KHz off of some
interesting DX
to tune up the rig into my antenna? Didn't want to "carrier chuck" on
top of other
QSOs......

4474. Frequency Loss / Range calculation...?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-25 05:40:53 UTC
From: achilles03@hotmail.com
Message-ID: <fef44ceb.0306242140.68edbc6@posting.google.com>
Source record: 66021

I was surprised at a quick calculation I did today on a simple GMRS radio. I don't want to be overconfident in my calculations, so I'd like to throw out this scenario to see if anyone can point out any gaps in my reasoning/calculations.

Typical GMRS handhelds transmit at approx 465 mHz and at 5 Watts power. However, at this freq and power, it's listed as having a range of just 7 miles. I'm assuming that this "listed" range is FAR short of what the range could be if it were line-of-sight (ground obstacles/clutter)...?

A GMRS radio with a 5W output (37 dBm) should be heard on a receiver/scanner with decent sensitivity (.5 uV or -113 dBm) ATLEAST 50 miles away (124 dB path loss and 30 dB margin), and possibly 100 miles (130 dB path loss ad 20 dB margin). Of course, you'd have to have some elevation to have that much line-of-sight.

Am I correct in these calculations? Anyone have any comments?

Thanks in Advance!
Dave

For next three days to come my eyes will remain taped like that. Then he switched on that light thing that kept flashing (as far as I can remember), later he moved in wheel chair and started dipping me in water again and again, I remember I felt a lot of pain in my eyes, sometimes he left me in water for three, four minutes. He kept asking me who do I speak with, who else knows what they know? Apparently they had planned to kill me once they get my next generation, thus after my marriage, so some person had told me this thing indirectly, I didn't know what it meant and he heard it from me, funny if I knew what it meant and what it was about why would I tell him. The fact is Jews are the most racist people on this earth, they are friends of Satan. They commit crimes against weak and powe!
> rless people just to satisfy their satanic soul. Rape, murder, torture and even using biological weapons against people from other religions is just normal thing for them it is said any average zionist Jew who works for secret service has killed at least two Muslims/nonMuslims. This includes people like Amir Butler, Abu Omar and many others. And these people raped me only and only because I am a not a Jew. Why would someone rape a child when he is only seven years old, why would someone rape a young boy who is only active in Islamic society and wanted to help people.
>
>It is amazing that when it comes to raping people these people are too good, second to none, but when it comes to face the truth, they will make up any lie to save themselves up.
>
>May God bring unbiased justice and truth back to this world again, may God free our minds and thoughts, may God end the days of those who are racist and friends of Satan those to hurt people because of their religious difference and lie about it.
>wa'Salam
>Mohsin

This is an atrocity. How could this be?

Like many Alpha Tango members I have DXed over 100 confirmed countries on 12 whiskey SSB, worldwide without the need for license or expense of ham radio.

I have everything a man could ask for without the additional volunteer headache Uncle Charlie could induce by means of harassment. Besides,,I like the freeband way better than the HF hammie bands and repeaters.

And I do it barefoot 99% of the time..only time I use power, is when it's something really rare and I have exhausted myself with my 3 watts..then, and only then, I may elect to toss out a hundred watts,,,maximum. That "crime" is less than the fine and imprisonment that you can get for taping a movie from HBO.

No cber has been prosecuted (during this or the last administration) for merely operating an amp or talking DX or freebanding without receiveing a warning. So, to set the record straight, a warning letter outlining the infractions is to be issued to the offending station as a warning. Fail to heed the warning and you may find yourself facing a fine. Underline the word "may". This reduces the relative risk and associated penalty to a petty infraction comparable to jaywalking.

I have spoken to Mr. Hollingsworth personally, and I can assure you, even if he thinks that slightly exceeding power limits is ok, he can't verbalize it due his present position.

There are many hammies on the freeband...and guess what? They are cool as all get out!!! Us cbersare a friendlier lot. We really don'tgive a rat's azz if a hammie talks on cb,,,we'lll talk to him anyways...probably why they come on down in the first place,,,so they can escape the frequency fuzz and just......enjoy radio.

Well it may be dumb ass ham humor, but I wish I could kick the ass of all the dumb asses that tune up for minutes on end on the air on or near a weak DX station. As for tuning into an imperfect antenna, you can use a dummy load to get close, then touch it up on the air QUICKLY! The ham bands would be a nicer place to listen to if everyone had a dummy load and used it. So stupid is as stupid does....

4495. BPL / PLC is a gross polluting legacy technology - file a comment with the FCC to stop it

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-26 05:32:02 UTC
From: robkemp90210@hotmail.com
Message-ID: <6114e4af.0306252132.1b62c98d@posting.google.com>
Source record: 65892

BPL / PLC is a gross polluting legacy technology that has been banned in Japan and Finland.

The FCC has issued a NoI concerning the deployment of BPL (Broadband over Power Line) in the US. BPL operates between 2 and 80MHz and if deployed under conditions advocated by the BPL lobbyists would turn the 2 to 80MHz spectrum into a waste ground of noise at S9 or higher.

It is important to bring to the attention of the FCC (by filing a comment on the NoI) that this spectrum is used for many diverse purposes and is very valuable. There are many better ways of deploying broadband.

Full details are here;
http://www.arrl.org/news/features/2003/06/19/2/?nc=1

Comments are due on or before July 7, 2003. The FCC now is accepting electronically filed comments via its Electronic Comment Filing System (ECFS).
http://gullfoss2.fcc.gov/prod/ecfs/upload_v2.cgi
In the "Proceeding" field, enter "03-104" and complete the required fields. Comments may be typed into a form or you may attach a file containing your comments.

Many good comments have been filed, one you may like to review is here;

:) I guess it's too late this year to setup a proper ham radio setup for
802.11 unless someone out
there knows what can be done to have it qualify as a FD contact? Just change
the SSID's
to call signs?

If you run SNOS it is pretty simple :-)

Put the access point / router / ethernet bridge into
your IP subnet, use FD as the SSID, choose channel 6,
turn off encryption. SNOS will do the rest and will automagically
create IP, AX.25 and NET/ROM links between you and
any other system you can hear. Then use the usual
packet radio exchange. SNOS takes care of the ID issue.

Yes I've tested this and yes it works.

A 2 or 8 watt amplifier and gain antenna will help ...

Great! Thanks for the info. I visited your site and I'll have a look at
SNOS. Last time I played around with NOS was with JNOS and TNOS.
But I'll have a look at SNOS.

It says alot about how things are likely
run in the Oregon ARRL Section. (grin)

But then again, as the average active
amateur population in any given area
which are either ARRL members or
representative of the same, rarely exceeds
20% of the aggregate, the whole affair
in the O.S. likely boils down to the usual
state of affairs....

Likely, a collection of grouchy old men who
still smoke tobacco in large amounts, who have
nothing better to do but rag on about esoteric
ham radio related issues, which have no substance
in real life, except that they provide a diversion
from their boring lives, in-between their trips to
McDonalds to get "their" free coffee refills of course
or untill the Manager kicks em out after he's
re-stoked the coffee urn

SNOS is a different thing than JNOS or TNOS.
The initial S is for "Simple" :-)

Yes ... exactly!

You could do the same thing with any of the *NOS software,
at least I think you could. The main issue would be automated
ip route discover ... don't think anyone else has implemented
ARP Poll and automatic arp/rip/route discovery yet.

Great! The easier the better, I don't have the time to play around with
route tables.
Since this is last minute for field day, I was hope we could atleast do a
2.4ghz contact.

Just when you thought conservatives couldn't get any dumber, here comes Louis Zizza.

Mr. Zizza attacked Pamela Anderson on a flight from Florida to California last week because he mistakenly assumed that she was one of those rotten anti-war celebrities that Bill O'Reilly, Rush Limbaugh and Sean Hannity have presumably filled him with hate for.

Apparently drunk (although he claims he was sober) Zizza spied the celebrity, his braincell lit up, and he let loose the abuse.

He was not arrested, but he later apologized for the mistake and claimed that he thought Anderson was "someone else."

4513. Rummy eloquently sez, Baghdad, Washington, D.C., what's the diff? People die.

That Don Rumsfeld - he just can't help putting his foot in it, can he?

Last week, while trying to mount a defense of the "success" we're having in Iraq, he suggested that the homicide rate in Baghdad is lower than that in Washington, DC.

"You got to remember that if Washington, D.C., were the size of Baghdad, we would be having something like 215 murders a month," Rumsfeld said.

"There's going to be violence in a big city."

What on earth is that supposed to prove?

Oh, I see... so all those deaths in Baghdad have got nothing to do with the suppression of protests, rocket attacks, suicide bombings, radiation poisoning from unsecured nuclear power plants... etc, etc.

They're just normal, everyday crimes that you would find being committed in any major city around the world.

Don, you're nuts.

Just let me know the next time you see a roving bunch of rogue lobbyists driving down K Street blowing stuff up with rocket propelled grenades and AK-47s.

The White House has "removed sections of a report by the US Government's own environmental agency to water down references to global warming" according to BBC News, which pretty much shows

a) how much of a priority the environment is for this administration, and

b) how much of a damn the White House gives about telling lies these days.

Apparently Bush's team wanted to add so many amendments to the section on global warming that it "no longer accurately represents scientific consensus on climate change", according to an EPA memo.

Yup, this seems to fit the administration's M.O. all right - if you don't like the facts, either change them or get rid of them altogether.

4515. Bush's Denial and Deception

Denial and Deception

By PAUL KRUGMAN

Politics is full of ironies.

On the White House Web site, George W. Bush's speech from Oct. 7, 2002 -- in which he made the case for war with Iraq -- bears the headline "Denial and Deception."

Indeed.

There is no longer any serious doubt that Bush administration officials deceived us into war.

The key question now is why so many influential people are in denial, unwilling to admit the obvious.

About the deception:

Leaks from professional intelligence analysts, who are furious over the way their work was abused, have given us a far more complete picture of how America went to war.

Thanks to reporting by my colleague Nicholas Kristof, other reports in The New York Times and The Washington Post, and a magisterial article by John Judis and Spencer Ackerman in The New Republic, we now know that top officials, including Mr. Bush, sought to convey an impression about the Iraqi threat that was not supported by actual intelligence reports.

In particular, there was never any evidence linking Saddam Hussein to Al Qaeda; yet administration officials repeatedly suggested the existence of a link.

Supposed evidence of an active Iraqi nuclear program was thoroughly debunked by the administration's own experts; yet administration officials continued to cite that evidence and warn of Iraq's nuclear threat.

And yet the political and media establishment is in denial, finding excuses for the administration's efforts to mislead both Congress and the public.

For example, some commentators have suggested that Mr. Bush should be let off the hook as long as there is some interpretation of his prewar statements that is technically true.

Really?

We're not talking about a business dispute that hinges on the fine print of the contract; we're talking about the most solemn decision a nation can make.

If Mr. Bush's speeches gave the nation a misleading impression about the case for war, close textual analysis showing that he didn't literally say what he seemed to be saying is no excuse.

On the contrary, it suggests that he knew that his case couldn't stand close scrutiny.

Consider, for example, what Mr. Bush said in his "denial and deception" speech about the supposed Saddam-Osama link: that there were "high-level contacts that go back a decade."

In fact, intelligence agencies knew of tentative contacts between Saddam and an infant Al Qaeda in the early 1990's, but found no good evidence of a continuing relationship.

So Mr. Bush made what sounded like an assertion of an ongoing relationship between Iraq and Al Qaeda, but phrased it cagily -- suggesting that he or his speechwriter knew full well that his case was shaky.

Other commentators suggest that Mr. Bush may have sincerely believed, despite the lack of evidence, that Saddam was working with Osama and developing nuclear weapons.

Actually, that's unlikely: why did he use such evasive wording if he didn't know that he was improving on the truth?

In any case, however, somebody was at fault.

If top administration officials somehow failed to apprise Mr. Bush of intelligence reports refuting key pieces of his case against Iraq, they weren't doing their jobs.

And Mr. Bush should be the first person to demand their resignations.

So why are so many people making excuses for Mr. Bush and his officials?

Part of the answer, of course, is raw partisanship.

One important difference between our current scandal and the Watergate affair is that it's almost impossible now to imagine a Republican senator asking, "What did the president know, and when did he know it?"

But even people who aren't partisan Republicans shy away from confronting the administration's dishonest case for war, because they don't want to face the implications.

After all, suppose that a politician -- or a journalist -- admits to himself that Mr. Bush bamboozled the nation into war.

Well, launching a war on false pretenses is, to say the least, a breach of trust.

So if you admit to yourself that such a thing happened, you have a moral obligation to demand accountability -- and to do so in the face not only of a powerful, ruthless political machine but in the face of a country not yet ready to believe that its leaders have exploited 9/11 for political gain.

It's a scary prospect.

Yet if we can't find people willing to take the risk -- to face the truth and act on it -- what will happen to our democracy?

4516. While Georgie's off fundraising.....

At the time of writing, 54 U.S. soldiers have been killed in Iraq since George W. Bush declared Mission Accomplished on May 1.

And now the White House is starting to worry.

Oh, they're not worried for the dead soldiers or their families - that's a "necessary cost" for the money that Halliburton is going to make off of this invasion thing.

I mean, it's a necessary cost to find Saddam's deadly weapons of mass destruction.

I mean, it's a necessary cost to provide democracy, freedom and excellent healthcare to the Iraqi people.

Or whatever the excuse is this week.

No, the White House is starting to worry that the political fallout of all these dead Americans may not be in their favor.

Because while men and women of the armed forces swelter in 130 degree heat, being shot at by angry Iraqis and not knowing when they'll come home or even what they're supposed to be doing, Our Great Leader is swanning around the USA holding $2000-a-ticket fundraisers in an attempt to raise $200 million dollars for his election campaign.

The fact that he's doing this under the guise of some great flag-waving military leader - while soldiers come home in body bags from Iraq almost daily - is particularly sickening.

They've served his purpose, and now their corpses can be swept aside while he campaigns.

So much for "supporting the troops."

4517. Guess who's getting a slice of Iraqi pie? The fraud king, WorldCom

Guess who's getting a slice of Iraqi pie? The fraud king, WorldCom

by Molly Ivins
Creators Syndicate

AUSTIN, Texas --

My, my, my, the great Iraqi Gold Rush is on, and who should be there at the front of the line, right along with Halliburton and Bechtel, but our old friends at WorldCom, perpetrator of the largest accounting fraud in American history.

WorldCom, shortly to become MCI, has been given a contract worth $45 million in the short term to build a wireless phone network in Iraq.

I learned via The Associated Press (AP) that Washington Technology, a trade newspaper that follows computing-related sales to the U.S. government, "found WorldCom jumped to eighth among all federal technology contractors in 2002, with $772 million in government sales."

And that is only counting the deals in which WorldCom is the primary contractor.

It is actually getting much more as a subcontractor.

The Securities and Exchange Commission recently reached a settlement with WorldCom, fining the company $500 million for its $11 billion defrauding of investors.

The company did not have to admit any guilt.

"The $500 million is in a sense laundered by the taxpayers," Tom Schatz, president of Citizens Against Government Waste, told AP.

WorldCom got the Iraq contract without competitive bidding, to the anger of rival companies A&T, Sprint, etc., which actually have experience in building wireless networks, according to AP.

A WorldCom spokesman "also stressed the company's deep, overall relationship with the U.S. military and government."

Among those continuing to make a good thing out of the Iraqi war is Richard Perle of the Pentagon's Defense Policy Board.

According to the Los Angeles Times, last February, Perle and the board received a classified briefing on the potential for conflict in Iraq and North Korea, including information on new communications networks.

"Three weeks later, the then-chairman of the board, Richard N. Perle, offered a briefing of his own at an investment seminar on ways to profit from possible conflicts with both countries," wrote reporters Ken Silverstein and Chuck Neubauer.

It's a subject on which Perle is fully qualified.

He was forced to resign as the Policy Board's chairman (though he did not resign from the board itself) in late March after it was learned he had been employed as a consultant by Global Crossing Ltd., then trying to get Pentagon clearance to sell itself to an Asian concern.

Perle also serves on the board of several defense contractors and is co-founder of Trireme Partners, a venture capital firm that invests in the defense and homeland security industries.

Also according to Silverstein and Neubauer, Perle's partner at Trireme, Gerald Hillman, has been put on the Defense Advisory Board, despite having no background in national security or defense.

One has to scramble to keep up with the Gold Rush and its players.

Tim Shorrock has an excellent article in the June 23 issue of The Nation detailing the state of play:

Hundreds of major corporations are interested in getting a piece of this pie.

Meanwhile, the invaluable Rep. Henry Waxman of California is keeping an eye on Halliburton.

He is raising questions about the company's ties to countries that sponsor terrorism, specifically Iraq, Iran and Libya.

As President Bush begins his two-week, $20 million "shock and awe" campaign fund-raising sprint, we will naturally be keeping an eye on the connections between the campaign contributions and government contracts.

And if you think that's too cynical, boy, have you not been paying attention.

One of the many horrors Shorrock found was a statement by Martin Hoffman, former secretary of the Army and close adviser to Donald Rumsfeld, on the privatization of Iraq.

He told Shorrock his strategy is like that of the strategic hamlets program in Vietnam.

"That was basic economic development," Hoffman said.

Ooops.

The only problem is that the strategic hamlet program was a colossal failure, producing untold damage, chaos and hatred.

It was a key reason we lost that war.

Another player with business interests in all this is Paul Bremer, the American viceroy in Iraq.

Bremer's company is Crisis Consulting Practice, set up after 9-11 to advise multinationals on how to handle terrorism.

Naomi Klein concludes in The Nation:

"Many have pointed out that Bremer is no expert on Iraqi politics. But that was never the point. He is an expert at profiting from the war on terror and at helping U.S. multinationals make money in far-off places where they are unpopular and unwelcome. In other words, he's the perfect man for the job."

Other efforts to abruptly introduce a capitalist economy into a state-run system have had awful results.

The "shock therapy" applied to Russia after the Soviet Union broke up almost destroyed the country, and it still hasn't recovered. Argentina went through a similar process.

So where's a president like Franklin D. Roosevelt when we need him?

"I don't want to see a single war millionaire created in the United States as a result of this world disaster," he said during World War II.

4518. 'Saddam' strike shows Bush desperation

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-26 21:14:57 UTC
From: Stagger Lee <Slee@houston-hunks.com>
Message-ID: <cWV2ZXJ5.376e9951de53cc229af5c8ec830be15c@1056662097.cotse.net>
Source record: 65915
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc

The reported convoy attack shows that the United States is becoming increasingly desperate, and determined, in its search for Saddam Hussein.

It badly needs a success right now.

American soldiers are being killed.

No weapons of mass destruction have been found.

Iraq is recovering only slowly.

Convincing the world that Saddam was dead would require describing in detail how those samples were acquired and how the matching DNA was examined

Hence the risk the Americans were willing to take.

The intelligence linking Saddam and Uday and Qusay Hussein to the convoy is thought to have been based on a monitored satellite telephone call.

The possibility of killing totally innocent people must have been taken into account.

The prize of getting Saddam Hussein or one of his once powerful sons, it seems, was worth the price others might pay.

A DNA investigation of human remains is said to be under way.

The relevant article of international law is Protocol 1 Additional to the Geneva Convention 1977.

Article 51 says:

"The civilian population shall not be the subject of attack."

Article 57 deals with the precautions which have to be taken.

The attackers "should do everything feasible to verify that the objectives to be attacked are neither civilians nor civilian objects."

The United States has not ratified the additional protocol, but Mr Cordone said that international law regarded the protocol as binding in the custom and conduct of war.

The unit in charge of the search for Saddam, Task Force 20, is said to have DNA samples of a number of former Iraqi leaders.

Establishing the identity of their bodies would not be difficult in that case.

But convincing the world that Saddam was dead would require describing in detail how those samples were acquired and how the matching DNA was examined.

The legacy of doubt left by the intelligence failure on the WMD issue would have to be overcome.

King Abdullah of Jordan compared the sightings of Saddam, who may or may not be dead, to those of someone who is:

"It's like Elvis," he told ABC television.

"You're getting so many stories, left, right and centre."

From The BBC, 6/23/03:

'Saddam' strike shows US desperation

By Paul Reynolds
BBC News Online world affairs correspondent

The reported American attack on a convoy thought to be carrying Saddam Hussein and/or his sons last week would have been legal only if there was substantial evidence indicating their presence, according to Amnesty International.

But if there had just been a hope and there was the risk of killing innocent civilians instead, then it would not be justified, said Amnesty International's Legal Director Claudio Cordone.

4519. An Iraqi 'quackmire' in the making

An Iraqi 'quackmire' in the making

By Jim Lobe

WASHINGTON -

"We know where they are," Pentagon chief Donald Rumsfeld assured television interviewers about the location of weapons of mass destruction (WMD) March 30, two weeks into the war in Iraq.

"They are in the area around Tikrit and Baghdad."

"I really do believe we will be greeted as liberators," Vice President Dick Cheney declared on television just as US troops massed along the border between Kuwait and Iraq on the eve of the war.

"Wildly off the mark," declared Rumsfeld's deputy, Paul Wolfowitz, when asked by senators just before the war whether then army chief of staff Eric Shinseki's estimate that more than 200,000 troops would be needed as an occupation force after hostilities was reasonable.

"I believe it is definitely more likely than not that some degree of common knowledge between [al-Qaeda and Iraq] was involved [in the September 11, 2001, attacks]", former Central Intelligence Agency (CIA) chief and member of Rumsfeld's Defense Policy Board James Woolsey testified before a federal court just before the war.

Now, more than two months after US troops established control over the area around Tikrit and Baghdad, not only have no WMD been discovered, but evidence of ties between Iraq and al-Qaeda, let alone Iraqi knowledge or complicity in the September 11 attacks, is simply non-existent.

If that were not embarrassing enough, Washington still has about 150,000 troops in Iraq - twice the number projected before the war - and is desperately seeking as many as 30,000 more troops from its "coalition" partners, all expenses to be paid by the US taxpayer.

That such a number may not be nearly enough was underscored this weekend when unknown persons in a remote desert area blew up a key oil pipeline that supplies Baghdad power plants.

The "Q" word - for quagmire - has also made it back into mainstream-media discourse as the impression grows that US troops may be facing a guerrilla war, rather than isolated "pockets or

resistance" of die-hard Ba'athists.

Some officers on the ground have complained before television cameras that they are far too thinly spread to impose order over such a large country, particularly when it appears that, at least in some parts at least, the natives do not particularly appreciate the presence of US troops, and a well-armed and tenacious few are trying to kill them.

What's more, they are succeeding, and at an accelerating rate; in the past couple of weeks - that is, six weeks after Bush declared the war won, they have killed an average of about one US soldier every two days and wounded several more.

"Facing daily assaults from a well-armed resistance, US troops in volatile central Iraq say they are growing frustrated and disillusioned with their role as postwar peacekeepers," was the way the Washington Post reported it.

"The war is supposed to be over, but every day we hear of another soldier getting killed," a US sergeant told the Post.

"Saddam [Hussein] isn't in power anymore. The locals want us to leave. Why are we still here"?

"The army is getting bogged down in a morale-numbing fourth generation war in Iraq that is now taking on some appearances of the Palestinian intifada," noted one recent comment on an all-military website, Defense and the National Interest, while another on the same site predicted that the Pentagon's plans for rotating new units into occupation duty could well "melt down" the army's personnel system within the year.

And then there was this little-noticed headline that appeared in USA Today based on a Senate hearing in which Wolfowitz had testified, "US troops may be in Iraq for 10 Years: defense officials reportedly seek up to $54 billion a year."

Wolfowitz, who before the war had ridiculed Shinseki's estimates, now agreed that a US withdrawal was not in prospect.

Indeed, he suggested, permanent bases may have to be built to house them, a notion that cannot be expected to go down well, even with US-backed exiles, like Ahmed Chalabi, who spent much of the past two weeks back in the US complaining vehemently about how the US occupation authorities are, essentially, blowing it.

Meanwhile, a prestigious joint task force of the Council on Foreign Relations and the Asia Society released a report suggesting that if the United States did not sharply increase its commitment to peacekeeping and reconstruction in Afghanistan, the country could quickly collapse back into the chaos that resulted in the rise of the Taliban.

The question that comes to mind is, what is going on?

Until now, most foreign policy analysts in the US - if not the regional specialists - have been inclined to give Washington's hawks the benefit of the doubt about whether their basic assumptions about Iraq corresponded to any tangible reality on the ground.

After all, no one has ever accused Cheney, Rumsfeld, Wolfowitz or Woolsey of being stupid.

So how could they have gotten the nation into this position?

One probability is that they, like many policymakers, tend to believe the own propaganda which they and their supporters have been spouting since even before the dust of the World Trade Center towers settled over Lower Manhattan.

The degree to which they themselves helped twist the intelligence about Iraq has become increasingly clear over the past few weeks as angry intelligence professionals have taken their complaints to the press.

Hints of a second, not unrelated reason may be found in recent, plain-speaking comments on the enormous budget deficits the administration is running up, even as it continues its drive to cut taxes.

"The lunatics are now in charge of the asylum," declared the Financial Times last month in an editorial seconded by New York Times columnist and Harvard economist Paul Krugman about George W Bush's fiscal policy.

They argued that administration ideologues were creating, apparently deliberately, a fiscal crisis in order to achieve their goal of doing away with a social and economic system that ensured domestic tranquility since the New Deal.

"The people now running America aren't conservatives: they're radicals," wrote Krugman.

"How can this be happening? Most people, even most liberals, are complacent. They don't realize how dire the fiscal outlook really is, and they don't read what the ideologues write."

The same may now be said about the Iraq hawks.

Despite the radical trajectory on which they have taken US foreign policy since September 11, the complacency, especially among Democrats, has been truly remarkable, and much of the "opposition" still isn't reading, or at least absorbing, what the foreign policy ideologues behind Rumsfeld, Cheney and Wolfowitz write or say, for that matter.

"This fourth World War, I think, will last considerably longer than either World Wars I or II did for us," Woolsey said in the third week of the war, as Rumsfeld was locating the WMD between Baghdad and Tikrit.

"As we move toward a new Middle East over the years, and, I think, over the decades to come ... we will make a lot of people very nervous."

4520. Burned Iraqi Children Said Turned Away

Burned Iraqi Children Said Turned Away

By DONNA ABU-NASR
Associated Press Writer

June 23, 2003, 3:45 PM EDT

BALAD, Iraq --

On a scorching afternoon, while on duty at an Army airfield, Sgt. David J. Borell was approached by an Iraqi who pleaded for help for his three children, burned when they set fire to a bag containing explosive powder left over from war in Iraq.

Borell immediately called for assistance.

But the two Army doctors who arrived about an hour later refused to help the children because their injuries were not life-threatening and had not been inflicted by U.S. troops.

Now the two girls and a boy are covered with scabs and the boy cannot use his right leg.

And Borell is shattered.

"I have never seen in almost 14 years of Army experience anything that callous," said Borell, who recounted the June 13 incident to The Associated Press.

A U.S. military spokesman said the children's condition did not fall into a category that requires Army physicians to treat them -- and that there was no inappropriate response on the part of the doctors.

The incident comes at a time when U.S. troops are trying to win the confidence of Iraqis, an undertaking that has been overwhelmed by the need to protect themselves against attacks.

Boosting security has led to suspicion in encounters between Iraqis and Americans.

There are increased pat-downs, raids on homes and arrests in which U.S. troops force people to the ground at gunpoint -- measures the Iraqis believe are meant to humiliate them.

In addition, Iraqis maintain the Americans have not lived up to their promises to improve security and living conditions, and incidents like the turning away of the children only reinforce the belief that Americans are in Iraq only for their own interests.

For Borell, who has been in Iraq since April 17, what happened with the injured children has made him question what it means to be an American soldier.

"What would it have cost us to treat these children? A few dollars perhaps. Some investment of time and resources," said Borell, 30, of Toledo, Ohio.

"I cannot imagine the heartlessness required to look into the eyes of a child in horrid pain and suffering and, with medical resources only a brief trip up the road, ignore their plight as though they are insignificant," he added.

Maj. David Accetta, public affairs officer with the 3rd Corps Support Command, said the children's condition did not fall into a category that requires Army doctors to care for them.

Only patients with conditions threatening life, limb or eyesight and not resulting from a chronic illness are considered for treatment.

"Our goal is for the Iraqis to use their own existing infrastructure and become self-sufficient, not dependent on U.S. forces for medical care," Accetta said in an e-mail to AP.

The incident came to light after an AP photographer took a picture of Borell being comforted by a colleague after the doctors refused to care for the children.

When Borell's wife, Rachelle Douglas-Borell, saw the photo, she contacted AP with a copy of a letter he sent her describing what happened.

When Borell talks about the children, he pauses between sentences, keeps his head down, clears his throat.

Seated on a cot in a bare room at an Army air base in Balad, 55 miles northwest of Baghdad, Borell said when he saw the three children, especially the girls, Ahlam, 11, and Budur, 10, he visualized his daughters, Ashley, 8, and Brianna, 5.

Borell, who spoke to the family through an Iraqi bystander with some English, did not understand exactly what happened to the children.

But the children's father, Falah Mutlaq, told AP they set fire to a bag of explosives they found on a street in their village, Bihishmeh, a few miles from the base.

Mutlaq, 36, who has 14 children from two wives, said he took the children to a hospital in Balad, but they were turned away because the facility could not treat them.

He then took them to the base.

Borell's eyes cloud with pain when he describes the children.

Madeeha Mutlaq was holding her son, Haidar, 10, fanning him with a piece of cardboard.

His legs, arms and half of his face were singed. Ahlam, Haidar's full sister, and Budur, his half-sister, had fewer but still extensive burns.

What struck Borell was the children's silence.

"They did not utter a single sound," he said.

Borell radioed his superiors, who contacted the base hospital.

Two Army doctors, both of them majors, responded.

One of them, according to Borell, "looked at (Haidar) ... didn't examine him, didn't ask him questions."

"(He) never looked at the girls," said Borell.

"Through the interpreter, one of the doctors told the father that we didn't have any medicine here ... and were not able to provide them care," said Borell.

"And he also expounded on the fact that they needed long-term care."

Borell said the combat hospital was fully stocked.

"Right before they left, I looked at the one doctor, asked him if he could at least give them comfort care," said Borell.

"He told me they were not here to be the treatment center for Iraq."

"He didn't show any compassion," the sergeant added.

Borell grabbed his first-aid kit and gave the father some bandages and IV solution to clean the wounds.

Mutlaq, who grows oranges and apples with water he gets from the Tigris River, laughed when he recalled the doctor's words.

"He lied," Mutlaq said.

"The world's greatest power going to war without burn medicine? Who can believe that?"

Mutlaq took the children the next day to Baghdad for treatment.

Budur, a chubby, giggly child with light brown eyes, seems to have recovered except for a large scab on her right arm.

Ahlam and Haidar are covered with yellowish scabs scattered over raw red flesh.

Haidar keeps his left fingers bent and hops on his left leg because it's too painful to use the right one.

A smile rarely leaves his face despite the discomfort.

Mutlaq said he often hears the children whimper at night from the pain.

Despite their suffering, Mutlaq said he feels no bitterness.

"How can I not love the Americans? They helped me with a flat tire the other day," he said.

Borell said he felt betrayed by the Army, which he joined after high school.

Besides the letter to his wife, he also wrote to his congresswoman and several media outlets describing the incident.

His superiors have not said a word, said Borell, "although I get the impression that they're probably not very happy."

Borell's wife gave him a silver bracelet that says: "Duty, Honor, Country."

He wears it to remind him why he's in Iraq.

"After today, I wonder if I will still be able to carry the title 'soldier' with any pride at all," said Borell.

4521. U.S. troops shoot Syrian border guards.

U.S. forces shoot Syrian border guards in assault on suspected Iraqi fugitives

PAULINE JELINEK, Associated Press Writer

Monday, June 23, 2003

WASHINGTON (AP) --

U.S. special forces shot several Syrian border guards during a firefight that broke out as the Americans chased a convoy of suspected Iraqi fugitives.

An undisclosed number of people were killed, wounded or captured in the attack against the convoy and the resulting border shootout in far western Iraq, Pentagon officials said Monday.

A senior defense official, speaking on condition of anonymity, said five Syrians were injured, three of whom were treated by U.S. forces.

The official would not say on which side of the Iraq-Syria border the clash occurred.

He said it did not appear that any Syrians were killed.

Officials released few details about the incident, which happened Wednesday.

State Department spokesmen did not return telephone queries asking when casualties among the border guards would be returned to Syria and what its effect on U.S.-Syrian relations was likely to be.

Working partly on information from previously captured Iraqis, special operations soldiers attacked the convoy to stop what they believed were high-level fugitives linked to the fallen Iraqi government of President Saddam Hussein, defense officials said.

About 20 people in the convoy were apprehended by the American troops, and most were released after it was determined they did not pose a threat, the senior defense official said.

The official would not disclose nationalities, but he said they were pursued as part of the U.S.-led coalition's effort to "seek out former regime members and leadership."

The official said "routine DNA testing will be done, if appropriate, based on all intelligence gathered."

He said a site exploitation team would attempt to collect remains of the dead.

He did not know the number killed and would not say how many vehicles were in the convoy.

It was unclear whether human remains had been found as of Monday.

Also unclear who shot first in the exchange of fire with the Syrian border guards or the sequence of other events that led to the shooting.

Asked at an afternoon State Department news conference whether diplomats at the U.S. Embassy in Damascus were working to send back the Syrians, department spokesman Philip T. Reeker referred the question to the Defense Department.

The senior defense official said he knew of no U.S. government contact with Syria on the issue.

Intelligence that prompted the attack indicated the convoy included a number of higher-level Iraqis, although not necessarily Saddam, other officials said.

There was no reason to believe that Saddam was among in the convoy, they said.

The special "Task Force 20" commando team was aided in the attack by fire laid down by an AC-130 gunship and other air support, one official said.

The convoy was traveling a known smuggling route near the city of Qaim.

It was unclear whether smugglers were among casualties and how many Iraqis might have been captured or killed.

U.S.-Syrian relations already had been strained over events in Iraq.

Can you say "vietnam"? How about "occupation tropps" in Germany,
Italy, and Japan? Why are you surprised by this?

4528. Help with Roland DXY 1200 Plotter

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-27 00:01:24 UTC
From: Martins <martins@dodo.com.au>

Source record: 65925

Hi
Can you help me out with some info

I have picked up a Roland DXY 1200 Plotter with no cables

The power in is on the side of plotter it has 3 pins marked 9.7v/31v dc
(like the back of a computer supply only smaller)
Is this the working voltage range or supply to each pin and a ground ?

I have not been able to find a manual for notes for it.

I hope to plot PCB with it

Thanks For your time

Regards
Craig vk2zcm

Good for him, the buttf**ing queers will never be accepted by
normal people, no matter what the liberal buttheads in the supreme
court rule.

I would say he needs to be appointed to the supreme court.

Must I remind you, Sadaam is no longer in power. And the cost in
American lives, while too high, still totals less than half the American
lives lost last year in Washington DC alone.

Has anyone else tried this radio?

I think the receive sucks and transmit is no better. This test
was done after borrowing an SMA to SO-239 adapter to an antenna
that works real good with a Yaesu FT-727R on 2 meters.

The Supreme Court does not opt to delay an execution unless they have good
reason to believe that something was definately amiss (e.g. that the
convicted party may be not guilty)...

According to what I saw on most every major news outlet, both conservative
and liberal, the general public does not agree with your statement, and that
attitudes toward gays have loosened considerably over the past decade or so.

I'm pretty sure I remember that book- it must have been published mid 1960s, 1 1/2" thick, hardcover, white and green dust cover and printed on thick rough paper. Mainly valve (IT4s, DF91s, and DAF9?) projects but transistors had crept in, OC44s and the like. . If you find one with the print read off it then it is probably the copy I used back then ;-)

FG Rayer (G3OGR) had a son, who I understand was also licensed. I can't see a Rayer listed in the callbook I have to hand but it may be worth trying to locate him. FG Rayer also wrote extensively for PW and possibly "Radio Constructor". I recall a feature on FGR (by his son I think) in PW, must have been Sept or Oct last year.

One would be off the grounds of FD. But your right, I might be mistaken, of course I would look into the rules.
So Tried SNOS last night and couldn't seem to get it going. Will it only work with 98/95? I was trying on a XP laptop.

Didn't know anything about William Pryor before reading the New York Times editorial. However, if that editorial is correct, he sounds like the perfect candidate for the Supreme Court. The Supreme Court is supposed to represent all the people, including the far right. Perhaps it is time for a candidate to represent that group, just like the other partisan groups represented by members of that court.

You say Pryor is against abortion, women's rights, gay rights and civil rights. He, on the other hand, might argue that those rights have to be better balanced against the rights of others (unborn children, men, non-gays, and non-minorities).

What the hell is that supposed to mean. There is no correlation. If we bring the troops home, and presumably they all don't go to Washington to live, we would have cut unnecessary deaths. We're supposed to be solaced by the thought that even though we're needlessly loosing our young men in Iraq, it's ok because more people are murdered in Washington every year?

And the Saddam is not in power stuff. If Saddam kills Iraqis and the U.S. kills Iraqis, do you think that the families of the dead say that even though they lost members of their family, it's ok since the U.S. killed them.

If our house to house searches keep up the way they are in Iraq, the Iraqis will soon think that they were better off with Saddam.

Can you spell OIL. That's mainly what we wanted, and strategic advantage. It certainly wasn't about WMD or Freedom. We are becoming oppressors.

Regards.

Of course attitudes toward gays have loosened considerably. After all, anyone opposed to the so-called "gay rights" is heavily censored and even ridiculed by the media. Instead, the American public is shown only one side of this issue (happy gays on television sit-coms or gays in "love"). That same media never shows homosexual men engaging in unsafe sex with strangers in public parks and nightclubs or sexually abusing children (unless it is gay priests in the Catholic Church - the media hates the Catholic Church more than it likes gays, but even then focuses more an the church than the outrageous behavior of those priests).

```
It only works with DOS.
It is an operating system, not an application program,
uses DOS to load then takes over the system.

Althought the "Attitudes" may have loosened, so have the morals.

Gays are given Carte Blanche by the media in terms of the failure of the media to report some of the most egregious behaviors. I have seen, on conservative shows, news articles of men in bras and panties marching in local parades. These were parades that the gays sued for admission to, parades designed to celebrate some community events, perhaps the 4th of July, etc. The gay marchers have no right, and are not thematically related to the parade's original intent. The gays are involved in activism. No problem with activism, but the public has been given a skewed look at the activities and proclivities of some gay groups. Failure of the major media to show the sordid side of gay life has artificially left many people with an unjustified empathy of the gay cause. The ability of the government to regulate activities that occur within the home is exemplified by the prohibition of pedophilic activities. The government maintains the right to prosecute any adults actively engaging or having engaged in this deviate practice, regardless of the location of occurrence. As perversion progresses, I would imagine that other home based activities will also be prohibited, such as extreme forms of bondage and sadism.

The same is true with religion, the media juggernaut has begun against positive role modeling of Christian figures and followers. The same is also true with abortion. The media allows the perceived notion of the excision of a subdividing cell to represent the abortion products, suppressing at all costs the actually imagery of the products of a late term aborted fetus (baby in the trash can).

Source record: 65846

I have my Drake L4B for sale. I bought it new in 1979. It is all original
except I replaced the tubes some time in 1988 or 89 and replaced the filaments
feed-through caps 6 or 7 years ago. Heck I still have the warranty card for it
you can send in :)
It is in good condition except the push/pull standby switch quit working many
years ago. I never used it so I didn't worry about it.
It puts out around 1400 watts with about 100 watts of drive.
It has been used very little in the last 12 years.
Front panel is in great shape. The top has a couple of VERY minor surface
scratches, which might buff out.
$725 and I'll ship or deliver if close enough
E-mail for phone number if interested.

Against all advise, the RN spent mucho pounds on sophisticated jamming equipment at the expense of "hard kill" weapons. These jammers worked as promised. When an Argentine pilot fired a missile at a Brit frigate the frigate's EW system responded automatically and decoyed the missile around itself ... unhappily onto the troop ship it was supposed to be defending!! The good news is that the troop ship had unloaded but some aboard suggested that "frigate" was derived from a similar Spanish word of appropriate meaning.

I suspect the same logic is behind keeping telegraph keys ... (c:

I went out and got this radio on sale and am pretty satisfied. I live probably 5 miles from the nearest repeater and am hitting it in low wattage mode. I use an earpiece to avoid the radio's speaker. Very intuitive unit.

I am not familiar with the design you are referring to , but I would surmise that it has something to do with a helically wound antenna. This is a pretty fair antenna, but you will never get a match on this with 500 feet of wire on it ! What you really would want to do with this particular antenna would be to wind about 1/2 wavelength of wire on it, for the center of the frequency band of interest. the formula for determining the half-wave length would be :

468 / freq (in mhz).

the circular disk is generally used to provide a "capacitance hat" to the antenna, thereby lowering its angle of radiation, (and in general reception), and to broaden somewhat the bandwidth of the antenna. Lowering the angle of reception would be the plan for a dxing antenna, since we are interested in signals that are at or only slightly above the horizon level. These are the furthest away, since they are coming in nearly straight from the horizon. The capacitance hat would not make much diff on this particular antenna design, since it simply does not work that way. The helical coil antenna exhibits a distributed capacitance between the turns of the coil , and a series inductance by nature of the coil, which has to usually be compensated for by trimming the top coils a bit to get the antenna "tuned". We can safely ignore the resistance in 1/2 wave of number 12 copper wire, which is generally what is used to wind the antenna. I can think of better antennas off the top of my head for dxing, notably a rotatable beam, maybe with traps in it for multiple bands, mounted at as high of a location as you can muster. These directional "beam" antennas not only provide gain in the reciever in the desired direction, but suppress noise and interference from other directions, thereby improving the signal to noise ratio by some considerable amount.

When winding the helical antenna, we start with close-spaced turns at the bottom , and gradually spread the turns a bit as we go up the rod, providing essentially a base-loaded antenna. The last 10 or 15 turns are usually put on close-spaced, as this gives a little bit of a top loading effect , which helps lower the radiation / reception angle a bit. But it's not really a DXers antenna, while the multi-rotatable beam would be.

by Robert Raketty
Staff Writer

The U.S. Supreme Court is expected to issue its landmark ruling possibly as soon as Monday, June 23, in the much-watched Lambda Legal case Lawrence v. Texas, which challenges Texas's "Homosexual Conduct." A victory would effect the 13 states that have sodomy laws on the books, and could clear the way for equal rights for Lesbian, Gay, Bisexual and Transgender Americans. Events are being planned in 25 cities nationwide, including Seattle, to mark the occasion whether the ruling is favorable or not.

"We expect that the decision will have a profound effect on a variety of civil rights issues, such as the looming battle over marriage rights for same-sex couples," said Jamie Pedersen, a Seattle attorney and co-chair of Lambda's national board. "For those who are not familiar with the case, the Supreme Court will be deciding whether the U.S. Constitution permits states to pursue criminal prosecutions against Gay men and Lesbians for having sex. Lambda Legal has been representing the plaintiffs since shortly after their arrest in Houston, Texas, in September 1998."

Lambda Legal had asked the court to strike down the Texas law because it is an unconstitutional invasion of privacy and by singling out LGBT Americans, it violates the Constitution's equal protection guarantee.

Lambda Legal, the American Civil Liberties Union of Washington and the Seattle LGBT Community Center are planning a rally to coincide with the date of Supreme Court announcement which could come as early as Monday, June 23, or as late as Monday, June 30. Local organizers plan to send out an e-mail alert with the final details of the rally the morning of the decision.

The crowd will gather at about 5:00 p.m. on the steps of the Federal Courthouse (1010 Fifth Ave.), located across the street from the new Central Library between Madison and Spring. In addition to Pedersen, who will talk on Lambda Legal's behalf, other speakers include State Reps. Ed Murray (D-43) and Joe McDermott (D-34).

4566. Gearing up for the Gay Pride Parade

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-27 22:24:15 UTC
From: "radiobuff0@mailcity.moc" <JJ>
Message-ID: <LU9PIWWA37800.0156712963@Gilgamesh-frog.org>

Here in Seattle the Pride parade takes place in late June, and I want to make sure I'm properly ready.

I seized on a chance to attend a different parade as a warm-up. Every year the historically Scandinavian section of the city stages a Norwegian parade. My friend Mona and I decided to go.

The sweaters were beautiful, the children in their outfits adorable, and the parade had all the pizzazz of a plate of lutefisk.

It isn't that I believe men in g-strings and boas are what make a parade. But I think a parade of and for people who are still battling for acceptance can pack an emotional wallop both participants and spectators feel.

Not that the Norwegian parade was devoid of emotion. We stood next to a group of handsomely costumed youthful senior citizens who alternated speaking English and Norwegian. Whenever someone joined their party, there was enthusiastic hugging and pushing and an elbow to the kidney for Mona.

They apologized to her. Had this been Pride, she would've gotten an apology and a date.

Rather than attending such warm-up affairs, a better way to gear myself up for the Pride parade is to take a moment to concentrate on slogans and other aspects of the event, and come up with a few new ideas. The Pride organizers don't have to pay me for my suggestions. This is my community service. And I haven't even been arrested for anything.

I think it's time to expand on some of the well-known chants that arise during Pride. Consider the chestnut "We're here, we're queer, get used to it!" A number of variations suitable to the times leap to mind, like "We're here, we're queer, not to mention intersex and two-spirit!" Or "We're here, we're queer, get a load of our buying power!"

I have a soft spot for "We're here, we're queer, and so was Will Geer."

A chant heard at Dyke Marches could now include a sequel. A few minutes after bellowing "Two, four, six, eight, how do you know your wife is straight?" folks could follow up with "Two, four, six, ten, last night your wife came 'round again!"

It's my impression that chants aren't as pervasive at Pride as they used to be. Maybe we're less political now, or more diverse. Or maybe

we're too sophisticated to keep intoning "Hey, hey, ho, ho, homophobia's got to go!" Or maybe, to a degree, it has.

Turning now to the signs people carry, last year women with the Seattle Lesbian Cancer Project displayed some that earned applause. The front of one sign demanded "Spread 'em!" The back explained "Lesbians need pap tests too." Because the LGBT community is targeted by the tobacco industry, another sign read "Tell Philip Morris to stick it up his butt."

I applaud this kind of informational signage, and offer a suggestion for a sign concerning breast exams: "Touch each other. What could be better?"

Other signs I expect to see at this year's Pride include "My partner is in Iraq," "Message to Supreme Court-bugger the sodomy law," and "I volunteer to be Will's boyfriend."

One of my all-time favorite signs was attached to a stroller in Boston some years back. It read "Hatched by two chicks."

With the gayby boom in full bloom, I am bedeviled by the question of propriety at Pride. Chants, signs, floats, attire or the lack of it. How do we balance our need for self-expression with the need to parent appropriately? I remember thinking last year I could explain most of the parade participants to a child-until the Golden Showers group walked by.

I have no suggestions for tackling that issue. I do, though, have a suggestion for any protesters who plan to appear.

Don't.

ROCHESTER, N.Y., June 26 -- Seventy-four percent of American adults surveyed in April 2003 favor the U.S. Supreme Court overturning state laws that criminalize private, consenting sexual relations between same-sex couples, yet allows that same private conduct to occur between opposite-sex couples. This was the finding of a national online poll released by Witeck-Combs Communications (http://www.witeckcombs.com) and Harris Interactive(r) (http://www.harrisinteractive.com).

The survey also reveals that Americans almost equally oppose laws regulating consenting sexual relations that occur in the private homes of opposite-sex and same-sex couples. Nearly nine out of 10 Americans (87 percent) oppose state laws regulating private, sexual relations that are applied to opposite-sex married adult couples and almost as many (82 percent) oppose such laws that are applied to same-sex adult couples in a domestic partnership.

"Even when we exclude respondents who self-identify as lesbian, gay, bisexual or transgender, support for overturning state sodomy laws does not change significantly," said Darin Johnson, vice president at Witeck-Combs Communications. "It is clear that an overwhelming majority of Americans believe the Supreme Court should overturn all state laws that interfere with private sexual relations between consenting adults, whether same-sex or opposite-sex couples."

These are highlights of a nationwide survey of more than 2,000 adults, of whom approximately seven percent self-identified as gay, lesbian, bisexual or transgender (GLBT). The survey was conducted online between April 17 and 23, 2003 by Harris Interactive, with analysis of GLBT data provided by Witeck-Combs Communications, Inc., a strategic public relations and marketing communications firm with special expertise in GLBT issues.

"These numbers tell the same story we've been telling courts in this country for years: the vast majority of Americans support the right to privacy of all people, including gays and lesbians, and oppose anti-gay discrimination," said Kevin Cathcart, executive director of Lambda Legal Defense and Education Fund, the national gay rights organization bringing the Supreme Court challenge to consensual sex laws.

Across the board, regardless of income, gender, age, region of the country, or political philosophy, Americans overwhelmingly oppose state laws that regulate sexual relations that occur in the private home of an adult same-sex couple.

After a five-year court battle, state prison officials have agreed
to provide female-hormone therapy to trans woman Jessica Elaine Wolfe,
who is incarcerated at the State Correctional Institution at Graterford.
Wolfe filed a lawsuit against the state Department of Corrections
and various officials on April 30, 1997, seeking trans-related
medications and the ability to present herself as a woman in prison.
The case was settled on July 24, 2002. Terms of the settlement are
confidential, according to court records.
However, the Pittsburgh Tribune-Review recently reported that Wolfe
is receiving hormone therapy and other medications.
Wolfe also has received an undisclosed amount of money to settle the
case, said Richard J. Wickersham, a defense attorney in the case.
Sean Connolly, a spokesman for state Attorney General Mike Fisher,
referred all questions to state prison officials.
U.S. District Judge Anita B. Brody, who handled the case, also
declined to comment.
Prison spokeswoman Susan McNaughton confirmed that a state-prison
inmate is receiving Premarin, an estrogen replacement drug, and Lupron
Depot, a medication that decreases testosterone levels.
However, McNaughton declined to identify the inmate, citing privacy
and medical confidentiality rules. She did not refute the Tribune-
Review story.
Wolfe, 39, is serving a 5- to-15-year sentence at Graterford for
raping an 8-year-old girl in 1995. She could not be reached for comment.
Her name was legally changed from James Elliot Wolfe to Jessica
Elaine Wolfe after her incarceration in July 1996, according to court
records.
Wolfe was denied parole in September 2002. Her next scheduled parole
interview is in September 2004, although she may apply for an earlier
parole interview in September 2003, according to state parole-board
records.
Jerry Galinski, a spokesman for the prison, said Wolfe does not have
a cell mate at Graterford. If an inmate harasses Wolfe, he will be
disciplined promptly, he said.
Kristine Holt, a local transgender attorney, praised the settlement.
“It’s a good thing,” Holt told PGN. “I’m glad the state is
providing
medications for her. Medications shouldn’t be withheld from her just
because she’s a trans woman.”

Holt stopped short of saying Wolfe should be housed in a female prison.

“I realize it may be difficult to place her in a women’s prison,” Holt continued. “But I do hope the state is making some sort of accommodation for her protection - and I don’t meet 23-hour-a-day confinement for her.”

Galinski said Wolfe is housed in a section of the prison that has increased supervision, but she is not confined to her cell more than an average prisoner.

According to state-prison policy, inmates with penises must be assigned to male prisons, despite an inmate’s outward appearance or gender expression.

There are no prison units specifically set aside for transgender inmates, according to state-prison policy.

Phyllis Randolph Frye, another transgender attorney, conveyed support for Wolfe.

“A person is in prison because they’ve done something wrong,” Frye said. “But that’s no reason to treat them inhumanely. My main concern is the protection of the transgender person. They need to be segregated without being isolated.”

She questioned why the case ensued for more than five years.

“I don’t understand why prison officials are so mean as to spend thousands and thousands of dollars in litigation, rather than give someone their hormone,” Frye continued. “Who does it hurt, other than someone with a trumped-up feeling of control? We need sensitive medical professionals to help make these decisions.”

McNaughton said prison officials do consult with transgender-related medical experts, when necessary. She said the state Department of Corrections has not established a transgender advisory board to assist with formulating prison policies.

4569. Gay Pride Picnic 2003 Recap

About 270 people, an all time record, came together to celebrate the 11th annual Pride Erie Picnic at Presque Isle, Beach 11 on June 14, 2003. Once again, we had hot dogs and hamburgers and folks brought a yummy assortment of dishes. There were about 225 people at last year's picnic, which was the previous record amount for attendance.

Thanks to Coca Cola of Erie for donating soda, Paper Moon, Plymouth Tavern, Two Friends Italian Market and Antler's Pub for donating cases of water, plates and etc. We are also grateful to the Zone for donating the hamburgers, cheese and hot dogs, and the Village for donating buns and ice.

As has always been the case, folks brought their friends, families and pets. We had people from Pennsylvania, New York and Ohio. We also had a wide range of ages and backgrounds attending. One attendee emailed afterwards that he liked the Erie picnic more than one of the nearby cities because it was more like family, whereas the other city's felt more commercial and less personal. Two women from San Francisco were back in the Erie area for a graduation ceremony and joined us at the Pride Picnic after hearing about it.

Again, we really feel that the picnic was such a success because so many people interacted one on one with others who may not have known about the event. All of us working together help our community to have an event to be extra proud of!

Thanks to Paul Grubbs, Don, Ken Blood, Dave Amy, Keith Roumfort, Matthew Miller, and Patrick for setup/truck driving. One of the original truck drivers wasn't able to make it, so extra special thanks to Paul Grubbs, Don and Ken Blood for stepping in when needed.

Big thanks also to Dave Amy, Keith Roumfort, and Bob for cooking. We had a slight bit of a difficulty when we realized only 1 spatula had been packed for cooking. The cooks mysteriously balked at the possibility of turning meat with their bare hands and facing third degrees burns (wimps!), so thanks to Larry for emergency cookware delivery. Many thanks to everyone for bringing such a delicious array of food!

There were some info tables and personnel on hand. The Health Department had safer sex info, and the Hispanic American Council as well. Steve Glassman of SPARC was able to get almost 150 signatures to send to elected officials to amend the PA Human Relations Act, our state's version of civil rights legislation. People who signed had to be PA residents and over the age of 18, so not everyone was able to

sign. Trigon had a display about the upcoming Pride Weekend happening on September 12-14. The Green Party also had info, as did the Crime Victim Center, PFLAG and other organizations.

We would like to thank Rashima for being dot mistress and diligently passing out numbered stickers, so we knew how many people attended. It was very edifying to see that we had a slight increase and that there were so many first time people.

We took the picture in a slightly different spot at the beach than in years past. Folks also played volleyball and caught up with old and new friends. Big thanks to Deb Spilko, who took photos throughout the day and Brian Skelly, who took the group photo!

Big thanks to those who helped with clean up, including Dave Amy, Keith Roumfort, Brian Skelly, Matthew Miller, Larry, and Evan.

And, as always, many thanks to those of you who talked with friends, or mentioned in chat rooms, and otherwise helped us get the word out. Thanks to everyone who came and made the day so enjoyable!

For next year's picnic, we are considering trying to move to the larger space at the Cookhouse, by Beach 6. This would have the additional advantages of having electricity, and much more space (the pavilion is only rated for 80 people, but the cookhouse is rated for 240), and the info area spills into the end of the end of where food is), and it is also located closer to the entrance, so missing something wouldn't mean having to do without.

4570. ITS LAW SAME-SEX COUPLES MARRY IN ONTARIO, CANADA

Same-Sex Couples Who Wed in Ontario May Face
Discrimination in the United States

WASHINGTON - The Human Rights Campaign joined gay, lesbian, bisexual and transgender community legal and advocacy groups today in lauding the Ontario appeals court June 10 ruling recognizing civil marriage rights for same-sex couples. American same-sex couples are also able to wed in Ontario under this ruling. HRC strongly believes that these marriages should be treated equally and given the same respect as any marriage, but warns that married couples returning home to the United States can expect to face discrimination under federal law and many state laws. But we also believe that some states, businesses or other institutions will honor these marriages, says HRC.
"Ontario's landmark ruling -- and the Canadian government's decision not to appeal it -- recognizes that the Canadian Constitution mandates civil marriage equality for its gay and lesbian citizens. Obviously, this ruling pertains to the civil marriage license issued by the province and will not affect what marriages religious institutions choose to sanction. Leaders in the United States should take note of this ruling and recognize that all committed couples deserve to be treated with the same dignity and respect," said HRC Executive Director Elizabeth Birch. "Couples who marry in Ontario and return to the United States seeking the same rights, responsibilities and obligations that heterosexual married couples receive should be aware that discriminatory laws in this country remain a problem. We will continue working to end marriage discrimination in this country."
Whether or not same-sex couples choose to marry in Canada, they should take steps to protect their families at this time. Couples should continue to secure wills, heath care proxies, adoption and co-parenting agreements, and consult with lawyers and financial advisors to set up a safety net of legal documents. Visit HRC FamilyNet at www.hrc.org/familynet for more information. If you are a member of the armed services, a foreign national living in the United States or you receive public assistance, getting married could have significant consequences. Finally, if you do marry, consult with an attorney before signing and filing government forms as a married couple.
Same-sex couples are denied the freedom to marry in all 50 states. In 37 states, anti-gay forces have added an extra layer of discriminatory legislation. Same-sex couples also do not have access to the rights, benefits and responsibilities of marriage that opposite-sex couples receive under federal law. It is imperative that any challenges to these laws and to other obstacles certain to arise be made strategically, working with the GLBT legal groups that are already

involved in efforts to secure civil marriage rights for gays and lesbians in the United States.

The Gay & Lesbian Advocates & Defenders (GLAD), Lambda Legal, the National Center for Lesbian Rights (NCLR), the American Civil Liberties Union Lesbian & Gay Rights Project and Freedom To Marry are among those leading the efforts for civil marriage rights for same-sex couples. Legal challenges are pending in two states, Massachusetts (plaintiff couples are represented by GLAD) and New Jersey (plaintiff couples are represented by Lambda Legal).

In a joint statement released last week, several of the groups listed above cautioned that "couples should absolutely not race across the border" to set up lawsuits in response to discrimination against marriages granted in Canada. "The wrong cases could set us back for years. We will be strongest if we work together," the groups added.

To contact the groups, visit their websites at: www.glad.org, www.lambdalegal.org, www.nclrights.org, www.aclu.org and www.freedomtomarry.org

The federal Defense of Marriage Act of 1996 creates a federal definition of marriage and spouse, limiting the definition of marriage to a "legal union between one man and one woman as husband and wife," and spouse to "a person of the opposite sex who is a husband or a wife."

According to a 1997 General Accounting Office study, the law denies unmarried couples more than 1,000 federal rights, responsibilities and obligations associated with civil marriage, including the right to Social Security survivor benefits and to file jointly for taxes.

"U.S. law discriminates against same-sex couples in federal programs, such as immigration, federal tax benefits and family medical leave," said HRC General Counsel and Legal Director Kevin Layton. "Marriage could open the door to hundreds of rights, responsibilities and benefits that are currently being blocked by discriminatory laws in many states."

"Still, we expect some states, businesses or other institutions to treat the marriages of same-sex couples with equal respect," noted Birch. "Gay and lesbian couples ought to be able to expect their lawful marriages to be honored. Furthermore, we should all celebrate the fact that people will now see lawfully wedded same-sex couples living ordinary, everyday married lives. And the sky won't have fallen in the wake of this victory."

HRC advocates at the federal level and partners with GLBT advocacy organizations at the state level for policy and legislation to ensure equal treatment for same-sex couples, including civil marriage and the granting of individual rights and responsibilities, such as inheritance and hospital visitation rights. Visit www.hrc.org to find out more about HRC's work on these issues.

The Human Rights Campaign is the largest national lesbian and gay political organization with members throughout the country. It effectively lobbies Congress, provides campaign support and educates the public to ensure that lesbian, gay, bisexual and transgender Americans can be open, honest and safe at home, at work and in the community.

SAA Picnic Held at Park; No Harassment
Phil LaPadula

A local gay man who was cited for indecent exposure while sitting on a beach at John Lloyd State Park in a white swimsuit has been found not guilty after defending himself in a Hollywood court.

Judge Lee Jay Seidman declared Tracy Faulkner, a registered nurse, not guilty of two counts of indecent exposure after examining the swimsuit and hearing testimony from Faulkner and the arresting officer, David G. Pius. In his citation, Pius said the swimsuit was “less than fully opaque.”

“I am thankful to live in a country where a regular person can defend himself against injustice and win,” Faulkner said. “I am also grateful to the bailiff, who followed us to the parking lot to congratulate me. She said more people should stand up for themselves. And I am most thankful to Judge Lee Jay Seidman for his fairness and patience.”

Faulkner is one of nine gay men who attended a meeting at the Law Offices of Kent and Cormican on June 10 to discuss the possibility of a class-action suit against park officers who have been accused of targeting gay men and falsely accusing them of violations at John U. Lloyd Park. Kent and Cormican have the names of 15 gay men who are willing to testify in a possible class-action suit that they were harassed and/or falsely accused of violations by officers in the park. One of the men at the meeting, Nunaz Guerra of Hollywood, said he was falsely accused of engaging in sex on the beach. Guerra said he was standing on John Lloyd beach talking to another man when an officer came up and shined a flashlight on him. Guerra said the officer asked to see his ID. Guerra said he asked the officer, “What’s going on?” The officer then told him that he was under arrest for engaging in oral sex. Guerra said he was shocked. “We were just standing and talking,” he said. “If I had done that and gotten caught, I would have admitted it,” he said. “We were both standing. The other person would have had to be on his knees to do that.”
Another man at the meeting, Jose Mendoza, has pled not guilty to a charge of sitting “in a restricted area” on John Lloyd beach. Mendoza said he was sitting about 20 feet from the water on a sand dune above a ledge. Like several other gay men charged with the same violation, Mendoza said he had no idea he was doing anything wrong. “The park has been completely negligent about informing people about this restricted area,” he said. His trial has been rescheduled for June 23.
J. Luis Jimenez, said he was stopped by Officer David G. Pius, the same

officer involved in the swimsuit case, and Officer D. Jones while jogging through the park on a trail. Jimenez said Officer Jones told him, “This doesn’t look like a restricted are, but it really is.” According to Jimenez, the officers asked to see his ID. After he told them it was in his car, the officers followed him back to the car, searched his car and searched a backpack in the car, Jimenez said. “They kept asking me questions,” he said. At one point, Jimenez said the officers asked if he had urinated in the area. “When someone passed on the trail, they asked me if I knew him,” Jimenez said. “I said, ‘No, he waved at you.’” The officers gave him a warning for being in “a restricted area” and left.

Jimenez, who teaches environmental studies at a local college, said, “I have traveled all around the world to national parks, and whenever there are restricted areas, there are always signs.” He added, “I have seen [the park officers drive vehicles all over the protected vegetation. They are disturbing the ecosystem.”

Rodger Stamp, a Hollywood resident, contacted The Express last week and said he has witnessed harassment and false arrests at John U. Lloyd Park and been targeted himself. “I saw a guy on the beach take off his shorts,” Stamp said. “He had a bathing suit under the shorts. Officer Jones came up to him and told him he was under arrest for masturbating on the beach.”

Stamp said an officer once stopped him along a trail and asked to see his ID. “He told me I was in a ‘high sex-crime area’ and that I wasn’t supposed to be there,” Stamp said. “I wasn’t doing anything wrong; I was just walking on the nature trails.”

Stamp said the majority of people he sees having sex on the beach are heterosexual couples. He said he once saw a couple on the beach. According to Stamp, the woman was wearing no top and a thong bathing suit.

The Express faxed a list of eight questions to the Lucia Ross, media and public relations spokesperson for the Florida Department of Environmental Protection, Division of Law Enforcement, more than two weeks ago. She promised to give them to Major Elwood Stevens, bureau chief of the park patrol. On June 7, Ross told The Express that the department was “drafting a response.” The Express still has not received any response. The department has also declined repeated requests from The Express to talk with the officers involved in the incidents.

Meanwhile, the Sunshine Athletic Association (SAA), a local gay group, held its annual picnic at John U. Lloyd park last weekend. About 100 members of the group showed up, and there were apparently no incidents, according to Andy Eddy, an SAA member. “Some people called and were afraid to go, but nothing happened,” Eddy said. In fact, he said the park officers on duty that day “were very nice. They came around and emptied the trash.”

4574. Historic Moment of Gay Pride in West Palm Beach

West Palm Beach Mayor Lois Frankel just added a splash of color to city hall. But she didn’t have the building painted, and she’s not redecorating her office. On Saturday morning, June 21, Frankel made history by being the first mayor of West Palm Beach to raise the colorful symbol of gay pride—the rainbow flag—on the city hall flagpole.

On June 6, Frankel received a letter from Compass, Palm Beach County’s LGBT Community Center, requesting the display in honor of the Stonewall Gay Pride Celebration. Frankel said she didn’t give the request a second thought. “They asked if we would raise the flag, and I’m happy to do it,” the mayor said. “We have a significant and important gay population in West Palm Beach that’s been very instrumental in the development of a number of our neighborhoods.”

The rainbow flag will fly over city hall until Monday, June 23.

On Saturday evening, June 21, Compass held its annual Stonewall Ball fundraiser at the Harriet Himmel Gilman Theatre at CityPlace in downtown West Palm Beach.

Frankel joins a growing number of Palm Beach County politicians visibly supporting Pride celebrations. In March, Lake Worth Mayor Rodney Romano raised the same rainbow flag over Lake Worth’s city hall in honor of Compass’ Pridefest event held in Bryant Park.

Jamie Foreman, president of the Palm Beach County Human Rights Council, commended Frankel for her decision to fly the flag. “It’s recognizing the contribution of gays and lesbians to the community,” he said. “Throughout her career in public office, Lois has always been a strong ally.”

Frankel said, “I want people to feel comfortable, and live and work and feel like you’re a part of this city, regardless of your sexual orientation. This is a city for everyone, and diversity is what makes us so special.”

4575. Pridelines Prom Attracts 700 Gay Youths

‘Heat of the Ocean’ Event Makes Waves in Miami
Mike Buhl and Mike Irwin

Pridelines Youth Services—a local organization for gay, lesbian, bisexual, transgender and questioning youth—held its eighth annual youth prom on Saturday, June 14. “The Heart of the Ocean,” held in the Wolfson Ballroom of Temple Israel in Miami, attracted over 700 youths, as well as four local TV news stations.
The prom kicked off with a performance by Elaine Lancaster and MTV’s Rachel Robinson and Shane Landrum from Battle of the Sexes. After their welcome, Party 93.1’s DJ Sizzle cranked up the music. The singing group Unite and Fight, a collaboration between Pridelines Youth Services and Youth Expressions, performed the song “Killer on the Loose” followed by a show from Florida She King 2003, Blake.
With the call for entries for the prom king and queen contest, the youths rushed to be one of the first five entries for each title, at the Pridelines table, near the entrance. After all of the entries were taken, Robinson and Landrum began the contests. The contestants were judged first by their looks and then by how they danced. Bryan Crook of Miami was named King of the Seven Seas, and Odiissi of Miami was named Queen of the Mermaids.
Crook is an 18-year-old Killian High School graduate who has been involved with SAVE Dade and Florida’s Humane Farms. Odiisi is a 19-year-old Jackson High School graduate who volunteers for Pridelines.
Co-host, Shane Landrum has attended as many as 50 events this year. “This is the first youth event that had such a low age range,” he said. Landrum has been involved with the gay community since high school; however, he has only been open about his sexuality for four years. Asked why he volunteers within the community, he said that he “loves to help all the people.”
Landrum is in a relationship that has lasted a year and is still going strong. Landrum also has a website, www.ShaneLandrum.com.
Pridelines Youth Services is dedicated to providing a safe, supportive, fun and educational environment for gay, lesbian, bisexual, transgender and questioning (gay) youth in South Florida. The group designs and implements specific health promotion programs (drugs, alcohol, sexual health, smoking, self-esteem building, etc.), which enable and nurture healthy lifestyle choices. Pridelines offers a variety of resources, in the forms of brochures, magazines, books and videos. The service allows youths to express themselves through writing, art and at Youth Town Meetings. Such programs provide a safe and nurturing environment and break the isolation that places gay youth at high risk for drug abuse, suicide, hopelessness and school truancy.

Pridelines also provides skill-building and leadership opportunities within the agency itself as well as at local and national levels. The group is also expanding its outreach so that more youth, and the community at large, are aware of the resources available.

4576. Being Gay, Pride in Who We Are

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-27 23:01:18 UTC

Once again, we gather to celebrate Pride. That means we have to support those who are with us, and condemn those who would destroy us, because being who you are means standing up and saying that you will not be denied.

Those who would deny you decency must be defeated. Power concedes nothing without a demand. Never has. Never will.

Accordingly, we today censure the series of federal judicial nominations that would bring to the bench a gathering of Neanderthals in black robes. The latest entry in the parades of myopic misanthropes is Alabama Attorney General William Pryor, nominated to the 11th Circuit Court of Appeals in Atlanta, that forum where federal cases in Florida eventually wind up.

It is no surprise that Mike Signorile, one of our writers, in his national column, referred to Pryor as a judicial maniac; one of the many demagogic nominees who are a presidential payoff to the Christian right.

Pryor has called the woman’s right to abortion “the worst abomination of constitutional law in our history.” He defended infamous Alabama state judge Roy Moore, who posted the Ten Commandments in his courtroom and had them engraved in a monument in the court building’s rotunda, where they stay, awaiting an appeal from a higher court.

Pryor believes that accepting homosexuality and decriminalizing gay sex acts will lead to sex with human corpses, as well as with assorted members of the animal kingdom.

“A constitutional right that protects ‘the choice of one’s partner’
and ‘whether and how to connect sexually,’” Pryor has written, “must
logically extend to activities like prostitution, adultery, necrophilia, bestiality, possession of child pornography and even incest and pedophilia (if the child should credibly claim to be ‘willing’).”

Last week Pryor appeared before the Senate Judiciary Committee, explaining, among other things, that he canceled a trip to Disney World because “Gay Days” were being held there. “He wanted to save his daughters from the evil queens he believes are prancing around the Magic Kingdom,” Signorile wrote in his column.

When we hear of the president meeting at the White House with Log Cabin Republicans, we want to applaud him for supporting the umbrella of diversity. But we are beginning to think he is sucking us into the lion’s den in order to chew us up and spit us out. Throw a few bones to the beggars and then step all over them.

WASHINGTON, June 26 (AFP) - In a major ruling with wide-ranging implications for homosexual and privacy rights, the US Supreme Court ruled
Thursday that states cannot ban sodomy between consenting adults.
The ruling, following a case in which two Texas men were arrested for
having sex in a private apartment, was acclaimed by gay rights groups but
bitterly condemned by conservatives.
"The case does involve two adults who, with full and mutual consent from
each other, engaged in sexual practices common to a homosexual lifestyle. The
petitioners are entitled to respect for their private lives," the court said
in its 6-3 decision.
"The state cannot demean their existence or control their destiny by making
their private sexual conduct a crime."
Texas was one of four US states where it had been a crime for members of
the same sex to engage in sodomy. In Texas this was defined as oral or anal
sex.
The challenge to the Texas statute started after sheriff's deputies in
Harris County arrested John Lawrence and Tyron Garner when they were
discovered having sex in Lawrence's apartment in September 1998.
Police broke into the apartment in response to a weapons tip that proved
unfounded. Lawrence and Garner were both convicted and ordered to pay fines of
200 dollars each.
The Texas state appeals court upheld the sentence, ruling that the law
"advances a legitimate state interest, namely, preserving public morals".
The Supreme Court ruling overturns sodomy laws across the United States,
including those in nine states which outlawed the practice among heterosexuals
as well as homosexuals.
The administration of President George W. Bush, who served as

governor of
Texas, declined to comment on the ruling, reflecting the highly
divisive
nature of the topic.
Ruth Harlow, the lawyer for the two Texas men, said the ruling
recognized
the "basic humanity" of gay and lesbian Americans.
"All of us as Americans have the right to choose how we can express
our
love for one another in the privacy of our own homes," Harlow said.
"The court is just catching up with American society, which has made
major
progress."
Michael Adams, with the gay legal advocacy group, Lamda Legal
Defense Fund,
said the ruling would facilitate fights against other areas in which
gay
people continue to face discrimination, including employment and
marriage.
The Americans Civil Liberties Union called the ruling "historic."
"With this decision, the court has finally recognized that we
(homosexuals)
are part of the American family," said James Esseks with the ACLU's
Lesbian
and Gay Rights project."
"By acknowledging that we are not criminals, this decision will make
it far
easier for us to get society to change."
But converatives blasted the ruling, saying it could lead to an end
to laws
banning incest, bigamy and beastiality.
"Just because the court doesn't care for the law in Texas they have
invented a 'right' to unlimited sexual expression that is nowhere in
the
constitution," said Robert Knight, director of the Culture and Family
Institute, a converative advocacy group.
He said the court had "no business substituting their immorality for
the
Texas people's moral standards."
"This puts laws against prostitution, incenst, bigamy and even
beastiality
in jeopardy, because if the right to privacy trumps all other
considerations,
then there is no defense for upholding any law bearing on sexual
morality."
Tom Minnery, of the conservative Focus on the Family agreed.
"With today's decision the court continues pillaging its way through
the
moral norms of our country," he said in a statement.
"If the people have no right to regulate sexuality then ultimately

the
institution of marriage is in peril, and with it, the welfare of the
coming
generations of children."

4579. Lambda praises gay rights ruling

WASHINGTON, June 26 (UPI) -- The Lambda Legal Defense & Educational Fund called Thurday's ruling by the Supreme Court on gay rights a "landmark."

"Today the U.S. Supreme Court closed the door on an era of intolerance and ushered in a new era of respect and equal treatment for gay Americans," said Ruth Harlow, legal director for the lesbian and gay civil rights group.

The U.S. Supreme Court struck down Texas' law against homosexual sodomy, which criminalized oral and anal sex by consenting gay couples.

Lambda represented John Lawrence and Tyron Garner, who were arrested in Lawrence's Houston home and jailed overnight after officers responding to a false report from an acquaintance found the men engaged in private, consensual sex.

Once convicted, they were forced to pay fines and are now considered sex offenders in several states. In addition to Texas, 12 states have consensual sodomy laws, some of which apply to straight and gay adults alike.

SUPREME COURT REJECTS SODOMY LAWS:
Highest Court Affirms "Equal Protection" for Gays and Lesbians

(Washington D.C.) - In the most sweeping decision ever on gay and lesbian rights, the nation's highest court ruled today that so-called "sodomy" laws are unconstitutional. The term "sodomy," which has been defined differently depending on the jurisdictions, the judge and the era it was interpreted, was challenged in part because of its vagueness.

"This decision is a victory for all Americans," said Jeff Montgomery, Executive Director of Triangle Foundation, Michigan's leading civil rights organization for gay, lesbian, bisexual and transgender people. "The government should not be meddling in people's bedrooms. Everyone has a basic right to privacy and should not live in fear that police could enter their home, arrest them and throw them in jail for adult, consensual sex in their own home. The court has finally corrected one it's most embarrassing decisions ever (Bowers v Hardwick) and affirmed equal protection for gay and lesbian people. This decision is fantastic news for all Americans interested in stepping out of the past and respecting all relationships for what they contribute to our society. Finally gay, lesbian and bisexual Americans can be freed from the label of 'criminal' or 'outlaw' in this country"

Lawrence v Texas was challenged mostly because the Texas statute criminalized same-sex only "sodomy." Lambda Legal Defense and Education Fund argued that these and other sodomy laws violated the Fourteenth Amendment's equal protection clause because it targeted gay, lesbian and bisexual people for prosecution. The case also argued that the statute violated the fundamental right to privacy.

Michigan is one of approximately 15 states have some form of sodomy law still on the books. Michigan's statute "MCL 750.158 The Abominable and Detestable Crime Against Nature" has roots dating back to 1820. Michigan's sodomy laws were stricken down in 1990 (MOHR v Kelly) with plaintiffs from several counties and attorneys from the Michigan Organization for Human Rights (MOHR) and Lambda Legal Defense and Education Fund (LLDEF). The Wayne County Circuit Court decision was never appealed by the Attorney General so opponents of the law believe it is already unenforceable anywhere in Michigan. Others argue that because the law is still on the books, it was enforceable until today.

"This decision will have and unprecedented impact on the lives of every gay, lesbian and bisexual American," said Rudy Serra, Criminal and Civil Rights Attorney and Triangle Foundation Board member. "The

presence of sodomy laws has been the single largest legal obstacle to gaining full civil rights in this country. By claiming that gays and lesbians are felons, anti-gay judges and policy makers have blocked laws allowing equal rights, hate crime prosecutions, and equity in parenting and family benefits."

by Ann Rostow
Gay.com / PlanetOut.com Network

On Friday, one day after striking down sodomy laws in the Lawrence v. Texas case, the U.S. Supreme Court instructed the Kansas Court of Appeals to revisit an earlier case that raises the issue of discriminatory treatment of a gay man.

The high court vacated the decision in the case of Matthew Limon, a teenager who received a 17-year prison sentence for having consensual oral sex with a younger teen in the residential boarding school they both attended. The Kansas court upheld the sentence, and the Kansas Supreme Court declined to intervene.

The American Civil Liberties Union (ACLU) had petitioned the U.S. Supreme Court to accept the case for review, but the justices had not responded one way or another to the ACLU's request. Although the high court did not accept review, the message they sent to the Kansas court one day after the Lawrence decision was clear: Reduce the sentence.

Under a Kansas statute, the "Romeo and Juliet Law," heterosexual teens who are caught having consensual sex are treated as an exceptional case under the laws that govern underage sexual activity. Provided the miscreants are under 19, and provided the younger participant is between 14 and 16 and no more than four years separate their ages, the teens are subject to a maximum sentence of one year.

Homosexual teens involved in the same activity, however, are given no leeway, and prosecuted as adults. Matthew Limon received an even harsher sentence than usual, due to a previous incident of this sort on his juvenile record. As such, the youth was facing nearly two decades behind bars for the "crime" of having consensual oral sex with another boy. Limon had just turned 18 at the time of the encounter, while the other boy was about to turn 15.

The case had one constitutional claim in common with the challenge to the Texas sodomy law, namely that the statute punished same-sex couples more severely than heterosexual couples for no apparent logical reason. The ACLU did not argue that Kansas's treatment of underage partners violated their right to privacy.

Although Thursday's majority opinion was based on the right to privacy, and not the right to equal protection at issue here, the court made clear that gay men and women stand on an equal constitutional footing with heterosexuals, and that morality alone cannot justify

discriminatory laws.

In a press release Friday, ACLU Lesbian and Gay Rights Project Litigation Director James Esseks said the Lawrence ruling means that "states can no longer get away with ... unequal treatment. We hope that this is the first of many wrongs that yesterday's ruling will correct."

Posted: June 27, 2003 12:01 a.m. ET

(Ottawa) As hundreds of same-sex couples converge on city halls across Ontario to get marriage licenses a leading Roman Catholic churchman has issued a strongly worded warning to priests in the province.

Marcel Gervais, Archbishop of Ottawa and a former president of the Canadian bishops' conference, has told Catholic clergy they will be suspended if they perform any gay marriage.

"In the Catholic Church, an attempted marriage of two of the same sex would not be recognized and the person officiating would be suspended from their sacred duties," Gervais said.

Gervais said the church will continue to recognize marriage as "the union of one man and one woman to the exclusion of all others."

The Archbishop said no court ruling or act of Parliament will change the Church's position.

In announcing the government would not appeal an Ontario court ruling that struck down the ban on gay marriage Prime Minister Jean Chretien last week said legislation to extend gay marriage across Canada would respected the rights of religious organizations.

NY Times:

ASHINGTON, June 27 — In one of the first consequences of its landmark ruling on gay rights on Thursday, the Supreme Court today set aside the lengthy prison sentence imposed on a gay Kansas teenager for having had sex with a younger boy.

In a brief order with little elaboration, the court vacated the 17-year sentence imposed in 2000 on the defendant, Matthew Limon, and returned the case to the Kansas courts "for further consideration in light of Lawrence v. Texas."

Most North Americans may not have visited Manchester, England's second-largest city, but that doesn't mean they haven't seen it. Even without ever being aired on American television, "Queer As Folk" -- the gay-flavored British mini-series, predecessor to the American series of the same name -- became an underground video sensation in gay households across America. So it's not too surprising that this saucy series made a star out of one its lead players -- the city of Manchester itself. Almost overnight Manchester's reputation as a forlorn, past-its-prime industrial burg has been updated: Now it's one of the hottest gay cities on the planet!
And the timing for Manchester's long-awaited close-up couldn't be better. This year Manchester will host thousands of gays and lesbians from around the continent (and the world!) for EuroPride 2003 (+44-161/238-4568, fax +44-161/238-4579; www.europridemanchester 2003.com, info@europridemanchester 2003.com; August 15-25), one of the biggest, brightest, gayest events of the year. With past EuroPride events having been in luminary spots such as Paris, Cologne and Rome, Manchester puts itself squarely on the map with this event.

Much has happened in the past decade to warrant this recent star treatment. The explosion of bars, shops and restaurants around Manchester's Canal Street area resulted in the vibrant neighborhood now known as the Gay Village. This nine-block region is a proudly touted as headliner in the city's funky roster of attractions, drawing throngs of gay folks out every weekend. Just south of town, across the water from the stadium that's home to soccer heart-throb David Beckham and his Manchester United teammates, there's The Lowry, a brand spanking new art and performance venue housed in a gleaming, cutting-edge facility reminiscent of Frank Gehry's Bilbao Guggenheim.

All over Manchester you can find smart eateries, cool live music venues (the city's famous music scene has spawned the likes of The Smiths, Simply Red, M People, and Oasis), and just lots going on. In amongst the blocks of red-brick Victorian architecture, students swarm (this is England's biggest university town), hipsters hang, and queer folks live it up.

Given all of this, plus Manchester's tradition of liberal politics (there's not one Conservative amongst the city's 70 city council members) and its proximity via train and plane from London and other major North American and European cities (Manchester International Airport serves 175 countries across all five continents with six direct flights to and from the U.S.), there's no reason why you can't check it out for yourself.

(Kassel, Germany) A man accused of murdering and then cooking and eating a man he met on the internet is expected to be formally charged today.

The case dates back two years. The suspect, identified only as Armin M., until he appears in court, has admitted videotaping himself killing the Berlin man, a computer chip developer at Siemens corporation, identified only as Bernd Juergen B.

Police originally thought they were investigating a murder but now say they are convinced the victim allowed himself to be led to the slaughter.

On the morning of his disappearance 9 March 2001, Bernd Juergen B completed his will. He left the bulk of his estate including a lavish penthouse apartment and EUR 50,000 worth of computer equipment to his domestic partner, a man named Ren&#65533;.

According to police, the victim had large amounts of cash and his passport when he travelled 300 kilometres from Berlin to the alleged murderer's house near Kassel.

Searching the rambling, 30-room, half-timbered house in the village of Rotenburg, investigators unearthed skeletal remains, some of them packaged in a freezer, along with videotapes and CD-ROMs on which the suspect allegedly recorded his actions.

Authorities were tipped off to the crime by internet surfers who stumbled upon chat room requests allegedly posted by the suspect in which he was looking for people willing to be slaughtered and eaten by him.

4591. Boisterous rally at Utah Capitol backs sodomy ruling

By Derek P. Jensen
The Salt Lake Tribune

Hailing a decision by the U.S. Supreme Court that struck down a Texas sodomy law, a boisterous crowd of 200 cheered, hugged and applauded speakers Thursday while gathered on the sunny steps of the state Capitol as rainbow flags flew.

"It's a major political event," said Ernie Hale, standing next to his partner. "I don't normally come to something like this, but it's a big deal. It's a long time coming." Waving a large rainbow flag, Kathy Worthington of Taylorsville said she has followed the gay sex debate for many years. "This is historic, it's really historic," she said.

Worthington -- who is planning a trip to Canada next week to marry her partner of 11 years -- said the high court's decision will have an immediate effect on the issue of gay clubs in Utah schools. "We won't have legislators saying, 'It's illegal activity,' " she said.

Salt Lake resident Scott McCoy said he was thrilled to see the crowd: "You see all stripes, all walks of life here. Families, children -- it's great."

Throughout the hourlong rally, there was no vocal opposition.

Civil rights attorney Brian Barnard -- who has challenged Utah's sodomy law for years -- announced to the crowd, "I do not care what Gayle Ruzicka [leader of Utah's Eagle Forum] does in the privacy of her own bedroom," to a wave of laughter.

Utah Families Coalition spokeswoman Laura Milliken Gray said Thursday's decision could give her group ammunition to challenge Utah's adoption ban for gay couples.

Following the rally, Joe Watts, standing with Sharon, his wife of 41 years, said, "It's another great step in our progress toward liberty."

Gay.com / PlanetOut.com Network

In a state where 67 percent of the electorate voted to ban same-sex marriage just seven months ago, Nevada legislators silently but unanimously passed a law this session that extends hospital visitation rights to partners of gays and other unmarried people.

The measure, effective on Tuesday, coasted through the legislative process this spring so quietly that even now that it has passed no one in the local media has written about it.

Under the new law, any Nevada adult can designate who can visit them in a medical facility regardless of legal family status. The law also permits individuals to decide who can take possession and decide the fate of their remains, catapulting the designee to the top of the priority list ahead of any blood relatives.

The measure emerged out of last fall's overwhelming approval of Question 2, which constitutionally defined marriage as being between a man and a woman. The religious conservatives who pushed the amendment insisted they weren't attacking gay people but merely hoping to protect heterosexual marriage, so two of the state's most influential political insiders put them to a test. Democratic strategist Billy Vassiliadis and Sig Rogich, a Republican former aide to President George H. W. Bush, challenged conservatives to support a bill providing hospital visitation and funeral rights for unmarried couples.

Vassiliadis directed a chief lieutenant, Dale Erquiaga, to draft the measure. Erquiaga, who is gay, enlisted the state's only openly gay legislator, Assemblyman David Parks, D-Las Vegas, to introduce it and worked with conservatives to settle on agreeable language. He also kept gay activists from testifying to keep from inflaming the process and attracting media attention.

"Everybody understood that this had to be about the very limited rights we wanted to gain," said Erquiaga, a vice president at Vassiliadis' advertising and public relations firm, R&R Partners. "We weren't trying to make political points and didn't want this to become a big political debate. We were just trying to do something for everyday folks."

Nonetheless, gay everyday folks like partners Stephanie Washington and Kerry Woods are thrilled. Woods was barred from being with Washington when Washington was in the emergency room with kidney stones in 1999, and Washington was kept out of the examination room in 2001 when Woods

broke her ankle.

"I knew that there had to be another way to (get marital rights after Question 2), even if we had to take this apart and go after it piece by piece," said Washington, 40, who is on the board of the pro-gay Equal Rights Nevada. "It's only the right thing to do."

Erquiaga and Parks were surprised the bill passed unanimously but credited their efforts to not make it gay-specific. Indeed, conservatives now explain their support as being intended to assist heterosexuals.

"I have constituents in (the elderly community of) Sun City who cohabitate without marriage because one or both would see their retirement income decrease if they married," explained GOP Assemblyman Bob Beers of Las Vegas via e-mail.

Few states offer such rights to same-sex or unmarried heterosexual partners, and those that do typically include it as part of a domestic partnership. Yet the fact that Nevada legislators approved this so soon after Question 2 passed shows the debate was effective even though gays lost in November, said Evan Wolfson, executive director of the national Freedom to Marry Coalition.

"This is further evidence that the debate over the freedom to marry moves the center in our direction even when we suffer a momentary loss," Wolfson said. "Talking about marriage claims for gay people the powerful and resonant vocabulary of love, family, commitment and care. We get non-gay people to understand the needs of our real-life families. It's why the right wing is so scared to death."

4593. Baghdad ... What a mess!

As Baghdad boils, blackouts shut down air conditioning and anger
Iraqis

By Sameer N. Yacoub, Associated Press, 6/27/2003 16:15

BAGHDAD, Iraq

Sabotage against Baghdad's power grids has blacked out much of the
city for days on end, forcing residents to sleep on roofs, fan infants
and study by candlelight.

The electric outages are also fueling anti-U.S. sentiment at a time
occupation forces are seeking to quell a worsening insurgency that has
seen a sharp rise in attacks on American troops.

With temperatures reaching 117 degrees, life has been almost
unbearable.

''We have been living without electricity completely for the past
three days,'' said Siham Ibrahim, a 48-year-old woman who has been
sleeping with her family on the roof of their two-story house in
Baghdad.

''When the Americans removed Saddam, we expected that we would have a
better life, but things are getting worse.''

Coalition forces have struggled to re-establish basic services like
electricity and water since ousting Saddam Hussein's regime.

American officials have bristled at criticism that they aren't working
quickly enough.

The top U.S. official in Iraq, L. Paul Bremer, accused remnants of
Saddam's regime of sabotaging the power grids and promised to do
everything possible to fix the damage.

''They are trying to hinder the coalition's efforts to make life
better for the average Iraqi person... but we are not going to let
them succeed,'' he told reporters Wednesday.

An explosion Sunday rocked Iraq's largest gas pipeline near the town
of Hit, west of Baghdad, and several other attacks have followed.

The pipeline carries gas from Kirkuk to various parts of Iraq to fuel power stations, and the power situation in Baghdad has worsened since the attack.

A series of recent attacks on coalition troops has raised concern the United States could be confronting a guerrilla war in Iraq.

But many Iraqis say they blame the Americans for the problems.

''I do not believe that the Americans, with all their advanced technology, have not been able to solve the power problem in my country. I am angry with them,'' said Khalid Issa, a 36-year-old teacher.

He said his 12-year-old daughter has had difficulty studying for her exams because there is no light to read by.

The power failures have been a boon to Baghdad's growing legion of robbers, who have taken advantage of the outages to break into darkened apartments and steal cars from shadowy streets.

Perhaps the only other group that has welcomed the problems are those who sell generators.

The price of a small generator has risen to $1,100 from $600 a week ago, far too expensive for the average Iraqi.

At Baghdad's main power station, al-Dora, workers said the plant manager was too busy trying to fix the facility to speak to reporters.

The station, which supplies power to about half the city, has not been able to handle demand.

''There is a shutdown in the whole station, which is out of work now due to the overload,'' said a station employee, who refused to give his name.

4594. Bush heard the voice of God.

Road Map in the Back Seat?

By Al Kamen

Friday, June 27, 2003; Page A27

Imagine our surprise Wednesday to read in the Israeli paper Haaretz (online), that Palestinian Authority Prime Minister Abu Mazen, meeting recently with militants to enlist their support for a truce with Israel, said that, when they met in Aqaba, President Bush had told him this:

" God told me to strike at al Qaeda and I struck them, and then he instructed me to strike at Saddam [Hussein], which I did, and now I am determined to solve the problem in the Middle East. If you help me I will act, and if not, the elections will come and I will have to focus on them."

So who needs to find WMD or a link with al Qaeda when the orders come from The Highest Authority?

Two calls to the White House for clarification went unreturned, but colleague Glenn Kessler did some digging.

The Haaretz reporter, Arnon Regular, read what the paper said were minutes of the Palestinians' meeting to Kessler and another colleague, who is an Arabic speaker.

The Arabic-speaking colleague's translation, was this:

"God inspired me to hit al Qaeda, and so I hit it. And I had the inspiration to hit Saddam, and so I hit him. Now I am determined to solve the Middle East problem if you help. Otherwise the elections will come and I will be wrapped up with them."

Even then, there's uncertainty.

After all, this is Abu Mazen's account in Arabic of what Bush said in English, written down by a note-taker in Arabic, then back into English.

But one thing seems consistent:

The election season is going to be a huge distraction from the Road Map, something the White House has always insisted would not be the

case.

4595. The Army Times blasts Bush and Republicans

From The Army Times, 6/30/03 issue:
http://www.armytimes.com/story.php?f=0-ARMYPAPER-1954515.php

Editorial

Nothing but lip service

In recent months, President Bush and the Republican-controlled Congress have missed no opportunity to heap richly deserved praise on the military.

But talk is cheap -- and getting cheaper by the day, judging from the nickel-and-dime treatment the troops are getting lately.

For example, the White House griped that various pay-and-benefits incentives added to the 2004 defense budget by Congress are wasteful and unnecessary -- including a modest proposal to double the $6,000 gratuity paid to families of troops who die on active duty.

This comes at a time when Americans continue to die in Iraq at a rate of about one a day.

Similarly, the administration announced that on Oct. 1 it wants to roll back recent modest increases in monthly imminent-danger pay (from $225 to $150) and family-separation allowance (from $250 to $100) for troops getting shot at in combat zones.

Then there’s military tax relief -- or the lack thereof.

As Bush and Republican leaders in Congress preach the mantra of tax cuts, they can’t seem to find time to make progress on minor tax provisions that would be a boon to military homeowners, reservists who travel long distances for training and parents deployed to combat zones, among others.

Incredibly, one of those tax provisions -- easing residency rules for service members to qualify for capital-gains exemptions when selling a home -- has been a homeless orphan in the corridors of power for more than five years now.

The chintz even extends to basic pay.

While Bush’s proposed 2004 defense budget would continue higher targeted raises for some ranks, he also proposed capping raises for E-1s, E-2s and O-1s at 2 percent, well below the average raise of 4.1 percent.

The Senate version of the defense bill rejects that idea, and would provide minimum 3.7 percent raises for all and higher targeted hikes for some.

But the House version of the bill goes along with Bush, making this an issue still to be hashed out in upcoming negotiations.

All of which brings us to the latest indignity -- Bush’s $9.2 billion military construction request for 2004, which was set a full $1.5 billion below this year’s budget on the expectation that Congress, as has become tradition in recent years, would add funding as it drafted the construction appropriations bill.

But Bush’s tax cuts have left little elbow room in the 2004 federal budget that is taking shape, and the squeeze is on across the board.

The result:

Not only has the House Appropriations military construction panel accepted Bush’s proposed $1.5 billion cut, it voted to reduce construction spending by an additional $41 million next year.

Rep. David Obey, D-Wis., senior Democrat on the House Appropriations Committee, took a stab at restoring $1 billion of the $1.5 billion cut in Bush’s construction budget.

He proposed to cover that cost by trimming recent tax cuts for the roughly 200,000 Americans who earn more than $1 million a year.

Instead of a tax break of $88,300, they would receive $83,500.

The Republican majority on the construction appropriations panel quickly shot Obey down.

And so the outlook for making progress next year in tackling the huge backlog of work that needs to be done on crumbling military housing and other facilities is bleak at best.

Taken piecemeal, all these corner-cutting moves might be viewed as mere flesh wounds.

But even flesh wounds are fatal if you suffer enough of them.

It adds up to a troubling pattern that eventually will hurt morale -- especially if the current breakneck operations tempo also rolls on unchecked and the tense situations in Iraq and Afghanistan do not ease.

Rep. Chet Edwards, D-Texas, who notes that the House passed a resolution in March pledging "unequivocal support" to service members and their families, puts it this way:

"American military men and women don’t deserve to be saluted with our words and insulted by our actions."

Translation: Money talks -- and we all know what walks.

4596. Who's responsible for hiding the bogus Niger-uranium claims?

Let's assume for a moment that neither the president nor any of his top advisors knew that the Niger-uranium documents were bogus when the president delivered his State of the Union speech.

(Let's call it an extreme hypothetical.)

Let's say it was just a snafu.

If it's really true that folks at the State Department knew the story was bogus, and folks in the intelligence community knew it was bogus, and folks at the NSC were told it was bogus, and folks at the OVP were told it was bogus ...

If all those people knew, and somehow the information never got to the president or any of his top advisors, isn't that the kind of Category-5 screw-up that, almost by definition, costs a National Security Advisor her job?

If the president were given information to tell the public, even while many people in his own government knew the information was bogus -- and I think we now know that's true -- don't you figure he'd want some answers or explanations?

From someone?

House Rejects Deeper Probe on Iraqi Arms

By KEN GUGGENHEIM

WASHINGTON --

The House on Thursday rejected two attempts by Democratic lawmakers for additional inquiries into the handling of intelligence on Iraq's weapons programs.

Democrats sought to include the inquiries in a bill authorizing 2004 intelligence activities.

That bill, whose details are mostly classified, was expected to be approved late Thursday or early Friday.

Democrats have questioned whether prewar intelligence was inaccurate or manipulated to back up President Bush's push for war.

Republicans have said there is no sign of wrongdoing and have accused Democrats of raising the issue for political reasons.

4598. Wolfowitz Appointed Grand Inquisitor and Executioner

Wolfowitz Given Authority Over Terrorism Tribunals

Defense Secretary Donald H. Rumsfeld delegated to his top deputy, Paul D. Wolfowitz, the final word on which terrorism suspects are to be tried by a military tribunal.

Wolfowitz also was given the authority to decide who will serve on the tribunals, which the Pentagon calls commissions.

After President Bush determines which terrorism suspects in U.S. custody are subject to be tried under his Nov. 13, 2001, military order, a chief prosecutor would draft charges against any or all of those suspects.

It would then be for Wolfowitz to decide who would actually go to trial, according to Air Force Maj. John Smith of the Pentagon's Office of Military Commissions.

Wolfowitz becomes the heir-apparent to the throne of Heinrich Himmler.

4599. U.S. Begins Theft of Iraqi Petroleum Crude

Who in the Iraqi "state oil marketing firm" has the authority to
negotiate contracts in behalf of the Iraqi people??

Only the elected representatives of the Iraqi people have that
authority.
Can anyone name them?
==========
Iraq oil to sail to U.S.
ChevronTexaco gets contract for crude

For the first time since the U.S. war in Iraq ended, ChevronTexaco
Corp.
will load a tanker with crude oil from the nation's Persian Gulf port
of
Mina al-Bakr on Saturday.

The Iraqi oil will be sent to a refinery on the U.S. West Coast,
ChevronTexaco spokesman Andy Norman told Bloomberg News Tuesday. The
company bought 2 million barrels of Basrah light crude oil earlier this
month.

Iraqi oil was pumped onto a tanker at the Turkish Mediterranean port of
Ceyhan on Sunday, Iraq's first exports since the start of the U.S.-led
war in March.

Exports from Mina al-Bakr will begin Thursday, Thamir Ghadhban, the
U.S.-
appointed Ministry of Oil chief executive, told reporters.

Earlier this month, ChevronTexaco and five other companies won
contracts
for 10 million barrels of Iraqi crude, the first round of contracts
following the war.

The contracts, disclosed by Iraq's state oil marketing firm, could
generate around $300 million at current prices. The proceeds will go to
a
fund controlled by the United States and its allies and earmarked for
Iraq's reconstruction.

ChevronTexaco, headquartered in San Ramon, was the only U.S. company to
be awarded Iraqi oil. The other firms winning contracts were Tupras, in
Turkey; Total, of France; ENI, in Italy; and Repsol and Cepsa, both in
Spain.

Much of the oil being sold has been sitting in storage tanks in Iraq and
Turkey since before the war began. Arranging a sale has been problematic
because of questions of ownership, diplomacy and security.

Last month, the major roadblocks vanished when the United Nations
Security Council voted to lift the sanctions it had imposed on Iraq
following the Gulf War in 1991. Iraq's state oil marketing company --
overseen by U.S. administrators -- became the new steward for crude
sales.

Previously, the company had to funnel sales through the U.N. oil-for-food
program, which was implemented in 1995 to ensure that Iraq used the
proceeds to buy food and medicine, not weapons.

Iraq produced about 2.5 million barrels a day before the war, or about 3
percent of the world's oil supply. Iraq's oil industry, however, has been
severely wounded by the war and its aftermath. Looting and sabotage of
facilities have cut production to about 700,000 barrels of crude per day,
by some estimates.

MISSION ACCOMPLISHED?

From a St. Petersburg Times editorial, 6/26/03:
http://www.sptimes.com/2003/06/26/Opinion/Bush_s_illusions.shtml

Bush's illusions

Almost two months after the president said major combat in Iraq had ended, U.S. troops are still being killed and the White House's plans are in disarray.

On May 1, President Bush was the star of an elaborately staged event that may come to symbolize his administration's illusion-over-reality approach to the war in Iraq.

That evening, the president donned a flight suit, climbed aboard a Navy jet and flew to the deck of the USS Abraham Lincoln, which was kept adrift just off the coast of California so it could serve as a dramatic setting for a nationally televised spectacle.

The jet carrying the president made a screeching stop on the carrier, and the commander in chief emerged with all the strutting bravado of a Top Gun ace.

The president's handlers, who filmed the event for later use during the 2004 presidential campaign, set the camera angles so that the open Pacific, rather than the nearby San Diego skyline, served as the backdrop for the president's performance.

The event drew criticism from those who still find it unseemly for public officials to use matters of war for such brazen political gain.

Yet it was the substance of the president's speech, not just the heavy-handed symbolism of the surroundings, that looks most suspicious in retrospect.

"Major combat operations in Iraq have ended," the president, surrounded by thousands of Navy personnel under a banner proclaiming "Mission Accomplished," told the world that day.

Yet we now know that the president's assertion was, at best, premature.

Since the president declared that major combat had ceased, dozens of American and British soldiers have been killed or wounded in daily skirmishes.

If anything, Iraqis opposed to the continuing presence of U.S. troops have become more violent and better organized in recent weeks.

Those still loyal to Saddam Hussein have been emboldened by U.S. forces' failure to capture Hussein or account for his fate.

Even many Iraqis who were originally inclined to give U.S. and British authorities the benefit of the doubt have since turned against them.

If occupying forces don't quickly show more success in restoring order and rebuilding the Iraqi economy, we may lose any hope of building broad Iraqi support.

Thousands of undermanned U.S. troops - most of whom expected to come home once the president announced the war was effectively over - continue to perform admirably in Iraq.

But they have not received adequate support and guidance from their political leaders.

Few of our forces are trained for the peacemaking role that has been thrust upon them.

President Bush and his top advisers often have derided the notion of nation-building, the crucial but thankless task our forces are being asked to perform in Afghanistan and Iraq.

At the same time, the administration's doctrinaire unilateralism has rejected broader help from the United Nations and NATO, two organizations with valuable experience in such operations.

Yet the White House often seems more interested in denying problems than in solving them.

For example, the Army chief of staff, Gen. Eric Shinseki, was chastised by his political superiors, and eventually removed from his post, after he estimated early this year that 200,000 troops would be required to occupy Iraq in the months following the war.

That clear-eyed assessment conflicted with the White House's script for a quick, clean military victory.

Today, Shinseki's prediction looks optimistic.

Congress and the American people finally are beginning to raise serious questions about the credibility of the case the Bush administration made against Iraq in the weeks leading up to war.

At the very least, the president and other top officials grossly exaggerated the immediate threat posed by Hussein's regime.

Claims about Iraq's purported nuclear weapons program and links to al-Qaida were based on transparently phony documentation.

And while the search for chemical and biological weapons continues, it already is clear that the White House's specific claims about the

scope and location of those weapons have not been borne out.

A scrupulous investigation into charges that the Bush administration intentionally distorted intelligence to fit its political purposes in Iraq should continue.

Our government's credibility depends on it.

At the same time, though, Americans should be asking similar questions about the credibility of the Bush administration's ongoing postwar effort.

Even on its own terms, the White House has shown little of the patience, foresight and flexibility that will be required for the long-term job of building a peaceful, stable Iraq.

It is a far more complex task than the one the White House set for itself in Afghanistan, where the government of President Hamid Karzai and his U.S. protectors have made little progress in curbing the power of regional warlords, Taliban loyalists and other enemies of peace.

Wars cannot be neatly choreographed, and the end of combat operations cannot be precisely timed to fit the schedules of political consultants.

U.S. death toll rises in Iraq

By THOMAS E. RICKS
The Washington Post

WASHINGTON -

A wave of attacks on U.S. troops and civilian occupation forces in Iraq is raising worries that the 21-day war that ended in April was an incomplete victory.

The war defeated Saddam Hussein's military but apparently not his Baathist political party, some military experts say.

Neutralizing Baathist resistance is proving to be more difficult than the Pentagon calculated, and the continuing violence is becoming an embarrassment, said a U.S. official in Baghdad.

The attacks continued Thursday:

• A member of a U.S. special operations force was killed and eight were wounded by hostile fire southwest of Baghdad, the U.S. military said.

• A bomb exploded on the Baghdad airport road, killing a U.S. soldier and wounding another, the military said. The road -- heavily used by U.S. forces -- has been the scene of several attacks using trip wires dangling from overpasses or grenades tossed from bridges.

• Assailants threw grenades at a U.S. and Iraqi civilian convoy in west Baghdad, killing two Iraqi employees of the national electricity authority, U.S. soldiers and Iraqi police said. The convoy had U.S. Humvees at the front and the back, and two Iraqi civilian vehicles in the middle. The victims were traveling in the same car.

• Two U.S. soldiers were apparently abducted from an observation post north of Baghdad. American troops and helicopters scoured the desert for them Thursday.

The attacks came on top of Wednesday's mob violence that killed six British troops in southern Iraq, the Shiite-dominated area that until this week had been considered quiet and portrayed by Pentagon officials as a success story.

4602. QUEER MUSLIM CONFERENCE IN CANADA A SUCCESS

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-28 03:31:30 UTC

June 27, 2003 - Salaam Canada and Al-Fatiha Foundation USA hailed the success of the 1st Salaam Canada and 4th Al-Fatiha International Conference, held in Toronto from June 20 - 22, 2003. More than 150 delegates came together for the three day event which was the first of its kind in Canada.

Lesbian, gay, bisexual, transgender Muslims and their allies gathered from all parts of Canada including Vancouver, Montreal, Quebec City, Ottawa, Halifax and Toronto. More than a dozen people also came from the United States and the United Kingdom. The theme of the conference was "Liberating Tradition, Celebrating Culture: A Festival of Faith, Heritage and Politics."

The conference featued a diverse array of programming including workshops and a night celebrating culture, art, film, dance and spoken word, featuring the talents of queer Muslims from across Canada. Conference delegates were particularly motivated and excited to be in Toronto, only days after Canada became the third country in the world to adopt same-gender marriages.

Highlights of the conference included a reception at the Toronto city hall, held on Friday evening, June 20th, hosted by Kyle Rae, an openly gay city councilmember. On Saturday evening, June 21st, a banquet dinner featuring a keynote speech by Svend Robinson, the first openly gay member of the Canadian parliament, attracted more than 200 people. The banquet dinner was attended by many members of the LGBT community as well as members of the progressive Muslim community in Toronto. Both Kyle Rae and Svend Robinson remarked on the diversity of Muslims in Canada and the opportunities for LGBT Muslims to build on the intersections of queer and Muslim politics in Canada and around the world.

The conference and the banquet dinner both began with a smudge ceremony, honoring the native and aboriginal people of Canada. Additionally, the conference held Sufi zikr (remembrance of God) and meditation sessions from three different Sufi traditions. All prayers were conducted in accordance with progressive Muslim ideology, where women and men line up side by side and both women and men have the opportunity to lead prayer.

Other featured speakers included Dr. Ghazala Anwar, a renowned theologian, Imam Abdullah, the world's first openly gay Imam (Muslim clergyman), Professor Scott Kugle, a scholar of Islamic jurisprudence and Islamic law and Rusmir Music, a scholar of gender and sexuality in Islam. John Fisher, outgoing director of EGALE (Equality for Gays and

Lesbians Everywhere), the national LGBT political organization in Canada, also spoke to the conference delegates about the history of the queer movement in Canada.

Conference workshop and session topics included:

New World Order
Towards a Liberating Theology
Healthy Sexuality and Wellness
Visions of a Progressive Mosque
Sharing the Spirit - The Sufi Way

The queer Muslim movement traces its history back to Toronto, where in 1992 an organization called Min Alaq (from a blood clot) was started for lesbian and gay Muslims. The organization later changed its name to Salaam, but disbanded in 1994 after threats were received from the wider non-queer Muslim community.

The 1st Salaam Canada and 4th Al-Fatiha International Conference was the seventh major conference held for lesbian, gay, bisexual, and transgender Muslims, since 1998, when Al-Fatiha, which led to the formation of Salaam Toronto and the Al- Fatiha Foundation USA, was formed. These conferences include:

1998 - 1st International Retreat - Boston 1999 - 1st North American Conference - New York City 2000 - 2nd International Retreat - London 2001 - 2nd North American Conference - San Francisco 2002 - 3rd International Retreat - Washington DC 2002 - 1st Al-Fatiha UK Conference - London

Al-Fatiha Foundation plans to hold two regional conferences in New York City in August 2003 and in Los Angeles in October 2003.

There are currently three queer Muslim groups in Canada. Salaam in Toronto, Salaam in Halifax, and Salaamat in Vancouver. Al-Fatiha has seven chapters in the United States in New York City, Washington DC, Atlanta, Houston, San Francisco, San Diego and Los Angeles. There are also four sister organizations outside of North America. Al-Fatiha UK in London, the Safra Project for lesbian, bisexual and transgender Muslim women in London, Gay Muslim Support Group in Johannesburg, South Africa, and Al-Fitrah Foundation in Capetown, South Africa.

Mission of Salaam Toronto:

Salaam Toronto is an organization dedicated to Muslims who are lesbian, gay, bisexual, and transsexual and/or transgender, as well as those questioning their sexual orientation or gender identity, and their friends. Salaam Torontos goal is to provide a safe space and a forum for LGBTQ Muslims to address issues of common concern, share individual experiences, and institutional resources. Salaam Toronto is dedicated to gender justice and the full participation of women in Salaam Toronto and in society at large. Salaam Toronto promotes the Islamic notions of social justice, peace, and tolerance through its work, to bring all closer to a world that is free from injustice, prejudice, discrimination, racism, misogyny, sexism and homophobia.

Mission of Al-Fatiha Foundation:

Al-Fatiha Foundation is dedicated to Muslims who are lesbian, gay, bisexual, transgender, intersex, questioning, those exploring their sexual orientation or gender identity, and their allies, families and friends. Al-Fatiha promotes the progressive Islamic notions of peace, equality and justice. We envision a world that is free from prejudice, injustice and discrimination, where all people are fully embraced and accepted into their faith, their families and their communities. Founded in 1998, Al- Fatiha Foundation is a registered US-based non-profit, non-governmental organization. Salaam Toronto and Al-Fatiha are members of an international grassroots network of organizations dedicated to Muslims who are lesbian, gay, bisexual, transgender, intersex, questioning, those exploring their sexual orientation or gender identity, and other sexual and gender minorities.

sir,
freebanding is NOT a hobby.

its a deliberate and amlicious violation of federal rules and regulations
(those being policy, and thus according to the US supreme court, have the
affact and power of law).

you want to attract attention, fine. just don't try to take others with
you when you go down.

BTW, this applies to all those hams that choose to use gear on 11 meters.
better make sure its type approved. If not, well, you get the picture.

That's like saying the turnips in the veggie section aren't vegetables because the sign only says 'turnips'. Or that turnips have all the characteristics of a vegetable -only- because they are sold in the vegetable isle. I don't know about you, but I think turnips are sold in the veggie isle not because they are -like- vegetables, but because they ARE vegetables. And rules, regulations, statutes, ordinances, acts, codes and charters are not just -like- laws, they ARE laws.

Yesterday was cutting out some spaces between tracks,
(cut both sides with sharp knife, then overheat with soldering
iron till copper pulls away), when I firstly cut my finger and then
subsequently burnt it on the soldering iron. Sucking my finger, I
thought, "Black Pudding"!

A quick trip to SafeSummerSanitisbury's (we've got the three
"S for Shoddy" in our town, no decent emporium like Tesco's
or Waitrose) and a good breakfast this morning!

Is Black Pudding the only good thing to come out of Yorkshire?

If you take the essential recipe of Black Pudding (those bits of the
carcass that can't be used for anything else) and add an excess of
binding material (shredded plastic?) would you end up with the
beefburger?

Is the beefburger the Yanks' way of spin doctoring the Black Pudding?

And where do you live, Bumfuck, Tennessee? It's 2003 Pappy.

Where did you get your 74 percentage Pappy? Was this an informal survey taken by you in your trailer park? Is this a guess? What is it Pappy? Show some proof or STFU.

No, Eric has it rght. Rules and regulations carry the force of law. None has been considered and passed into public law, rather a single law confering onto those rules and regulations the force of law.

To bad they and all the draft dodgers don't stay they permanently!

.
Boycott anything made in France and vacation somewhere else.

Many of the draft dodgers have stayed here permanently.
For the most part we're glad they did, they make great
Canadians.
When they started showing up here, my father, who was in
the US Air Force in Korea said "good for them, they're the
smart ones". However, those that chose to go to Vietnam
certainly deserve respect also.

As for the queers..... we've already got lots thanks.

Nice try agent shit aka Q, but anyone with more than three working brain cells (which is 2 more that you have) can see the flooding of the group with gay news is coming from http://80.65.224.85 (frog remailer) which is not where I post from. Do you get a kick out of forging ids? Are you and your butt buddy going to Canada to get married? Good, just make sure you stay there with the rest of the queers.

4633. Iraqi elections take yet another step backwards

The longer this is put off the more an underground "alternative"
government will form.

http://www.washingtonpost.com/wp-dyn/articles/A42905-2003Jun27.html

SAMARRA, Iraq -- U.S. military commanders have ordered a halt to local
elections and self-rule in provincial cities and towns across Iraq,
choosing instead to install their own handpicked mayors and
administrators, many of whom are former Iraqi military leaders.
The decision to deny Iraqis a direct role in selecting municipal
governments is creating anger and resentment among aspiring leaders
and ordinary citizens, who say the U.S.-led occupation forces are not
making good on their promise to bring greater freedom and democracy to
a country dominated for three decades by Saddam Hussein.
The go-slow approach to representative government in at least a
dozen provincial cities is especially frustrating to younger,
middle-class professionals who say they want to help their communities
emerge from postwar chaos and to let, as one put it, "Iraqis make
decisions for Iraq."
The most recent order to stop planning for elections was made by
Maj. Gen. Ray Odierno, commander of the 4th Infantry Division, which
controls the northern half of Iraq. It follows similar decisions by
the 3rd Infantry Division in central Iraq and those of British
commanders in the south.
In the capital, Baghdad, U.S. officials never scheduled elections
for a city government, but have said they are forming neighborhood
councils that at some point will play a role in the selection of a
municipal government.
L. Paul Bremer, the civil administrator of Iraq, said in an
interview that there is "no blanket prohibition" against self-rule.
"I'm not opposed to it, but I want to do it a way that takes care of
our concerns. . . . Elections that are held too early can be
destructive. It's got to be done very carefully."
Iraqi critics of the policy shift say the American and British
forces are primarily hurting themselves by smothering aspiring leaders
who would benefit from the chance to work more closely with
Westerners. In addition, they say the occupation authorities are
fostering a dependent, passive mindset among Iraqis and leaving no one
but themselves to blame for the crime, faltering electricity and
general misrule Iraqis see in their daily lives.
Sattar, the would-be candidate in Samarra, said: "The new mayors
do not have to be perfect. But I think that by allowing us to
establish our own governments, many of the problems today would be
solved. If you ask most Iraqis today if they have a government, they

will tell you, no, what we have is an occupation, and that is a dangerous thing for the people to think."
Ten weeks into the occupation, the cities and towns outside of Baghdad are largely administered by former Iraqi military and police officers and people who had close ties to the Baath Party. Iraqi generals and police colonels, for example, are now mayors of a dozen cities, including Samarra, Najaf, Tikrit, Balad and Baqubah.
[...]

4634. Bush never made serious postwar plans

Top officials convinced themselves that the aftermath would be easy - and cost-free.

Top White House and Pentagon officials refused to listen to warnings that Chalabi and other Iraqi exiles did not command sufficient support inside Iraq. Nor did they heed warnings that Saddam's highly centralized government structure would collapse once he was ousted.

Worst of all, the Pentagon provided no communications system for the civilian occupation team - even though U.S. bombs had destroyed Baghdad's phone network.

The civilians tasked with running the country couldn't even talk to each other until the end of May, let alone to the Iraqi ministries they were supposedly running.

Only now are they getting a limited cell-phone network.

Why the delay?

In part, due to political machinations back in Washington over the phone contract.

Guess who got the $45 million no-bid deal?

MCI/WorldCom, the company that bilked its shareholders out of $11 billion and has very little experience in building wireless networks.

What does this tell you about how serious the Pentagon is about rebuilding Iraq?

No wonder a very senior British official in Baghdad told the Daily Telegraph last week that the American-led reconstruction effort in Iraq was "in chaos" and suffering from "a complete absence of strategic direction."

From The Philadelphia Inquirer, 6/26/03:
http://www.philly.com/mld/inquirer/news/editorial/6171177.htm

Bush never made serious postwar plans

Litany of problems in Iraq is the result.

By Trudy Rubin

BAGHDAD -

Whoever was responsible at top levels in the Pentagon for postwar planning should be fired.

But then no one would be fired.

Three weeks in Iraq makes very clear that no one in the Bush administration made serious postwar plans before the start of the Iraq war.

That lack of foresight is largely responsible for the huge occupation problems the Bush team now faces - as Iraqi anger mounts over lack of security, electricity, water, sewage and jobs.

4635. Iraq is a mess and Bush and Rumsfeld don't have a clew.

Analysis: End to Iraqi disarray sought

By Derk Kinnane Roelofsma

WASHINGTON, June 27 (UPI) --

With daily killings of coalition troops, sabotage of oil pipelines, uncontrolled crime, continuing shortages of electricity and water, and rising Iraqi hostility to occupation, Defense Secretary Donald Rumsfeld is looking, two months after the overthrow of Saddam Hussein, for ways to end the disarray in U.S. policy on Iraq.

Writing in the New York Times last Thursday, John S. Burnett gave a snapshot of the current disorder.

Reporting from southern Iraq, he wrote that among other ills:

"Lawlessness is endemic.

Alongside the highway, boys scale electric poles with wire cutters (the electric cables have copper that can be sold) while their elders look on.

To the south, in Umm Qasr, Iraq's only deep-sea port, young men climb atop trucks chartered by the World Food Program, casually tossing down 100-pound bags of flour to their friends waiting below, while a Spanish military unit guarding its ship stands by impotently only yards away.

There is no police force of any note here -- and if a policeman had a gun and was to fire, he would just start his own interfamily war."

In an interview on June 17, an unnamed senior British official at the Coalition Provisional Authority in Baghdad told the Daily Telegraph of London that it was, "The single most chaotic organization I have ever worked for."

"The operation is chronically under-resourced and suffers from an almost complete absence of strategic direction," according to the official.

Last week, Patrick Cockburn, a British journalist particularly knowledgeable about Iraq, reported from Baghdad that the few Iraqis who have joined the authority describe the American officials

administering Iraq as living in an air-conditioned fantasy world.

The head of the authority, L. Paul Bremer, speaking at an air-conditioned press conference, said that with a few exceptions, Baghdad was receiving 20 hours of electricity a day.

"'It simply isn't true,'" said one Iraqi, shaking his head in disbelief after listening to Bremer.

"'Everybody in Baghdad knows it,'" Cockburn reported him as saying.

The day Burnett's account appeared, John Hamre -- the president of the Center for Strategic and International Studies, a prestigious Washington think-tank -- who had been deputy secretary of defense in the Clinton administration, left for Iraq.

He did so at the behest of Defense Secretary Donald Rumsfeld, a CSIS spokesman told United Press International.

Hamre was heading a team of five that will spend about 10 days attending meetings in Baghdad and touring the country.

As informal advisers, the team's task is to assess the reconstruction effort in Iraq for Rumsfeld and Bremer.

The Hamre mission came as U.S. military and diplomatic experts charged the Bush administration with bungling the post-conflict situation in Iraq.

"There is no longer anyway to tap dance around the responsibility of the administration for what more and more looks like a monumental bog up," Thomas Houlahan, told UPI.

Houlahan is the Washington-based director of a military assessment program for James Madison University at Harrisburg, Va.

He is also a former paratrooper with the 82nd Airborne Division and staff officer with the 18th Airborne Corps.

The planning for Operation Iraqi Freedom, Houlahan says, "was very slipshod and not up to the standards of the U.S. Army."

Timothy Carney, a former U.S. ambassador who has just returned from two months in Iraq, has said much the same thing.

Carney, with long experience in post-conflict zones, told the British Broadcasting Corp. that the White House failed to think through post-war plans and that there was a lack of resources and of priority for reconstruction efforts.

A grievous flaw in the initial U.S. post-conflict effort, the BBC reported him as saying, was that the reconstruction team was under the command of military officers who either did not understand or did not give sufficient priority to rebuilding Iraq.

Reconstruction efforts were further hampered by a lack of troops, he said.

A well-known writer on military, Ralph Peters, told UPI there has been what he called a Stalinist refusal by the administration to admit that anything in its plan for Iraq could go wrong.

Peters is a retired lieutenant colonel with a background in military intelligence.

Referring to the looting that followed the fall of Baghdad and other Iraqi cities, Houlahan says U.S. irresponsibility, however unintentional, rises to the level of violation of the rules of war. "Once you are in a city, you are responsible for it," he said.

Asked how the White House and Defense Department went wrong, Houlahan answered that, "Virtually no thought at all went into what to do in Iraq after the war."

Rumsfeld, he said, "made the whole operation more difficult than it needed to be and increased the risks to the soldiers."

One result, Houlahan said, was that, "We are using armored forces for peacekeeping, when we have light divisions doing nothing."

Houlahan did not spare the military.

"There are too many senior leaders in the armed forces who are boot-licking yes-men," he said.

"If serious and well-presented objections had been raised, Rumsfeld would not have created so many problems."

Damage was done to the Army's structure in the Clinton years, Houlahan argued, in good part by the Army itself.

Heroes of the Gulf war were passed over for promotion as too controversial. Instead, as he sees it, politicians in uniform got the promotions.

Peters, asserting that neo-conservatives such as Deputy Defense Secretary Paul Wolfowitz, Richard Perle and others were behind the war, said they "talked themselves into believing a scenario in which the Iraqis would magically restructure themselves."

"The neo-cons underestimated the probability of resistance from Baath elements," Peters says.

"Iraq has a population of about 23 million; 1 or 2 million had a real stake in the Baath system and of these tens of thousands remain emotionally committed to it."

Yonah Alexander of the Potomac Institute for Policy Analysis takes a similar view:

"The White House and Pentagon thought that once a knockout blow was delivered to the Iraqi forces, they would be able to tell the Iraqis what to do."

So, Alexander says, there was no organization prepared to insure security and carry out reconstruction.

There is a window of opportunity to make good on the country's liberation, Alexander says, but it is closing fast.

Houlahan shares the same sense of urgency:

"We need to get our act together in a matter of weeks, not months."

There is irony in Rumsfeld seeking advice from Hamre. According to CSIS, Hamre was chosen because Rumsfeld liked a CSIS report, published before the war, on what to do in post-conflict Iraq.

The report contained 10 recommendations by Hamre and Gordon Sullivan, president of the Association of the United States Army.

The first was: "Create a Transitional Security Force that is effectively prepared, mandated, and staffed to handle post-conflict civil-security needs, including the need for constabulary forces."

Rumsfeld and the rest of the Bush administration appear to have completely ignored the recommendation.

From CNN, 6/27/03:
http://www.cnn.com/2003/ALLPOLITICS/06/27/bush.california.ap/index.html

Bush dashes for dollars in California

LOS ANGELES, California (AP) --

President Bush passed through four cities, delivered two speeches and spent eight hours airborne in a marathon day in which he was greeted by hundreds of West Coast protesters but also enough well-heeled Republicans to add $5 million to his campaign coffers.

Bush's two California stops Friday -- at a luncheon outside San Francisco and a dinner in Los Angeles -- were part of an efficient and lucrative two-week dash.

The effort will allow the president's re-election campaign to file federal finance reports showing $27 million to $30 million for the three-month period ending Monday.

The amount is certain to dwarf the totals of the nine Democratic presidential contenders -- even though Bush started months after his rivals.

The lunch brought in $1.6 million.

The glitzier evening event added another $3.5 million to the day's take, said campaign spokeswoman Nicolle Devenish.

But the president clearly had more on his mind than his re-election account.

Eager to start a weekend stay at his Texas ranch, Bush opted out of an overnight in California, which he lost to Al Gore by 12 percentage points in 2000.

Instead, he chose a schedule in which he flew from Washington to San Francisco to Los Angeles and halfway back across the country to arrive in Crawford, Texas, well after midnight.

Looking toward his final destination, Bush told his lunchtime supporters he couldn't wait to see his wife.

But, he quipped, "She'll be the lump in the bed next to me since I get in at 1:30 in the morning."

He also rushed through the VIP reception before his speech -- a private picture-taking session with those who raised $50,000.

Then, on stage, he impatiently signaled for California finance chairman and close pal Brad Freeman to wrap up his introductory remarks.

Bush left San Francisco a full 45 minutes ahead of schedule.

Donors who gathered in the airport hotel ballroom paid $2,000 to eat grilled chicken salad, with a strawberry and mango relish; wild mushroom ragout and a triple chocolate mousse.

They were also served pre-speech jokes by comedian Dennis Miller, who later earned a ride not only on Air Force One but also in the president's limousine.

His well-received assessment of the Democratic White House hopefuls: "I haven't seen a starting nine like that since the '62 Mets," a reference to the New York baseball team that won 40 games and lost 120.

From Bush, the audience got a well-rehearsed, 25-minute summary of administration achievements and campaign promises.

"We have a lot on the agenda and what I want to tell you is that I'm going to continue to earn the confidence of all Americans, regardless of their political party, by keeping this nation secure and strong and prosperous and free," Bush said.

"We have accomplished a lot, but our work is only the beginning."

The routine -- from the ticket price to the jokes to chicken on the menu to Bush's speech -- was largely repeated in Los Angeles. Guests there were treated to Johnny Mathis singing "The Star-Spangled Banner."

But despite the $2,000 entry fee, donors had to go to the cash bar for cocktails.

"You're laying the groundwork for what will be a great national victory in 2004," Bush told them.

But traveling in this traditional Democratic stronghold had Bush sharing the spotlight with his opponents.

Outside the San Francisco hotel, about 1,000 protesters lined up behind barricades and a row of police in riot gear.

They held signs proclaiming mostly anti-war messages; "Bush lies: Iraqi people & GIs die," read one.

An energized and seemingly even larger crowd gathered across from the Century Plaza Hotel in Los Angeles as Bush wooed donors inside.

Their chants and songs could be heard by fund-raiser guests as they made their way through the hotel, but not in the ballroom below.

Bush Misled US Into Iraq War--An Official Finding?

06/26/2003

By David Corn

George W. Bush misled the nation into war.

Who says?

Representative Jane Harman, the ranking Democrat on the House intelligence committee.

On the basis of what?

On the basis of information preliminarily reviewed by the intelligence committee as part of its ongoing investigation into the prewar intelligence on Iraq.

On June 25, during the House debate on the intelligence authorization bill, Harman delivered an informal progress report on her committee's inquiry.

Her remarks received, as far as I can tell, little media attention.

But they are dramatic in that these comments are the first quasi-findings from an official outlet confirming that Bush deployed dishonest rhetoric in guiding the United States to invasion and occupation in Iraq.

This is not an op-ed judgment; this is an evaluation from a member of the intelligence committee who claims to be basing her statements on the investigative work of the committee.

Here's what she says:

* On Bush's prewar assertions about Iraq's weapons of mass destruction: "When discussing Iraq's WMD, administration officials rarely included the caveats and qualifiers attached to the intelligence committee's judgments.....For many Americans, the

administration's certainty gave the impression that there was even stronger intelligence about Iraq's possession of and intention to use WMD."

* On the evidence upon which the WMD assertions were based: "The committee is now investigating whether the intelligence case on Iraq's WMD was based on circumstantial evidence rather than hard facts and whether the intelligence community made clear to the policy-makers and Congress that most of its analytic judgments were based on things like aerial photographs and Iraqi defector interviews, not hard facts."

* On the supposed Hussein-al Qaeda connection: "[T]he investigation suggests that the intelligence linking al Qaeda to Iraq, a prominent theme in the administration's statements prior to the war, [was] contrary to what was claimed by the administration."

She is not beating around the bush.

She asserts that the President overstated the WMD case, ignoring nuances and uncertainties in the intelligence reporting, and created a false impression about what was known about the threat posed by Iraq.

She maintains that Bush rashly claimed Hussein was in cahoots with the evildoers of 9/11, when intelligence indicated otherwise.

This is damning stuff.

Never mind all the recent claptrap from administration apologists about the Iraq war having been fought for the good of the repressed Iraqis.

The primary rationale for the war Bush offered in public was based on two notions:

Iraq possessed ready-to-go WMDs and Saddam Hussein was in league with al Qaeda and could slip these awful weapons to Osama bin Laden at any moment.

(Last fall, Bush exclaimed--with no caveats or qualifiers--that Hussein was "dealing" with al Qaeda.)

The danger, Bush and his crew argued repeatedly, was imminent and real--so clear-and-present that the United States could not afford to wait any longer or take a chance on enhanced and more intrusive inspections.

Now Harman says Bush had no right to declare, as he did on March 17, that "intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised," or to say Hussein was a bin Laden ally.

Harman, a California moderate who is no hothead and who voted for the Iraq war, is essentially branding Bush a liar.

If her remarks accurately reflect the committee's work, it means the administration will be confronted with evidence it misrepresented intelligence in its attempt to whip up support for the war.

And it may well be confronted in public.

Harman notes that Representative Porter Goss, the Republican chairman of the committee, has promised to hold public hearings, perhaps in July, and to produce an unclassified report as soon as possible.

(Soon after Harman made her remarks on the floor, Goss led a successful effort to defeat an amendment offered by Representative Dennis Kucinich, a Democratic presidential candidate, that would have required the inspector general of the CIA to investigate the allegation that Vice President Dick Cheney pressured the agency to produce reports supporting the administration's policy on Iraq.)

"It is already clear that there were flaws in US intelligence," Harman says.

"Iraq's WMD was not located where the intelligence community thought it might be. Chemical weapons were not used in the war despite the intelligence community's judgment that their use was likely. I urge this administration not to contemplate military action, especially preemptive action, in Iran, North Korea or Syria until these issues are cleared up."

She also suggests that an independent commission might be needed to examine the MIA WMD controversy.

Harman's statement was a sneak preview.

If she is not blowing smoke, Bush's prewar deceptions may end up more thoroughly substantiated than was his case for war.

"To put it bluntly, if Bush has taken Congress and the nation into war based on bogus information, he is cooked.

Manipulation or deliberate misuse of national security intelligence data, if proven, could be "a high crime" under the Constitution's impeachment clause.

It would also be a violation of federal criminal law, including the broad federal anti-conspiracy statute http://caselaw.lp.findlaw.com/scripts/ts_search.pl?title=18&sec=371, which renders it a felony "to defraud the United States, or any agency thereof in any manner or for any purpose."

It's important to recall that when Richard Nixon resigned, he was about to be impeached by the House of Representatives for misusing the CIA and FBI.

After Watergate, all presidents are on notice that manipulating or misusing any agency of the executive branch improperly is a serious

abuse of presidential power."

U.S. Soldier Shot in Iraq, Analysts Warn of Revolt

By Andrew Gray

BAGHDAD (Reuters) - A U.S. soldier was shot in the head and critically wounded while shopping in a Baghdad store on Friday, the latest target in a surge of attacks that analysts say could explode into open revolt.

The soldier, a specialist assigned to try to win over the civilian population, was shopping for digital video disks in the Kazimiyah neighborhood in the northwest of Baghdad when he was shot in the back of the head, residents said.

U.S. officials blame die-hard supporters of fallen leader Saddam Hussein for attacks on their troops but many Iraqis say there is widespread anger at the occupation and the failure to provide basic services and security.

Apart from the mounting toll from hit-and-run tactics, the U.S. military is struggling to prevent sabotage of oil and power facilities and may now have to rethink troop movements with two missing soldiers feared abducted.

In a sign of the growing concern in Washington and among foreign companies eyeing Iraq, the Pentagon has sent a group of private experts to assess postwar reconstruction efforts.

The visit follows a report issued this week by Kroll Inc., a risk consulting company, which told corporate clients that an Iraqi revolt against occupying forces was one of two most likely scenarios in 2003. The other was a so-called wobbly landing with some instability but not outright revolt.

Leader of Iraq's Shi'ite Muslim majority Ayatollah Mohammed Baqir al-Hakim called during Friday prayers in the holy city of Najaf for Iraqis to try peaceful means of resistance first.

"However, if they do not get any results, then the people of Iraq may resort to military action," he said, as quoted by the Voice of the Islamic Republic of Iran and monitored by the BBC.

"The Iraqis will have to choose their own future and determine the destiny of their own country," said Hakim, leader of the Iranian-backed Supreme Council for Islamic Revolution in Iraq.

4639. Chickenhawk Cheney cites war "victories" in fund-raising letter

Cheney cites war 'victories' in fund-raising letter

Posted: June 27, 2003

By Paul Sperry

WASHINGTON --

In a new fund-raising letter to supporters, Vice President Dick Cheney boasts of "important victories in the war on terrorism," and entreats potential donors to re-elect President Bush and "put this man of integrity and honor back in the White House for another four years."

The two-page letter, dated June 26, follows one penned by President Bush last month also asking for campaign donations.

Like Bush, Cheney warned that next year's election "could be very close."

"We've had important victories in the war on terrorism," Cheney said, while cautioning there is more work to be done.

Iraq is not mentioned in the letter.

Nor is Saddam Hussein or Osama bin Laden.

Anyone have any idea which "victories" the Chickenhawk is talking about?

4640. The Sodomy ruling killed Strom Thurmond

Occupation Forces Halt Elections Throughout Iraq

By William Booth and Rajiv Chandrasekaran
Washington Post Staff Writers

Saturday, June 28, 2003; Page A20

SAMARRA, Iraq --

U.S. military commanders have ordered a halt to local elections and self-rule in provincial cities and towns across Iraq, choosing instead to install their own handpicked mayors and administrators, many of whom are former Iraqi military leaders.

The decision to deny Iraqis a direct role in selecting municipal governments is creating anger and resentment among aspiring leaders and ordinary citizens, who say the U.S.-led occupation forces are not making good on their promise to bring greater freedom and democracy to a country dominated for three decades by Saddam Hussein.

This should come as no surprise. After all, Georgie did say:

"There ought to be limits to freedom"

at a press conference at the Texas State House, May 21, 1999

"If this were a dictatorship, it would be a heck of a lot easier, just so long as I'm the dictator."

at a televised Newsconference, 2/18/00

"A dictatorship would be a heck of a lot easier, there's no question about it."

Yeah, come on all of you, big strong men,
Uncle Sam needs your help again.
He's catchin' himself some terrible flack
Way down yonder in ol' Iraq
So put down your books and pick up a gun,
We're gonna have a whole lotta fun.

And it's one, two, three,
What are we fighting for ?
Don't ask me, I don't give a heck,
Next stop is ol' Iraq;
And it's five, six, seven,
Open up the pearly gates,
Well there ain't no time to wonder why,
Whoopee! we're all gonna die.

Well, come on Rumsfeld, let's move fast;
Your big chance has come at last.
Gotta go out and get some A-rabs
The only good muslim is the one who's bagged
And you know that peace can only be won
When we've blown 'em all to kingdom come.

And it's one, two, three,
What are we fighting for ?
Don't ask me, I don't give a heck,
Next stop is ol' Iraq;
And it's five, six, seven,
Open up the pearly gates,
Well there ain't no time to wonder why
Whoopee! we're all gonna die.

Huh!

Well, come on Wall Street, don't move slow,
Why man, this is war au-go-go.
There's plenty good money to be made
By supplying the Army with the tools of the trade,
Just hope and pray that if they drop the bomb,
They drop it on som muslim mom.

And it's one, two, three,
What are we fighting for ?
Don't ask me, I don't give a heck,
Next stop is ol' Iraq;

And it's five, six, seven,
Open up the pearly gates,
Well there ain't no time to wonder why
Whoopee! we're all gonna die.

Well, come on mothers now don't be lax,
Pack your boys off to ol' Iraq.
Come on fathers, don't hesitate,
Send 'em off before it's too late.
Be the first one on your block
To have your boy come home in a box.

And it's one, two, three
What are we fighting for ?
Don't ask me, I don't give a heck,
Next stop is ol' Iraq;
And it's five, six, seven,
Open up the pearly gates,
Well there ain't no time to wonder why,
Whoopee! we're all gonna die.

Gay Americans won a historic victory Thursday when the Supreme Court struck down Texas's sodomy law. The sweeping 6-to-3 decision made a point of overturning a 17-year-old precedent that was curtly dismissive of gay rights. The ruling Thursday has implications that reach beyond sodomy, and is an important step toward winning gay men and women full equality under the law. The challenge to Texas's "Homosexual Conduct" law was brought by two men who were convicted of engaging in "deviate sexual intercourse" in a private home. The men argued that the law denied them equal protection by criminalizing sexual acts of same-sex couples that were legal for different-sex couples. Criminalizing their private sexual acts, they argued, deprived them of their liberty and privacy rights. The Supreme Court could have ruled on relatively narrow equal protection grounds. But five justices went further, holding that any anti-sodomy law violates gay people's liberty rights. Justice Anthony Kennedy's majority opinion noted that the case is really about gay people's ability to maintain personal relationships. It demeans gays, he wrote, to see it as a dispute about sexual conduct, "just as it would demean a married couple were it to be said marriage is simply about the right to have sexual intercourse." The three dissenters accused the majority of advancing a "homosexual agenda." But their analysis relied on the same tired arguments conservatives have long used to deny minority rights.

4648. JJ exclusive Gays overjoyed at sodomy ruling by U.S. Supreme Court

LISA LEFF

SAN FRANCISCO (AP) - In a gesture of gratitude for the U.S. Supreme Court's decision striking down a Texas sodomy law, gay-rights activists lowered the huge rainbow flag that flies over this city's Castro District and hoisted the Stars and Stripes in its place.

Gay members of a local American Legion Post unfurled the American flag, then saluted and sang the Star-Spangled Banner, as residents marvelled that a goal they had been seeking for so long had been realized.

"The symbolism of the nation's highest court recognizing the validity of gay relationships is just really important for the community because it shows we live in a society where we can create change with laws, not violence," said Geoffrey Kors, director of Equality California.

The high court's 6-3 decision overturned not only the Texas statute but apparently swept away laws in a dozen other states that ban oral and anal sex for everyone, or for homosexuals in particular.

While gays and lesbians celebrated, conservatives blasted the high court's ruling as a move that would destroy the country's morality.

Religious broadcaster Pat Robertson condemned the decision, saying it would effectively take the nation "down into a moral sewer."

"I don't know that any society which has legalized sodomy and has embraced sodomy has ever survived. And the United States won't be any different," Robertson said Thursday on The 700 Club on his Christian Broadcasting Network.

"Now . . . they will have gone one more step into taking us down into a moral sewer," he added.

The case involved two men who were jailed overnight and ordered to pay $200 fines in 1998 after police, responding to a false complaint of an armed intruder, entered their apartment and discovered them having sex in their bedroom.

"We never chose to be public figures or to take on the spotlight," said one of the men, John Lawrence. "We also never thought we could be arrested this way. We are glad this ruling not only lets us get on with our lives, but opens the door for all gay people to be treated equally."

Gay-rights groups had regarded the challenge to the law banning certain sex acts between same-sex couples as one of their most important legal

cases in decades. On Thursday, they said the high court's ruling would help protect gays and lesbians from discrimination in other areas as well.

"For years, whenever we have sought equality, we've been answered both in courts of law and in the court of public opinion with the claim that we are not entitled to equality because our love makes us criminals," said James Esseks, litigation director of the ACLU's Lesbian and Gay Rights Project. "That argument - which has been a serious block to progress - is now a dead letter."

Several hundred New Yorkers, some carrying signs reading "Free to be Gay in all 50 states," rallied Thursday in Manhattan's Greenwich Village.

"I'm ecstatic. I'm thrilled," said Charley Beal, 45. "It's the first time that the Supreme Court has ever positively voted in favour of gays."

The rally took place near the site of the Stonewall Riots of 1969, when patrons of a gay bar in the neighbourhood fought back against a police raid.

But across the country, conservative critics of the decision, spurred by Justice Antonin Scalia's blistering dissent, complained the ruling would lead legalizing other questionable sexual practices.

"The implications for other sexual crimes is unmistakable," said Scott Lively, director of the Pro Family Law Center in Sacramento, Calif., which filed a brief supporting the Texas law.

"If the state doesn't have even a legitimate interest in criminalizing sodomy . . . how can the state continue to regulate against group sexual encounters, sadomasochism, sex between brothers and sisters, sex with animals and sex with corpses?"

Ruth Harlow, who argued the case before the Supreme Court as legal director of Lambda Legal, said the court was merely "catching up" with public opinion.

The Supreme Court was criticized by civil rights groups 17 years ago when it upheld Georgia's sodomy law. Georgians later repealed that law, and now, "82 per cent of Americans have already expressed the view that these kinds of laws are inappropriate," she said.

By SAHM ADRANGI
From Saturday's Globe and Mail

TORONTO — Kurt Wilts and David Powers travelled to Toronto from Minneapolis to stand side by side in what used to be an old nursery on the third floor of City Hall -- each wearing a tuxedo, each holding a gold ring in his hand.
"With this ring, I thee wed," Mr. Wilts said to Mr. Powers as he placed the ring on his partner's finger.

Turning to Mr. Wilts, Mr. Powers smiled and repeated, "With this ring, I thee wed."

With that, Mr. Wilts, 41, and Mr. Powers, 43, became one of 239 same-sex couples married in Toronto since June 10. Afterward, the couple were overwhelmed with emotion.

"I'm at a loss for words right now, but it's a very warm, content feeling knowing that we're married," Mr. Powers said. "Saying we're legally married is a lot different than just saying we're partners."

Pride Week is in full gear and to celebrate, City Hall will stay open an additional six hours today and tomorrow to accommodate gay couples planning to get married.

Officials expect a large influx of U.S. couples, adding to the 25 who have been wed so far. They say couples have flown in from lands as diverse as China, Australia, Israel and the Cayman Islands.

"The world sees Toronto as a city that embraces all people, regardless of language, religion or sexuality, and that's exactly what we are," said Brad Ross, a city spokesman.

"If the gay and lesbian communities want to come and celebrate their lives here, we're more than happy to welcome them."

City Hall's move is part of a broader campaign to attract gay tourists from the United States, partly to mitigate the SARS-related downturn in tourism. Even with the legalization of gay marriages, the Gay Pride Parade's main hotel sponsor, the Delta Chelsea on Gerrard Street West, says it expects two-thirds of its 1,500 rooms to be filled this weekend.

The 341-room Best Western Primrose Hotel on Carlton Street is 80-per-cent booked. In other years, it would have been sold out long in advance.

But for many U.S. couples, even severe acute respiratory syndrome hasn't been able to keep them away.

Take Jason Rawls and Henry Pabian, for instance. Five years ago, Mr. Rawls lived in an Amish community in the American Midwest. Mr. Pabian was an unmarried 46-year-old living in Canton, Ohio.

This weekend, they'll be on a float in the Gay Pride Parade.

Walking out of their wedding ceremony yesterday with a dozen friends from Ohio, Mr. Rawls and Mr. Pabian said they have never been happier.

"We never thought this day would come. We're lucky we're living in these times instead of 40 or 50 years ago, when people couldn't be themselves -- when they had to live a lie or be in jail," said Mr. Pabian, 51.

Neither Mr. Pabian nor Mr. Rawls knows yet how U.S. officials will handle Canadian-granted same-sex marriage licences. But they're certain that Canada's decision to legalize gay marriages will give a major boost to U.S. activists.

"The court ruling says a lot about Canada," said Mr. Rawls, 37. "They're a whole generation ahead of the U.S. But we'll get there, too."

The Pride Parade will take place on Sunday at 2 p.m. It begins at the Bloor and Church Street intersection, travelling along Bloor Street to Yonge Street, then south on Yonge Street before reaching Dundas Street. There, it will continue east, ending at Church Street.

4651. JJ exclusive Gay young people getting own prom

Michael Kiefer
The Arizona Republic
Jun. 28, 2003 12:00 AM

The Valley One in Ten youth meeting looked like any other teen support group.

There were 27 of them, GLBTQs for gay, lesbian, bisexual, transgender and "questioning," although they prefer to call themselves "queer," appropriating a derogatory term from an earlier generation.

They were planning the first-ever gay prom in the Valley to be held tonight at a central Phoenix church. It's the prom they never went to in high school. That prom scared them, and a mere mention brought up queasy memories.

"I wanted to go with a male, but didn't feel strong enough," said Sean Gentile, 19, of Phoenix, a student at Phoenix College.

Tonight's event was planned to give him and other young gays a place to feel comfortable.

"This will be no different from any high school prom other than it will be an opportunity for gay youth to go with a date or the people they want to be with and have a good time," said Babe Caylor, a counselor with One in Ten. "It will probably be a first-time experience for a lot of the young people in a date-centered event."

A 2001 survey by the Gay Lesbian Straight Education Network, a national organization of educators, showed that fewer than half of GLBTQ youths feel comfortable attending a school dance or prom; only half felt comfortable even discussing gay or lesbian topics at school.

"As a therapist who works with adolescent and adult gay clients, I think it's one of the healthiest things that this community could offer," said Joe Amico, a Phoenix counselor. "It does give them that chance to just be who they are and not worry about the other kids giving them problems or the schools making it an issue."

Holding the event away from school sidesteps those potential disputes.

"My first inclination is that it would be a good thing," said Wade McLean, president of the Arizona State Board of Education, "because it's supervised, only understanding people would be allowed access, and those that feel that they would want to take ad hoc action would be excluded from the activity. Therefore it's safe."

The event is sponsored by Valley One in Ten, a 10-year-old support group funded mostly by community donations. It takes its name from an estimate that one in 10 people is gay, and there are meetings three nights a week for teens ages 14 to 17 and young adults 18 to 22 at locations in Scottsdale and Phoenix.

"We are a safe haven for youth. We are skilled in GLBTQ, but we're there for all youth," said Caylor, 47, who has volunteered her time for nine years. She's diminutive, but it's clear that she can be as big as she needs to be to back up her words.

Caylor has two children of her own, but she speaks maternally of all her charges.

"It's really hard for them to be out there in this world," she said. "We have everything that we deal with from homelessness to drug abuse. We've got both boys and girls who are out there on the street, and we're trying to get them off the street. And this is why we provide this space so they know that they don't have to be out there."

Gay proms have been held in other major U.S. cities for many years, and the youth and staffers at One in Ten had long thought about staging one in Phoenix but felt the town wasn't ready. Nor did they have a place to hold it.

Then the pastor of a central Phoenix evangelical church offered his parish hall. Volunteers rounded up caterers, photographers, hairstylists and DJs willing to donate time and services. They gathered enough donations so that the program participants could attend for free and enough money to pay for security and even tuxedo rentals for those who couldn't afford them.

"First of all, is anyone excited about prom?" Holly Woods, 24, one of the prom planners asked the youths at the planning meeting. Then she laid down the law: No one gets in unless they are on the guest list and have a ticket. The premises will be split between the minor and the adult partyers. No drinking. No making out in the parking lot. And although the participants may attend in drag or in costume, there are lines of taste they can't cross.

"If you got somethin' showin', you get the chance to go home and change," Woods said in her Texas accent.

Then came the dampening advice. "We're going to be under a microscope," said Dolores Levesque, 27, another group counselor. "We want to be on our best behavior."

Specifically, she warned that the event might be picketed by anti-gay protesters, and so One in Ten and the church planned a prayer service at the church a few days before the dance.

"If something bad is going on out there, we're going to bless it," Caylor said.

TORONTO, Ontario (Reuters) -- Toronto's wedding registry office will open this weekend for the first time in its history to issue marriage licenses to gay and lesbian couples who want to take advantage of Canada's recently changed marriage laws.

The city has already issued 225 marriage licenses for same-sex couples and expects hundreds more to tie the knot this weekend. It has received about 15 inquiries a day from around the world since June 10, when an Ontario court set aside the definition of marriage as a union between a man and a woman as unconstitutional.

About a million people were expected to visit Toronto for Gay Pride this week, which finishes with a parade Sunday.

Brad Ross, a spokesman with the city of Toronto, said 25 of the 225 gay marriage licenses issued so far have gone to U.S. couples and some couples have applied from as far as Europe, China, Cayman Islands, Israel and the West Indies.

Ross said the city will also keep its marriage chapel open over the weekend. It is making two meeting rooms available for those who wish to marry there if the chapel is occupied.

Heterosexual couples are also welcome to get licenses or tie the knot over the weekend, he said.

"It's a very convenient time for people. Everybody is in the same place (for Gay Pride Week)," said Rev. Brent Hawkes of the Metropolitan Community Church of Toronto, the majority of whose members are gay or lesbian.

He will perform six weddings this weekend and plans to marry his partner John on their 25th anniversary, in three years time.

A landmark ruling by an Ontario provincial court June 10 included homosexual unions into the definition of marriage.

The federal government signaled its acceptance of gay marriage a week later when it decided not to appeal the provincial court's decision.

"We are now full participants in Canadian society. Apartheid is gone," said Bruce Walker, a lawyer in Toronto who plans to marry his partner of 26 years in the next six months. "It has been a 26-year struggle."

South of the border, the U.S. Supreme Court earlier this week struck down a Texas law banning sodomy between same-sex couples, in effect ending all anti-sodomy laws in the 13 states where they still exist.

But gay marriages are not allowed in the United States. Vermont allows gay civil unions but not full marriage.

"I am amazed to live in such a beautiful country," Walker said of Canada. "It is beyond my wildest imagination that it happened so quickly."

4653. JJ exclusive GAY PRIDE MARCH IN PARIS

Thousands of homosexuals, bisexuals and transexuals have taken to the streets of Paris for the annual Gay Pride march.

And for the first time, they were joined by a representative of President Jacques Chirac's conservative party.

The marchers, clad in skimpy leather outfits, wild feather head-dresses and in some cases little at all, were led by the city's gay Socialist mayor, Bertrand Delanoe, and a host of leftist politicians.

Police estimated the crowd at 500,000 people. The lesbian, gay, trans and bi association Inter-LGBT put the number at over 700,000.

For the first time in the march's 13-year history, an official representative of France's leading conservative party took part.

Jean-Luc Romero, the gay national secretary of Chirac's UMP party, joined Delanoe at the front.

"I have been a militant for gay rights for a long time, so it was natural that I be the first person to represent the UMP at this march," Romero told France's LCI television.

But the UMP has been far from united in its support, with one member criticising Delanoe for taking part.

Francoise de Panafieu, a local district mayor who once considered running for Delanoe's job herself, said in a newspaper interview it was "undignified" for the mayor of Paris to march in the parade.

Delanoe, who has taken part in the march since before his election as mayor in 2001, has not made an issue of his sexuality and it rarely merits a mention in France.

4654. JJ exclusive Internet sperm bank for lesbians

The world's first sperm donor service designed to help lesbians become parents has been launched in the UK.
Man Not Included will match up lesbian couples with sperm donors through the internet.

The team behind the service will meet both donors and recipients for vetting purposes, but the two parties will not meet.

This is a service that is wanted and needed by the lesbian community

John Gonzales, mannotincluded.com
The sperm donation will be made through one of a network of established clinics and then despatched to the recipients for them to carry out "home insemination".

Demand

John Gonzales, who is setting up the service, said he expected some criticism from people who did not approve of the idea of helping lesbians become parents.

But he said: "If a child is going to be loved and cared for, to me it doesn't matter if it is two women or a man and a woman bringing it up.

"It takes a great deal of courage and thought for women to decide to do this and so the child will be very wanted."

He said many existing fertility clinics and services were sometimes reluctant to deal with same-sex couples.

"This is a service that is wanted and needed by the lesbian community," he said.

Many lesbians desperate for children resorted to advertising or asking friends to find a sperm donor, he said.

However this did not preserve anonymity and could lead to complications for both sides in the future.

Registration on the site starts at £80 and it should cost a couple £480 to conceive a child through the service.

Couples would be able to state preferred physical characteristics of donors.

Sperm donors would be paid expenses only, in the region of up to £60 per donation.

Safeguards are also planned to ensure a single donor could not father too many children.

Long-term couples

Mr Gonzales said the service was designed primarily to help lesbian couples in long-term relationships.

But if it was approached by a single lesbian or a heterosexual couple, it would consider each case individually.

The site at www.mannotincluded.com went live last weekend and will begin working fully on 9 July.

The team behind the project is hoping if the idea takes off in the UK, it could be extended to other parts of the world.

But pro-life supporters have criticised the service. Josephine Quintavalle, Director of Comment on Reproductive Ethics, said: "The whole idea must be vigorously resisted and men must see this initiative for what it is yet another attack on their role in society.

"The male must not be reduced to a vial of anonymous sperm, and the rights of children to enjoy real fathers must be protected."

4655. JJ exclusive Gay-rights ruling good for all

Newsgroup: rec.radio.amateur.misc

Commentary by Dan Meisler

I've heard one estimate that 10 percent the population is homosexual. Another study says the number is closer to 1 percent. That would mean between about 29 million and 2.9 million Americans are gay.

Whatever the exact number, they all should celebrate this week's Supreme Court ruling that struck down a Texas law that prohibited consenting partners from engaging in gay sex -- even in the privacy of their own home. In fact, all Americans should celebrate.

There are many ways to see this ruling. Some call it a victory for privacy rights. Others say it will inevitably lead to the legalization of gay marriages and, thus, the destruction of the "traditional" family.

To me, the court preserved the proper role of government and allowed everybody in America to continue to enjoy the foundational rights of liberty and the pursuit of happiness.

Why anyone would try to dictate what goes on in someone else's bedroom is beyond me. I don't want to know what happens in my friends' private lives, whether they are gay or straight. It's none of my business, just as what goes on behind my closed doors is none of my friends' business.

And it stretches logic beyond the breaking point to say that somehow it should be the government's business.

Some opponents of gay rights say homosexuality is a perversion and should not be condoned by the government. If it is granted government approval, they say, it will lead to a permissive society in which sexual acts such as pedophilia and incest are allowable.

The difference is that there is no victim in the supposed crime of consensual homosexual sex.

It's entirely appropriate for the government to try to protect people from sexual abuse and rape. But not to protect gay people from themselves.

I find it ironic that many of the people trying to limit the rights of gays are from the political camp that can be labeled "conservative" -- the same camp that lobbies against all forms of regulation on business interests and tirelessly tries to limit the size and scope of the

government.

But they want the government to be able to police our bedrooms? It's just not consistent.

The argument that legal gay marriages will erode the sanctity of "traditional" unions between men and women also puzzles me. Why would it have any bearing on my relationship with my wife?

The court's ruling is a victory for the concept of "live and let live," and thus should be cheered by all Americans. As long as nobody is getting hurt or victimized, people should be able to do what they want in the privacy of their own homes.

June 28, 2003 -- Seven same-sex couples began fighting yesterday for the right to get married in New Jersey — one day after the U.S. Supreme Court stamped out a Texas law that made gay sex a crime.
In the packed Mercer County Courthouse in Trenton, the attorney for the seven gay couples argued for two hours that the state's prohibition of same-sex marriages leaves them without the basic rights afforded to married couples.

"Marriage is just as important to same-sex couples," said the lawyer, David S. Buckel.

"The government should not interfere with anyone who wants to marry."

The seven couples are represented by Lambda Legal Defense & Education Fund — the same firm that successfully fought the Texas "Homosexual Conduct" law that criminalized oral and anal sex by consenting gay couples.

New Jersey Superior Court Judge Linda Feinberg asked Lambda to file briefs on its argument that same-sex marriages are the same as traditional ones.

>
> No, Eric has it rght. Rules and regulations carry the force of law.

Then they are laws. If it looks like a duck, swims like a duck, quacks like a
duck....

> None has been
>considered and passed into public law, rather a single law confering onto those
>rules and regulations the force of law.

Well, I checked with Webster:

law -- 1. all the rules of conduct established by the authority or custom of a
nation, etc. 2. any one of such rules. 3. obedience to such rules. 4. the study
of such rules..... ---"lay down the law" 1. to give orders authoritatively....

I also looked through a few online law dictionaries:

http://www.duhaime.org/dictionary/dict-l.htm#L
http://dictionary.law.com/definition2.asp?selected=1111&bold=||||
http://dictionary.lp.findlaw.com/scripts/results.pl?co=dictionary.lp.findlaw.com&topic=7e/
7e837b5d2a954e82f31227c53fd80b3b
http://august1.com/pubs/dict/l.htm

So they all say pretty much the same thing -- if it's enforcable, it's a law.
Maybe you can find something that says something different?

It has been reported (somewhere) that the ruling on the ban of
sodomy being struck down, so shook up the full fledged bigot
Strom Thurmond that it down right killed him. It was said that
"God called him home to save him the mental anguish of this
ruling". His last words were said to be, My God, My God, why
has thou forsaken me, and passed into delirium yelling, marriage
is next, marriage is next, and dropped dead.

.....
And the last anybody heard is that Congressman Barney Frank, D. Mass. was
headed for Canada so he could marry his twenty-something live-in boy toy.
Barney wants to be first in line now that fudge packing is legal in Canada.

The idea that rules and regulations are not laws is a fallacy that is coddled by anti-government malcontents. Their battle-cry is that the Constitution doesn't provide for the making of 'rules' or 'regulations', only 'laws', a semanitic spin based on the definition of 'law'. I really don't think that the authors of the Constitution intended the document to be legally interpreted by dummies, which is why they created the Judicial branch of government. And that branch has NEVER -- not ONCE in over 200 YEARS -- excluded from the definition of 'law' any rule, regulation, code, ordinance, or any other binding authority simply because it didn't include the word 'law' in the title. So no matter how -you- choose to define the word, the meaning is very clear to the rest of us, as well as to the US Government. But if you have a different definition, please post it.

A hand-held "Dremel" tool results in too much deep cutting
of the substrate, with the result that the boards starts to
bend out of shape when you solder components to it.

The ordinary hardware shops have Chinese "Dremels",
complete with speed control, for £19 plus the complete range of tools.

Here's how I spend my Saturday afternoons here in Ohio.

You can email me for more details and to see if you've got what it takes hon. rfcommsys@aol.com

Six Man Football Basics

The idea behind the Columbus Sixman Gay Football League is to allow recreational full-pads/contact leagues to compete on a local level.

Unlike traditional 11-man, the game of Sixman can be played with 10-15 players on each team. You can field an entire league with the same number of people it takes to field only two 11-man teams. Of course with a different style of play comes different rules.

In Sixman EVERYONE IS ELIGIBLE TO CATCH A PASS!!!

This makes things extremely fast paced on the field. The game is more wide open, faster and leads to huge scores.

Another big difference in Sixman is that a field goal is worth four points and an extra point is worth two. Running or throwing the ball in for an extra point is worth one. The field is 80 x 40 (instead of 100 x 50), offenses begin 1st and 15, the QB can only run from the line of scrimmage if he is pitched the ball after the snap from center.

Not familiar with Sixman football? Sixman started in Nebraska in 1933 and has been around ever since. It is still played by small high schools through-out Texas and the Midwest.

Rules

The Field
The playing surface is 40 yards wide and 80 yards long with ten-yard end zones.

The Equipment
The official football is the same size and weight as the NCAA ball.

The Players and Formations
Six players on the field; 10-man roster minimum, 20 max.

Three (3) offensive players must line up on the line of scrimmage.

Quarterback can only run from the line of scrimmage if he is pitched the ball
after the snap from center.

Timing
Four 10-minute quarters with a 15-minute halftime.

Each team is allowed three (3) timeouts per half.

Movement of the Ball and Scoring
Four (4) downs are allowed to advance the ball fifteen (15) yards for a first down, or to score.
Six (6) points for a touchdown.
One (1) point for a conversion by running or passing the ball into the end zone.
Two (2) for kicking after a touchdown.
Four points are awarded for a field goal.
Two (2) points for a safety.

Kicking
Field goal are worth four (4) points; successful try, 2 points if successful through place or drop kick and 1 point if successful by pass or run.

Kickoffs are from the 30 yard line. Kickers may use a one-inch tee.

On fourth down, a team may go for a first down, touchdown, field goal, or punt.

Passing
Passing rules in Sixman Football are the same as NCAA Football in which receivers must have one foot inbound.

Overtime Rules
The CSFA will follow NCAA overtime rules.

FREQUENTLY ASKED QUESTIONS
What is Sixman Football?
Sixman football ,simply put, is football with six people instead of eleven. It was originated for small high schools in 1933 and it played today by small schools in Texas and through-out the Midwest. The reason we decided to play sixman is that you can field a whole league in one city and it only takes 15-20 people to have a strong team. Unlike 11-man football you do not need 40+ to get a team started and trying to have a 10 team league in one place would be near impossible, not to mention expensive. Other good reasons to play sixman include the ability for everyone to receive a pass, less injuries due to size and speed of the game. Bottom line, its more fun

Who can play in the CSGFA?
Anyone (over the age of 18). It is an adult recreational league for gay men, dedicated to good sportsmanship and playing sixman football. Everyone will be given the chance to participate.
What kind of league is it?
Recreational. Its not Pro or even Semi-Pro just fun. Its for guys like you and me that love the action of "REAL" football but don't have the time or money to travel all over the country to play.

Dayton--Comedian Bernie Lubbers, the headline entertainer for the June 21 Dayton Pride Dinner and Expo, raises his glass to the assembled crowd.

Around 300 people turned out for the dinner at the Dayton Convention Center. A count was not available for the free expo that preceded the dinner.

“God, the comedian was really, really good,” said Dayton Lesbian and Gay Center treasurer John Zimmerman.

“Their show pretty much went off without a hitch,” he said of the evening.

“I thought the event was exciting and filled with a lot of enthusiasm,” said Rev. Raeanna Biddle of Eternal Joy Metropolitan Community Church, who attended all the weekend’s festivities.

Her praise for the Community Family Pride Picnic in Carillon Park the following day was as effusive.

“The weather was great,” she noted. “There was a beautiful blue sky and a light breeze blowing, and the location was fantastic.”

Cincinnati--Mt. Auburn Presbyterian Church will not allow the ouster of their minister, Rev. Stephen Van Kuiken, to deter them from their policies of full inclusion for LGBT people, church members said in the week following his defrocking.

The presbytery of Cincinnati rescinded Van Kuiken’s ordination on June 16 and separated him from the denomination for continuing to wed gay and lesbian couples. Presbyterian law allows ministers to perform “holy union” ceremonies for same-sex couples, but not to call them marriages.

Van Kuiken was reprimanded in April by an ecclesiastical court and ordered to stop performing same-sex weddings. The court did not, however, rule on the complaint that Van Kuiken ordained openly gay elders and deacons, lay leaders in the church. The Presbyterian denomination bars non-celibate gay men and lesbians from leadership positions.

Van Kuiken, within weeks of the court decision, performed a wedding for a lesbian couple.

Mt. Auburn’s June 22 service was performed by Rev. Duane Holm, director of the Metropolitan Area Religious Coalition of Cincinnati. He was the first in what will likely be a string of guest ministers until the presbytery selects an interim minister for the congregation.

Holm told the church to carry on its mission to “witness in love to the whole church to teach us to be more inclusive,” according to a report in the Cincinnati Enquirer.

After the services, the church’s session, or governing body, met to discuss a number of issues, including continuing financial support of Van Kuiken, who is married and has two children.

In April, the church passed a resolution stating that it would not recognize the removal of their pastor for carrying out church policies, which he was doing by performing same-sex weddings.

Whether the church will seek to keep Van Kuiken because of the resolution is unclear, although some members appear willing to risk the wrath of the presbytery to do so.

Generally, when a congregation leaves the denomination, the church property and operating funds stay with the denomination, which owns the

physical building. Conservatives in the church, however, have been increasingly willing in recent years to allow progressive congregations to keep their property in an attempt to get them to “peacefully separate” from the church, leaving the more conservative elements in control of more of the denomination.

The original complaint against Rev. Van Kuiken called for the minister and his church to accept Presbyterian doctrine or to remove themselves from the denomination.

Columbus--The ninth annual A Matter of Pride Conference drew 125 people to the Columbus Health Department on June 20.

The conference is geared toward substance abuse, mental health and social service providers and their clients, and is organized by Women’s Outreach for Women, the Buckeye Region Anti-Violence Organization and Stonewall Columbus, among other groups.

“We get a little bigger each year. I think we get a little better each year,” said WOW program director Amy Crawford, who was the conference coordinator.

Both Crawford and Gloria McCauley, executive director of BRAVO, pointed to the youth panel discussion at this year’s event as an indicator of the innovative approach the conference is taking.

“It was a youth panel, but not what we usually see in a youth panel,” said McCauley, noting that it was made up of children of LGBT parents, instead of focusing on LGBT youth. “It’s important that kids’ voices are heard too.”

She noted that her own daughter was on the panel, but, she chuckled, she was not allowed in the room.

“It was a great conference,” McCauley continued. “We all have a vested interest in our families, no matter what they look like, and that’s what this conference was about.”

Crawford echoed her sentiment.

“I think it was great,” she said. “The conference evaluations were really positive. People seemed to enjoy it.”

In addition to the youth panel, the keynote address was presented by Dr. Charlotte Patterson, a professor of psychology at the University of Virginia. Her primary field of research is child development in connection with family, school and peer environments, and she is currently working on a study of gender development in children of gay and straight parents.

Other presenters included Rebecca Gurney, the domestic violence coordinator for BRAVO, attorney Dottie Pointer discussing family law and LGBT families, and Robin Wisniewski, a school psychologist in the

Columbus suburb of Upper Arlington.

Some of the other sponsors were the Ohio State University GLBT Student Services Office, the Ohio Psychological Association, the Capital University College of Social Work and the Franklin County Alcohol, Drug and Mental Health Board.

by Eric Resnick

Cleveland Heights--Petitions to put a proposed domestic partner registry on the November 11 ballot were presented to City Hall on June 23.

The petitions were filed by Heights Families for Equality, which has been collecting signatures and identifying supportive voters since March 11.

The proposal would allow unmarried couples over the age of 18, same-sex or opposite sex, to register their partnership with the city. It would be open to both residents and non-residents of Cleveland Heights.

If approved, the measure will be the first such registry in Ohio and the first in the United States created by voter initiative.

The city would maintain the registry for a fee paid by the couples.

Council Clerk Thomas Malone said June 24 that an informal count showed that HFE had submitted 426 petition forms containing 5,732 signatures.

Signatures of 3,570 Cleveland Heights voters are required to put the initiative on the ballot.

Malone said the petition forms would be sent to the Cuyahoga County Board of Elections to verify that each signature is that of a registered voter. They will provide an official count in about three to five days, he said.

According to the city’s charter, once the signatures are verified, the ordinance moves to city council. They can either pass it without amendment, or send it to the voters.

Linda Coulter and her partner Dana Bjorklund gathered signatures because they say it is not enough for them to have wills and powers of attorney recognizing their relationship.

“This is something that recognizes us as a couple, not just as someone qualified to sign a document,” Coulter said.

Bjorklund believes the registry, though not legally binding, could be used to further equality for same-sex couples.

“[Coulter] used to work for Nestle in Solon,” said Bjorklund, “and they told her they would love to give her partner benefits, but they had no

way to prove that we are family.”

“This does,” Bjorklund added, “if a company needs that proof.”

Heights Families for Equality was originally formed last year to block attempts to repeal domestic partner benefits that city council had given to municipal employees.

That measure made Cleveland Heights the only city in Ohio to provide benefits to the same-sex domestic partners of city workers. A group trying to repeal it failed to get enough signatures to put it on the ballot.

Don Rodrigues called the new initiative “a significant symbolic marker toward equality.”

“Most of the time, our community is defending against voter actions,” said Rodrigues, who was sent by the National Gay and Lesbian Task Force to work with HFE. “This is one of the first pro-active GLBT ballot measures in the country and the first on this issue.”

“The reason why the tide has turned is that we have learned to talk to voters one-on-one and identify that supportive base,” Rodrigues added.

Katie Alex collected more than 500 signatures for the registry. She said that until this initiative, she had been “the poster child for political apathy.”

Alex said that voters who are indifferent at first become supportive once they hear why the registry is important.

But some voters do oppose the measure.

“There are still voters who protest,” said HFE spokesperson David Caldwell. “It’s the usual crowd that thinks gays and lesbians should not have any family rights, plus a few who are genuinely skeptical of all government, and a few with theological objections.”

“But we have collected signatures of over half the number required to pass this already, and if we do the work until election day, we will win,” said Caldwell.

“I am really inspired that we are creating a new way to do GLBT politics,” said Caldwell, “going right to the voters where the power lies.”

Caldwell identifies as heterosexual and is married.

“That’s a strategic advantage,” said Caldwell, “It allows me to say
things others cannot say, while the gays and lesbians talk about their lives. We’re a great team.”

So far, there has been little organized opposition to the initiative.

Those who opposed last year’s domestic partner benefits also oppose the registry, but with the exception of primary election day May 6, have not been publicly visible.

That group, now called Cleveland Heights Families First Initiative, put up a web site and gave out flyers at the polls on primary election day. But they were outnumbered polls by HFE volunteers collecting signatures.

CHFFI spokesperson Tracie Moore did not return calls and e‑mails for comment.

At the June 23 Cleveland Heights city council meeting, vocal benefits opponent James Redhed said he was unaware of the initiative until that day, and also declined comment.

Council member Jimmie Hicks opposed last year’s benefits and has sent out a flyer asking for donations to oppose the registry. He was out of town this week.

Other council members, while supporting the idea of a partner registry, express some concern with the timing of the initiative.

“The timing is not good,” said council member Bonita Caplan, “and it will cause political chaos that is not good for the city.”

Caplan believes it would be better for the initiative to be on the ballot in the spring, rather than a regular local election.

She said three supporters of last year’s benefits ordinance, Phyllis Evans, Dennis Wilcox and Vice Mayor Kenneth Montlack, are up for re-election and could be vulnerable if opponents make the registry a polarizing issue.

“The majority are supportive [of the registry],” said Caplan, who also supported the benefits ordinance, “so urging a more conservative approach is a political statement, not an ideological statement.”

Mayor Ed Kelley does not agree that Evans, Montlack, and Wilcox are vulnerable because of the initiative, as much as he is concerned how voters will react to so many issues on the ballot.

Kelley said Cleveland Heights voters will probably be faced with a school levy, a tax for a proposed Cleveland convention center, and an initiative he believes Gov. Robert Taft will propose in addition to electing local candidates.

“The registry has a chance on its own,” said Kelley, “but diluted, I don’t know. Voters will rank its importance with all those other issues, and it is hard to tell what they will pay attention to or what kind of voters will come out.”

HFE doesn’t think any of that matters.

“This isn’t a campaign,” said Caldwell. “We have identified the voters
and will get them to the polls regardless of what else is happening

The15th Cleveland Pride festival fills a park surrounded by Lake Erie
and rainbow flags

by Eric Resnick

Cleveland--The largest lesbian, gay, bisexual and transgender Pride
festival in the city’s history was held in the middle of a triangle of
prominent rainbow flags on June 21.

The flags flew over Cleveland City Hall, atop the Freedom Schooner
Amistad, a reproduction of a slave ship which is visiting the city, and
the William G. Mather lake freighter museum, permanently docked at the
East Ninth Street Pier.

The festival, in Voinovich Park at the end of the pier, came after a
rally aboard the Mather and a parade from Cleveland State University.
The parade followed a lavender stripe painted by the city along Euclid
Ave. and East Ninth St.

About 7,500 people attended the festival, said Pride Coordinator Brynna
Fish. She based this on the number of wrist bands given at the gate to
people entering. Many overpaid the $5 suggested donation.

At the rally, Pride president Brian Thornton pointed to Lake Erie from
the deck of the Mather.

“Across that lake, two people can marry regardless of their sexual
orientation,” he said, referring to a June 10 Ontario court ruling
changing the definition of marriage from “one man and one woman”
to “two people.”

“If Canada can get it right, how much farther behind can we be?” said
Thornton in one of many references to the Canadian decision. Among
these was a man quietly singing “O, Canada” in the audience while the
North Coast Men’s Chorus sang “The Star Spangled Banner.”

Elected officials at the event included State Sen. Eric Fingerhut, who
is a candidate for U.S. Senate; State Reps. Dale Miller of west
Cleveland and Michael Skindell of Lakewood; Cuyahoga County Common
Pleas Judge Bridget McCafferty and Lakewood City Council members Denis
Dunn and Thomas George, who is also a candidate for mayor. Nickie
Antonio represented Lakewood Mayor Madeline Cain, and Cleveland City
Council member Jay Westbrook represented all of council and Mayor Jane
Campbell.

Also visible was openly gay Lakewood City Council candidate John Farina.

Ohio American Civil Liberties Union director Chris Link urged LGBTs to run for public office.

Westbrook asked those at the rally to take a moment to honor the late Dr. John Carey, who died after falling from the Mather while attending a party. Carey was a gay physician who was a pioneer in the diagnosis and treatment of AIDS.

Parade grand marshals were Robert Burns of the AIDS Taskforce of Greater Cleveland, master bookseller Richard Gildenmeister, Ray Graham of Cleveland, England, Katie Alex of Heights Families for Equality, Courtney Hill of the Lesbian and Gay Center Youth program, Judy Maruzan of the ACLU, and Joe Santiago, who was the first openly gay candidate to run for Cleveland City Council.

Grand marshals rode the parade in a silver Buck Rogers rocket taken from a ride at the old Euclid Beach amusement park. Laugh Out Proud comedy contest winner Roxane Larimore rode in the Batmobile from the original movie.

The grand marshals selected the winners of the float contest. The AIDS Taskforce of Cleveland won best float for “Mardi Gras for Another Day,” and Liberation United Church of Christ was named the most creative for a two-tiered cake celebrating their anniversary. Anthony Salatino’s pink flamingo was the funniest float.

The number of marchers in the parade was 698, making it one of the smaller parades in recent years.

Fish said putting the rally at the end of the parade instead of the beginning might be a reason for the drop.

“As the festival grows,” said Fish, “there is a certain energy or pull, and people are just eager to get here.”

Cleveland Pride Vice President Sue Doerfer said recent events helped the festival grow.

“With all that has happened this week in Lakewood, and at Cleveland City Hall, and with Heights Families for Equality, it just makes people more excited,” said Doerfer.

Doerfer said that the festival was different this year because of the “little touches.”

“There were more vendors and activities,” said Doerfer, “and the clown making balloons for the kids. It just feels more like a festival.”

“I would like to see the city as a whole, not just the elected officials, embrace Pride like they do the St. Patrick’s Day events,” said Fish. “Then straight people would want to celebrate with us, and watch the parade.”

Entertainment was presented on three stages and a dance floor.

The Youth Zone stage featured a Rainbow Idol contest patterned after
the TV show American Idol.

The “Second Stage” featured top local talent including the Sissy Show,
the Rainbow Wranglers, the North Coast Men’s Chorus, and Da Real T.

Main Stage performers included an ensemble of high school musicians
from Cleveland Heights called Rude Staff Checkers, and Laugh Out Proud
winner Larimore.

Musicians included political activist and folk singer Amrit Kohli, who
chose Cleveland as his only Pride appearance in 2003.

Kohli mixes politics with his music and makes no apologies for it.

“I’m for impeaching Bush and ending war,” said Kohli, “and I know
that
either I was going to help my career and be quiet about my politics or
I was going to risk being slowed down for some time.”

The Pride festival crowd appreciated Kohli’s choice to be out on the
political stage as well as the musical one.

Singer and songwriter Ellis drove to Cleveland from Denver to perform
at Pride for free.

“I just have a great time when I perform here,” said Ellis, who has
also been on stage at Cleveland’s Harmony Bar and Grill, “and Pride is
a wonderful, grassroots event.”

Ellis will also perform at Pride festivals in Fargo, North Dakota,
Duluth, Minnesota, and her home town Minneapolis, as well as the
Michigan Womyn’s Music Festival.

Sophie B. Hawkins performed her hit “Damn, I Wish I Was Your Lover” and
other numbers. She will also perform at New Jersey Pride this year.

Hawkins said Pride festivals are an audience she never had while under
contract with Sony.

“They thought either you are a recording artist or a performer, but
never both,” said Hawkins, whose new album will debut in January.

Hawkins, whose stage show has plenty of sexual energy, likes Pride
festivals.

“There’s so much light in people living the truth,” said Hawkins,
“and
taking responsibility for who they are.”

Hawkins describes herself as “omnisexual.”

“It’s not just about gender,” said Hawkins, “It is about mind and
soul.
I’m not limited. I have had hot relationships with both men and women,
and I expect that as they grow they will change and I will change and

connect with new minds and souls.”

Hawkins called her sexuality a “huge problem” in the corporate recording world, adding, “I have to be who I am.”

Martha Wash, the iconic singer of the classic gay anthem “It’s Raining Men” lit up the main stage, as the crowd nearly had to be held back.

Wash said she performs at many Pride festivals and always enjoys them. In addition to Cleveland, Wash will perform at Pride festivals in Seattle, Atlanta, and Rehoboth Beach this year.

Wash doesn’t know when she became such an object of adoration of gay men, but she is flattered by it.

“Maybe it goes back to performing with Sylvester,” she said, referring to the days when she and Izora Rhodes backed up the gay disco singer.

Later, Wash and Rhodes formed the band Two Tons o’ Fun, which became the Weather Girls in the 1980s.

Clevelander Brian Miller, who attended the festival with his wife Jean and their four-year-old daughter, took issue with a television reporter asking another presumably heterosexual couple why they would come to a Pride event.

“I would have said, ‘Because I am not isolated from the LGBT community, so my attraction to it is to be less separated,’ said Miller.

“A great experience was to be had by anyone who went there,” Miller concluded.

Actually, the Canadian federal government is drafting new
leglislation (in favour of same sex marriages.) They were
forced to do something as Ontario had already started
performing same sex marriages following a two year wait
after the Ontario court ruling. While the Ontario court
decision affected the law in only Ontario, the Federal
leglislation will be binding in all of Canada.

> Obviously, this ruling pertains to the civil marriage license issued by
> the province and will not affect what marriages religious institutions
> choose to sanction.

All legal marriages first require a license from the state.

Their trying to raise the sales tax here, also
just raised the vehicle registration fee 3X. It's
going to cost a couple of hundred dollars just
to reg. my bike, I'm going to hate to see what
it's going to cost for trucks.

Try this: You write a pro-gay letter to any newspaper and have someone
else write an anti-gay letter to that same newspaper, then see which one
gets published.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, K2PF, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, WA4PGM, WA5PAE, K8BL, K8YSE, KC8FS, W8UVZ, K0HB, 9A6AA, DL/VE3ZIK & Contesting.info, DL1ASA, DL1EK/DL7VOA & DX Newsletter, EA5YN, F5NLY, F5NQL & UFT, FJ5DX & La Gazette du DX, G3SWH, HK6DOS, HL1VAU, I1JQJ & IK1ADH - 425 DX News, IK8VRH, JI3DST, JI6KVR & JA-IOTA Islands News, JJ1BDX/3, OE1ZKC, SP5UAF, VA3RJ & ICPO, VK8NSB and Radio Club Venezolano for the following DX information.

EDITOR'S NOTE: WOW!!! It was a real challenge putting this one together. I started Saturday about 5:00 PM and wrote this between operating Field Day (also fighting off spiders and bugs), and driving back and forth from the Field Day site (Headed home about 3:15 AM. Not much sleep... Must have been the bugs!). I woke up real early Sunday morning. Finished writing around 11:15 AM so the official proof-reader (my wife) can look at it while I head back out to Field Day. I came home around 3:30 PM, and corrected and added more to the bulletin... I do not recommend this to anyone.... Hope you had fun at Field Day!!! 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 22nd/June, through Sunday, 29th/June there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, A2, A4, A6, A7, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HM, HP, HR, HS, HV, I, IS, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, SU, SV, SV5, SV9, T2, T5, T7, T9, TA, TF, TG, TI, TK, TL, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5,

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. Operators Franz/DJ9ZB, Elmo/EA5BYP, Victor/EA5FO and Vicente/EA5YN, will be active from Annobon Island in October. The station callsign is absolutely as sured, and it will be announced before the operation starts with other complete details (bands, modes, dates, etc). QSL via DJ9ZB.

4W, TIMOR LESTE. Well known DXer Kan Mizoguchi, JA1BK, sent out a press release (via WA2MOE) explaining why "East Timor" should be removed from the ARRL DXCC List and "Timor Leste" should be added as a new DXCC entity. Kan explains:
"Explanation of our petition to remove the former 4W and to add Timor Leste: The Eastern part of the island Timor was originally a Portuguese colony but was invaded by Indonesia in 1975.
Following the resignation of the Indonesian dictator General Suharto, Portugal and Indonesia entered into a treaty allowing an independence referendum to be held among the area's residents, and the United Nations began a short period of temporary administration and peacekeeping.
That area was called "East Timor", and the UN agency charged with assisting the people to independence was called UNTAET, standing for United Nations Transitional Administration of East Timor. It should be remembered that UNTAET was not a country but was a UN agency only.
The International Telecommunication Union (ITU) allocated to UNTAET a bloc of call prefixes 4WA-4WZ , and under the provisions of DXCC2000 rules, ARRL made "East Timor" a DXCC entity.
There is a problem with this. At the time the entity was established there was no state or country, just a land area which shortly would have a referendum for independence according to the treaty. DXCC2000 states that if '...provisional assignments not be ratified later by the full ITU, the Entity will be removed from the DXCC List '.
The referendum was held on May 20, 2002. Independence won, and the provisional allocation of 4WA-4WZ was returned to ITU by UNTAET. The allocation was never ratified. According to DXCC2000, UNTAET should have been removed immediately from the entities list. It was not.
The new political state is known as the Democratic Republic of Timor Leste and has been admitted to the United Nations. The ITU has now reallocated the same bloc of prefixes to Timor Leste and the government of that country has established a procedure whereby amateur radio licenses can be and are issued.
The conclusion is obvious: Since the ARRL added UNTAET/4W to the DXCC list it had to be removed when the provisional call bloc was cancelled effective May 20, 2002 because UNTAET disappeared and the United Nations returned this provisional allocation to ITU. The allocation to UNTAET was never ratified so removal from the DXCC list should have been automatic according to the rules of DXCC2000.
On the other hand, the Democratic Republic of Timor Leste became a

United Nations member state on September 27, 2002 and is now eligible to be a new entity according to DXCC2000 criteria a).
ITU has reallocated 4WA-4WZ to the Democratic Republic of Timor Leste and actual amateur radio activities started after this reallocation."

9A, CROATIA. OPDX has been informed that Braco, OE1EMS/T94JJ, is active at the moment from Krk Island (EU-136), and he is using the callsign 9A/OE1EMS. He will activate some other Croatian Islands and will use the callsign 9A/OE1EMS/p. With this callsign you can expect activity only on 20 meters and maybe 40 meters. Please note he will be active in the IOTA contest from Krk Island. QSL via DJ2MX.

9H, MALTA. Thomas, DL1ASA, will be on holiday on Gozo Island (EU-023) from August 1-15th. His callsign will be 9H3TM. His activity will be on all HF bands on CW, SSB, RTTY and will participate in the WAE-CW Contest on the weekend of August 9-10th. He will enter the contest as a Single-OP in Low-Power. QSL is "OK" via the DARC Bureau. For more details, see his Web site at: http://www.dl1asa.de.vu

B4, CHINA. Michael, BD5RV, reports that the People's Republic of China Headquarters Station BY1PK (operated by the JiangSu DX Club) will be active in the IARU HF World Championship. They will use the callsign B4HQ. QSL via BA4RD: Ken Wang, P.O.BOX 538, Nanjing 210005, P.R. CHINA.

C6, BAHAMAS. Look for Jimmy, W6JKV, to be active as C6/W6JKV between now and July 7th. His activity over the past week has been on 6 meters at various times between 1000-1800z (usually looking for Europe). Watch around/between 50110-50125 kHz.

CONVENTION. Hans, K0HB, states, "Keep your calendars clear for October 18th! The Twin City DX Association of Minnesota is proud to present the W0DXCC 2003 Conference at the Holiday Inn, Route 35W in Bloomington, Minnesota! Top DX speakers, the W0 Buro, ARRL DX Advisory Committee, DXCC card checking, retailers and demos of the top radios plus lots more for a an exciting day of DX fun. It's near Mall of America for the family, and don't miss the Vikings play the Denver Broncos on October 19th!"
Visit the following Web page for more details at: http://www.TCDXA.org

DX INFO ON THE WEB. Dejan Menges, T94DJ, reports he is a Contest/DX Editor for the ARABiH. Please visit the ARABiH official Web page at: http://www.arabih.org

FO, FRENCH POLYNESIA (Also, a ZL IOTA and Austral Islands [FO/A]). Look for operators Barry/ZS1FJ/G4MFW/ZL1MFW, Phil/G3SWH and Deon/ZS1ZL, to activate the following islands during a DXpedition to French Polynesia in July:
* Tubuai Island (OC-152) in the Austral Islands, July 11-14th
ADDED NOTE: A short operation may also take place on Rurutu Island OC-050 in the Austral Islands.
* Mangareva Island (OC-063) in the Gambier Islands, July 15-22nd
* Tahiti Island (OC-046) in the Society Islands, July 23-24th
* Great Barrier Island (OC-201) in the New Zealand Island Group

around July 25-26th
The callsigns to be used are: FO/G4MFW on SSB and RTTY and FO/G3SWH on CW. QSL routes: FO/G4MFW via ZS1FJ and FO/G3SWH via G3SWH. Activity will be on all bands, including the WARC bands (even during the IARU Contest weekend while on Tubuai Island). The low bands 160, 80 and 40 meters will also be on the air. Modes are SSB, CW and RTTY. The preliminary frequencies are:
SSB - 28495, 24945, 21295, 18145, 14195, 7095 and 3795 kHz
CW - 28025, 24895, 21025, 18075, 14025, 10105, 7005, 3505 and 1830 kHz
RTTY - 28075, 24922, 21085, 18102 and 14075 kHz
Please note that small deviations might be needed, e.g. if the announced frequency is busy, not busy enough or filled with QRM. They will always work split, listening up 5 on SSB and up 1-2 on CW and RTTY. Strategically located pilot stations have been appointed to assist the expedition members in the efficient flow of traffic and information.
European Pilot: Don, G3XTT Pacific Pilot: Harry, KH6FKG
US Pilot: Don, W0DM African Pilot: ZS1AU
Expedition costs in the Pacific Region are extremely high and any donations from DX associations and individuals will be gratefully accepted and may be sent to G3SWH. Please do not send checks in any currency other than sterling or cash in currencies other than Euros and U.S. dollars. The expedition website will publish daily news, frequencies, operating conditions, pilot station activity, equipment status, E-mail addresses and QSL information. Web site is at: http://www.qsl.net/g4mfw

I5, ITALY (Castles and IOTA). Paul-Joel, F2YT, will be touring the Italian Province of Grossetto (I5) from August 8-31st. He will be using the callsign I/F2YT. Paul-Joel will be activating a lot of Italian castles which count for the Italian Castles Award. Ottavio, IK1PML, the well known QSL cards printer, will also go with him, at times. A short trip to Elba Island (IOTA EU-028, IIA LI-001) is also scheduled between August 15-31st, where Paul will sign IA5/F2YT. Watch the clusters for spots. Activity is planned on 7052 and 14252 kHz SSB, but by request, Paul can make a CW QSO on the same frequency. QSL via F2YT, either direct or via the bureau.

IOTA NEWS.....
AS-036. Operators Takeshi/JA3GJE and Hajime/JP3TKP will be active as homecall/6 from Iki Island (Iki-jima Gounuura-cho Iki-gun Nagasaki-ken) from 0700z, July 3rd to 0000z, July 7th. Their activity will be on 40/17/12/10 meters SSB. QSL via the Bureau to their home callsigns.

AS-080. Club members of Pyong-taek DX Club (Operators DS2GOO, 6K2CLF, 6K2CEO and 6K2CEW) will be active from Anmyon Island (KDN F26) between July 4-6th as D90HE/3 or with their private Homecall/3. QSL via Han, DS2GOO (P.O.Box 39, Pyongtaek, Kyonggi-do, 450-600, South Korea). Log search and pictures will be available at: http://myhome.naver.com/~dxer2han/2003/

AS-147. Takeshi/JI3DST will be active as JI3DST/8 from Okushiri Island (Okushiri-cho Okushiri-gun Hokkaidou) from 0700z, July 25th to

0000z, August 3rd. Activity will be on 40/17/15/12/10/6 meters
SSB. QSL via the BUREAU (BURO is best). Also, look for Takeshi
to be active in the IOTA contest.

EU-001. Jun, OE1ZKC, will be on the air from Kos Island, Dodecakese
Island, as SV5/OE1ZKC from July 16-23rd. QSL via home call.

EU-031
EU-144. Operators Ciro/I8ACB, Luigi/IK8OZZ, Antonio/IK8VRH, Maurizio/
IK8YTA, Gianni/IZ8CGS and Giuseppe/IZ8EBI will be active with
the callsign IR8DX and IR8DX/P from Campania Region Group
(EU-031) and Calabria/Basilicata Region Group (EU-144) between
July 1st and October 30th. QSL via IK8VRH or the ARI Bureau.

EU-050. Operators IZ8CGS, IK7YTT, IZ8CCW, IZ6FIR, IW8ROS and IK0ESW
will be active as IL7M from the Island of San Domino during
the IOTA Contest. QSL via IZ8CGS. For more details,
visit the Web page at: http://www.mdxc.org/il7m

EU-136. Bill, ON5JE, is expected to be active now through July 17th as
9A/ON5JE from Rab Island (IOCA CI-096). QSL via his home
callsign, direct or by the bureau.

SA-040. FALSE INFORMATION RECEIVED. OPDX received some false information
last week (for OPDX. 615). Operators Pablo/HK8RQS, Victor/HK8JEH
and Albaro/HK8HIX are NOT going to Morro Island, October 11-14th.
Also, Morro Island is actually SA-081, not SA-040.

LIGHTHOUSE ACTIVITY. Francis/F6HKS and Jean Claude/F6HDH will be operating
from the Contis Lighthouse, (FRA088, PB 060) for the International
Lighthouse/Lightship Weekend, August 16-17th. They will be operating on
CW and SSB from 40-10 meters, except the WARC bands. The other reference
indicators are: French Departments Loire Atlantique, 44 and Province
Brittany. QSL via their home callsign, include a SAE + sufficient
postage or via the French REF bureau.

P4, ARUBA. John, KK9A, will be active as P40A during the CQ World Wide
DX SSB Contest (October 25-26th) as a Single-Op/Single Band (20m) entry.
QSL via WD9DZV.

QSL INFO AND NEWS.....
Members of the Pina Colada Contest Club (KP2AA) and Federacion de
Radioaficionados de Cuba did a first-ever joint Cuban-U.S. Field Day
operation over the past weekend as CO0US. A special commemorative QSL
recognizing their common interest in emergency communications
preparedness, and international goodwill through Amateur Radio will
be available for SASE or SAE and other return postage. QSL via K7JA.
Operators were: CO2OJ, CO2II, CM2OY, CO2KL, plus CO2KK, CO2JA and
others; W1HIJ, K6PEQ, KF6SGV, N6PEQ, K7JA, and KL7MF.

OPDX has been informed that Hiroo, JA2EZD (aka XW2A, XY2A and XY2M),
has set up (changed) his postal box because of thieves. He even went as
far as to set a trap to see if his mail was being stolen (He put six

air mail letters in the box on a Friday and on Monday they were gone!). He will use the new P.O. Box for receiving QSL cards (it is a Mail Service Office). The new POB is: P.O.BOX 10.003 Vientiane, Laos.

Joe, JJ1BDX/3 informs OPDX that QSL cards for Manabu, UK/JI2MED, should preferably be sent to his home callsign JI2MED via JARL bureau only. Manabu also accepts direct QSLs to the following address, only for those who promptly need his card: Manabu SHIMOYASHIRO, 107-B, Amir Temur str., Tashkent 70084, Uzbekistan. DO NOT SEND DIRECT QSLs to his home address in Japan.

QSL ROUTE CHANGE. Yoshiro, N1VF/KH2, who plans to be on from Guam Islands (OC-026), November 21-24th, seems to have changed his QSL route. QSL via Yoshiro Nishimura M.D., 2-6 Takemidai 4-Chome, Suita City, OSAKA 565-0863 JAPAN.

T31MY QSL STATUS. George, OM2SA, reports that the next 700 QSLs for T31MY are answered and should be mailed out this week. ADDED NOTE (Thanks to Pick, WA5PAE): As you know, Mike/T21MY and Jan/T2YL went QRT and will be heading to Fiji to visit with Paul, 3D2AJ, and his wife Va'inga. Mike said that he had no plans to do any more radio operations until they stop at Vanuatu (YJ) later this year on their way back to Austrailia to be "land lubbers" during the typhoon season.

Ralph, K2PF, informs OPDX that he is now handling QSL cards for Dejo, T94DJ.

XQ6ET QSL STATUS. George, W8UVZ, reports: "I finished processing all current requests yesterday (June 25th) and the final batch is going in the mail today. And I have mailed, and Bob has RX 150 blank QSLs, to respond to about 100 QSL requests that he was holding. A couple of reminders for those still needing XQ6ET confirms:
One call per envelope please
Old style IRCs still won't flow easily thru our USPS.
Send all QSL requests to W8UVZ with SASE or SAE and funds for postage.
But note that I do not have logs to check E-mail 'in log' requests.
All QSLs are still verified over the air. There has been a good outpouring of donations to help fund the amp that was sent to Bob last month. Bob has the MLA 2500 on the air and his top band signals are much improved, in spite of some still poor low band condx. We expect many more QSL requests for low band QSOs since Bob is again quite active in his winter season. And Bob has designs on improving his modest antenna setups soon. Thanks to the needy for being patient with this change in QSL route."

SILENT KEY. It was announced last week that well known DXer "Al" Albert H. Hix, W8AH, became a Silent Key (SK) on June 25th. Almost every DXer who attended the Dayton Hamvention and DX Dinner Banquet knew or knew of Al. With DXCC totals of 388 it was hard not to notice him. He will surely be missed. OPDX and its readers would like to send out our deepest sympathy to his family and friends. ADDED NOTE: WV ARRL Section Manager, Hal, KC8FS, has provided OPDX InterNet Subscribers (as an additional bulletin) with

a writeup from the Charleston Gazette on Al, W8AH.

SN0, POLAND. A Polish team for the IARU HF World Championship (July 12-13th) will be again active using the callsign of SN0HQ. QSOs will be confirmed via the bureau. QSL Manager is SP2PI. More details about SN0HQ (list of operators, station locations, SN0HQ award etc.) can be found at: http://www.sp5zcc.waw.pl/iaru/info.html

SOMETHING FREE! Emir, 9A6AA, member of the Croatian Amateur Radio Association and IOCA Manager, reports that the new IOCA directory (booklet) is finished. You can change (free of charge) your old IOCA booklet for a new one, during the "Hamradio" in Friedrichshafen.

SPECIAL EVENT. Territory Day is July 1st and marks the celebrating of the 25th year of Self-Government in the Northern Territory (NT). Early on July 1st, the most senior elected member of the Northern Territory government, the Honourable Chief Minister Clare Martin will be the first person to transmit on-air using a special amateur radio callsign, VI8NT, to celebrate the anniversary of self-government in the Northern Territory.

TK, CORSICA, Fred, F5OZK, will be active as TK/F5OZK between July 5-25th. Activity will be on 40-10 meters, including the WARC bands. QSL via his home callsign, direct or by the bureau.

TM0, FRANCE. Look for TM0HQ to be active from the Official French Headquarter during the next IARU HF Contest, July 13-14th. QSL via the French REF Bureau.

MESSAGE FROM JUN, VK4SJ (aka - ZK1AYL). Jun, VK4SJ, sent OPDX the following message:
"I wish to SINCERELY THANK 'ALL' who sent E-Mails, Cards and Messages of Sympathy after the tragic accident on Rarotonga, Cook Islands on the 23rd of May that took the life of my husband Doug VK4BP - ZK1SIM. These tributes and cards were of a great comfort to our 2 Son's and myself and helped to ease the pain of our loss. The QSL cards for our DXpedition on Aitutaki OC-083 and Rarotonga OC-013 have been processed and will be posted by this coming weekend (June 28-29th). All cards without return postage will be returned via the Bureau. ..... June VK4SJ - ZK1AYL". Her address is: June Sim, VK4SJ, P.O. Box 406, Caloundra, Queensland, AUSTRALIA 4551.

VP5, TURKS AND CAICOS ISLANDS (Operators Needed!). Operators KY1V/David, WA4PGM/Kyle, plus three other ops are headed to VP5 for the 2003 CQWW CW Contest. Kyle/WA4PGM announced this past week that they are looking for one teenage operator that will get an all expense paid trip! (WOW!!!!) Plus two others ops to complete the team. La Villa Rose has been secured as the contest station; for more information go to:
http://www.qth.com/vp5/ham-radio.html
Please contact them ASAP to insure your spot. Their E-mail addresses are: KY1V - dave@ky1v.com WA4PGM - vp5@wa4pgm.us

VP8, SOUTH SHETLAND (Update to OPDX.615). Dany, LZ2UU, informs OPDX more details of his stay at the Bulgarian Antarctic Base "St. Kliment Ohridski",

situated on South Shetlands (Livingston Island). He will basically be
their radio operator. Dany wil be there from the middle of November until
the end of February 2004. He will use the callsign LZ0A on all amateur
radio bands, CW, SSB and RTTY mode. However, in the CQWW DX-CW Contest,
he will use the VP8/LZ2UU callsign (Also, maybe in any other contests
too). There is no E-mail and Internet available there.

YV, VENEZUELA (Contest Activity). The Radio Club Venezolano Contest
Committee would like to invite everyone to take part (and celebrate)
in Radio Club Venezolano 70th anniversary during the Venezuela
Independence Contest on July 5- 6th. Activity will be on CW/SSB and
the new rules for the contest can be downloaded at:
http://www.radioclub.venezolano.org (look for concursos)
A special anniversary QSL will be available with QSOs with YV5AJ,
the HQ station.

It's a slang for 12 Watts P.E.P., which is the max legal output on 11-meter
CB radio in SSB mode.

"radiobuff0@mailcity.moc" wrote:
> This was the finding of a national online poll

The subject line does not follow from the above line. The poll
consisted of a self-selected population who
1. have ready access to a computer, and
2. chose to respond to the poll.

> The survey also reveals that Americans almost equally oppose laws

That should instead read "...those who chose to respond to the poll
almost equally oppose laws..."

Also, how does the writer know that only Americans responded to
the poll? Was there some citizenship filter contained at that poll
site?

>Nearly nine out of 10 Americans (87 percent) oppose state laws

No. Try "87 percent of those anywhere in the world with computer
access who chose to respond to the poll oppose state laws...."

>These are highlights of a nationwide survey of more than 2,000
>adults,

Nationwide? How did they restrict the online poll to just our nation
and just American citizens?

>"These numbers tell the same story we've been telling courts in this
>country for years: the vast majority of Americans support the right to

More nonsense.

Here's a number you can chew on: 70% of Hawaii voters voted against
same-sex marriages. It was a ballot question a few years back. This
was in contrast to Hawaii being an extremely liberal state.

10 Appalling Lies We Were Told About Iraq

By Christopher Scheer, AlterNet

June 27, 2003

"The Iraqi dictator must not be permitted to threaten America and the world with horrible poisons and diseases and gases and atomic weapons."

George Bush, Oct. 7, 2002, in a speech in Cincinnati.

Today, more than three months after Bush's stirring declaration of war and nearly two months since he declared victory, no chemical, biological or nuclear weapons have been found, nor any documentation of their existence, nor any sign they were deployed in the field.

The mainstream press, after an astonishing two years of cowardice, is belatedly drawing attention to the unconscionable level of administrative deception.

They seem surprised to find that when it comes to Iraq, the Bush administration isn't prone to the occasional lie of expediency but, in fact, almost never told the truth.

What follows are just the most outrageous and significant of the dozens of outright lies uttered by Bush and his top officials over the past year in what amounts to a systematic campaign to scare the bejeezus out of everybody:

LIE #1: "The evidence indicates that Iraq is reconstituting its nuclear weapons program ... Iraq has attempted to purchase high-strength aluminum tubes and other equipment need for gas centrifuges, which are used to enrich uranium for nuclear weapons."

President Bush, Oct. 7, 2002, in Cincinnati.

FACT: This story, leaked to and breathlessly reported by Judith Miller in the New York Times, has turned out to be complete baloney. Department of Energy officials, who monitor nuclear plants, say the tubes could not be used for enriching uranium. One intelligence analyst, who was part of the tubes investigation, angrily told The New Republic that, "You had senior American officials like Condoleezza Rice saying the only use of this aluminum really is uranium centrifuges. She said that on television. And that's just a lie."

LIE #2: "The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa."

President Bush, Jan.28, 2003, in the State of the Union address.

FACT: This whopper was based on a document that the White House already knew to be a forgery thanks to the CIA. Sold to Italian intelligence by some hustler, the document carried the signature of an official who had been out of office for 10 years and referenced a constitution that was no longer in effect. The ex-ambassador who the CIA sent to check out the story is pissed: "They knew the Niger story was a flat-out lie," he told the New Republic, anonymously. "They [the White House] were unpersuasive about aluminum tubes and added this to make their case more strongly."

LIE #3: "We believe [Saddam] has, in fact, reconstituted nuclear weapons."

Vice President Cheney on March 16, 2003 on "Meet the Press."

FACT: There was and is absolutely zero basis for this statement. CIA reports up through 2002 showed no evidence of an Iraqi nuclear weapons program.

LIE #4: "[The CIA possesses] solid reporting of senior-level contacts between Iraq and al-Qaeda going back a decade."

CIA Director George Tenet in a written statement released Oct. 7, 2002 and echoed in that evening's speech by President Bush.

FACT: Intelligence agencies knew of tentative contacts between Saddam and al-Qaeda in the early '90s, but found no proof of a continuing relationship. In other words, by tweaking language, Tenet and Bush spun the intelligence180 degrees to say exactly the opposite of what it suggested.

LIE #5: "We've learned that Iraq has trained al-Qaeda members in bomb-making and poisons and deadly gases ... Alliance with terrorists could allow the Iraqi regime to attack America without leaving any fingerprints."

President Bush, Oct. 7.

FACT: No evidence of this has ever been leaked or produced. Colin Powell told the U.N. this alleged training took place in a camp in northern Iraq. To his great embarrassment, the area he indicated was later revealed to be outside Iraq's control and patrolled by Allied war planes.

LIE #6: "We have also discovered through intelligence that Iraq has a growing fleet of manned and unmanned aerial vehicles that could be used to disperse chemical or biological weapons across broad areas. We are concerned that Iraq is exploring ways of using these UAVs [unmanned aerial vehicles] for missions targeting the United States."

President Bush, Oct. 7.

FACT: Said drones can't fly more than 300 miles, and Iraq is 6000 miles from the U.S. coastline. Furthermore, Iraq's drone-building program wasn't much more advanced than your average model plane enthusiast. And isn't a "manned aerial vehicle" just a scary way to say "plane"?

LIE #7: "We have seen intelligence over many months that they have chemical and biological weapons, and that they have dispersed them and that they're weaponized and that, in one case at least, the command and control arrangements have been established."

President Bush, Feb. 8, 2003, in a national radio address.

FACT: Despite a massive nationwide search by U.S. and British forces, there are no signs, traces or examples of chemical weapons being deployed in the field, or anywhere else during the war.

LIE #8: "Our conservative estimate is that Iraq today has a stockpile of between 100 and 500 tons of chemical weapons agent. That is enough to fill 16,000 battlefield rockets."

Secretary of State Colin Powell, Feb. 5 2003, in remarks to the UN Security Council.

FACT: Putting aside the glaring fact that not one drop of this massive stockpile has been found, as previously reported on AlterNet our own intelligence reports show that these stocks -- if they existed -- were well past their use-by date and therefore useless as weapon fodder.

LIE #9: "We know where [Iraq's WMD] are. They're in the area around Tikrit and Baghdad and east, west, south, and north somewhat."

Secretary of Defense Donald Rumsfeld, March 30, 2003, in statements to the press.

FACT: Needless to say, no such weapons were found, not to the east, west, south or north, somewhat or otherwise.

LIE #10: "Yes, we found a biological laboratory in Iraq which the UN prohibited."

President Bush in remarks in Poland, published internationally June 1, 2003.

FACT: This was reference to the discovery of two modified truck trailers that the CIA claimed were are potential mobile biological weapons lab. But British and American experts -- including the State Department's intelligence wing in a report released this week -- have since declared this to be untrue. According to the British, and much to Prime Minister Tony Blair's embarrassment, the trailers are actually exactly what Iraq said they were, facilities to fill weather balloons, sold to them by the British themselves.

So, months after the war, we are once again where we started -- with plenty of rhetoric and absolutely no proof of this "grave danger" for which O.J. Smith died.

The Bush administration is now scrambling to place the blame for its lies on faulty intelligence, when in fact the intelligence was fine, it was their abuse of it which was "faulty."

Rather than apologize for leading us to a preemptive war based on impossibly faulty or shamelessly distorted "intelligence" or offering his resignation, our sly madman in the White House is starting to sound more like that other O.J.

Like the man who cheerfully played golf while promising to pursue "the real killers," Bush is now vowing to search for "the true extent of Saddam Hussein's weapons programs, no matter how long it takes."

On the terrible day of the 9/11 attacks, five hours after a hijacked plane slammed into the Pentagon, retired Gen. Wesley Clark received a strange call from someone (he didn't name names) representing the White House position:

"I was on CNN, and I got a call at my home saying, 'You got to say this is connected. This is state-sponsored terrorism. This has to be connected to Saddam Hussein,'" Clark told Meet the Press anchor Tim Russert. "I said, 'But -- I'm willing to say it, but what's your evidence?' And I never got any evidence.'"

And neither did we.

U.S. Death Toll in Iraq Passes 200

By PAUL HAVEN, Associated Press Writer

BAGHDAD, Iraq -

After days of intense searching by ground and air, U.S. forces on Saturday found the bodies of two soldiers missing north of Baghdad, as the toll of American dead since the start of war topped the grim milestone of 200.

And the "mission" (whatever that is) is not yet "accomplished"

4709. Bush plan to turn Medicare over to the greedy.

Senior citizens and people with disabilities, and their families, deserve affordable prescription drugs through a system that puts their needs before drug and insurance company greed.

From The Madison Capital Times, 6/27/03:
http://www.madison.com/captimes/opinion/column/guest/51712.php

Bush plan is Trojan horse to privatize Medicare

By Darcy Haber

Medicare is our national health insurance system for seniors and people with disabilities.

That may come as a surprise to you, since some people think that national health care is un-American.

For almost 40 years our parents and grandparents have found reliable, affordable health coverage for the doctor and hospital of their choice through the national health insurance system called Medicare.

But now President Bush is using the promise of a Medicare prescription drug benefit as a Trojan horse to tear apart Medicare.

And here's the kicker; the Medicare Rx benefit that's being offered stinks.

Let's first take a look at the prescription drug "benefit" that the Senate is debating now, as part of a proposal put forward by the ranking Republican and Democratic members of the Senate Finance Committee.

Under the proposal, seniors and people with disabilities on Medicare who use $1,000 for prescription drugs would have to pay $1,057.50 for coverage.

That's right, they have to pay more, when you add up premiums, deductibles and co-payments.

The plan isn't much help to the person who uses a lot of prescriptions either.

A senior or disabled person who needs $5,000 of prescription drugs would still have to pay $3,695 for prescriptions.

The biggest reason that the "benefit" is so stingy is that Congress doesn't have enough money, after providing more than a trillion dollars in tax cuts for the rich, to finance a Medicare prescription

benefit that actually helps seniors with the high cost of drugs.

But there's another reason too; since the prescription drug benefit will be provided through private insurance plans - and not through Medicare - Bush's plan won't stop price-gouging by the drug industry.

Americans, most of whom purchase drug coverage through private insurance, pay the highest price for prescription drugs in the world.

By contrast, people in other countries pay much lower drug prices than we do, because they use their national health insurance systems to negotiate lower drug prices for everyone.

However, we don't need to turn to other countries for an example of how to use government to lower drug prices.

Guess who gets the lowest drug prices in the U.S.?

It's the Department of Veterans Affairs.

The department uses its purchasing power to be a tough price negotiator with the drug companies.

Medicare has already proven it does a better job of controlling health inflation than private insurance.

Despite insuring the oldest, sickest and most disabled people in the country, Medicare has had lower health care inflation than private insurance for 30 years.

If the new prescription drug benefit were offered through Medicare, instead of private insurance, drug prices could be lowered by as much as 40% (that's the difference between what we pay for drugs in the United States and what the Canadians pay) and the savings would mean a real Medicare Rx benefit for the 40 million seniors and disabled on Medicare, not a phony one.

Medicare already has enough experience with privatization to know it doesn't work; more than 2 million seniors have been dumped by their Medicare HMOs because the HMOs said they couldn't make a big enough profit.

But no senior or person with disabilities has ever been dumped out of Medicare.

Senior citizens and people with disabilities, and their families, deserve affordable prescription drugs through a system that puts their needs before drug and insurance company greed.

The only way to do that is for Congress to reject providing a miserly prescription drug benefit through private insurance and instead provide a real, affordable prescription drug benefit directly through the Medicare system.

"Greed is all right, by the way... I think greed is healthy. You can be greedy and still feel good about yourself."

Ivan F. Boesky, who was later convicted of conspiring to file false documents with the federal government, involving insider trading violations, and agreed to pay $100 million in fines and illicit profits

4710. US TV networks kissed (and still kiss) Bush's ass.

US TV networks 'kissed ass', says Wolff

By Ciar Byrne

Michael Wolff, the media commentator and New York Magazine columnist, has accused American television networks of "kissing ass" in their coverage of the Iraq war in return for a relaxation of media ownership rules in the US.

Wolff put forward what he described as the "semi-conspiracy theory" that major media companies in the US meekly followed the flag-waving agenda of the Bush administration in order to persuade the federal communications commission to change its regulations.

"Ass kissing has gone on to a profound degree. It's pervasive throughout all these news organisations. They need the FCC to behave in certain ways. In order to do this we have got to go along to get along," said Wolff, who delivered the keynote speech at today's MediaGuardian forum on war coverage.

He added the FCC's decision to relax media ownership rules came shortly after the end of the war.

"Any reporter in America who would see that quid pro quo in any other business says: 'No, that doesn't happen in the news business'," Wolff added.

Wolff also claimed the system of embedding journalists with troops in Iraq was little more than a public relations operation.

"I have difficulty in understanding why somebody didn't say: 'You're not becoming a war reporter, you're becoming a PR guy'," he said.

Journalists who thought the Bush administration took a risk with the embed system were mistaken, Wolff said.

"One of the thoughts was - this could potentially be very devastating to the Bush administration. What if we saw carnage? What if the coalition forces really were bloody?

"A lot of media people went round talking about that without any realisation that this was the most one-sided war that will ever have been fought in history.

"From the beginning the embedding was safe. They couldn't lose.

"I think the whole principal is intrinsically dangerous. I don't think we should be attached to military forces. There's no way you wouldn't become an adjunct to those forces.

"I don't know how we launched into this without any form of scepticism."

He added journalists who were promised access to the "head of General Tommy Franks" at Central Command in Dohar were forced to become "Jayson Blairs" because of the pressure on them to provide news when they were being starved of information by the US military.

New York Times journalist Blair was fired for fabricating and plagiarising large parts of his stories.

Wolff ran into trouble with the Bush administration when, at a Dohar press briefing, he dared to ask the question:

"What are we doing here? What is the value proposition? What do we get out of this?"

One should never make the mistake of asking the Bush administration to answer difficult or embarrassing questions.

4711. Hussein Must Be Caught or Killed, Top Bushie Official in Iraq Says

Saddam Hussein Must Be Caught or Killed, Top U.S. Official in Iraq Says

LONDON --

Saddam Hussein must be captured or killed so he can no longer be a rallying point for anti-coalition fighters in Iraq, the top U.S. official in the country said Sunday.

L. Paul Bremer, the civilian administrator of Iraq, said there were still leftover Baath Party members and perhaps terrorists from neighboring countries fighting U.S. and British troops, who drew succor from Saddam's apparent survival.

"I think it is important that we either catch him or kill him," Bremer told the British Broadcasting Corp.

OK. When are ya gonna do it?

4712. And Bush wants to privatize Medicare.

HealthSouth has been accused of a $2.5 billion accounting fraud.

From The New York Times, 6/27/03:
http://www.nytimes.com/2003/06/27/business/27CARE.html

Subpoena Threatened in HealthSouth Case

By REUTERS

WASHINGTON --

A Congressional committee threatened today to subpoena Richard Scrushy, the former chief executive of the HealthSouth Corporation, if he fails to turn over all the documents it requested in an investigation of the company.

In reply, a lawyer for Mr. Scrushy complained of "harassment" and "government duplication."

The House Energy and Commerce Committee, as part of its inquiry into HealthSouth, had told Mr. Scrushy to turn over by June 25 any records he had on the company's personnel, finances and accounting practices.

"They did not fully comply," a committee spokesman, Ken Johnson, said. "We've made clear that they must turn over everything or run the risk of a subpoena."

HealthSouth has been accused of a $2.5 billion accounting fraud.

Jonathan Rose, a lawyer for Mr. Scrushy, said an index would be provided to 30 boxes of documents sought by the committee and already held by the Securities and Exchange Commission.

Yup. Privatize Medicare. Just what the health industry needs to give it greater opportunities to lie, cheat and steal.

4713. Manufacturing sector is in the toilet. No new jobs here.

From Reuters, 6/25/03:
http://money.cnn.com/2003/06/25/news/economy/durables.reut/index.htm

Durable orders dip in May

Drop of 0.3% is surprise to forecasts expecting growth, seen as another sign of economic weakness.

WASHINGTON (Reuters) -

Orders for costly U.S. manufactured goods fell in May for the second month in a row, the government said Wednesday, a sign of economic weakness that comes at a time when Federal Reserve officials are meeting to discuss interest rates.

U.S. durable goods orders sank 0.3 percent last month -- in contrast to the expectations of private economists that they would rise 0.8 percent.

The data from the Commerce Department showed April orders plunged 2.4 percent, revised down from an earlier reported 2.3 percent drop.

The report showed broad-based weakness in demand for big-ticket items, with categories such as cars, computers and machinery showing declines.

Excluding the volatile transportation sector, orders edged up 0.2 percent, a much weaker showing than the 1 percent gain projected by economists in a Reuters survey.

The lousy Bush economy continues.

4714. THIS MOTHERFUCKER IS CRAZY Bush

I read bush's statement that god told him to strike at saddam, and more than anything else I've heard or read, this concerns me the most (Actually, it scares the shit out of me). George Bush has lied to congress, the american people, and the world. This administration has falsified evidence, violated a host of international and domestic laws, invaded a country that was of no threat to us, we're using DEPLETED URANIUM MUNITIONS!!??? and they claim not to know what gulf war sickness is?? how about radiation poisoning! They've trampled on the constitution, bankrupted the country, and murdered american soldiers and thousands of innocent civilians, INCLUDING THOSE KILLED ON 9/11. It should be clear to anyone that applies common sense that 19 guys with boxcutters could not hijack 4 planes, fly them into 3 buildings, and penetrate the defense net of the most powerful military in human history without a lot of help from the inside. Now, it's god who told him to invade iraq. Look, I don't want to use fancy language to say this, I'll say it plain: THIS MOTHERFUCKER IS CRAZY. Bush, Cheney, Rumsfeld, Powell all need to be impeached, removed from office, and subsequently tried for war crimes at the hague. We are at a crossroads in human history, and we, the american people have to put a stop to this lunacy. They are killing men, women and children in our name. It has to stop. Talk to your friends, your elected reps, be proactive. Take back democracy, and throw the fascists out on their ass. God Bless America.

Rage. Mistrust. Hatred. Fear. Uncle Sam's enemies within
While the US fights a war on terror, it is also systematically crushing its citizens' rights. Neil Mackay on the alarming rise of a new tyranny

WHEN the Hollywood actor Tim Robbins took to his feet before the National Press Club in Washington DC in April this year, he delivered a speech laced with deliberate echoes of Bob Dylan's protest song Blowin' In The Wind. While Dylan, however, sang of freedom and liberty one day triumphing over repression and control, Robbins was saying that the greatest democracy on earth, the United States of America, was heading in the opposite direction under President Bush: to a future where freedom had lost out to repression and liberty to control.
'A chill wind is blowing in this nation,' said Robbins -- who, along with his wife, the actress Susan Sarandon, has been routinely denounced by the American right. 'A message is being sent through the White House and its allies in talk radio ... if you oppose this administration, there can and will be ramifications. Every day the airwaves are filled with warnings, veiled and unveiled threats, spewed invective and hatred directed at any voice of dissent. And the public ... sit in mute opposition and fear.'

Just days before this speech, Saddam's statue in Baghdad was wrapped in the Stars and Stripes and dragged to earth by US tanks. To millions of Americans like Robbins, the image must have been replete with irony. Here was democratic America destroying one of the most tyrannical regimes on earth in the name of freedom -- yet in the process of fighting for democracy abroad, America's own freedoms were being systematically eaten away at home.

A few things have happened recently that show just how powerful -- and, perhaps, unstoppable -- is the march of the right-wing machine in the US. This month the American Enterprise Institute (AEI), a right-wing think tank umbilically tied to the Bush administration, declared open warfare on non-governmental organisations (NGOs) deemed too left-wing and set up an organisation called NGOWatch to monitor these liberal pressure groups. NGOs that have fallen foul of its wrath include groups promoting human rights, women, the environment and freedom of speech; among its targets are the American Civil Liberties Union

(ACLU), Amnesty International, Greenpeace and the World Organisation Against Torture. Only this February, George Bush boasted that 20 AEI members were working for his administration. AEI fellows include Lynne Cheney, the vice- president's wife, and Richard Perle, the most influential of all neo-conservative hawks.

NGOWatch has issued scathing reports on the following groups:

lHuman Rights Watch, which investigates government abuses around the world. According to NGOWatch, it is an organisation that 'recommends groups that promote same-sex marriage', 'promotes sexual orientation rights', 'denounces abstinence [from sex] programmes', 'advocates gays in the military' and 'demands release of some detainees at Camp X-Ray in Guantanamo Bay'. Nearly 700 men are held at the camp without charge, trial or access to legal help.

lCARE International, which works in the third world. It is attacked because its president, Peter Bell, criticises Bush's Mexico City Policy, which prohibits international groups that perform or promote abortion from receiving tax dollars to teach family planning.

lThe NOW (National Organisation For Women) Foundation, which promotes abortion rights and equality in the workplace. NGOWatch says: 'With lesbianism and left-wing politics, NOW conferees cling to the fringe.'

Naomi Klein, author of the anti-corporate bestseller No Logo, points out that Andrew Natsios, head of the government-run United States Agency for International Development (USAID), attacked NGOs this May 'for failing to play a role many of them didn't realise they had been assigned: doing public relations for the US government'. Klein says NGOWatch is a 'McCarthyite blacklist, telling tales on any NGO that dares speak against the Bush administration's policies or in support of international treaties opposed by the White House'.

But the Bush administration might not find the term 'McCarthyite' all that insulting if the poster-girl of the American right, Ann Coulter, gets her way. Coulter is set to knock Hillary Clinton, the former first lady, off the top of the US bestseller lists with her book Treason: Liberal Treachery From The Cold War To The War On Terrorism. Its central thesis is that Senator Joe McCarthy, the man behind the communist witch-hunts of the 1950s, was a good guy and an all-American patriot. Coulter is the woman who said after September 11: 'We should invade their countries, kill their leaders and convert them to Christianity.' She also said US citizens should carry passports on domestic flights to make it easier to identify any 'suspicious-looking swarthy males'.

McCarthy was censured by his Senate colleagues: despite levelling charges of communism at all and sundry, he was unable to produce the name of a single card-carrying communist in the US government. The Encyclopaedia Britannica says he was seen by his detractors as a 'self-seeking witch-hunter who was undermining the nation's traditions of civil liberties', yet his accusations led to the persecution of many of those he condemned .

Coulter says: 'The myth of McCarthyism is the greatest Orwellian fraud of our times. Liberals are fanatical liars, then as now. Everything you think you know about McCarthy is a hegemonic lie . Liberals denounced McCarthy because they were afraid of getting caught ... McCarthy was not tilting at windmills. Soviet spies in the government were not a figment of right-wing imaginations. He was tilting at an authentic communist conspiracy.'

Coulter's article of faith is that liberals have managed to shout harder than the right and twist society with propaganda. It is a remarkable claim given the approach to journalism by one of the US's most popular TV stations, Fox News. Vilification of liberals is almost a sport on Fox, which is owned by Rupert Murdoch. One of its main anchors, Bill O'Reilly, told viewers the US should 'splatter' Iraqis; one of its other anchors referred to the veil worn by a Muslim-American woman as a 'thing'.

While Europeans might recoil at a subservient press and a government with such blatantly right-wing policies, others will say: 'So what? The Bush administration is simply pushing its agenda and the media is reflecting the support of the public.' But that is not the case. Scratch the surface and more and more disturbing examples of government control and attacks on dissent in the name of patriotism spring to light -- and it is obvious that a vast swath of the US public is horrified by what is happening.

Take the case of John Clarke, an organiser with the Ontario Coalition Against Poverty (OCAP). In February 2002 he was crossing into the US from Canada to speak at Michigan State University. He was taken into the immigration offices and asked what anti-globalisation protests he had attended and whether he 'opposed the ideology of the United States'. His car was searched and he was frisked. He was denied entry to the US, then interrogated by a special agent with the State Department's Diplomatic Security Service. He was asked if the OCAP was a cover for anarchism and if he was a 'socialist'. The agent had a file on the OCAP, leaflets from public-speaking engagements Clarke had taken part in and the name of a man Clarke had stayed with in Chicago. Clarke was accused of being an 'advocate for violence' and threatened with jail. Astonishingly, the interrogator asked him questions about Osama bin Laden.

Sounds like a rogue agent? Not if you take into account the six French journalists who arrived at Los Angeles Airport this May to cover a video games conference. They were detained -- three of them in cells for 26 hours -- interrogated, subjected to body searches and then forcibly repatriated .

It is not just foreigners that are deemed dangerous and un-American. There was Tom Treece, a teacher who gave a class in 'public issues' at a high school in Vermont. A uniformed police officer entered his classroom in the middle of the night because a student art project on the wall showed a picture of Bush with duct tape over his mouth and the words: 'Put your duct tape to good use. Shut your mouth.' Local residents said they would refuse to pass the school budget unless Treece was sacked. He was eventually removed from that class.

Or how about Jason Halperin? This March he was in an Indian restaurant in New York when it was raided by five police officers with guns drawn. Halperin says they kicked open the doors, then pointed guns in the faces of staff and made them crawl out of the kitchen . Ten other officers from the Department of Homeland Security then entered. One patron said the police had no right to hold him; he was told the Patriot Act allowed his detention without warrant. Halperin asked if he could see a lawyer; he was told only if he came to the station, and then in 'maybe a month'. When he told police he was leaving, an officer walked over, his hand on his gun, saying: 'Go ahead and leave, just go ahead.' Another officer said: 'We are at war and this is for your safety.'

The American Civil Liberties Union had to take court action to help 15-year-old Bretton Barber, who faced suspension from school when he refused to take off a T-shirt showing Bush with the words 'International Terrorist' beneath. AJ Brown, a college student from North Carolina, was visited at home by secret service agents who told her: 'Ma'am, we've gotten a report that you have anti-American material.' She refused to let them in, but eventually showed them what she thought they were after -- an anti-death-penalty poster showing Bush and a group of lynched bodies over the epithet 'We hang on your every word'. The agents then asked her if she had 'any pro- Taliban stuff'.

Art dealer Doug Stuber, who ran the presidential campaign in North Carolina for the Green Party's Ralph Nader, was told he cou ld not board a plane to Prague because no Greens were allowed to fly that day. He was questioned by police, photographed by two secret service agents and asked about his family and what the Greens were up to. Stuber says he was shown a Justice Department document that suggested Greens were likely terrorists.

Michael Franti, frontman of the progressive hip hop band Spearhead, says the mother of one of his co-musicians, who has a sibling in the Gulf, was visited by 'two plain-clothes men from

the military' in March this year. Franti says: ' [The military] came in and said, 'You have a child who's in the Gulf and you have a child who's in this band Spearhead who's part of the resistance.'' The military had pictures of the band at peace rallies, their flight records for several months, the names of backstage staff and their banking records.

Chris Hedges, a Pulitzer prize- winning New York Times reporter, was booed off stage after making what was perceived to be an anti-war speech at a graduation ceremony at Rockford College in Illinois. College officials unplugged his mic twice while he was making the speech, which he had to cut sharply in order to keep the situation under control ; some students blared foghorns and turned their backs, while others rushed up the aisles screaming and throwing caps and gowns .

A report by the ACLU called Freedom Under Fire: Dissent In Post-9/11 America says: 'There is a pall over our country. The responses to dissent by many government officials so clearly violate the letter and the spirit of the supreme law of the land that they threaten the underpinnings of democracy itself.'

The words of Justice Antonin Scalia, an avid Bush supporter and member of the Supreme Court, seem to support these fears. In March, during a lecture at John Carroll University in Ohio, Scalia told his audience: 'Most of the rights you enjoy go way beyond what the Constitution requires.' He added that in wartime 'the protections will be ratcheted down to the constitutional minimum.'

Under current laws, anyone even suspected of terrorism can be held indefinitely without charge or access to a lawyer. A new proposed law would lead to anyone deemed a sympathiser of an organisation classed as terrorist having their US citizenship revoked; they would also be deported. The Pentagon's Total Information Awareness plans will allow the state to analyse every piece of data held on each US citizen.

Many are frightened to fight back. In September 2002, around 400 peaceful demonstrators near the White House were attacked and arrested; in Oakland, California, police used rubber and wooden bullets at a peace rally. Yet there is resistance. The Bill Of Rights Defence Committee has been supported by more than 114 legislatures in cities, towns and counties, as well as the states of Alaska and Hawaii. They have all passed resolutions opposing draconian legislation: that accounts for 11.1 million people.

Still, with massive donations rolling in from corporate backers, many fear it is unlikely Bush will be dethroned in 2004. With a supine Democratic Party, save a few maverick voices, and a craven media, it is left to a handful of fringe voices to speak out for Americans who are angered and disgusted at the state of their

nation.

These voices belong to people such as Bruce Jones, an author and Vietnam veteran. He recently wrote about what he saw as 'the ugly side of patriotism ... those who insist that 'you are either with us or against us''. He added: ' There is no more important patriot in this nation than the citizen who has the guts to stand up and tell the official establishment that it is wrong.

'I know who my enemies are -- the idiots who burned down the dry-cleaning establishment I use here in Modesto because it had the word French in its name, or because it had Assyrian owners who immigrated from the Middle East. I know who I must fear the most -- those Americans who do not understand what freedom of speech means; those who equate patriotism with blind obedience.'

Washington Post Foreign Service
Sunday, June 29, 2003; Page A21

BAGHDAD -- Around 10 p.m. Thursday, Mohammed Kubaisi, 12, was fatally shot in the chest on the roof of his home in Baghdad by a U.S. soldier.

Those are the only facts on which the Kubaisi family and the U.S. military agree.

For the family, it was a wanton killing, the slaying by a trigger-happy soldier of a curious, unarmed boy who was watching troops search for weapons in his neighborhood.

"This is a crime," said Wafaa Kubaisi, Mohammed's mother. "Why would an American with all his technology kill a child?"

According to the U.S. military, what the soldier saw was a figure in the darkness carrying an AK-47 automatic rifle and moving across the roof of the house, with exposed U.S. soldiers below. The U.S. forces recovered the weapon when they searched the house after the shooting, according to Maj. Sean Gibson, a military spokesman.

A military investigation is underway, but the results are already moot for many residents of Baghdad. In their mind, the killing was gratuitous. Even some Iraqis who initially welcomed the U.S. occupation see the boy's death as another grievance against U.S. forces.

"I thought the Americans would bring prosperity, but they are punishing us," Mohammed's uncle, Kamel, said to the nodding approval of mourners at the home of the dead boy's grandfather on Saturday evening.

The men sat on the lawn, smoking and speaking quietly. The women, inside the house, periodically burst into tears, their cries rising from behind closed doors.

"The bullet that shot Mohammed will be worth a million bullets," said Mohammed's mother, in a veiled threat of revenge, after she emerged from the home, staggering and supported by family members.

U.S. officials said they did not want to engage in an argument with the family and offered a bare-bones account of the event -- as they do with most incidents involving U.S. forces.

The family members have offered an emotional account of what they see as U.S. brutality, further poisoning an atmosphere in which U.S. troops are being killed almost daily.

It is the family's story that is now circulating in the al-Jihad neighborhood of west Baghdad and beyond.

There had been several shootings in the neighborhood before U.S. troops arrived, including the killing of one of the Kubaisi's neighbors by thieves, an indication of the lack of security in the city, mourners said. As U.S. troops pushed into the neighborhood, searching homes on a street behind the Kubaisi houses, a frisson of excitement pushed Mohammed to the roof for a bird's-eye view of the action. As a U.S. soldier noticed him, another resident, a 15-year-old boy, warned the soldier that it was a child on the roof. The soldier fired anyway, the family said.

After Mohammed was shot, his sister, Aseel, carried him down to the kitchen and placed him in the arms of his mother. Mohammed's identical twin, Mustafa, knelt beside him. "Talk to me, talk to me," the rail-thin boy pleaded.

Family members and neighbors rushed into the house, which was soon filled with wailing and screaming, the family said. U.S. troops also arrived quickly. Mohammed's mother said that a soldier kicked her when he burst into the house and that other troops poured in pointing their guns and further terrorizing the occupants.

In a separate interview, however, Mohammed's father described a U.S. soldier taking Mohammed's pulse and another soldier, who he presumed was the shooter, weeping in the corner.

Mohammed was eventually whisked to the car of a doctor, who pronounced him dead on the way to the hospital. He was buried Friday, and the formal mourning, marked by visits from friends and neighbors, ended Saturday.

"He is in heaven now," said his father. "And he will take his mother and his father by the hand and one day lead them into heaven, too."

Mohammed's father, unlike his mother, said he was not ready to call for revenge, but expressed astonishment that the U.S. military had not apologized for killing his son.

"I want to speak to the man who killed my son, and I want to speak to his superior," he said. "That is our tradition. We must speak."

http://www.guardian.co.uk/worldlatest/story/0,1280,-2848009,00.html

Associated Press Writer

LONDON (AP) - Prime Minister Tony Blair's office did not doctor an intelligence report on Iraq's weapons of mass destruction to exaggerate the threat posed by Saddam Hussein, a lawmaker involved in an official probe said Sunday.

Eric Illsley, part of a Parliamentary committee investigating the government's use of intelligence material to justify war in Iraq, said he was satisfied that Blair's communications chief, Alastair Campbell, had not tampered with the dossier.

But fellow committee member John Maples said his colleague's remarks were premature, adding the verdict may come soon. ``We haven't come to any conclusions at all yet,'' he told the British Broadcasting Corp.

In part, the House of Commons Foreign Affairs Select Committee is investigating a BBC report that Blair aides redrafted a file published in September to include claims that Saddam could launch chemical and biological weapons at 45 minutes' notice.

BBC defense correspondent Andrew Gilligan said intelligence officials were unhappy with the ``sexed-up'' report and believed the information about the 45-minute notice came from a single, unreliable source and was incorrect.

The story prompted accusations that the government had exaggerated the scale of the Iraqi weapons threat to convince skeptical lawmakers of the necessity of war.

Government relations with the BBC have slumped to their lowest level in years, with Campbell and the corporation's director of news, Richard Sambrook, firing venomous open letters at each other.

The government is demanding an apology and neither side is backing down.

In the latest twist, Illsley, of Blair's Labor Party, told LBC radio on Sunday that he and other committee members were satisfied the dossier and the 45-minute detail were compiled by intelligence chiefs.

Countering that report, Maples told the BBC that the committee was meeting Tuesday decide its position. Blair's office declined to comment, saying it would wait for the committee's official verdict. "You can tune in for ten minutes and figure

out what [Rush Limbaugh] has been talking about
the past two months. Well, in this case, two years
. he's STILL talking about Clinton."

4718. Iraq War Not Over --U.S. Military

| The Iraqi Resistance
| Sunday, June 29, 2003; Page B06
|
| AT THE BEGINNING of this month, U.S. commanders in Iraq
| concluded that the war that a month earlier had been
| declared over really wasn't. Loose networks of Iraqi
| militants, many with ties to Saddam Hussein's deposed
| dictatorship, were trying to launch a guerrilla
| campaign, hoping to drive U.S. troops from Iraq and
| eventually restore the old regime. The American response
| was relatively strong: Thousands of Army troops
| scheduled to leave Iraq were instead deployed to what
| became known as the "Sunni triangle" northwest of
| Baghdad, and systematic sweeps were begun to root out
| the lingering resistance. Yet, as the month ends, the
| problem appears to be getting worse rather than better.
| By last week the number of incidents had risen to two
| dozen a day, and Iraqi ambushes were growing in
| effectiveness and range. At least six soldiers have been
| killed since Wednesday. The enemy also managed to cut off
| power and water in Baghdad with sabotage attacks and
| killed several Iraqi civilians working to restore
| electricity.

http://www.alternet.org/story.html?StoryID=16274

"The Iraqi dictator must not be permitted to threaten America and the world with horrible poisons and diseases and gases and atomic weapons."
– George Bush, Oct. 7, 2002, in a speech in Cincinnati.

There is a small somber box that appears in the New York Times every day. Titled simply "Killed in Iraq," it lists the names and military affiliations of those who most recently died on tour of duty. Wednesday's edition listed just one name: Orenthial J. Smith, age 21, of Allendale, South Carolina.

The young late O.J. Smith was almost certainly named after the legendary running back, Orenthal J. Simpson, before that dashing American hero was charged for a double-murder. Now his namesake has died in far-off Mesopotamia in a noble mission to, as our president put it on March 19, "disarm Iraq, to free its people and to defend the world from grave danger."

Today, more than three months after Bush's stirring declaration of war and nearly two months since he declared victory, no chemical, biological or nuclear weapons have been found, nor any documentation of their existence, nor any sign they were deployed in the field.

The mainstream press, after an astonishing two years of cowardice, is belatedly drawing attention to the unconscionable level of administrative deception. They seem surprised to find that when it comes to Iraq, the Bush administration isn't prone to the occasional lie of expediency but, in fact, almost never told the truth.

What follows are just the most outrageous and significant of the dozens of outright lies uttered by Bush and his top officials over the past year in what amounts to a systematic campaign to scare the bejeezus out of everybody:

LIE #1: "The evidence indicates that Iraq is reconstituting its nuclear weapons program ... Iraq has attempted to purchase high-strength aluminum tubes and other equipment need for gas centrifuges, which are used to enrich uranium for nuclear weapons." – President Bush, Oct. 7, 2002, in Cincinnati.

FACT: This story, leaked to and breathlessly reported by Judith Miller in the New York Times, has turned out to be complete baloney. Department of Energy officials, who monitor nuclear plants, say the tubes could not be used for enriching uranium. One intelligence

analyst, who was part of the tubes investigation, angrily told The New Republic that, "You had senior American officials like Condoleezza Rice saying the only use of this aluminum really is uranium centrifuges. She said that on television. And that's just a lie."

LIE #2: "The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa." – President Bush, Jan.28, 2003, in the State of the Union address.

FACT: This whopper was based on a document that the White House already knew to be a forgery thanks to the CIA. Sold to Italian intelligence by some hustler, the document carried the signature of an official who had been out of office for 10 years and referenced a constitution that was no longer in effect. The ex-ambassador who the CIA sent to check out the story is pissed: "They knew the Niger story was a flat-out lie," he told the New Republic, anonymously. "They [the White House] were unpersuasive about aluminum tubes and added this to make their case more strongly."

LIE #3: "We believe [Saddam] has, in fact, reconstituted nuclear weapons." – Vice President Cheney on March 16, 2003 on "Meet the Press."

FACT: There was and is absolutely zero basis for this statement. CIA reports up through 2002 showed no evidence of an Iraqi nuclear weapons program.

LIE #4: "[The CIA possesses] solid reporting of senior-level contacts between Iraq and al-Qaeda going back a decade." – CIA Director George Tenet in a written statement released Oct. 7, 2002 and echoed in that evening's speech by President Bush.

FACT: Intelligence agencies knew of tentative contacts between Saddam and al-Qaeda in the early '90s, but found no proof of a continuing relationship. In other words, by tweaking language, Tenet and Bush spun the intelligence180 degrees to say exactly the opposite of what it suggested.

LIE #5: "We've learned that Iraq has trained al-Qaeda members in bomb-making and poisons and deadly gases ... Alliance with terrorists could allow the Iraqi regime to attack America without leaving any fingerprints." – President Bush, Oct. 7.

FACT: No evidence of this has ever been leaked or produced. Colin Powell told the U.N. this alleged training took place in a camp in northern Iraq. To his great embarrassment, the area he indicated was later revealed to be outside Iraq's control and patrolled by Allied war planes.

LIE #6: "We have also discovered through intelligence that Iraq has a growing fleet of manned and unmanned aerial vehicles that could be used to disperse chemical or biological weapons across broad areas. We are concerned that Iraq is exploring ways of using these UAVs

[unmanned aerial vehicles] for missions targeting the United States." – President Bush, Oct. 7.

FACT: Said drones can't fly more than 300 miles, and Iraq is 6000 miles from the U.S. coastline. Furthermore, Iraq's drone-building program wasn't much more advanced than your average model plane enthusiast. And isn't a "manned aerial vehicle" just a scary way to say "plane"?

LIE #7: "We have seen intelligence over many months that they have chemical and biological weapons, and that they have dispersed them and that they're weaponized and that, in one case at least, the command and control arrangements have been established." – President Bush, Feb. 8, 2003, in a national radio address.

FACT: Despite a massive nationwide search by U.S. and British forces, there are no signs, traces or examples of chemical weapons being deployed in the field, or anywhere else during the war.

LIE #8: "Our conservative estimate is that Iraq today has a stockpile of between 100 and 500 tons of chemical weapons agent. That is enough to fill 16,000 battlefield rockets." – Secretary of State Colin Powell, Feb. 5 2003, in remarks to the UN Security Council.

FACT: Putting aside the glaring fact that not one drop of this massive stockpile has been found, as previously reported on AlterNet our own intelligence reports show that these stocks – if they existed – were well past their use-by date and therefore useless as weapon fodder.

LIE #9: "We know where [Iraq's WMD] are. They're in the area around Tikrit and Baghdad and east, west, south, and north somewhat." – Secretary of Defense Donald Rumsfeld, March 30, 2003, in statements to the press.

FACT: Needless to say, no such weapons were found, not to the east, west, south or north, somewhat or otherwise.

LIE #10: "Yes, we found a biological laboratory in Iraq which the UN prohibited." – President Bush in remarks in Poland, published internationally June 1, 2003.

FACT: This was reference to the discovery of two modified truck trailers that the CIA claimed were are potential mobile biological weapons lab. But British and American experts – including the State Department's intelligence wing in a report released this week – have since declared this to be untrue. According to the British, and much to Prime Minister Tony Blair's embarrassment, the trailers are actually exactly what Iraq said they were, facilities to fill weather balloons, sold to them by the British themselves.

So, months after the war, we are once again where we started – with plenty of rhetoric and absolutely no proof of this "grave danger" for which O.J. Smith died. The Bush administration is now scrambling to

place the blame for its lies on faulty intelligence, when in fact the intelligence was fine, it was their abuse of it which was "faulty."

Rather than apologize for leading us to a preemptive war based on impossibly faulty or shamelessly distorted "intelligence" or offering his resignation, our sly madman in the White House is starting to sound more like that other O.J. Like the man who cheerfully played golf while promising to pursue "the real killers," Bush is now vowing to search for "the true extent of Saddam Hussein's weapons programs, no matter how long it takes."

On the terrible day of the 9/11 attacks, five hours after a hijacked plane slammed into the Pentagon, retired Gen. Wesley Clark received a strange call from someone (he didn't name names) representing the White House position: "I was on CNN, and I got a call at my home saying, 'You got to say this is connected. This is state-sponsored terrorism. This has to be connected to Saddam Hussein,'" Clark told Meet the Press anchor Tim Russert. "I said, 'But – I'm willing to say it, but what's your evidence?' And I never got any evidence.'"

And neither did we.

Congratulations on getting a post in here, the propaganda pigeons have just about run out of real people to unload their wares on, so now they're dumping on each other. Not a pretty sight. Anyway, if the Radio Shack SWR meter can handle amateur power levels, there isn't any reason to remove it. At 10m the loss should be pretty small.
You could set up a test with a friend. Ask him to tell you your signal strength at his receiver, then remove or bypass the meter and ask again. Since 10m tends to fade, you might have to try that at least twice to confirm the difference. The closer the friend's station is to yours, the better - in the same town would be best.

No they don't. Churches in at least 3 Cdn provinces can read out the bans
of marriage on 3 consecutive Sundays and no licence required to have a
legal marriage after that (I have one of those nonlicenced one myself).

why are you comparing apples and tomatoes then?

the rules are clear, unless you have a license to operate in the section
from 27.405 - 28.000 (which I KNOW for a fact no one here does), you open
yourself up to litigation from the FCC, any commercial concern that may
have operating privileges there or even the military (which does have some
allocated spectrum there) this applies also for any frequency below 26.965
clear down to 12 meters (mostly commercial and marine band HF stuff).

you don't have the letter from the FCC saying you can operate there, its
the same as not having a license to drive a car on any street in america
(radio operations are a privilege, not a right and onyone spouting
otherwise really doesn't know what they are talking about).

if you want to show me where in the fcc rules it states that you can
operate there, be my guest. otherwise, stick to 11 meters (the class D
channels if you please) or get your ticket (amateur radio) and rgchew with
a bunch of us on bands you only dreamed of operating.

DE N7ZZT
Phoenix, Arizona

p. field day was a blast. I made several contacts on 6 meters from here to
south texas and even florida (on 25 watts and a homebuilt 2 element beam!)

> hear of the city of Sodom and Gomorrah? It is where the word "sodomy" came
> from.

Genesis 19 - God did not destroy Sodom and Gomorrah for being gay
because:

1. This story is clearly about an ATTEMPTED GANG RAPE, not about
sexual orientation, yet many pastors put their own spin/angle on this
story. "All the people from EVERY quarter" (v. 4) surrounded Lot's
house and tried to break down his door. This story is all about MOB
violence, humiliation and RAPE. There is no love or affection in this
story, as there is in any true same sex relationship. Had the rape
actually occurred it would probably have ended in murder, which was
the norm for that tribal society. Everyone except 10 people in sodom
and gommorah were violent barbarians- That's the lesson of Genesis 19.

2. Out of the 40 scriptures that refer to Sodom, NONE indicates
homosexuality as Sodom's sin. Here are some of those verses- Gen.
13:13, Gen.18:20, Gen.19:13, Deut.29:17-26, Deut.32:32-38,
Isaiah1:9-23, Is.3:8-15, Is.13:11-19, Jer.23:10-14, Jer.49:16-18,
Jer.50:2-40, Lam. 4:3-6, Ez.16:49-50, Amos 4:1-11, Zeph.2:8., and the
list goes on. Over time, biased people have attached a definition to
the word "sodomite" that never appears in scripture and that God never
intended.

3. JESUS speaks of Sodom's sin being INHOSPITALITY several times- Mark
6:10-11, Luke 10:10-12 and Matt.11:19-20. He draws a parallel here of
certain city's inhospitality exceeding even that of Sodom's
inhospitality, which according to Jesus was Sodom's most notable sin.

4. The men in the story were NOT GAY. Lot would not have offered up
his FEMALE daughters to the crowd if they were really gay and only
interested in men. 98% of all (not just prison) man- man rapes are
committed by heterosexuals. Rape is about cruelty and humiliation not
attraction. There is no evidence to suggest that "all the people" here
were gay. In fact the evidence AND common sense supports the
presumption that "all the people" here were heterosexuals. Besides,
the objects of the attempted rape were extra-terrestrials not men, its
possible that "all the people from every quarter" wanted to have sex
with them because they were intriguingly unusual, and not mere 'men'.

5. "ALL the people from EVERY quarter", "young and old" (ch19:4), the whole city participated in demanding sex from the 2 angels. However, it is statistically impossible that "all the people" could have been gay oriented. Therefore, God must have destroyed "all the people" for some other reason - barbarism, inhospitality, idolatry, pride, murder, promiscuity.

6. This encounter at Lot's door CANNOT be the CAUSE of Sodom's destruction because God had already decided to destroy Sodom BEFORE the attempted gang rape took place. The whole reason the 2 angels came in the first place was to warn Lot the city was going to be destroyed because of its PRE-EXISTING sins of not helping the needy, idolatry, murder --Ezekiel 16:49. Knowingly or unknowingly preachers create the illusion that this event is WHY sodom was destroyed, and that's either dishonest or just plain ignorant.

7. Judges 19:17-29 proves that it was common in that culture for heterosexual MEN to rape male foreigners and visitors, just like they did in Sodom. This story is exactly like Sodom. The MEN in Judges 19 surround the house, and initially request "to know" a MALE, but then they accept a FEMALE, proving that these stories had NOTHING to do with being gay and everything to do with barbarism. If Genesis 19 is a valid condemnation of homosexuality, than the story of Judges 19 has to be a valid condemnation of HETEROsexuality because they, unlike sodom, succeeded in raping and killing a female. Interestingly, nobody uses this account about Gibeah to denounce heterosexuality. Shouldn't we be calling heterosexuals those disgusting "Gibeahites" and the act of heterosexual sex "Gibeah"?

8. For thousands of years Sodom's sin was considered inhospitality, pride,idolatry. Not until around the 1st century A.D, did the story get twisted into being about sexual orientation. Sodom was a savage society. A city in which, Lot, one of the most godly people, offerred his own daughters to be gang raped. Then in the next chapter Lot allows himself to get drunk and gets his two virgin daughters pregnant. How about that for abominable?

9. The Bible presents Lot as "righteous", "just" in Genesis and in 2 Pet.2:7-8 and approves of Lot offering up his own daughters to be gang raped and treated as disposable property. So if modern enlightened Christians can see the error in that ancient mentality, why do so many people still hold to an equally outdated view of homosexuality? (Especailly since this passage is not even about sexuality but about violent savages.) Everything in the Bible is NOT currently applicable or, like "righteous" Lot, we'd still be bargaining with criminals by offering them our wives and daughters as marketable goods. Many Christians practice selective literalism and selective application of the Bible based on personal prejudices rather than interpreting the Bible objectively, consistantly and ethically.

4736. Microwave link testing

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 09:18:01 UTC
From: amr_gazzar@hotmail.com
Message-ID: <161bc9bb.0306300118.237e15ca@posting.google.com>
Source record: 65832

Im negotiating with my customer the fesibility and benifits of the 30 GHz spectrum analyzer to his microwave links .
My customer has many problems specially interference problems on his microwave links.

They have some questions which needs someone in the field:
1-the microwave tower is very high (50m) , so how they get the RF signal seen by the antenna Which is located at the top of the tower , how to get it to the spectrum analyzer?
How do people solve this problems?
Is there any cable supports such long distance carrying RF signal at 30 GHz?

For you to know the situation:
the RF is converted to the IF also at the top of the tower by mean of their Receivers?

2-So there is another question how would they connect between the Antenna and the receiver ?
Or they have to use another antenna with the spectrum analyzer?

5-Do we have any application notes about testing and troubleshooting Microwave links?

Thank you very much.

[snip]

Take your stupid truck driving trailor trash red neck fucking ass and do
this shit someplace else.

You are so ignorant that all you can do is parrot crap posted by someone
else.

Try doing something constructive, look out the broken front window of the
mobile and recount the number of rusted car bodies, washers and dryers.
Might just have enough to start that wrecking yard/laundermat.

Come on boy, squeal like a pig, we know you can do it.
--
You are a fluke of the Universe
You have no right to be here
And whether you can hear it or not,
the Universe is laughing behind your back

Thanks for posting this JJ. Got any more?

Check out 14.313. David Tolassi was allegedly prancing around his Vermont
town and waving a half-litre of champaign in celebration of the new ruling.
David was packing his bags (not to be confused with packing fudge) and was
last seen heading for the Canadian border. David invited his best friend,
W4NTI to accompany him as 'best man' but NTI told David that the only
wedding present he, Dan, would give David would be a bloody nose.
David is rather upset that a man cannot legally marry another man under our
current laws. Of course coming from a screwed up clown such as Davie this
comes as no surprise. Dan offered to "knock his dick straight" and goofy
David thought this was a proposition. Dan later explained what he meant and
little Davie became upset.
David said he was gonna install an HF rig in his Toyota so he could keep in
touch (no pun intended) with his Ham Radio buddies as he wended his way to

Canada and his date with imfamy.
Just think...by this time next week little Davie will again be on his way home and he will be sharing his Toyota with his beloved butt buddy. I wonder how the Preacher will pronounce that...."I give you mister and mister David Tolassi" or "I now pronounce you husband and husband."
The point is moot. Only their proctologist will be able to differentiate. David and his 'mate' will be unavailable for comment. They will be much too busy packing fudge.

You are joking, right? And what happens after the gay football games? You guys go to the showers and play Leap Frog, right? Turn up the CD players, dude. Put on some heavy rock...it drowns out the screams and moans after you guys do that pile-on thing. You guys want the crowds to think you are playing tackle football but we all know what really goes on in those pileups. That is why it takes the referees 45 minutes to disengage all of you.
Trouble with Gay Football is that everybody wants to be the Tight End. Sadly, nobody qualifies for the position.

4745. Berlin celebrates gay pride festival

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:39:04 UTC

BERLIN, June 29 (AFP) - Tens of thousands of gays and lesbians partied into
the early hours of Sunday as Berlin celebrated a quarter of a century of its
annual gay pride festival.
It followed a day of thumping music and festivities in a shrill and gaudy
parade through central Berlin that at its height drew more than 600,000 people
onto the streets, according to organisers.
The parade was launched by Berlin mayor Klaus Wowereit, who declared his
homosexuality two years ago and whose phrase then, "and it's just as good that
way," has become a symbol.
"There's no reason to hide," Wowereit, flanked by his partner, said as he
officially opened the 25th annual Christopher Street Day parade.
The parade was made up of some 60 lorries masquerading as colourful, often
eccentric and occasionally provocative floats, such as half-naked policemen in
leather and gold-painted men with nothing but a thong to hide their modesty.
The festival, which this year used the slogan "acceptance, not tolerance,"
is named after the 1969 clashes between police and homosexuals in Christopher
Street, New York.

4746. Hundreds march, hundreds watch in rare gay march in Calcutta

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:39:05 UTC

CALCUTTA, June 29 (AFP) - More than 100 people marched Sunday in a rare gay
rights parade in the eastern Indian metropolis Calcutta, braving the rain and
the glares of onlookers unsympathetic to their cause.
Carrying umbrellas in the rainbow colors of the gay rights movement, the
marchers held up banners urging more acceptance for sexual minorities,
including one saying "Let us love and be loved."
Armed police escorted the marchers through the muddy streets to avert
trouble. While Calcutta has had small gay "public walks" before, organizers
said Sunday's march was hoped to be Calcutta's most visible rally for
homosexual rights.
Hundreds got out of bed early to watch the parade, many out of curiosity --
and some clearly opposed to the march.
"We wonder what's happening in Calcutta, the seat of culture in India,"
said Suman De, a retired government servant who came upon the march as he
returned from a morning walk.
"Authorities should immediately stop such activities. Otherwise our youths
will be lost in the merry-making of the gays."
Sunita Agarwal, a housewife, said she watched the march from her home as it
was "unique."
"My son and daughter woke up early to watch the parade," she said.
Marcher Agniva Lahidi, said the rally was meant to show that "supporters of
the right to alternative sexuality have come out of the closet and they are
ready to make their presence felt in the city."
"We would like to send a message to our relatively conservative society,
where even kissing is frowned upon," Lahidi said.
Rafiquel Haque Dowjah, secretary of the gay advocacy group Integration,
said the march was part of a month of events in Calcutta to promote homosexual
rights, including a panel discussion, the launch of a newsletter and

artistic
events including a ballet and music video.
India's courts are reviewing laws that, while rarely enforced, make
consensual gay sex an offense punishable by up to 10 years in prison.
While there are few open homosexual communities in most of India,
the
western metropolis Bombay and the southern hi-tech hub Bangalore enjoy
reputations as more hospitable to gays and lesbians.

4747. Toronto goes gay for the weekend

Newsgroup: rec.radio.amateur.misc

TORONTO, June 29 (UPI) -- Tens of thousands of homosexuals are having a gay old time in Toronto this weekend for the 23rd annual Pride celebration.

More than ever, the city is welcoming the influx of tourists, the first major event since experiencing two outbreaks of Severe Acute Respiratory Syndrome.

The SARS publicity hurt the local economy for more than $1 billion. But fears of the apparently dormant disease had no effect on Dennis, a 24-year-old homosexual from Cleveland.

"I'm more likely to get killed by a drunk at home than I am to catch SARS," he told UPI. "This is a great city -- tell the world we fags appreciate this reception."

A recent provincial superior court ruling allows same-sex marriages in Ontario, and the visiting gay crowd is taking full advantage.

The city hall license office and chapel stayed open through the weekend, with more than 20 same-sex marriages processed, the majority from couples from the United States.

4748. 1.5 million turn out for Gay Pride marches

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:39:05 UTC

BERLIN, June 28 (AFP) - From Paris to Zagreb, one and a half million people
paraded through the streets of European cities on Saturday to celebrate
tolerance and equal rights for the gay community, organisers said.
More than 600,000 massed in the streets of Berlin for the 25th edition of
the Gay Pride parade, this year headed up by the city's mayor Klaus Wowereit,
who revealed his own homosexuality to the public in 2001.
Clutching a pink teddy bear and a bunch of red roses, Wowereit said the
march was both a celebration and a political event, aimed at furthering the
rights of the gay community.
"There is no reason to hide," said Wowereit, who publicly came out with the
snappy catchphrase, "I'm gay and it's just as good that way", which has since
become a rallying cry for the gay community.
Festooned in bright colours, 60 floats and a crowd of scantily-clad
paraders headed towards the city centre to listen to speeches later in the
evening.
In Paris, between 500,000 and 700,000 people joined the annual march,
organised by the lesbian, gay, bisexual and transexual communities, as it
wound up through the city centre to the Place de la Republique, organisers
said.
In a carnival atmosphere, wearing everything from a green butterfly suit to
a sailor's outfit or Venetian mask, the paraders marched under a canopy of
balloons, brandishing banners demanding equal rights for their community.
The march had high-profile backing from a number of personalities,
including Paris mayor Bertrand Delanoe -- himself gay -- former culture
minister Jack lang, and the first right-wing lawmaker to officially join the
parade, Jean-Luc Romero.
Delanoe called for the adoption of a law criminalising homophobic acts and

remarks, saying it was time for parliament to act against homophobia.
Former Socialist prime minister Laurent Fabius stressed the
importance of
furthering gay parenting rights, and suggested taking constitutional
measures
to guarantee those rights.
"It would be good to show that the French people are against all
forms of
discrimination and homophobia in particular," he said at the march.
In Vienna, some 200,000 people, many festooned in the rainbow
colours of
the gay community, marched to celebrate homosexual rights and urge the
government to act against discrimination.
In the Croatian capital Zagreb, some 200 people gathered for the
country's
second ever Gay Pride march, parading through the city centre under a
rainbow
banner, and with a tight police escort.
The march, organised by two Croatian gay organisations, was more a
political rally than a celebration, with many bystanders in this
fervently
Catholic society visibly hostile towards the demonstrators.
Meanwhile in France, a new survey showed that tolerance towards
homosexuality is on the increase.
Sixty-one percent of people said they would react well if they
discovered
their child was homosexual, up from 41 percent in 1995, the survey
carried out
by polling institute IFOP and published by Le Monde newspaper revealed.
Conversely, 36 percent of people would react badly to the news, down
from
56 percent eight years ago, the results showed.
Fifty-five percent of reposndents were in favour of homosexual
marriages,
although 59 percent would deny homosexual couples adoption rights.
Responses varied considerably by age group, with 60 percent of 15-
24
year-olds in favour of gay adoption rights, compared to 18 percent of
over
65s, according to the survey of 1,019 people conducted in June.

NEW YORK, June 29 (AFP) - Tens of thousands took to the streets of New York
on Sunday for the 34th annual Gay Pride Day, with celebrations sweetened by
the US Supreme Court decision to knock down laws banning gay sex.
"I'm so emotional about all this stuff going on. We've been working so hard
for so many years," parade co-director Tom Hom said.
Organizers refused to predict attendance, but the parade, which usually
attracts close to half a million, could top that number, buoyed by recent
victories for the movement.
"I'm so excited and joyous, but I know there's more work left to be done,"
Hom added.
The march in New York, one of the biggest in the world, was given added
impetus by the ruling by the United States' highest court that sodomy laws
were unconstitutional.
The march started at noon along Fifth Avenue and headed south toward
Greenwich Village, site of the 1969 "Stonewall rebellion" against the
repression of homosexuals. The movement grew, spawning pride parades in many
US cities and around the world.
"When we come to events like this we get to be reminded of how diverse the
population is," said one marcher.
"Some day the rest of the country is going to recognize the relationship.
and I think that is really one step in that direction."
Gay and lesbian couples are also savoring Canada's recent decision to allow
same-sex marriages. The US magazine Newsweek asked on its cover: "Is Gay
Marriage Next?"
Conservative politicians stepped up to voice their opposition to same sex
marriages however.
"Marriage is a sacrament ... traditionally in our Western values has been

defined, as between a man and a woman," Bill Frist, the head of the Republican
majority in the Senate, told ABC television Sunday.
On Thursday, the US Supreme Court struck down state laws banning gay sex
between consenting adults, even in private.
The court decided that Texas could not punish two men arrested for having
sex in a private apartment. The Supreme Court decision was acclaimed by gay
rights groups but bitterly condemned by conservatives.
"The state cannot demean their existence or control their destiny by making
their private sexual conduct a crime." the court said in its 6-3 decision,
which struck down similar laws in all 13 states, some of which punished acts
of oral or anal sex.
Texas was one of four US states where it had been a crime for members of
the same sex to engage in sodomy. In Texas this was defined as oral or anal
sex.
The challenge to the Texas statute started after sheriff's deputies in
Harris County arrested John Lawrence and Tyron Garner when they were
discovered having sex in Lawrence's apartment in September 1998.

4751. US senator backs amendment to bar gay marriage..Get rid of him

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:46:06 UTC

WASHINGTON, June 29 (AFP) - Senate Majority Leader Bill Frist said
Sunday
he would support an amendment to the US Constitution to ban same-sex
marriages, days after the nation's highest court struck down state
sodomy laws.
Frist told ABC's "This Week" program that he "absolutely" supports
a
constitutional amendment that would define marriage as being between a
man and
a woman.
"I very much feel that marriage is a sacrament, and that sacrament
should
extend and can extend to that legal entity of a union between, what is
traditionally in our Western values has been defined, as between a man
and a
woman," he said.
US law already defines marriage as between one woman and one man
for
federal purposes, and allows states to decide not to recognize same-sex
marriages performed in other states.
No US state currently allows gay marriage, but the northeastern
state of
Vermont allows civil unions for same-sex couples.
The debate in the United States reignited after Canada announced
earlier
this month it would legalize gay marriages, which would be available to
Americans who cross the border for the ceremony.
Then the US Supreme Court on Thursday struck down state sodomy laws,
in a
decision that conservative lawmakers believe could pave the way for gay
marriages in the United States.
Conservative members of Congress have proposed an amendment banning
gay
marriage, but constitutional changes require enormous support to pass.
Two thirds of both houses of Congress must approve the measure,
which then
needs support of at least 38 of the 50 state legislatures to take
effect.

RIO DE JANEIRO, June 29 (AFP) - About 100,000 people took part in Rio's Gay
Pride parade Sunday along the edges of the famous Copacabana beach, according
to police figures.
The parade kicked off with a rendition of the national anthem, then broke
into dancing to carnival-style music.
Organizers said they wanted to expand the event to become an expression
against discrimination. "We want it to be a big party for citizens opposing
discrimination of whatever type," said Rainbow group president Claudio
Nascimento.
Brazilian government official Luiz Eduardo Soares told the rally,
"Intolerance is one of the sources of violence; this pacifist, libertarian,
civic demonstration proves that all manner of love is alright."
Rio deputy Fernando Gabeira of the ruling Workers Party (PT) noted that a
bill launched by Sao Paulo mayor Marta Suplicy had been debated in the
national assembly relating to the registering of civil same-sex marriages.

Anyone who's ever seen an episode of Farscape know's the real star of the late,
lamented series was the various curves & bulges in the leather pants of it's
leading man BEN BROWDER.
A petition is currently on PetitionOnline.com addressed to the editor-in-chief
of Playgirl magazine requesting that the magazine should consider approaching
the representatives of Mr. Browder regarding making him an offer to pose for a
nude centerfold.
Please note this petition will only be online until 8/31/03. Anyone interested
in adding their name to this worthy cause can link to the petition here:
http://www.petitiononline.com/beninpg/petition.html

Stranger wishes have come true thanks to the power of petitions. We at the Ben
Browder Fantasy Forum heartily recommend that all who may be interested add
their signatures.

..And while You're at it, why not check out the Ben Browder Fantasy Forum?!
We're a Yahoo! Group devoted to the gawking at photos of and discussing the the
Heavenly body of the hunky Farscape star. You can link to us here:

WASHINGTON, June 29 (UPI) -- The Senate majority leader Sunday came down hard on the Supreme Court's ruling on gay sex and voiced support for a proposed constitutional ban on gay marriage.
The high court Thursday struck down a Texas law banning sodomy among consenting adults in private homes. In its ruling, the court said the law violated privacy rights.
Sen. Bill Frist, R-Tenn., told ABC's "This Week" that the ruling could lead to the condoning of "prostitution or illegal commercial drug activity in the home."
He said the justices "overstepped their bounds" and issues regarding morality should be left to state legislatures.
Frist also told ABC's "This Week," he "absolutely" supports a proposed constitutional amendment banning gay marriages in the United States.
The amendment was offered by Rep. Marilyn Musgrave, R-Colo., and was referred to a House Judiciary subcommittee one day before the Supreme Court ruling on sodomy was issued.

4756. Visitors in Toronto for Gay Pride

Newsgroup: rec.radio.amateur.misc

TORONTO, June 29 (AFP) - Thousands of visitors descended on Toronto Sunday
for the city's annual Gay Pride parade, traditionally one of the world's
largest host cities of the gathering but recently affected by a SARS epidemic.
The parade was the climax of a week of celebrations, with gays and lesbians
exuberant after Canada's Court of Appeal struck down the federal definition of
marriage as being solely between a man and a woman.
The parade also allowed Toronto to recover some of its cheer, following a
decline in tourism due to the epidemic of severe acute respiratory syndrome
(SARS) which has left 38 dead.
But police and organizers declined to say how many people were present.
Last year, organizers said one million people attended the Toronto Gay
Pride parade.
This year's event followed on from last week's historic ruling deciding
that the federal definition of marriage went against Canada's Charter of
Rights and Freedoms.
The move gave the go-ahead for Ontario city clerks to begin registering
same-sex marriages.
Toronto's city clerk's office was to stay open during the weekend for
couples -- including same-sex couples -- to fill out a marriage license
application, also keeping its wedding chamber open for ceremonies.
Around 250 same-sex couples have married in Toronto since it became legal
to do so June 10.
Elsewhere, only the Netherlands and Belgium have legally recognized
same-sex marriages.

4757. Britain moves to give gays same rights as married couples

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:52:07 UTC

LONDON, June 30 (AFP) - Gays and lesbians in England and Wales would enjoy
the same legal rights as married couples under proposals to be released Monday
by the British government.
If adopted by parliament, the reforms will create civil partnerships to
give homosexual couples pension and property rights, so long as they sign an
official registration document.
It would also give next-of-kin rights in hospitals, allow gays to benefit
from a deceased partner's pension, and exempt them from inheritance tax on a
partner's home.
"We are delighted that a long overdue step is being taken by the
government, said Ben Summerskill, chief executive of the gay rights group
Stonewall.
"Hundreds of thousands of gay people are in stable, long-term
relationships, but still don't have the same rights as many others," he said.
"It's not just social status that matters, like the right to visit each
other in hospital, but the right to share a partner's pension, for example --
which is something available to every heterosexual."
The Daily Telegraph reported that the proposals were backed by Prime
Minister Tony Blair and a Bill could be introduced into parliament this year.
The plans -- which would not cover Scotland, because it sets its own laws
for civil relationships -- were to be published by deputy minister for women
and equality, Jacqui Smith.
But another gay campaigner, human rights activist Peter Thatchell, called
the proposals "heterophobic" because they fail to cover all unmarried couples
-- straight as well as homosexual.
"Cohabiting heterosexuals also lack legal recognition and protection,"

Thatchell said. "This is a grave injustice."
The government's blueprint was not expected to use the term "gay
marriage".
But the proposed civil partnerships are likely to be as close to a
marriage
contract as possible.
It is thought partners would even be able to dissolve the agreement,
in a
form of "divorce".

4760. Should the church accept gay clergy?

Newsgroup: rec.radio.amateur.misc
Date: 2003-06-30 10:58:07 UTC
From: Lord Floyd <nospam@biteme.invalid>
Message-ID: <VNAUK3PX37802.5385532407@Gilgamesh-frog.org>
Source record: 65656
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur.misc

The Sunday Times - June 22, 2003

Focus: Loose canon - Christopher Morgan and Jonathan Ungoed-Thomas

Should the church accept gay clergy?

"The boy from the Welsh valleys was tubby with red hair. The lad from Durham was leaner and darker. Both wanted to be priests and both were ambiguous about their sexuality. When they met at a theological college in Oxford 27 years ago, it was a defining moment in their lives. They have been in a loving relationship ever since.

However, that has now triggered another defining moment. The appointment of one of them, red-haired Canon Jeffrey John, as a bishop has provoked a potentially catastrophic row within the Church of England about the large number of homosexuals among the clergy.

Although John's "life partnership" with his friend from Durham, Grant Holmes, is the cause of the dispute, the man at the heart of it is Rowan Williams, the new Archbishop of Canterbury.

The large and active evangelical wing of the church, which argues that the Bible condemns homosexuality, suspects Williams of a liberal agenda to promote gay priests.

In turn Williams denies being behind John's appointment as Bishop of Reading - an auxiliary post within the diocese of Oxford - but he is determined to go ahead with it. Liberal members of the church hope that by facing down the conservative evangelicals, Williams will enable many gay priests to come out of the closet.

The battle is not only about homosexuality. About one-third of England's clergy are broadly evangelical and have long warned that the liberalisation of the C of E will cause "anarchy and division". Ranked against them, the liberal clergy believe the church must modernise or risk becoming obsolete.

The gay issue has replaced the ordination of women as the key factor in this long feud - and it is proving so bitterly divisive that churchmen on both sides fear it will destroy the 470-year-old institution.

HOW has it come to this? After all, homosexuality is now broadly accepted in British society. There have been openly gay MPs in the cabinet and it will hardly be news to anyone that there is a large number of gay vicars in the C of E.

"I would estimate that up to a third of the Church of England's clergy are gay," said an insider. "Of those nearly half are in some sort of partnership. But a majority keep that a secret and some go to extraordinary lengths to disguise their relationships."

As one senior clergyman noted last week: vThe Church of England is good at talking about truth, but hopeless about honesty."

Peter Stanford, a writer on religious affairs, points out: "Go on the annual Anglo-Catholic pilgrimage to the Marian shrine at Walsingham in Norfolk and you enter a high camp world where every priest has a 'name in religion' - ie a woman's name."

"Until now these gay vicars have been out, but not quite out. So while they're happy to go to church functions with their partners as a couple, they don't greet parishioners on the steps of the church on Sunday with 'Hello, I'm the gay vicar - meet my boyfriend'."

John is not the first homosexual to be appointed as a bishop. Church sources say that the closet gays on the senior staff of the diocese of London include a bishop, an assistant bishop, three archdeacons and a senior adviser.

Such men live under the constraints of a doctrinal fudge that the church reached in 1991 in a document called Issues in Human Sexuality, which proscribed homosexual activity among the clergy but not among the congregation.

"Issues in Human Sexuality said it is okay to be gay and have sex if you're in the pews but only to be gay if you're in the pulpit - hardly, you might think, a recipe for a happy, fulfilled life and ministry," said Stanford.

Williams is known to regard it as intellectually dishonest. At least 15 diocesan bishops ignore the document and continue to ordain gay priests.

One irony in the dispute is that, while openly gay, John says he abides by Issues in Human Sexuality and that he and Holmes do not have a sexually active relationship.

Nor is he a gay activist. He said last week: "I have never campaigned about homosexuality, but I have never lied about it or tried to hide it. I have never gone out of my way to talk about it. People gradually catch on."

This does not satisfy his critics, however. Graham Dow, the fundamentalist Bishop of Carlisle, led the attack last week expressing "deep concernv. On Friday clergymen lobbied Richard Harries, the Bishop of Oxford, who is directly responsible for John's appointment, to ask him to change his mind. If he does not, the evangelicals say it will cause a permanent split in the C of E.

The campaign against the appointment is not confined to Britain. Peter Akinola, the evangelical Archbishop of Nigeria, has warned that it could break up the worldwide Anglican church; and Remi Rabenirina, the

Archbishop of the Indian Ocean, was quoted yesterday as saying: "Homosexuality is just filthy."

They were among 14 overseas Anglican primates who earlier this month denounced a Canadian bishop for approving the blessing of a homosexual relationship. They signed an angry letter warning of a worldwide schism. "The clear choice has to be made between remaining a communion or disintegrating into a federation of churches," they said.

Stanford sees a schism as not the only danger. "If Jeffrey John does not drop out, then we may have two Churches of England and an end of the Anglican communion as one big happy family meeting at Lambeth every 10 years," he said. "Yet if he does, there could follow a witch-hunt against those all-but-out gay vicars who are living in contravention of the 1991 guidelines. Such a crusade would decimate clerical ranks."

A FURTHER element in this affair is that after Williams was selected as Archbishop of Canterbury last summer, John was considered - and rejected - as his successor as the Bishop of Monmouth. A senior source in the diocese revealed last week that John was rejected because he was openly gay. It was realised "after consultation" that the appointment was likely to cause deep consternation in the clergy, if not outright rebellion.

So how is it that he has now been made a bishop? The answer lies in a Dickensian building behind Westminster Abbey. This is where Tony Sadler, appointments secretary to the archbishops of Canterbury and York, has his office.

Sadler, a donnish-looking figure, is almost unknown outside the Church of England; but insiders realise the immense influence he wields along with William Chapman, the prime minister's appointments secretary. Between them they help to fill the highest offices of the church in England, but not Wales.

Sadler, who is married with three grown-up daughters, is a former churchwarden at St Luke's church in Kew, southwest London. He will soon be retiring.

He has long had a star against John's name in his list of potential candidates for promotion. Although not the most gregarious member of the clergy, John was seen as able, amenable and a gifted preacher. He went to Hertford College, Oxford, to study classics and modern languages before entering St Stephen's House theological college.

In his 25 years as a priest he had acquired a reputation for being able to maintain the historical traditions of the church while also reaching out to a wider public. He was vicar of Eltham, south London, before becoming canon theologian at Southwark Cathedral.

His roots were in the traditionalist Anglo-Catholic wing of the church, but he was also part of the Affirming Catholicism movement, a liberal group of clergy and lay people in favour of women's ordination and gay

clergy.

In March this year Sadler had to compile a list of "seven or eight" potential candidates for the vacant post of Bishop of Reading. There was no doubt that John was a formidable candidate. Should he be ruled out because he was also openly gay? No, thought Sadler.

"My understanding is that we are not in the business of discriminating on the grounds of sexual orientation," he said last week. It was, he added, an impartial decision and one motivated to find the best candidate for the post.

The shortlist was passed to Harries, who is known for his liberal views. After consultation with other bishops he chose John - who was subsquently endorsed by Downing Street.

Sadler came under attack last week from George Austin, the former Archdeacon of York, who complained that the appointments secretaries "see it as their mission to push their liberal agenda forward. There is a clear discrimination against those who oppose the liberal agenda. Until recently the big question was: are you pro-women? Now the question seems to be: are you pro-gay?" Sadler denies pursuing any agenda: "I put Jeffrey's name down on my list because his gifts and experience fitted the job description. As the Bishop of Oxford (has) made absolutely clear, it was his judgment that Jeffrey was the right person."

He says he did not tell Williams about putting John's name on the list. The first that the archbishop knew about it was when Harries informed him of his choice. By then the fuse was already lit.

Nonetheless, some evangelicals suspect that Williams was one of the prime movers behind what amounted to an ecclesiastical ambush. They view him with suspicion and are well aware of his dissatisfaction with church policy on homosexual priests.

Renowned for his deft popular touch, Williams has not publicly entered the dispute. But even if he was not the driving force behind John's appointment, he has endorsed it; and he now has to perform the delicate balancing act of seeing it through without causing the dismemberment of the church.

Williams hopes that he can defuse the issue by private consultations. But there is already concern in Church House, the C of E's headquarters, that the most fundamentalist of the evangelicals may publicly defy him at the ceremony to ordain John a bishop, which will take place at Westminster Abbey in October.

During the service Williams will address the assembled ranks of clergy with the words: "Those who have authority to do so have chosen Jeffrey as a man of godly life and sound learning to be a bishop in the church of God. Is it therefore your will that he should be ordained?" The reply should be: "It is." The nightmare in Church House is that, instead, the cry will go up: "It is not."

4761. Church of England admits it has already ordained two gay bishops

The Sunday Times - June 22, 2003

Church of England admits it has already ordained two gay bishops
Christopher Morgan

"TWO GAY clergymen were appointed bishops in the Church of England in the 1990s without encountering objections, it has emerged.

The appointments were confirmed by senior church sources last week as they tried to quell the row over the appointment of Canon Jeffrey John as Bishop of Reading.

Rowan Williams, the Archbishop of Canterbury, is understood to be perturbed by the double standards and has told aides he is committed to ordaining John. Williams is said to be "steeled" for a confrontation with the church's evangelicals.

One aide said: "This is an appointment endorsed by the archbishop, approved by Downing Street and commanded by the Queen. The archbishop would have to resign if he did not ordain John."

Church sources said last week that gays held positions throughout its hierarchy, including the two bishops ordained in the 1990s. Williams wanted a reasoned debate on the issue, they said. He sympathises with liberal elements of the church who are angered that many churchmen are forced to conceal their sexuality.

It is understood that Williams believes the church's policy on gays, outlined in a 1991 document, is "fundamentally flawed". The row over John's appointment will be used as an opportunity to debate the policy.

His ordination is due to be conducted by Williams at Westminster Abbey on October 9 and could prove to be highly embarrassing. As part of the ceremony Williams must ask the congregation: "Is it your will that he (John) should be ordained?" The congregation must answer: "It is."

Tony Sadler, the archbishop's appointments secretary who shortlisted John for appointment by the Bishop of Oxford, said: "We are not in the business of discriminating on grounds of sexual orientation."

Sadler, one of the archbishop's most senior aides, has not previously spoken about the furore and his comments will cause fresh anger among evangelicals.

Debate is likely to focus on the church's 1991 document Issues in Human Sexuality. David Jenkins, the former Bishop of Durham who helped write it, admitted last week that the policy was flawed.

"It was obviously a fudge, but we got away with it, and that's often how things are kept together," he said.

The problem for the church is how to reassess the policy without causing the break-up of the Anglican communion. Peter Akinola, leader of the Anglican Church in Nigeria, has threatened to split from the church over John's appointment.

In Britain, dozens of clerics and lay readers have said they may break from the Oxford diocese if John's appointment is not rescinded. Nine bishops in England have signed an open letter condemning the appointment but eight bishops have voiced support for John.

4762. A radical idea whose time has not come

Jun. 26, 2003 - A radical idea whose time has not come
By Hillel Halkin, The Jerusalem Post

One shouldn't, I suppose, disagree in public with one's editor-in-chief. Yet I feel, with some trepidation, the need to take issue with Bret Stephens, who, writing in last Friday's Jerusalem Post, implicitly called for - in the context of its recent legalization in Canada - gay marriage in this country.

In a column on "Gay Pride - and Israel's" (June 20) Stephens wrote: "To preserve existing legal barriers against gays would only perpetuate a gay subculture that is both neurotic and alienating. The only decent conservative alternative is to insist that gay men and women join the social and cultural mainstream - and to enact the policies [e.g., gay marriage] required for them to do so."

My trepidation, I must say, isn't really about disagreeing with the Post's editor. It's about writing on an issue - homosexuality - that is so sensitive, so emotionally loaded, and so freighted with historical, cultural, anthropological, political, and philosophical complexities that it's no mystery to me why I've never addressed it in writing before. One's sense of caution keeps one away from such things.

And yet one mustn't be too cautious when one feels strongly about something said by someone one respects.

The institutionalization of gay marriage strikes me as a mistake, and the fact that it is beginning to spread in the democratic world, and may eventually become universal, does not make it less of one. It is a mistake in Holland, a mistake in Vermont, a mistake in Canada, and it would be, I think, a mistake - though, fortunately, one that is not currently on the national agenda - in Israel.

I don't think that having such an opinion necessarily makes me prejudiced against homosexuals - at least not as individuals. But it does make me prejudiced for heterosexuals - at least as a group. And this is a distinction that needs to be made.

The real question about the place of homosexuality in contemporary society is not whether it is "sinful" (although, in a profound sense, it may be); nor whether it is "unnatural" (which, in terms of anatomical design, it certainly is); nor whether it is "immoral" (the case for which is hard to make in regard to consenting partners).

The real question is not about homosexuality at all. It is about heterosexuality, and whether or not it is a positive social value.

It has been such a value just about everywhere in the past. There have been, among the thousands of societies known to historians and anthropologists, those that have condemned homosexual behavior, those that have tolerated it, those that have found special roles or niches for it, and even those, like Plato's Athens, that have romanticized it. Yet there has been no society before the late 20th century that has not, in its institutions, laws, customs, and attitudes treated heterosexuality as a self-evidently preferable way of living for most men and women, just as there has been no society that has considered all sexual orientations to be of equal worth.

There are obvious reasons for this. Procreation, fatherhood, motherhood, family life, and a division of social functions between the sexes have always been at the heart of the human experience, and these are all naturally predicated on heterosexuality. Since human life in the past was unimaginable without them, heterosexuality as a social norm has been a defining feature of human life, too.

Which is, of course, a major part of the argument for dropping it as a social norm now. We are living in a historical epoch, say the proponents of gay marriage and institutionally equalized homosexuality, in which the world is overpopulated and needs fewer children rather than more; in which the family is less central than ever before; in which feminism has largely eliminated the economic and social differences between men and women; and in which procreation itself has become a technologically manipulable process that can make a father or mother out of anyone. Why not recognize, then, that an individual's sexual orientation is no longer of any concern to society, which should treat all such orientations on the same basis?

This is not an unintelligent argument. But it is an intelligently radical argument, not, as Bret Stephens calls it, a "decently conservative" one.

What, after all, in its deepest sense, is conservatism as a political philosophy about? It is not about social classes, or individual freedoms, or taxation, or foreign policy, or specific subjects like these, even though it may have much to say about them. It is rather about the value of the accumulated wisdom and experience of mankind. It is a philosophy that says:

"The human race has come a long way in the course of its history - but it has, until recently, come that way very slowly, adding gradually to what it knows and making small, incremental changes in how it lives, so that no drastic damage that cannot be corrected is done to the fragile fabric of human society and the human psyche. In the past two centuries, however, starting with the Industrial Revolution, these changes have become exponential and enormous, altering human life to the core. Since we do not know how much more this core can withstand before it crumbles or turns into something else, let us keep the rate of change down as much as possible before we do any more rashly irreversible things that may, when it is already too late, be eternally regretted."

It is not conservatism to change, within the space of one or two generations, everything that thousands of generations before us have thought and done in terms of sex. It is radicalism. And to take the institution of marriage, which has nearly everywhere and always been the human race's way of recognizing the unique bond between a man and a woman, and to extend it to two men or two women is radicalism at its most extreme.

No rational soul would call for the persecution of homosexuals in a democratic society, or for denying them the same access to jobs, housing, education, and so forth, that heterosexuals have. But marriage, although it may have its economic advantages, is not a job or a house. It has traditionally been, and still is in much of the world, and to many people in Israel, a sacrament, a way of saying: "We believe that this is the best way for two people to live and for society to organize itself." To say that it makes no difference whether these two people are of the opposite sex or of the same sex is to say that heterosexuality is no longer a social value, and that society has declared itself neutral and uncaring as to whether its members practice it or not.

I suggest we think very carefully - not once, not twice, but a thousand times - before saying that.

The Sunday Times - June 22, 2003

Ringo's lesbian stepdaughter to marry lover - John Harlow, Los Angeles

"AS Nelle Porter, the cold-hearted blonde lawyer known as the Ice Princess in the television series Ally McBeal, Portia de Rossi inspired both loathing and lust among viewers. Now, as she prepares to marry her lesbian lover Francesca Gregorini, the stepdaughter of the former Beatles drummer Ringo Starr, the Australian actress has been transformed into an unwitting heroine for American gay women who are demanding marriage rights.

The wedding of de Rossi, 30, and the 34-year-old singer-songwriter daughter of the former Bond girl Barbara Bach, is expected to take place in the next few months. De Rossi has said she wants children and Starr has given his blessing to the match, telling friends he and and his wife are looking forward to grandchildren.

Last week's decision by the Canadian government to allow gay marriages has raised the possibility that the wedding may be held in Starr's seaside house in Vancouver.

The couple, who met two years ago, have colourful pasts. De Rossi dropped out of law school in Sydney a decade ago and divorced her husband, an Australian film technician, to find fame in Hollywood.

Her first big role was opposite Hugh Grant in the 1994 film Sirens. Asked whether they were having an affair, Grant replied: "Do you have any idea how funny that rumour is?" The remark was not widely understood for several years.

Gregorini, the Roman-born daughter of an Italian industrialist, went to university in New England with the daughters of Diana Ross and Jane Fonda. Then she started a boutique with Carolina Herrera and Tatiana von Furstenberg, both daughters of renowned fashion designers.

There was a turbulent side to her. Starr reportedly sent her home from a rock tour after she started a lesbian affair with a musician. Earlier this year, however, Gregorini - who says she became a lesbian at 19 - bought a £1.5m house with de Rossi in the fashionable Los Angeles district of Los Feliz.

"She is putting her wild days behind her," said a business associate. "They are wearing matching platinum rings and have gone shopping in Bond Street in London with Barbara Bach, and now we are waiting for them to set the date."

So is America's gay press. "Straight people have had Brad and Jennifer: this will be our first big celebrity wedding," said an editor on The Advocate, a gay magazine.

Canada is the third country, after Belgium and the Netherlands, to allow gay marriages. The British government plans to extend tax, pension and property rights to homosexuals who register long-term relationships.

In the United States, by contrast, such changes are introduced one state at a time, always following court actions led by women. Since the state of Vermont allowed a civil ceremony three years ago, two-thirds of the 5,600 same-sex couples who have married have been female.

Most surveys suggest there are twice as many gay men as women, a conundrum that has baffled biologists, but this is changing. In 1998 a National Opinion Research Center poll found that 3.3% of American men described themselves as gay, compared with 2.1% of women. A forthcoming update is expected to show near-parity.

Celebrity weddings such as de Rossi's may encourage more lesbians to acknowledge their sexuality. Dr Ronnie Sanlo, a social researcher, said prominent gay women, such as Mary Cheney, daughter of Vice-President Dick Cheney, and Chrissie Gephardt, daughter of Dick Gephardt, the Democratic presidential candidate, already symbolised a higher public profile for lesbians in America.

"We may end up with gay marriages in places such as Massachusetts - which is expected to legalise it over the next few weeks - which are not recognised in other states, just like marriages between people of different races a few years ago," she said. "Maybe one day people will look back and ask what the fuss was all about."

4765. Gay pride - and Israel

Jun. 19, 2003 - Gay pride - and Israel's
By Bret Stephens, The Jerusalem Post

Today, June 20, gay and lesbian Israelis will parade through Jerusalem's streets, from City Hall to Independence Park. The march was supposed to have taken place last week; it was postponed after one of its organizers, 47-year-old American immigrant Alan Beer, was murdered by a Hamas suicide bomber aboard Bus 14A.

For those of us who devote a good amount of thought and breath defending Israel from various calumnies - particularly those coming from the hard Left - the fact that this march is taking place at all is excellent news. So Israel is a theocratic state? Show me an equivalent march taking place in Iran or Saudi Arabia. So the Israeli army is an instrument of Fascist oppression? Maybe, but gays and lesbians serve in the IDF's ranks without formal discrimination - more than can be said for the US armed services.

Why, then, should those most opposed to this march be the same people, more or less, who are most ardently "pro-Israel"?

"This is a disgusting parade which has no place in a Jewish state," said Itamar Ben-Gvir, a spokesman for the outlawed ultranationalist Kach movement who also confessed to taking down 30 rainbow-striped flags in downtown Jerusalem. "The gay and lesbian community is a marginal, fringe group, and they must not be given a public stage," added MK Nissim Ze'ev of the haredi Shas party.

I know at least a few people who'd argue that it is Ze'ev and Ben-Gvir, not Beer, who represent a "fringe." But put that argument aside. The question is, when we boast that Israel is "the only democracy in the Middle East" (Turkey honorably excepted), what are we really saying? Exactly how does it distinguish us from our neighbors and enemies? And what obligations does it impose upon Israelis, gay and straight?

One way to get at these questions is to point to what we're not. For starters, we're not a country that treats homosexuals the way the Palestinian Authority does.

A few months ago, watching the news in the run-up to the Iraq war, I spotted a couple of demonstrators marching to a "Queers for Palestine" banner. Note the preposition. While most of the antiwar marchers were merely against war (even if this meant keeping Saddam Hussein in power), these two were for Palestine. I spent the remainder of the

evening trying to think of the nearest equivalent. Blacks for the Old South? Jews for the Ayatollah? "Recovered" homosexuals?

In fact, "recovered" is what Palestinian gays must be if they are to survive in "Palestine." As Yossi Klein Halevi wrote last August in The New Republic, Islamic law prescribes five separate forms of death for homosexuals. To these, the Palestinian Authority adds several of its own. In the West Bank city of Tulkarm, Halevi reports, a young Palestinian homosexual he calls Tayseer "was forced to stand in sewage up to his neck, his head covered by a sack filled with feces, and then he was thrown into a dark cell infested with insects and other creatures he could feel but not see... During one interrogation, police stripped him and forced him to sit on a Coke bottle. Throughout the entire ordeal he was taunted by interrogators, jailers, and fellow prisoners for being a homosexual."

Tayseer's story is one of hundreds. Halevi also tells the story of one Palestinian homosexual who was put in a pit in Nablus and starved to death over Ramadan; of another whose PA interrogators "cut him with glass and poured toilet cleaner into his wounds"; of a third who lives in fear of his life from his brothers. "It's now impossible to be an open gay in the PA," says Shaul Ganon of Aguda-Association of Gay Men, Lesbians, Bisexuals and Transgender in Israel.

All this is of a piece with the broader treatment of homosexuals throughout the Muslim world. The Taliban used to put homosexuals to death by collapsing a wall on them. In Malaysia, the maximum penalty for sodomy is 20 years in prison and "mandatory whipping." In Egypt, an increasingly severe crackdown on homosexuals is now entering its third year. In April [2003], Brazil put forward a gay-rights resolution at the UN Human Rights Commission; Muslim countries successfully filibustered it.

And so on. Of course, everybody knows this, though nobody talks about it much. And of course, everybody knows that Israel is a comparatively receptive place for gays and lesbians, though nobody talks about it much, either. Along with South Africa, France, Ireland, Canada and Spain, Israel has been in the forefront of granting legal protections against discrimination based on sexual orientation. So when we say, "We are the only democracy in the Middle East," we are not simply making a statement about our political structure, but about social and cultural attitudes. We are a typical Western state. Nothing demonstrates it better than today's march.

"Typical," however, is also problematic. Typical Western states also mass produce and widely disseminate pornography, ingest gigantic quantities of narcotics and generally suffer every plague of affluence. The gay-rights movement, some argue, belongs in this category.

I don't buy this for a second. But I appreciate why the argument is made. "Gay-Pride Parade Sets Mainstream Acceptance Of Gays Back 50

Years," went a headline a few years back in The Onion, a satirical newspaper. "'I'd always thought gays were regular people, just like you and me, and that the stereotype of homosexuals as hedonistic, sex-craved deviants was just a destructive myth'" the paper "quoted" Hannah Jarrett, a fictional 41-year-old mother of four. "'Boy, oh, boy, was I wrong.'"

The Onion gets it exactly. For decades, the basic problem with the gay-rights movement has been that it tended to make opposite demands. It rightly insisted on mainstream acceptance and equal protection of the laws. Insanely, it then proceeded aggressively to flaunt its every difference. The aim, it seemed, was not to join a mainstream in the manner of the black civil rights movement or feminism, but to overthrow the very concept of "mainstream."

The result was to confirm every lurid prejudice about gay life. Sexually promiscuous? Emotionally unstable? Morally suspect? Politically radical? The icons of gay life in the 1970s and 1980s, from Michel Foucault to the Village People to Calvin Klein, all giddily seemed to answer yes.

My guess is that the way in which the gay-rights movement pursued its agenda set it back by at least a decade. That both the IDF and the British military allow openly gay service members ought to have been enough to show that the US armed forces could have done the same - but the gay community bears its share of the blame for making its case such a difficult one to make. Ditto for gay marriage, which only this week was legalized in Canada: This was something that ought to have happened ages ago, if only more of the gay community had been demanding it back then, and if (male) gay relationships did not have a reputation for being so fickle.

Now this is changing. As Andrew Sullivan writes, among gays "a need to rebel has quietly ceded to a desire to belong. To be gay and to be bourgeois no longer seems such an absurd proposition. Certainly since AIDS, to be gay and to be responsible has become a necessity."

Sullivan is right - indeed, has to be right. Those who opposed the gay-rights revolution cannot realistically expect that today's homosexuals will simply be pushed back into the closet. And to preserve existing legal barriers against gays would only perpetuate a gay subculture that is both neurotic and alienating. The only decent conservative alternative is to insist that gay men and women join the social and cultural mainstream - and enact the policies required for them to do so.

Which brings me back to Beer. Cleveland-born, a software engineer, "Al" was also an observant Jew who came to Israel five years ago because "it gave him the opportunity to pray as he wanted and live the [Jewish] life he wanted," according to Ze'ev Pertrucci, a former roommate. Interviewed by The Jerusalem Post in 1999, Beer said his homosexuality had presented no obstacles to joining an Orthodox

synagogue. "My understanding of being Orthodox is that there is a long list of mitzvot to keep, which is what I do," he said. "It doesn't bother my being religious."

Testifying in the Knesset the same year, Beer told a parliamentary committee he was "proud of my many identities": Gay, Orthodox, Jerusalemite, Zionist. "People can be both free and holy," he said. Friends recall his "American swagger," his Hawaiian shirts, his passion for cinema, his "infectious laugh," his willingness to volunteer, easygoingness.

Beer was murdered after returning from a shiva call for a friend up north. Had he not been on that bus, he would have marched Friday for gay pride. Would any of us not want him back? And would any of us, really, not have wanted him there?
